Special Edition

Mothers of Sewak Park Fill Water at 2 AM at Night

The Condition of Uttam Nagar - Constitution says water is a right, System says wait

Cover Story — Article: Sanjay Kumar Bathla

Main Points

- Article 21 - Pure water is fundamental right
- Forced to fill water at 2 AM in Sewak Park
- Dirty water and waterlogging in Uttam Nagar
- Promises of leaders vs ground reality

Presentation Sanjay Kumar Bathla • Parivahan Vishesh, October 2026

Parivahan Vishesh News

Author: Sanjay Kumar Bathla
Editor, Parivahan Vishesh

Lead: It is 2 AM at night. Lights are on in the streets of Sewak Park, Uttam Nagar. Children are sleeping, but mothers are unable to sleep. Bucket in hand, pipe on shoulder, sleep in eyes and one question in mind - will water come today or not?

This is not a story of one night. This is the daily reality of thousands of families of Uttam Nagar. Taps remain dry during the day, when the city sleeps at night, people here are forced to stay awake and fill water. On one hand government says "Jal Hi Jeevan Hai" (Water is Life), on the other hand for the most basic need of life, citizens have to keep vigil whole night.

This contradiction is the center of this article.

1. Sewak Park: Where people had to protest for water

People of Sewak Park say that for more than 10 days there was no water in the colony. First it was told that there is trouble in the canal behind, then many days passed, no answer came. In scorching heat people had to buy water from market to drink.

Situation worsened so much that people came on road and protested. Police persuaded and removed them, traffic resumed. But water did not come again in taps. In 2023 also same thing happened - people of Sewak Park were craving for water for 20 days and they had registered protest by singing songs. Voice of people craving for every single drop did not reach administration.

2. Condition of Uttam Nagar: No water, but dirty water. Problem of Uttam Nagar is not only that water does not come, but whatever water comes is not drinkable.

Residents of Vishwas Park Extension say that water comes once in two days, and that too muddy, stinking and polluted. Families have to run motor for hours. Children are facing health problems. They complain daily, but no hearing.

And roads? Those are visible in videos only - streets of Uttam Nagar are filled with deep black water. In A-Block, B-Block of Mohan Garden, sewer water has been filled up to knees for one and a half years. Local resident and BJP leader Subhash Maggo also said that the regional MLA of this area never paid attention, people are forced to live in stinking sewer water for one and a half years.

On one side there is no water to drink, on other side there is dirty water up to knees outside house. What kind of development is this?

3. What does Constitution say? Water is not alms, it is a right*This article is not just complaint, it is a constitutional warning.

Article 21 - Right to Life:

Supreme Court has clearly said that under Right to Life given in Constitution, right to clean environment and pollution-free water i.e. pure water is included.*Historic decision of Supreme Court:* Court has said that pure water is fundamental right

of person and ensuring it is constitutional duty of welfare state. In Article 47 and 48, improving public health and protecting environment is duty of states.

Delhi High Court Order (2021): "Right to access to drinking water is fundamental to life and there is a duty of the State under Article 21 of the Constitution to provide clean drinking water to its citizens." Court said that even on basis of being unauthorized colony, no one can be deprived of right to drinking water.

Directive Principles of State Policy:-

Article 47: It is duty of State to improve nutritional level, living standard and public health.- **Article 48A:** Protecting environment is duty of State.- **Article 51A(g):** It is duty of every citizen to protect natural environment.

Delhi Jal Board Act and Gazetted

Notifications: Delhi Jal Board was formed itself with this objective that every citizen of Delhi gets clean drinking water. Delhi Jal Board itself has announced toll-free helpline 1916 and tanker arrangement. But having helpline number and water reaching - there is huge difference between both.

When a mother wakes up at 2 AM at night to fill water, then Article 21 is being violated. When dirty water flows in streets and children fall sick with dengue-malaria, then Article 47 is being violated.

4. Promises of leaders and ground reality

MLA Pawan Sharma (Uttam Nagar): In 2025 election, BJP's Pawan Sharma won by securing 1,03,613 votes. He had promised to open schools, build dispensaries, develop parks and

construction of new roads. But public is asking - Directions are given in DDC meeting, but why road of Mohan Garden has not been built for one and a half years? On sewer problem in Bhagirathi Garden, Uttam Nagar, local people have said that many times complaint was made to MLA Pawan Sharma, but no concrete action was taken.

MP Kamaljeet Sehrawat (West Delhi):

Kamaljeet Sehrawat had told 5 priorities after winning - metro expansion, CCTV, hospital in Chhawla, new colleges and housing for poor. She had said - "Water supply too is a long-standing problem. We need two separate water lines - one for drinking water and the other for treated water." But question is that from 2024 to 2026 where has double line been built? In Uttam Nagar even today dirty water comes from one line, there is no trace of second line.

Delhi Government and MCD:

When gates of Najafgarh drain are closed then entire drainage system of Hastasal, Uttam Nagar collapses. For 4 days colony remains filled with black dirty stinking water. People are unable to come out of house.

Leaders come with folded hands in election, but after election it is turn of public to fold hands.

5. Question of public interest: What are we demanding? We are not asking for anything free. We are asking for our constitutional right.

Our 7 demands:

1. Water supply at fixed time: Not at 2 AM at night, water should come at fixed time and Delhi Jal Board its...

Heartfelt Wishes for Sharadiya Navratras - Tritiya Maa Chandraghanta Sukhdham

Parivahan Vishesh News

May Maa's incomparable motherly love and blessings always remain upon you

Introduction: Heartfelt wishes for Sharadiya Navratras to all of you on behalf of the Joint Management Board of the heads of Transport Vishesh News Limited, Parivahan Vishesh Daily Newspaper, Temple of Liberalization and Welfare Allied Trust (Registered) and Transport Operators and Labour Welfare Association (Registered)

"May Maa's incomparable motherly love and grace remain upon everyone, this is our wish."

1. Fact: Tritiya Day - Who is Maa Chandraghanta?- Mantra: Chant Om Devi Chandraghantayai Namah

On the third day of Navratri, the third form of Maa Durga, Maa Chandraghanta is worshipped.- A bell in the shape of a half-moon adorns her forehead, that is why she is called Chandraghanta.- Maa has ten hands, in which trident, mace, sword, bow-arrow, kamandal, discus, lotus and Abhaya Mudra adorn.- Maa Chandraghanta's vehicle is lion and her form is a wonderful confluence of gentleness and valor.

2. Main Points: Puja and Worship Method*- After taking bath in the morning, wearing pure clothes and after Kalash puja, meditate on Maa Chandraghanta.- It is considered auspicious to offer saffron kheer, milk, sweets and red flowers to Maa.- Red color is very dear to Maa. Worship with red clothes, red flowers and red sandalwood.-

Trading and investment related scams have become the primary modus operandi of cybercriminals sitting abroad. The September 2026 data from Hyderabad Cybercrime Police shows that more than 16 crore of the total cyber fraud losses in the city occurred

Rising Threat of Trading and Investment Cyber Frauds

due to these scams alone. This trend reflects a sharp rise in cross border financial fraud, driven by victims' psychological vulnerability, the illusion of high returns, and increasing digital participation on unregulated platforms. This pattern indicates that in the coming years, trading and investment scams will increase further and become the most profitable avenue for organised cybercrime syndicates. Dominance of Trading and Investment Scams/Trading and investment frauds accounted for more than 16 crore of the total losses.

Breakdown: • Trading Fraud (11 cases): • Loss: ₹8.43 crore • Recovery: 9.20 lakh Together, these two categories make up 92% of the total cyber fraud losses, clearly showing that financial manipulation scams are the primary target area for cybercriminals. Why These Scam

s Are Increasing 1. Victim Illusion and Psychological Exploitation Cybercriminals exploit victims in the following ways: • Illusion of guaranteed profits • Fake dashboards showing fabricated returns • Social media advertisements for "high yield investments" • FOMO (Fear of Missing Out) • Building trust through WhatsApp/Telegram groups Victims continue investing even after initial losses because of: • Fake bonuses • Withdrawal restrictions • Manipulated profit charts • Emotional pressure from scam "relationship managers" 2. Increase in Digital Participation • Expansion of online trading apps • Growth of cryptocurrency platforms • Unregulated financial influencers • Device takeover through remote access tools • Cross border call centres targeting Indian investors 3. Foreign Cybercrime Networks Hyderabad's data matches national and global trends: • Syndicates operating from South East Asia, the Middle East, and Eastern Europe

• Multilingual call centres • Fake trading websites and malware laden APKs • Money laundering through mule accounts and crypto wallets Cyber Patrolling and Platform Monitoring Police identified: • 140 social media profiles containing abusive/obscene content • 30 paid advertisements using minors • 1,457 suspicious profiles promoting illegal betting and fraudulent investment sites • 2,603 paid advertisements linked to gaming, betting, and investment fraud Nine FIRs were registered against promoters of these platforms. Victim Assistance and Response Mechanisms • 2,767 petitions received on the National Cyber Crime Reporting Portal • 381 FIRs registered • 7.68 crore Recovery: 40.24 lakh • Investment Fraud (17 cases): • Loss: 67.54 lakh recovered • 1,928 victim assistance calls made by C-MITRA • 307 Zero FIRs registered for immediate action Why These Scams Will Increase Further 1. High Profitability for Criminals • Large value transactions •

Repeated payments • Long term victim engagement • Low detection due to cross border operations 2. Low Awareness Among Citizens • Blind trust in online investment platforms • Lack of verification with SEBI • Misplaced confidence in WhatsApp/Telegram groups • Ignoring remote access risks 3. Use of Technological Advancements by Criminals • AI generated dashboards • Deepfake video calls • Automated chatbots • Crypto based money laundering • Malware APKs that resemble legitimate apps 4. Weak Regulation of Online Financial Advertising • Fake advertisements on social media • Unverified influencers • Paid promotions of fraudulent platforms Recommendations System Level Measures • Mandatory SEBI verification for all investment apps • AI based monitoring of suspicious large transactions • Blocking of unverified business numbers by telecom operators •

Cross border Joint Investigation Teams (JITs) Citizen Awareness • Never trust high return promises • Do not download APKs from unknown links • Enable two factor authentication • Verify platforms on the SEBI portal • Report immediately to 1930 Trading and investment scams have become the centre of cybercrime activity today. These frauds, operated by foreign syndicates, are increasing further due to victims' psychological vulnerabilities. The September 2026 Hyderabad data clearly shows that these scams are not only dominant at present but will grow even more in the coming years unless strong system safeguards, strict regulation, and widespread public awareness are implemented. Cybercrime has now taken the shape of a global financial industry, and India must strengthen integrated enforcement, financial monitoring, and citizen education to curb the rising wave of investment related digital fraud.

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, 'Parivahan Vishesh News Doordarshan,' from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Government of India, various State Governments, and all political organizations before anyone else.

Get Ready — We're Coming Soon!

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world. After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Fasting in Navratri and Health too

Parivahan Vishesh News

Make worship healthy and safe with sattvic diet and right daily routine

Dr. Roop Kumar Banerjee, Homeopathic Doctor, Gorakhpur

Navratri is not only a festival of worshipping Maa Durga, but also an opportunity to discipline lifestyle, diet and daily routine. In these nine days, some people take only fruits, some eat one meal a day and some keep nirjala fast (without water). But remember, the purpose of fasting is not to give pain to the body, but to control the mind and worship God.It is often seen that people give up grains, but increase consumption of sabudana khichdi, deep-fried kuttu puri, potato chips, sweets and

high-salt namkeen. This adds extra calories, fat and sugar to the body and can cause weight gain, blood pressure, sugar fluctuation and digestive problems.

1. What to eat during Navratri?
Nuts-Seeds: Almonds, walnuts, peanuts without salt in limited quantity. Milk-Curd: Can take curd without sugar, milk, limited paneer. Sabudana: Take in limited quantity mixed with peanuts and vegetables. Kuttu-Singhara flour: Make roti, chilla, avoid deep frying. Fruits and vegetables: Use apple, guava, papaya, orange, bottle gourd, pumpkin, cucumber, tomato in less oil. Diabetic patients should not take fruit juice. Water: If not on nirjala fast, take adequate water, coconut water. Kidney patients should ask doctor.

2. A balanced fruit diet for one day
Morning - Water, one small fruit and some nutsMid-morning - Curd or milk without sugarAfternoon - Kuttu/Singhara chilla, curd and vegetableEvening - Fruit or nuts without saltNight - Roti with bottle gourd/pumpkin vegetable or a little sabudana khichdi

3. What to avoid?*Fried puri-pakora, chips,

high-salt namkeen-papad, sweets with more sugar, eating too much at once, too much tea-coffee on empty stomach and open flour without trust. Always take kuttu flour from a reliable source.

4. Problems that can occur during fasting*Dehydration, low or high sugar, BP getting disturbed, acidity-constipation, headache-fatigue and risk of falling due to dizziness, especially in elderly.

5. Diabetic patients should pay special attention
Take advice from doctor before fasting. Do not remain hungry for long time, eat kuttu-singhara-potato in limited quantity, avoid sweet syrups, check sugar regularly, do not increase or decrease medicine by yourself. Break fast if sugar goes below 70 mg/dL. Fasting can be risky for Type-1 and uncontrolled sugar patients.

6. Patients with high blood pressure
Rock salt is also sodium, do not eat unlimited. Reduce packet namkeen, chips. Take medicine regularly, do not let water deficiency occur. Check BP immediately on dizziness or

weakness. If there is chest pain, breathlessness, severe headache, meet doctor immediately.

7. Advice for other patients
Kidney patient: Take doctor's advice on potassium, salt, water.Heart patient: Avoid nirjala fast and change in medicine.Pregnant / breastfeeding women: Ask doctor before doing long or nirjala fast.Elderly: Regular food, water and rest is essential.

8. Formulas for healthy daily routine

Take adequate sleep, do not do heavy exercise on empty stomach, do not stay too much in sun, eat food slowly, do not ignore weakness-dizziness. If health deteriorates during fast, do not be stubborn.

When there is devotion in worship, balance in diet and discipline in daily routine, only then worship is beneficial.

Importance of Navel and Scientific Facts Related to Health

Parivahan Vishesh News

Amazing information related to navel! How much truth, how much myth?

Presenter: Pinki Kundu, Social Counselor

Let's know the scientific truth! Navel is a small part of our body, but most myths are spread about it. On social media it is often claimed that putting oil in the navel increases eyesight, hair becomes black, knee pain gets cured. Is this true? Let's understand on the basis of scientific facts.

1. Importance of navel in pregnancy - True: In the womb, the baby gets oxygen and nutrition from the mother through the Umbilical Cord. After birth the umbilical cord is cut and the navel is its remaining mark. It is the center point of the body, but after birth its direct connection with internal organs ends.

2. Does the navel have 72,000 blood vessels?- Myth. There is no solid

scientific proof for this claim. There are normal blood vessels around the navel, like in other parts of the body, but there is no proven basis for 72,000 nerves.

3. Does the navel remain warm for three hours after death?- Myth. This claim is not scientifically proven. After death the body temperature gradually decreases, the navel has no special relation to it.

4. What happens by applying ghee or oil in the navel?- Partially true: Applying ghee or coconut oil on the skin can help in reducing dryness, like on other skin of the body.- Myth: But that putting oil in the navel increases eyesight, makes hair black, stops hair fall or cures knee pain - there is no solid scientific proof for this.

5. Facial acne and dark circles under eyes
That these problems go away by applying oil in the navel, is not scientifically proven. Causes of acne and dark circles are related to hormones, sleep, nutrition and skin

care.
6. Asafoetida or oil on navel for stomach ache in small children
That stomach ache is cured immediately by applying asafoetida or oil around the navel, there is no solid proof of this. If child has continuous problem, consult a doctor, do not depend on home remedies.

7. How to take proper care of navel?
1. Keep navel clean and dry.
2. Clean gently while bathing, avoid harsh soap or rubbing.
3. There is no need to fill navel with oil or ghee.
4. If there is redness, swelling, pain or any kind of discharge, show to doctor immediately.

Editorial Message
Remember! Respect traditions, but while adopting health-related information, also give importance to scientific evidence. Navel is a normal part of the body, considering it a miraculous centre is a myth. Proper care and correct information is true health.

Turn Negativity into Positivity — Change Your Thinking, Improve Your Life

Parivahan Vishesh News

Focus on Mental, Physical and Social Health — Positive Thinking is the True Strength

Chief Editor: Sanjay Kumar Bathla

Nimbarkacharya: The Sage of Dual-Nondual Wisdom

Parivahan Vishesh News

Welcome to another article in the series devoted to great Saints of India who enriched the Vedic philosophy with their thoughts. In the last article contributed by Swar Katha, we discussed about the Eternal Teacher Ramanujacharya the “Propounder of Vishishtadvaita – In the current article we would be discussing about the life and times of “Nimbarkacharya: The Sage of Dual-Nondual Wisdom”, one of the greatest sages of India

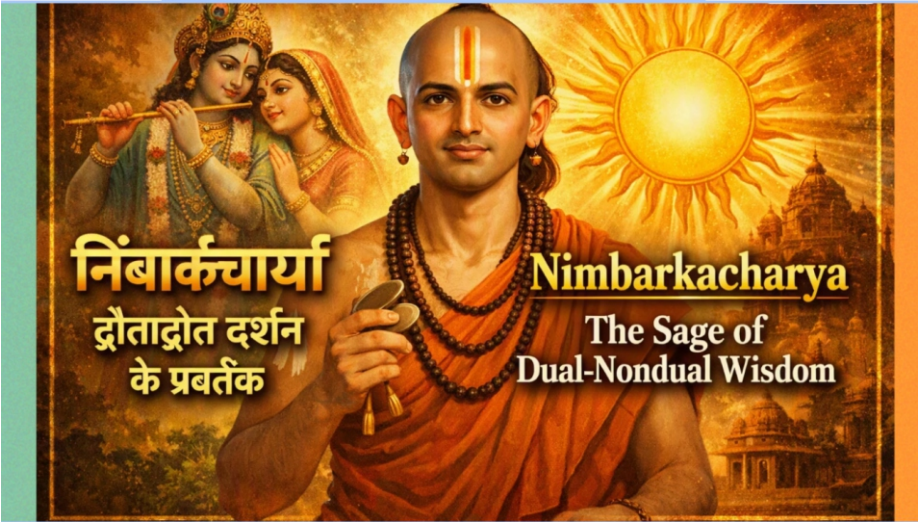

Nimbarka was a Hindu philosopher, theologian, and the principal proponent of the *Dvaitadvaita* (Dualistic-Non-dualistic) philosophy. He is also known as Nimbarkacharya, Nimbadiya, or Niyamananda. The name 'Nimbarka' is derived from two Sanskrit words: *Nimba* (neem tree) and *Arka* (sun). It is believed that he was named 'Niyamananda' at birth. According to a legend, he acquired the name 'Nimbarka' because he trapped rays of the sun (*Arka*) within the leaves of a neem (*Nimba*) tree. His followers regard him as an incarnation of the Sudarshan Chakra, the divine weapon of Lord Vishnu.

He played a pivotal role in propagating the worship of the divine couple, Radha and Krishna, and established the Nimbarka Sampradaya (sect).

Very little is known about Nimbarka's life. It is said that he was born into a Telugu Brahmin family on the third day of the bright fortnight (*Shukla Paksha*) of the month of Vaishakh. His father, Jagannath, was a Bhagavata saint, and his mother was Saraswati; the family resided in Paithan, in present-day Maharashtra. Some scholars hold the view that his father was the sage Arun and his mother was Jayanti Devi, and that they lived near the Godavari River.

There is a difference of opinion among scholars regarding the time of Nimbarka's birth.

Traditional followers of Nimbarka believe he appeared in 3096 BCE, whereas historians believe he lived between the 7th and 11th centuries CE. Some scholars suggest he lived in the 13th century, with an

estimated death date of 1162 CE, though this remains a subject of dispute.

Nimbarka authored several significant texts; some of his works include:

***Vedanta-parijata-saurabha*:** A commentary on the *Brahma Sutras* that is concise and does not refute other schools of thought.

***Vedanta-kamadhenu-dashashloki*:** A simple composition suitable for devotees who wish to grasp the truth quickly.

***Mantra-rahasya-shodashi*:** A work containing an exposition of the *Gopala Mantra*, which is central to the Nimbarka tradition.

***Prapanna-kalpavalli*:** A work that explains the *Mukunda-sharanagati-mantra* (the mantra of surrender to Mukunda).

Nimbarka's philosophy of *Dvaitadvaita* (Dualistic Non-dualism) emphasizes a state where the soul is both distinct from and inseparable from God. His teachings stress devotion to Krishna and Radha.

According to Nimbarka, the Ultimate Reality—or *Brahman*—is Krishna, known by various names such as Purushottama, Hari, and Bhagavan; he is accompanied by Radha. The *Brahman* described by Nimbarka is flawless, endowed with auspicious qualities, and beyond the influence of *Karma*; He possesses attributes such as knowledge, power, and compassion. *Brahman* is also both the material and efficient cause of creation, likened to a sovereign emperor who engages in playful activities without a specific ulterior motive. Nimbarka posits that the *jiva* (individual soul) possesses inherent knowledge, distinguishing it from insentient elements such as the body, senses, and mind. This inherent knowledge pervades every

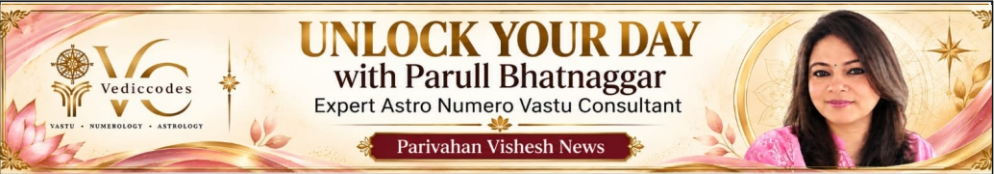

state of the *jiva*, including waking, dreaming, and deep sleep. Nimbarka explains that the *jiva* is both knowledge and the knower; he likens their relationship to that of a gem and its luster—distinct yet inseparable.

Nimbarka's philosophy clearly delineates the distinction between the *jiva* and *Brahman* by emphasizing their intrinsic relationship—analogous to cause and effect, or part and whole. *Brahman* is portrayed as the ultimate cause and the whole, whereas the *jiva*—the individual soul that experiences pleasure and pain—is viewed as an effect or transformation of *Brahman*. This relationship mirrors the transformation of clay into pottery or a tree bearing leaves and fruit, illustrating the distinction between the source material and its derivatives. Citing scriptural references, Nimbarka asserts that as a part of the omnipotent *Brahman*, the *jiva* lacks absolute freedom and power.

Nimbarka maintains that the relationship between the *jiva* and *Brahman*—characterized by both difference and non-difference—is natural (*svabhavika*) and entirely consistent, meaning these aspects coexist without conflict.

It is all for today, in the next article we would be discussing the life and times of another great sage of India. If the readers are interested in the philosophy of Sanatan Dharma, they may subscribe to “Swar Katha” “You tube channel.

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

13 OCTOBER 2026 | Day vibration: 6 — Responsibility, harmony, love, care and stability

Moolank 1

Money & Career: Day 6 asks your strong leadership energy to become more responsible and people-focused. Financial or professional progress comes through dependable action, especially in matters involving family, clients or a team.
Relationship: Take initiative in showing care rather than expecting others to follow your lead. Warmth and appreciation will soften any ego friction.
Precaution: Avoid controlling behaviour, pride and spending simply to maintain status.
Make Your Day Better: Lead with responsibility and do one thoughtful thing for someone important.

Moolank 2

Money & Career: Your cooperative nature blends well with Day 6. Partnerships, client work and family-related financial planning can benefit from patience and mutual understanding.
Relationship: Emotional closeness is highlighted. Speak openly, but do not make your peace entirely dependent on another person's mood or approval.
Precaution: Avoid over-sensitivity, people-pleasing and emotional spending.
Make Your Day Better: Offer support while keeping one healthy personal boundary.

Moolank 3

Money & Career: Creativity and Day 6's aesthetic energy can support communication, design, teaching, hospitality or presentation-related work. Keep your budget practical while improving quality.
Relationship: Affection and expression are favoured. Genuine compliments and a light-hearted conversation can strengthen connection.
Precaution: Avoid overspending on appearance, entertainment or trying too hard to impress.
Make Your Day Better: Use your creativity to add value rather than merely attract attention.

Moolank 4

Money & Career: Day 6 supports your practical approach to security. Review household expenses, long-term commitments and work systems; a responsible adjustment can strengthen stability.
Relationship: Reliability is appreciated, but affection also needs expression. Do not let duty replace emotional presence.
Precaution: Avoid rigidity, criticism and carrying every responsibility alone.
Make Your Day Better: Organise one practical matter and express appreciation in words.

Moolank 5

Money & Career: Day 6 slows your restless energy enough to focus on useful commitments. Opportunities involving clients, service or networking can grow if you follow through consistently.
Relationship: Freedom and closeness both matter today. Keep plans transparent so spontaneity does not look like unreliability.
Precaution: Avoid impulsive purchases, flirtatious mixed signals and escaping responsibility.
Make Your Day Better: Enjoy variety, but complete one promise before starting something new.

Moolank 6

Money & Career: Your Moolank 6 strongly resonates with Day 6, highlighting money, comfort, responsibility, family and aesthetics. Good for improving value, but keep generosity within a sensible budget.
Relationship: Love, harmony and commitment are strongly emphasised. A caring gesture or sincere conversation can deepen an important bond.
Precaution: Avoid possessiveness, over-giving and spending beyond your means for loved ones.
Make Your Day Better: Create harmony without taking responsibility for everyone's happiness.

Moolank 7

Money & Career: Day 6 brings practical responsibilities into your thoughtful world. Research purchases and commitments carefully, but do not isolate yourself from useful advice.
Relationship: You may need quiet, while loved ones may seek reassurance. Explain your need for space and offer a small sign of affection.
Precaution: Avoid emotional withdrawal, over-analysis and ignoring everyday responsibilities.
Make Your Day Better: Balance solitude with one meaningful act of connection.

Moolank 8

Money & Career: Day 6 encourages responsible management of money and people. Your authority can produce solid results when it protects long-term security rather than merely increasing control.
Relationship: Family or partnership responsibilities may need attention. Listen before giving instructions, especially when emotions are involved.
Precaution: Avoid dominance, work obsession and using money as leverage in relationships.
Make Your Day Better: Use your strength to create security, not pressure.

Moolank 9

Money & Career: Day 6 directs your generous nature toward practical service. Support a worthy person or cause, but protect your own resources and complete pending obligations first.
Relationship: Compassion and forgiveness are strong. You can heal a misunderstanding without sacrificing necessary boundaries.
Precaution: Avoid guilt-based giving, rescuing everyone and carrying old emotional burdens.
Make Your Day Better: Give with wisdom and bring one unresolved matter toward peaceful closure.

Shri Krishna Krita Devi Stotra - The fulfiller of all wishes

Parivahan Vishesh News
Pandit Yogesh Pauranik
(Astrologer)
Parivahan Vishesh Newspaper Daily

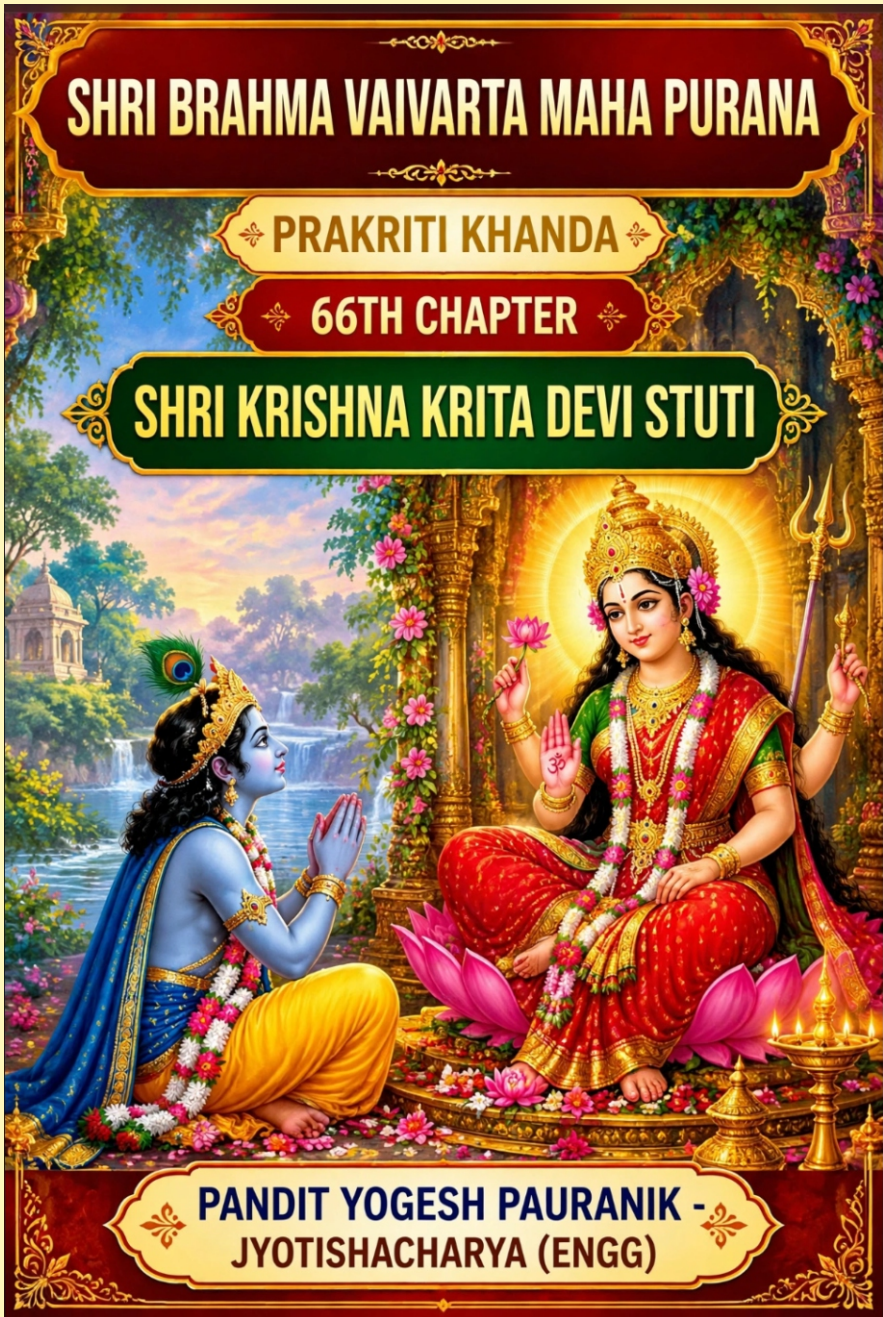

In the 66th chapter of Prakriti Khand of Brahma Vaivarta Purana, Lord Shri Narayan narrates the Devi Stotra to Sage Narad and says: O Narad! First of all in Goloka, in the spring season, inside the Rasa Mandala, Paramatma Shri Krishna happily worshipped the Devi and praised her. After that for the second time, Lord Vishnu praised the Devi on the occasion of war with Madhu and Kaitabha. Third time, knowing that the same life-threatening occasion had come, Brahmaji similarly praised Goddess Durga. O Muni! Fourth time Tripurari Shiva praised the Devi with devotion when the occasion of extremely terrible war with Tripuras came and fifth time at the time of killing Vritras, in the terrible life-crisis, Indras along with all the gods praised Goddess Durga. Since then Munindras, Manus and humans like Suratha started chanting and worshipping the Paratpara Parneshwari in every Kalpa. O Brahman! Now you listen to the Stotra of the Devi, which is destroyer of all obstacles, giver of happiness, giver of salvation, the essence and the means to cross the ocean of existence.

Shri Krishna Uvacha - Shri Krishna said:> Tvameva sarvajanani mulaprakritirishwari.> Tvamevadya srishtividmoh svecchhaya trigunAtmika. You alone are the mother of all, Mulaprakriti, Ishwari. You alone are the Adi Shakti in creation work. By your own will you have become of three gunas.> KaryArthe saguna tvam cha vastuto nirguna svayam.> Parabrahmaswarupa tvam satya nitya sanatani. For the sake of work you assume Saguna form, in reality you yourself are Nirguna. You are truth, eternal, Sanatani and Parabrahma

Swaroopo.> Tejahswarupa parama bhaktanugraha vighraha.> Sarvaswarupa sarvesha sarvadhAra paratpara. You are supreme Tejas form. You assume divine body to grace devotees. Seva Sankalp Abhiyan – Seva Setu camps proving beneficial for the villagers

Parivahan Vishesh News

Villagers reached Seva Setu Camp to become beneficiaries of government schemes

Chief guest social worker Manoj Dhankhar visited the Seva Setu Camp in village Dhakla.

Under the guidance of DC Varsha Khanwal, various departments set up stalls and provided information about the schemes.

All residents of the area took advantage of government services, public welfare schemes and health check-ups.

Jhajjar, October 12
Under the Seva Sankalp Abhiyan, Seva Setu Camp was organised in village Dhakla on Monday with the aim of easily providing the benefits of government services and public welfare schemes to the

citizens.Manoj Dhankhar inaugurated the Seva Setu Camp as the chief guest. Upon arrival, BDPO Salhawas Rahul Mehra welcomed the chief guest. A large number of area residents visited the camp, learned about the schemes and services of various departments, and took advantage of the available facilities. Under the guidance of DC Varsha Khangwal, people are being benefited by setting up Seva Setu Camps in Jhajjar district as part of the Seva Sankalp Abhiyan.Citizens are informed about the welfare schemes, services and programmes run by the government.Chief guest Manoj Dhankhar stated that various departments set up stalls at the camp, where departmental officers and employees provided information to citizens about government-run public welfare schemes, services, and programs. Citizens were also briefed in detail about the eligibility criteria for the schemes, the application process, and the benefits they received. Efforts were made to address the problems and queries of those who visited the camp on the spot.Inspired towards health preservation

and healthy lifestyleThe Health and AYUSH Departments also organized a health check-up camp at the Seva Setu Camp. Citizens were also screened and provided with essential information and advice regarding health care, a healthy lifestyle, and the AYUSH system. Visitors to the camp benefited from information about government schemes and health-related facilities.Citizens were enthusiastic about obtaining information about various schemes at the camp. Visitors visited departmental stalls to obtain information based on their needs and understood the necessary procedures for availing benefits based on eligibility. Officials and employees encouraged the public to take maximum advantage of government schemes.He appealed to the villagers to reach the Seva Setu Camp as per the schedule of the administration and get information about the schemes and services of various departments and avail the benefits of the public welfare schemes of the government as per their eligibility.

Citizens should play an active role in controlling air pollution: DC

Parivahan Vishesh News

DC Varsha Khanwal issues strict instructions to departments to prepare a special action plan to control garbage and stubble burning.

Instructions issued to ensure effective implementation of amended GRAP provisions in the district

Jhajjar, October 12

In Jhajjar district, which is part of the NCR region, the district administration has directed strengthening the monitoring and enforcement system for the effective implementation of the revised Graded Response Action Plan (GRAP) and the prevention of air pollution. DC Varsha Khangwal directed officials to ensure that all relevant departments, in coordination with each other, prepare a special action plan for pollution control and implement it effectively.Negligence in pollution control will not be tolerated at any level.DC Varsha Khanwal said that the provisions of the amended GRAP should be effectively enforced in the district. Regular monitoring of identified hotspot areas should be conducted and action should be taken against pollution-causing activities as per the rules. She said that there should be no negligence at any level in pollution control work.He directed for effective control of pollution caused by industrial units, diesel generator sets, road dust, vehicular emissions, open burning of garbage, illegal dumping, burning of paddy straw and crop residue and pollution caused by construction and C&D activities.Special focus on road dust and vehicular pollutionThe DC directed effective road dust control by implementing mechanical and vacuum sweeping, along with water sprinkling as needed. He also stressed the need to take action against polluting vehicles and other activities, and improve traffic management.Instructions for action against illegal RMC and HMP unitsReviewing the inspections of industrial units, the

DC directed that environmental standards be ensured. He directed strict action against illegal RMC and HMP units, as per regulations, and necessary action to disconnect the power connections of illegal or closed units. He also directed special attention to preventing the illegal dumping of industrial, solid, and construction waste in open spaces.Increase field surveillance to prevent stubble burning incidentsThe Deputy Commissioner directed strengthening field-level surveillance to prevent incidents of paddy stubble and crop residue burning. He emphasized the need to ensure the availability of crop residue management machinery and custom hiring centers, and to educate farmers about alternative methods of crop residue management.Pollution control will be effective only with public participation.DC Varsha Khanwal directed a comprehensive public awareness campaign regarding the provisions of GRAP, the harm caused by stubble and garbage burning, road dust control, the need for PUC, and the means for filing pollution-related complaints. She said that effective control of air pollution is impossible without citizen participation. Prompt action should also be ensured on received complaints.

Various activities are underway in Industrial Training Institutes under Seva Sankalp Abhiyan.

Parivahan Vishesh News

Under the aegis of the Skill Development and Industrial Training Department, programs "Swachhata Hi Seva" and "Vocal for Local" were organized on the theme "Service is my contribution".

Jhajjar, October 12.

As per the directions of DC Varsha Khanwal, continuous activities are going on under the Seva Sankalp Abhiyan across the district.Principal and District Nodal Officer Jeetpal said that on Monday, an activity titled 'Swachhata Hi Seva' was organised at Government Industrial Training Institute, Jhajjar at Gudha on the theme 'Seva Mera Yojnad' (Service is my contribution), in which all the staff members and trainees contributed their labour. In this cleanliness drive, cleaning was done from the main gate of the institute to the courtyard and the importance of cleanliness was explained. Apart from this, a cleanliness drive was also carried out at Government Industrial Training Institute, Jhajjar Mahila, Bahadurgarh, Khuddan, Jahangirpur, Matanhail, Salhawas and other institutes on the theme 'Seva Mera Yojnad' (Service is my contribution) under 'Swachhata Hi Seva'.He informed that apart from this, "Vocal for Local" programme was organised in Government Industrial Training Institutes Dubaldhan, Chhara, Jhajjar (Women), Salhawas, Bhapdoda and Jahangirpur, the objective of which was to make maximum use of locally manufactured goods, handicrafts, handloom and Khadi products in daily life. He said that to strengthen the local economy,

purchasing goods manufactured by local artisans, weavers, craftsmen and small industries gives impetus to the rural economy and creates new employment opportunities. Staff members and trainees of the institutes participated enthusiastically in both the programmes.

May the blessings of Jagat Mata remain on the minds of common people: Dr. Krishna Lal Middha

Parivahan Vishesh News

Haryana Assembly Deputy Speaker Dr Krishna Lal Middha visited Mata Bhimeshwari DeviBeri (Jhajjar), October 12 .

On Monday, on the second day of Navratri, devotees in the Mahabharata period town of Beri worshipped Goddess Bhimeshwari Devi in both the inner and outer temples. Haryana Assembly Deputy Speaker Dr. Krishan Lal Middha visited the Devi temple on the second day of the Sharadiya Navratri fair and offered prayers to the Goddess. He offered prayers to Goddess Bhimeshwari Devi in a proper manner.Pandit Kuldeep Vashisht, the chief priest of the Devi temple, gave the Deputy Speaker detailed information about the history of both the temples of Mata Bhimeshwari Devi. After learning about the traditions associated with the temple, Deputy Speaker Dr. Krishna Lal Midha said that he felt happy to visit the world-famous Mata Bhimeshwari Devi temple. He said that he prays to the Mother Goddess that her blessings remain on everyone. He said that Beri has a very old history. Having two temples of Goddess Mata together is a history in itself. The worship method of the time of Maharishi Durvasa is still followed in these temples, which is commendable.On the other hand, on Monday, on the second day of Navratri, devotees from far and wide, chanting the praises of the Mother Goddess, visited Mother Goddess

and expressed their wishes.Under the guidance of Deputy Commissioner Varsha Khanwal, the administration has made necessary arrangements for the Navratri fair, which runs until October 19th. Meanwhile, the CEO of the Mata Bhimswari Devi Shrine Board and SDM Renuka Nandal inspected the temple premises on Monday. She also issued necessary instructions to relevant officials, including the health department.

SIR 2026 No eligible voter should be left out; focus on timely disposal of notice and hearing cases: DC

Parivahan Vishesh News

The final voter list will be published on November 6.Jhajjar, October 12 .

The Election Commission and the administration are focusing on the timely disposal of voter notices and hearing-related matters under a special campaign launched recently across the district. Pending cases were heard in special camps and door-to-door surveys that lasted for three days until October 9th. This information was provided by DC and District Election Officer Varsha Khanwal on Monday.He said that to make the voter list more transparent, booth level agents, 8 assistant electoral registration officers and 4 electoral registration officers have been appointed for all 807 polling stations across the district.The DC said that while regularly reviewing the pending cases by the Election Commission, special attention is being paid to the concerned officials to ensure speedy disposal of pending hearing cases, effective monitoring and action as per the prescribed procedure.The DC said that BLOs should collect documents from voters to complete the hearing of notices on time, where the required documents have not been submitted by the concerned voters even after receiving the notice.District Election Officer Varsha Khanwal has appealed to all eligible voters who have not yet submitted their documents to

submit them to the Booth Level Officer so that the names of all eligible voters can be included in the final voter list to be published on November 6, 2026. She clarified that if anyone has any kind of complaint, they can feel free to contact the concerned BLO, Assistant Electoral Registration Officer and Electoral Registration Officer.

Transparency is paramount in the procurement process of Kharif crops: DC

Parivahan Vishesh News

Administrative officials took stock of Kharif crop arrangements in grain markets across the district.

Inspects facilities in Mandis including gate passes, CCTV surveillance, crop lifting and Atal Canteen

Administrative officers listened to the problems of farmers and commission agents and directed them to solve them on priority.

Jhajjar, October 12 .

The district administration is fully alert to make the millet and paddy procurement process smooth, transparent and farmer-friendly in the grain markets of Jhajjar district. As per the instructions of DC Varsha Khangwal, the concerned SDMs reached Jhajjar, Bahadurgarh and Beri grain markets of the district on Monday and inspected the Kharif crop arrangements. The officials took stock of the arrival of millet and paddy in the markets, the procurement process, quality check, crop lifting and the facilities being provided to the farmers. They also talked to the farmers and commission agents.Monitoring of every system from gate pass to harvesting of cropsDuring the inspection, officials examined the process of issuing gate passes, monitoring through CCTV cameras, the status of procurement operations, and the arrangements for harvesting in the markets. They emphasized the need to ensure adherence to established regulations and transparency at every level of the procurement process. The concerned departments should work in coordination to ensure farmers do not have to wait unnecessarily to sell their produce and that harvesting is timely after procurement.Administrative officers inspected the marketsOn Monday, SDM Ravi Meena inspected the millet procurement arrangements at the Jhajjar grain market and issued necessary instructions to the concerned officials. Meanwhile, at the

Bahadurgarh grain market, SDM Abhinav Siwach reviewed the procurement process, gate pass arrangements, and facilities available to farmers. At the Beri grain market, SDM Renuka Nandal inspected the millet procurement, harvesting, and arrangements made for farmers at the market.Farmers should not face any problem in the grain marketDC Varsha Khanwal directed officials to ensure that all necessary facilities, including clean drinking water, sanitation, toilets, and Atal Canteens, are available to farmers in the mandis. Procurement and lifting operations in the mandis should be expedited so that there is no unnecessary accumulation of crops and farmers do not face difficulties in selling their produce. Officials should regularly monitor the arrangements in the mandis and take the problems of farmers and commission agents seriously and ensure their resolution on a priority basis.

BJP Mahila Morcha protests in front of Congress Bhawan, raises questions over allegations against MP

Parivahan Vishesh News

Protest against Congress's alleged silence on sexual harassment allegations related to JNU's former teaching service; demand for women's dignity and fair action

Report Dr. Rajkumar Yadav, Parivahan Vishesh Newspaper, Rourkela.

BJP Mahila Morcha held a protest in front of Congress Bhawan at Sector-21 on Monday over alleged sexual harassment of girl students at Jawaharlal Nehru University (JNU). This program organized by BJP's Rourkela organizational district was led by District President Purnima Kerketta. The protesters raised slogans questioning the alleged

silence of Congress in the case related to Congress MP from Manipur Dr. Angomcha Bimol Akoijam. According to the press release issued by BJP Mahila Morcha, girl students had made complaints related to sexual harassment against Dr. Akoijam, who has taught at JNU. The release claimed that based on the investigation report of the internal committee of the university and available facts, on 9th October 2026 the JNU administration dismissed him from the teaching post. However, Dr. Akoijam has rejected the allegations, calling the action politically motivated and unfortunate. In the matter, independent verification of allegations, findings of investigation and official records of

concerned parties is necessary. During the protest, BJP leaders said that the question of dignity, safety and justice of women should be above the interest of any political party. They alleged that in the case of serious allegations, the silence of Congress raises questions on its political attitude. Mahila Morcha demanded ensuring fairness and accountability. Many leaders and workers participated in the protest program including Minati Devta, Nirupama Baliarsingh and Bandita Mahanta and others expressed their views. A large number of women workers including Sevati Nayak, Namrata Bag, Ranjita Kispotta, Mamta Mahanti and Lakshmi Bhumij were present. Biren Pati and Vikram Singh among others cooperated in the organization.

Public outrage erupts over ash dumping in forest, local organization memb

Parivahan Vishesh News

Pollution threat looms over water sources of Koilighugar pilgrimage site; demand for examination of permission, quantity and environmental standards of dumping Report Dr. Rajkumar Yadav, Parivahan Vishesh Newspaper, Rourkela.

Sundargarh: Opposition has intensified at the local level regarding the dumping of ash powder (fly ash) in the forest area. Members of local organizations registered their protest by stopping vehicles coming with ash from Vedanta. This incident has raised serious questions on the system of transportation and disposal of industrial waste. The concern of the protesters is not limited only to the transportation of ash, but also its possible impact on forest, water sources and surrounding population.

The most sensitive aspect of this dispute is the apprehension being expressed regarding the purity of water of the famous religious and natural site Koilighugar_. At the local level, the question is being raised that if ash is disposed of improperly, can it affect the surrounding water sources and environment? However, independent scientific investigation and laboratory report of water samples are still necessary to confirm water pollution. Pollution cannot be considered proven on the basis of apprehension alone.

According to the Central Pollution Control Board (CPCB) guidelines related to fly ash management, transportation, storage and disposal of ash should be in accordance with environmental safety measures. For filling low-lying terrain with ash, compliance with prescribed technical procedures and necessary permission of concerned regulatory bodies is also necessary. Examination of applicable forest-related approvals for such activities in

forest area is also necessary. Now many important questions are before the administration — Is there valid permission at the concerned site for ash dumping or not? How much quantity of ash has been allowed to be dumped? Is compliance with transportation route, dust control and water source safety standards being done? Demand is clear: District administration and Odisha State Pollution Control Board should inspect the spot, make permission-related documents public and get fair investigation of samples of nearby water sources done. Responsibility should be fixed based on findings of investigation. Industrial development is necessary, but not at the cost of environment and public health.

Not a Clash of Civilizations, but a Dialogue of Humanity

Parivahan Vishesh News

Wars Begin in the Mind: The World Must Protect Minds Before Weapons Become Necessary

An appeal for global peace, religious tolerance, coexistence, and the triumph of humanity over hatred.

Special Article

In an increasingly interconnected world, the growing threats of war, violence, and ideological conflict have made the questions of humanity, coexistence, and global peace more important than ever. Weapons, missiles, and fighter aircraft may strengthen a nation's security, but lasting peace requires a positive transformation in human thought. When walls of division are built between “I” and “the other,” or “us” and “them,” they can create conditions that lead from social divisions to international conflicts. The Constitution of the United Nations Educational, Scientific and Cultural Organization (UNESCO) states in its Preamble: “Since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed.” This message remains as relevant today as it was when UNESCO was established. In his thought-provoking article, Col. (Dr.) Baldev Singh “Manav” emphasizes the need to place humanity above all other identities, respect religious and cultural diversity, and promote dialogue rather than confrontation among civilizations. The Flydubai Incident Raises Serious Questions The reported violent incident aboard Flydubai flight FZ1073 on September 30, 2026, has raised questions not only about aviation safety but also about human behaviour and the influence of ideas on individuals. According to available reports, the co-pilot allegedly assaulted the captain aboard the flight travelling from Dubai to Tel Aviv. The aircraft reportedly lost altitude suddenly before landing safely in Tabuk, Saudi Arabia. The circumstances and motive behind the incident must be established through a proper investigation. It would be neither fair nor wise to hold an entire religion, community, or civilization collectively responsible for the actions of an individual. Nevertheless, the incident presents a broader question for humanity: Will the next great conflict take place only along national borders, or will it also unfold within the human mind? “Human First, Identity Second” In his influential book The Clash of Civilizations and the Remaking of World Order, American political scientist Samuel P. Huntington argued that cultural and civilizational identities could become significant sources of conflict in the post-Cold War world. However, the clash of civilizations should not be accepted as humanity's inevitable destiny. Instead, the world must ask how dialogue, mutual understanding, and cooperation can be strengthened among different cultures, religions, and ideologies. The author's central belief is that a human being's first identity is humanity itself. Religion, caste, language, region, nationality, and political ideology are other aspects of identity, but human dignity must remain above them all. This is why he writes “Manav” alongside his name. The word means “human being” and serves as a reminder of his guiding principle: Human first, identity second. Life first, ideology second. Compassion first, disagreement second. India's Civilizational Wisdom: Vasudhaiva Kutumbakam Indian philosophical traditions have long emphasized unity in diversity, tolerance, and peaceful coexistence. A celebrated verse from the Maha Upanishad states: “Ayam nijah paro veti ganana laghuchetasam; Udaracharitanam tu vasudhaiva kutumbakam.” It means that the distinction between “one's own” and “another's” reflects a narrow outlook, while people of noble character regard the entire world as one family. The Bhagavad Gita also offers a profound message of equality and universal vision. Verse 6.29 teaches the ideal of seeing oneself in all beings

and all beings within oneself. Similarly, the Sanskrit prayer “Sarve Bhavantu Sukhinah” expresses the wish that all may be happy, healthy, and free from suffering. These teachings do not call for the victory of one religion, community, or nation. They express a universal aspiration for the welfare of all humanity. Swami Vivekananda's Message of Universal Acceptance At the World's Parliament of Religions in Chicago in 1893, Swami Vivekananda began his historic address with the words, “Sisters and Brothers of America.” His message emphasized religious tolerance, mutual respect, and the acceptance of different spiritual traditions. More than a century later, his ideas remain deeply relevant. If religion teaches love, compassion, forgiveness, and self-restraint, how can hatred and violence committed in its name be justified? If nations exist to protect their citizens and promote their welfare, nationalism should never become an instrument against humanity. Likewise, if the purpose of civilization is to make human beings more humane, why should people become enemies of one another in the name of civilization? The Dalai Lama and many other global thinkers have also emphasized compassion, tolerance, and human equality as foundations for peace. Education Must Become a Medium of Peace, Not Hatred Strengthening security arrangements alone cannot guarantee lasting peace. It is equally important to nurture tolerance, empathy, and respect for differing viewpoints in the minds of children and young people. Schools and universities must teach students that disagreement does not mean hostility. Differences in thought, interests, and perspectives are natural features of human life. Even people raised in similar circumstances may think differently. How, then, can we expect all of humanity to think alike? Accepting disagreement is a sign of civilization; resorting to violence because of disagreement is barbarism. The author believes that education should not be limited to preparing young people for employment. It must also develop responsible, sensitive, and peace-loving citizens. Religious institutions, social organizations, and political leaders must likewise demonstrate responsibility through their words and actions, promoting harmony rather than division. Global Challenges Demand Global Cooperation Climate change, water scarcity, pandemics, food security, energy shortages, poverty, and economic inequality are challenges that extend beyond national borders. Addressing them requires international cooperation, transparency, accountability, and the equitable use of resources. Mahatma Gandhi's principle of Trusteeship is particularly relevant in this context. Gandhi believed that wealth, property, and talent should be used not merely for personal benefit but also for the welfare of society. Extending this principle to the international sphere, nations could be encouraged to act as responsible trustees of the Earth's natural resources. Does the air stop at a national border? Does the sun shine only for powerful countries? Does rainfall check passports? Does oxygen distinguish between religions? Nature does not discriminate.

Humanity must learn to do the same. The preservation and fair use of shared resources should therefore become a collective global responsibility. From the Clash of Civilizations to the Dialogue of Civilizations The author argues that the world must move beyond the idea of a clash of civilizations and embrace a dialogue of civilizations. Different religions and cultures should seek opportunities to learn from one another rather than attempting to eliminate one another. The world must become a place where believers and atheists, followers of different religions, and people with diverse ideological perspectives enjoy equal human dignity. Nations must protect their borders without imprisoning humanity within them. Disagreement must be recognized as a natural part of democratic life rather than treated as an offence. Power must be understood not as the ability to suppress the weak, but as the responsibility to protect them. Political leaders, religious leaders, educators, and international institutions must ask themselves difficult questions. How can peace be expected if hatred is planted in the minds of children? Who will solve global crises if every nation places its interests above humanity? What future awaits us if civilizations measure their greatness by their ability to defeat one another? A world governed solely by the principle that “might is right” would leave weaker nations, disadvantaged communities, and future generations increasingly vulnerable. Humanity Must Prevail The actual circumstances surrounding Flydubai flight FZ1073 must be determined through a proper investigation. However, the broader human lesson does not need to wait for that investigation: lasting peace requires a positive transformation in the way people think, behave, and relate to one another. Col. (Dr.) Baldev Singh “Manav” urges the world to decide whether religion, caste, region, nationality, and ideology should stand above the human being, or whether humanity should serve as the highest moral foundation while all these identities are respected. His message is clear: Human first, identity second. Life first, ideology second. Compassion first, disagreement second. By making the spirit of Vasudhaiva Kutumbakam a guiding principle in schools, universities, religious institutions, parliaments, and international organizations, humanity can build a stronger foundation for lasting peace. The greatness of civilizations lies not in defeating one another, but in contributing to the welfare of humanity. Ultimately, the question is not which religion will prevail, which nation will emerge victorious, or which civilization will prove superior. The most important question is whether humanity will survive and flourish. The true victory of humanity will be: Love over hatred. Non-violence over violence. Coexistence over intolerance. Unity over division. Life over destruction. This is the true meaning of civilization: not a “Clash of Civilizations,” but “Civilizations for Humanity.” — Col. (Dr.) Baldev Singh “Manav” Add a clear author credit and headline Reduce repetition in the peace message Strengthen the article's practical conclusion

Questions raised over functioning of Excise Department in Sundargarh

Parivahan Vishesh News

Foreign liquor reaching villages from liquor shops via four-wheelers, departmental officials become mute spectators!

Alleged supply of liquor from licensed shops to rural areas raises serious questions; fingers being pointed at monitoring system, transportation and transparency of action

Report Dr. Rajkumar Yadav, Parivahan Vishesh Newspaper

Sundargarh.* Serious questions are being raised over the monitoring system of the Excise Department regarding the alleged supply of foreign liquor in rural areas of the district. According to a report published in local newspaper Jilla Khabar, allegation has surfaced of liquor being transported to rural areas from liquor shops through four-wheeler vehicles. If these allegations are confirmed, then it will not only be a case of illegal business, but also a serious test of departmental monitoring and accountability. The biggest question is that if liquor is being transported regularly, then why is this activity not coming to the notice of concerned officials and enforcement teams? Is proper verification of necessary documents for transportation, source of supply, sales records and prescribed rules being done? With increasing availability of liquor in rural areas, concern over social problems, family disputes and tendency of intoxication among youth is also natural.*Excise Department's own responsibilities, then why lapse in monitoring?*In the official details of Excise Department of Odisha Government, controlling manufacture, distribution and sale of liquor and preventing illicit distillation and business of liquor without prescribed duty are included in main objectives. In such a situation, fair

investigation of allegations surfaced in Sundargarh district is necessary. It is notable that at the end of September 2026, news of attack on excise and police team during action against illicit mahua liquor manufacturing in Dharuadihi area of Sundargarh district had also surfaced. According to the report, during the action about 1,200 kg of fermented mahua material and 400 litres of country liquor were destroyed. This incident underlines the challenge of effective control over illicit liquor business in the district. However, complicity of any official or crime is not confirmed from available facts in the present case. Therefore, administration should investigate the allegations and make the actual situation public.*Investigation and accountability necessary* District administration and Excise Department should investigate stock register, sale details, transportation records of concerned liquor shops and sources of supply in rural areas. If irregularity is proved, action should be taken as per rules against concerned persons. Now question is not only of transportation of liquor, but also of credibility of government monitoring system. Administration will have to clarify whether compliance of rules is being ensured or not. Public needs not assurance, but transparent investigation and concrete action.

RGTA welcomes new Sub-Collector, wishes farewell to Chandrakant Malik

Parivahan Vishesh News

Transport businessmen express positive hope on administrative change in Panposh Subdivision, wish for development of area and better coordination

Rourkela.* Members of Rourkela Goods Transporters Association (RGTA) reached the office of new Sub-Collector of Panposh Subdivision and welcomed him. On this occasion, members of the association expressed respect towards outgoing former Sub-Collector Chandrakant Malik, wishing him for upcoming tenure and wishing for his bright future.

On this occasion, Rajesh Jethlia, Jagannath Panda, Prashant Pani, Govind Agrawal, Gauri Yadav, Rajendra Giri, Manoj Singh including other members of RGTA were present. Members while welcoming new Sub-Collector Prabhat Kumar Parida underlined the need for better dialogue, cooperation and coordination between administration and people associated with transport business. Members of the association while wishing former Sub-Collector Chandrakant Malik for his future responsibilities wished success in his upcoming work area. Meanwhile, welcoming new Sub-Collector, RGTA members expressed hope that under his leadership Panposh Subdivision will move forward in new direction of development. Members believe that administrative activeness, sensitivity towards public

interest and positive dialogue with various business organizations can give impetus to development process of area. Transport sector is an important base of local economy, industrial activities and trade supply system. In such a situation, better coordination between administration and transport businessmen can play useful role in road transport, business activities and solution of regional problems. Members of RGTA expressed hope that during the tenure of new Sub-Collector, Panposh area will achieve new achievements in terms of development, administrative efficiency and public amenities. Along with this, there will be meaningful initiative towards taking forward possibilities of area and strengthening its distinct identity in Odisha. The good wishes expressed on this occasion also brought forward expectation of furthering cooperative relations between administration and parties associated with transport business.

Dr. Vijay Garg

Human civilization has reached a remarkable stage of scientific and technological development. Artificial Intelligence (AI), nuclear energy, biotechnology and advanced communication systems have transformed the way we live, work and understand the world. These achievements offer extraordinary opportunities to improve healthcare, education, agriculture and scientific research. Yet, the same technologies can become instruments of destruction when misused, placed in irresponsible hands or employed without adequate safeguards. Three developments deserve particular attention: the rapid advancement of Artificial Intelligence, the continued existence of nuclear weapons and the growing possibilities of biological warfare. Individually, each presents serious challenges. Together, they raise fundamental questions about human survival, global security and the future of civilization.## Artificial Intelligence: Progress with Uncertain ConsequencesArtificial Intelligence is changing the world at an unprecedented pace. AI systems can analyse vast amounts of information, assist doctors in diagnosing diseases, support scientific discoveries and improve disaster prediction. In education, they can make learning more accessible and personalised. However, the growing capabilities of AI also introduce

AI, Nuclear and Biological Weapons: A Looming Threat to Humanity’s Survival

significant risks. It can be used to generate convincing misinformation, manipulate public opinion, conduct cyberattacks and support the development of autonomous weapons. AI-powered systems operating without adequate human supervision could make dangerous decisions, particularly in military situations where time for reflection is limited. One major concern is the possibility of machines influencing decisions involving the use of lethal force. If military systems become increasingly autonomous, technical errors, faulty information or misinterpretation of an adversary’s actions could trigger unintended escalation. AI may also intensify international competition. Countries could feel compelled to develop increasingly powerful systems for fear of falling behind their rivals. Such competition may weaken safeguards and increase the possibility of accidents or misuse. The solution is not to abandon AI but to develop and use it responsibly. Human oversight, rigorous testing, transparency, accountability and international cooperation must remain central to its development.## Nuclear Weapons: The Shadow of Global DestructionNuclear weapons represent one of the greatest threats ever created by humanity. Their destructive power extends far beyond the immediate explosion. A nuclear detonation can produce intense heat, devastating blast waves, radiation exposure and long-term

environmental damage. A large-scale nuclear war could destroy cities, overwhelm healthcare systems, disrupt agriculture and damage the global economy. Smoke from widespread urban fires could enter the atmosphere and reduce sunlight, potentially causing severe climatic disruption and threatening food production across regions far removed from the conflict. The danger does not arise only from deliberate war. Miscommunication, false warnings, technical failures and mistaken assumptions can also create the possibility of escalation. In a crisis, leaders may face enormous pressure to make decisions within minutes, when accurate information and calm judgement are most necessary. Nuclear deterrence is often defended as a means of preventing war. Nevertheless, it depends on assumptions about rational decision-making, reliable communication and effective command systems. No system can guarantee that human error or unexpected events will never occur. Reducing nuclear risks requires sustained diplomatic engagement, effective arms-control arrangements, secure communication channels and renewed efforts toward nuclear disarmament. Preventing nuclear war must remain a shared international priority.## Biological Weapons: An Invisible DangerBiological weapons pose a different but equally serious challenge. They involve the deliberate use of disease-causing organisms or biological

toxins to harm people, animals or crops. Unlike conventional weapons, biological threats may initially remain difficult to detect, allowing an outbreak to spread before its cause is understood. Modern biotechnology has created remarkable opportunities for medicine, agriculture and disease prevention. Researchers can study pathogens, develop vaccines and improve diagnostic methods. However, advances in biological science can also be misused by individuals or groups seeking to cause harm. A deliberately released biological agent could place enormous pressure on hospitals, disrupt transportation and trade, damage public confidence and create widespread fear. An outbreak involving a transmissible pathogen could cross national borders before authorities identify its origin. The COVID-19 pandemic demonstrated how an infectious disease can disrupt economies, education systems, healthcare services and everyday life across the world. COVID-19 was not established to have been caused by a biological weapon; its broader lesson is that societies remain vulnerable when a dangerous outbreak spreads faster than their ability to detect and control it. Preventing biological threats requires strong public-health systems, responsible laboratory practices, early-warning networks, international information sharing and effective implementation of the Biological Weapons Convention. Scientific research must be encouraged while appropriate safeguards prevent its misuse.## When AI, Nuclear Weapons and Biology IntersectThe greatest concern emerges when these technologies interact. AI could potentially assist the analysis of biological research, while automated systems may influence military surveillance, warning networks and strategic decision-making. These possibilities do not mean that catastrophe is inevitable, but they create new pathways through which errors, misuse or deliberate attacks could have serious consequences. For example, a cyberattack on critical infrastructure could disrupt emergency communication or essential public services. A false warning generated or amplified through unreliable information systems could increase

Editorial

My Thought

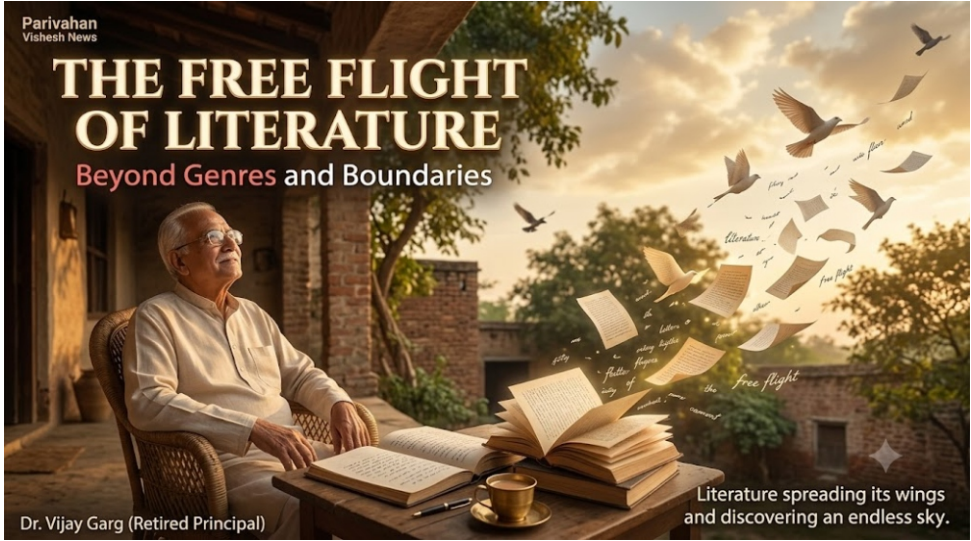

tensions between nuclear-armed states. Biological misinformation could undermine public trust during an actual health emergency. The combination of powerful technologies and weak governance can therefore create risks greater than those associated with any single invention. The central challenge is to ensure that technological progress remains under responsible human control. Scientific capability must be accompanied by ethical judgement, institutional accountability and international cooperation.## The Responsibility of Scientists and GovernmentsScientists have a responsibility to consider not only what can be achieved but also how their discoveries might be misused. Universities, research institutions and technology companies should strengthen ethical review, security practices and responsible research standards. Governments must establish clear regulations, maintain reliable emergency-response systems and cooperate across national boundaries. International agreements should address emerging AI-related military risks, strengthen nuclear safeguards and prevent the development and use of biological weapons. Public participation is equally important. Citizens need access to reliable information about emerging technologies and their risks. Independent journalism, scientific education and informed public debate can help society distinguish genuine threats from exaggerated claims. International institutions must also promote dialogue rather than allowing technological competition to become an uncontrolled arms race. Cooperation is particularly important because the consequences of nuclear conflict or a major biological emergency would not respect national borders.## Education and Human Values: The Foundation of SurvivalScientific knowledge alone cannot guarantee a safe future. Humanity also needs wisdom, empathy, restraint and a sense of collective responsibility. Educational institutions should teach students not only how technologies work but also how they affect society. Young people must

understand the importance of scientific integrity, peaceful conflict resolution, environmental protection and responsible innovation. History repeatedly demonstrates that progress without ethical direction can produce suffering alongside prosperity. The purpose of science should be to reduce human hardship, expand knowledge and improve the quality of life—not to create instruments capable of destroying the very civilization that produced them. A scientifically advanced society must also be morally mature. Intelligence without wisdom can be dangerous, and power without accountability can become destructive.## Conclusion: A Shared Future, A Shared ResponsibilityArtificial Intelligence, nuclear weapons and biological technologies represent three distinct challenges to humanity’s survival. AI can magnify both human achievements and human mistakes. Nuclear weapons can cause devastation on an unimaginable scale. Biological weapons can exploit the vulnerability of living systems and overwhelm public-health defences. Yet, humanity is not powerless in the face of these dangers. Responsible scientific research, strong international agreements, effective safeguards, public awareness and ethical leadership can significantly reduce the risks. The future will depend not merely on how much humanity discovers, but on how wisely it uses its discoveries. Scientific advancement must be guided by compassion, cooperation and respect for life. The most important question of our time is not whether humanity can create increasingly powerful technologies. It is whether humanity can develop the wisdom and collective responsibility necessary to control them.## The survival of civilization depends on ensuring that human intelligence remains guided by human values—and that the power to create never becomes the power to destroy our common future.

The Free Flight of Literature: Beyond Genres and Boundaries

Parivahan Vishesh News

Dr. Vijay Garg

Literature is one of the most powerful expressions of human imagination, emotion and thought. It gives shape to experiences, questions established beliefs, preserves cultural memories and opens new windows into the human condition. Yet, over the centuries, literature has often been divided into distinct genres such as poetry, fiction, drama, essays, biographies, satire and travel writing. These classifications help readers understand literary forms, but they can also become restrictive when treated as rigid boundaries. True creativity does not always follow predetermined rules. Literature achieves its fullest expression when it is allowed to fly freely beyond the limitations of genres.## The Purpose of Literary GenresLiterary genres provide an organised way of understanding different forms of writing. Poetry often uses rhythm, imagery and concentrated language to express emotions and ideas. Fiction explores imaginary characters and situations, while drama presents human conflicts through dialogue and action. Essays examine ideas, biographies recount lives, and satire exposes social weaknesses through humour and irony. These distinctions have practical value. They help publishers organise books, teachers introduce literary concepts and readers choose works according to their interests. Genres also carry traditions, techniques and expectations that writers can learn from. However, a classification is a tool, not a law of creativity. Problems arise when a writer is expected to remain within one category,

even when an idea demands a different form of expression. Literature should not become a prisoner of the very classifications designed to explain it.## Creativity Refuses to Remain ConfinedHuman experience is rarely divided into neat categories. Joy may exist alongside sorrow, personal memories may contain historical truths, and scientific discoveries may inspire philosophical reflection. A single experience can involve emotion, observation, argument, imagination and social criticism. Why, then, should writing always remain within clearly separated compartments? A poem may tell a complete story. A novel may contain philosophical reflections, scientific explanations and passages of lyrical beauty. An essay may combine personal memories with historical analysis. A travel narrative may become a meditation on culture, identity and human relationships. Such works demonstrate that literary forms can overlap without losing their individual strengths. Sometimes, the most original writing emerges precisely where different genres meet.## The Beauty of Blending Literary FormsThe blending of genres is not merely an experiment in style. It can help writers communicate complex ideas more effectively. A writer exploring environmental destruction, for example, might combine scientific facts with personal observations, poetic descriptions of nature and a fictional account of a village affected by pollution. Scientific information provides evidence, poetry creates emotional depth, and storytelling makes the consequences understandable through human experience. Similarly, a

biography can go beyond a chronological account of someone’s life. It may include historical context, social criticism, philosophical questions and reflections on human character. A literary essay may incorporate dialogue, anecdotes and narrative techniques to make abstract ideas more accessible. When forms interact thoughtfully, they can enrich one another. The purpose is not to mix everything indiscriminately but to choose the form that best serves the subject.## Tradition and InnovationEvery literary tradition has its own achievements. Classical poetry, folk narratives, epics, plays and traditional storytelling have preserved the wisdom, imagination and collective memories of generations. These forms deserve respect because they connect contemporary readers with their cultural heritage. At the same time, traditions remain alive through reinterpretation. Writers discover new possibilities when they question established conventions, adapt older forms to modern concerns and experiment with unfamiliar structures. Innovation does not necessarily mean rejecting tradition. It may involve carrying traditional elements into new contexts. A contemporary poem may draw upon folk imagery while addressing urban loneliness. A modern play may combine traditional storytelling with digital projections or documentary material. Literary freedom, therefore, is not a choice between tradition and change. It is the ability to learn from the past while responding creatively to the present.## The Influence of a Changing WorldThe modern world is increasingly interconnected. People encounter different languages, cultures, technologies and ways of thinking through travel, education and digital communication. Literature naturally reflects these exchanges. Digital platforms have introduced new possibilities for storytelling. A literary work may combine written passages, photographs, illustrations, recorded voices and interactive elements. Online writing can move between the personal essay, commentary, memoir and short fiction. These developments challenge older assumptions about where one genre ends and another begins. They also encourage writers to explore new

relationships between text, image, sound and audience. Yet technological novelty alone does not guarantee literary quality. A successful experiment must still possess clarity, emotional resonance, imagination or intellectual depth. The medium may change, but the essential purpose remains the meaningful expression of human experience.## Freedom Does Not Mean the Absence of DisciplineThe argument for literary freedom should not be misunderstood as a rejection of craft. Writing beyond genres does not mean that every structure is equally effective or that all conventions are unnecessary. Language, rhythm, narrative coherence, character development and the organisation of ideas remain important. A writer who combines several forms must understand how they work and why they belong together. Knowledge of traditional genres can actually strengthen innovation. A poet who understands rhythm can experiment with it more effectively. A novelist who understands narrative structure can challenge conventional storytelling with greater purpose. Creative freedom becomes meaningful when imagination is supported by skill, reflection and a clear artistic intention. The goal is not to abandon every boundary but to ensure that boundaries do not prevent a work from becoming what it needs to be.## The Role of Readers and CriticsReaders and literary critics also influence how genres are understood. When a work does not fit neatly into an established category, it may be difficult to classify or evaluate. Yet this difficulty can be an invitation to reconsider familiar assumptions. Instead of asking only, “Which genre does this work belong to?” readers can ask, “What is this work trying to communicate, and how effectively does its form serve that purpose?” Such an approach encourages a more open understanding of literature. It allows readers to appreciate a work for its originality, emotional power, intellectual contribution and artistic achievement rather than judging it solely by its conformity to a recognised category. Educational institutions can support this openness by encouraging students to read across genres and experiment with different forms of writing. Students should learn the

conventions of poetry, fiction and essays, but they should also be encouraged to discover their own voices.## Literature as an Open LandscapeLiterature is not a collection of isolated boxes. It is an open landscape in which ideas, emotions, memories and forms interact. Its boundaries shift as societies change and writers discover new ways to communicate. The most meaningful literary works often resist simple classification because human life itself is complex. They may begin as personal reflections and develop into social commentary, or start as imaginative stories and raise profound philosophical questions. The freedom to cross genres also makes literature more inclusive. Different writers possess different experiences, linguistic resources and ways of seeing the world. A flexible literary culture creates space for voices that might otherwise be excluded by narrow definitions of what writing should look like. Ultimately, the value of a literary work lies not merely in the category to which it belongs, but in what it reveals, questions, expresses and makes possible.## Conclusion: Let Literature FlyLiterary genres are useful guides, but they should never become walls around imagination. Poetry, fiction, drama, essays, memoirs and other forms offer distinct possibilities, yet their most exciting achievements often emerge through interaction and experimentation. Writers should be free to respect tradition, challenge conventions, combine forms and invent new modes of expression. Readers, too, should approach literature with curiosity rather than rigid expectations. Literature thrives when it remains open to change, welcomes diverse voices and responds to the complexity of human life. Its strength lies not in preserving every boundary but in discovering what becomes possible when boundaries are crossed thoughtfully.## Literature needs genres to organise its traditions, but it needs freedom to renew its spirit. When imagination rises above rigid classifications, literature spreads its wings and discovers an endless sky.*

For Publication Fidel Castro Birth Centenary Celebration: Cuba Will Live!

Parivahan Vi
(Report: *Viju Krishnan and S S Anil, Translation: Sanjay Parate*)

A delegation of All India Kisan Sabha General Secretary Viju Krishnan, All India Democratic Workers Association President Mariam Teacher, CITU Secretary Meenakshi Sundaram, All India Agricultural Workers Union General Secretary B Venkat, and Joint Secretary N Chandran, All India Insurance Employees Association President Dharmaraj Mahapatra and BEFI President S S Anil stayed in Cuba from 10-17 August 2026. This delegation had come to participate in the four-day ceremony held in Havana on Comrade Fidel Castro's birth centenary, 'First International Colloquium: Fidel, Legacy and Future'. The delegation stayed here for three more days and visited various historical places and met common people, workers, farmers and the Cuban Institute for Friendship with Peoples (ICAP). *Cuba became a ray of hope by stopping genocide*The delegation left from Indira Gandhi International Airport, New Delhi on the morning of 9th August and landed at Jose Marti International Airport, Havana on the morning of 10th August. The delegation carried boxes full of cancer and heart medicines with them. They were fully aware that this effort is not enough, yet they understood the importance of this work. Cuba has given free health care to its people. Its doctors have gone selflessly to conflict zones or places or to many such countries where there were disasters or infectious diseases and which includes the Covid-19 pandemic. Today against this very Cuba, US imperialism is organizing genocide and through an inhuman blockade is preventing Cuba from getting oil, food, life-saving medicines and medical equipment. More than 700 ships carrying help for Cuba are stuck at ports of different countries around the Caribbean Sea due to the blockade. It has been more than 10 months now, when no oil tanker ship has reached Cuba. The blockade against Cuba had started almost immediately after the revolution, in which the basic rules of international human rights law are being violated. US Deputy Assistant Secretary of State Lester Mallory had drafted an internal memorandum on 6 April 1960, in which his intentions were not hidden: "(...) every possible means should be adopted immediately to weaken the economic life (...) an action should be taken on it, which is as clever and hidden as possible and which interferes most in preventing Cuba from money and supplies, dropping its monetary reserve level and reducing real wages, increasing hunger and despair to overthrow the government."The Helms Burton Act of 1996 imposed trade restrictions and punished all companies including shipping companies trading with Cuba; under Trump rule, this attack has created a huge human tragedy. This naval blockade imposed on Cuba does the work of war and more genocide, which threatens the lives and livelihood of millions of people. Cuba has been defending itself while fighting the imperialist blockade for almost seven decades; even after the disintegration of the Soviet Union, for almost 4 decades it has stood firm against US imperialism; but now the situation is not like before. That is why today the strongest global solidarity actions are needed. The delegation soon had to bear the effect of oil or energy blockade imposed by America. This airport did not have shining lights like airports around the world and the way to the hotel also, except for occasional shining lights, was almost like a black-out. On reaching the place of stay, the delegation came to know that there was neither electricity nor water; every delegate was given two bottles of water and water had to be carried from a pool to the first or second floor, where they were stayed. Although this problem was solved on the same day, anyone could understand what it means for common people in Cuba in hot and humid weather for months. They are facing severe power cuts of 20 or more hours. This is despite the fact that they have managed to repair their thermal power plant with 1,400 MW capacity. Heavy shortage of fuel due to blockade is preventing them from generating electricity at full capacity. If America had not deliberately created such shortage of

fuel, power cut in Cuba would hardly be three hours. Although China has helped a lot in increasing solar energy, this help is still not enough to meet the shortage of thermal power plant.*Fidel's legacy is alive*The delegation soon understood the inhuman situation created by imperialist blockade and reached the venue of 'First International Colloquium: Fidel, Legacy and Future'. The colloquium included meetings of Fidel Castro Ruz Chairs, a symposium on Cuban Revolution as well as youth, parliamentary and women's forums. It included keynote addresses, theme-based presentations, round table panels, presentation of pamphlets, launching of books and documentary screenings etc. The inaugural session was addressed by First Secretary of the Communist Party of Cuba and President of Cuba Miguel Diaz-Canel. Leaders of various countries were present in this session, who came forward with full solidarity with Cuba and its common people, so that a clear message could be sent to US imperialism and its stooges.Miguel Diaz Canel told how Cuba has responded while facing such difficulties? We responded exactly as Fidel taught us. He told: creative, by staunchly opposing. To face the pandemic, we made our indigenous vaccines with full freedom. To avoid shortage of fuel and chemical fertilizers, we promoted the model of urban and rural agro-ecological farming. Apart from weapons and fighter jets, we strengthened our popular defense line only with firm belief and unity. Our scientists, teachers, doctors, farmers and workers have proved that human activity does collectively is a much more powerful wealth than imperialist wealth. Above all, we never left our internationalism. We keep sending our medical brigades to the poorest corners of the world; we keep sharing our studies and scientific methods; and we remain an island that builds bridges of solidarity. Yes, we have to face a lot of difficulties: blackouts, water shortage, inflation and tiring lines weigh heavily on us. Yet, no shortage has ever succeeded in extinguishing the flame of solidarity burning inside the people of Cuba. We move forward without compromising socialist principles and without bowing under external pressure. Our mission is to build socialism on a small island facing the world's biggest imperialist power.The Indian delegation got a chance to meet President as well as Gerardo Hernandez, who is one of five Cubans -- leader of Wasp Network, who had spent sixteen years in US jails. He is on an important post like National Coordinator of Committee for the Defense of the Revolution (CDR). CDR is doing good work for politicization of people and building anti-imperialist consensus. Our delegation also had interaction with Che Guevara's daughter Aleida Guevara, who is well known to Indians.On 11 August, famous performer and pianist Frank Fernandez associated with National Theatre of Cuba and National Symphony Orchestra celebrated Fidel's hundredth anniversary by mixing Cuba's musical traditions with classical style. The closing ceremony of the colloquium took place on 13 August at Karl Marx Theatre -- it was a historic event, in which Comrade Raul Castro also participated. Havana's historic Karl Marx Theatre became witness to another revolutionary milestone opening the door of history: the hundredth anniversary of Fidel Castro's birth and a memorable evening of the closing ceremony of 'First International Colloquium: Fidel, Legacy and Future'.The visit to Fidel Castro Ruz Museum also

showed us an interesting aspect, from which it was known how much Fidel is alive in people's minds, even in children's minds. We were very happy to see that children of 6-14 years were explaining different panels and displays so clearly and deeply, as well as good historians of older age explain. The visit to Revolution Square (Plaza de la Revolution Jose Marti) with the magnificent monument of Cuba's great revolutionary Jose Marti, looking at the big steel outlines of Che and Camilo Cienfuegos and in front of the slogan Hasta la Victoria Siempre (Ever onward to victory), Museum of Revolution, in which the book Gramma is kept, which brought Fidel and other revolutionaries to Cuba and Che Guevara Garrison -- all these were very inspiring. One special thing, which gave a sense of some disturbance, was stopping the crowd of people."International solidarity mission with life-saving medicines*The delegation had to fulfill an important responsibility. It had to hand over medicines collected together by CPI(M) and CPI to two important centers -- Pediatric Oncology Ward of National Institute of Oncology and Radiobiology (INOR) and internationally famous National Institute of Cardiology and Cardiovascular Surgery (ICCC) located in Havana. Our delegation was told that other delegations coming from Europe and Latin America were also giving similar medicines. Both these institutions are examples of excellent work in their respective fields.INOR has been providing health services at international level since 1995 and has attracted patients from more than 52 countries including America, Canada, Mexico, Venezuela and Europe. INOR is known for new treatment of lung cancer, anti-tumor vaccines like Cimavax and Vaxira. This visit gave a unique and first glimpse of Cuba's uncompromising public health care model and its strong struggle even in very difficult conditions. Through more than fourteen special departments -- including Pediatric Oncology -- this largest institution gives its patients completely free, complete medical care. Through active preventive measures like systematic newborn screening protocol and HPV vaccination, Cuba's health care system has been expert in early detection of disease. However, the institute's director Dr. Luis Eduardo Rodriguez and his team told with great sadness that where the survival rate from childhood cancer had earlier reached up to 85 percent, the heavy shortage of essential medicines due to cruel economic blockade has reduced that figure to 65 percent. The boxes of medicines that the delegation carried for treatment of cancer patients also included vials, which had to be kept carefully in an ice box. We can see how the inhuman blockade of US imperialism is really cutting the veins of Cuba's health care. Cuba, which is known worldwide for doctors of Henry Reeve Medical Brigade, who risked their lives and flew to

roaming on streets of Havana, anyone can feel that this international thinking is not only in political rhetoric; it is also included in everyday life of common people.*Economic hardship, migration and farmers*Since 2021, due to economic hardship, shortage of food and fuel, and uncontrollable inflation, the biggest mass exodus in Cuba's history has happened. Recent international studies show that more than 18 lakh people have left the country -- which is about 15% to 18% of Cuba's total population. Most people went to America, while many also settled in Spain and various Latin American countries. Rusty locks hanging on gates of many houses on streets of Havana are silent witnesses of this mass exodus. The delegation also found serious cases of poverty and inequality in Old Havana. From all previous visits to Cuba, it was clear that children and old people did not go out in this way in search of food or money. In the urban unorganized workforce there are people who told about their low earnings and how they often have to sleep hungry. Even in bodega -- which are government-subsidized nearby ration shops, where people get monthly food, stock is low there too.In Cuba, in Havana, on its old streets, what we saw was not just stagnation, but the strong struggle of people bearing the heavy brunt of economic blockade to stay alive. Near Museum of Revolution, on streets of Old Havana and even in hotels old people and children were begging; seeing people in seminar taking some part of food kept in packets for people going back home -- these scenes brought to fore poverty and everyday hustle of citizens of capital, who were engaged in struggle of their survival. Despite facing heavy shortage, people say with full belief that their difficulties are not due to their government, but due to decades-old inhuman blockade of US imperialism, which wants to strangle them. Political understanding gained from political education was clearly visible in people of all ages and their anti-imperialist thinking was clear. This thinking keeps Cuba high in front of world. In face of continuous restrictions and crises, those who are not ready to retreat even a little from their ideals, are not ready to lose.The delegation intended to visit National Association of Small Farmers (ANAP) -- which is the largest organization of small-scale farming workers in Cuba -- and Federation of Cuban Women (FMC) which was established in 1961. Due to urgent work, these meetings had to be cancelled. Visit to a farming village was also added to travel plan, which gave opportunity to directly interact with farmers associated with ANAP. The delegation went to Vinales, a valley about 200 km away from Havana in Pinar del Rio province. Vinales Valley is a UNESCO World Heritage Site, known for its traditional farming, tobacco plantations surrounded by limestone hills. The delegation met a family, which has been doing tobacco farming for generations and is known for its premium cigars. These farmers were part of ANAP and they told about difficulties coming due to blockade. A farmer named Sergio told the delegation that government distributes tobacco seeds to farmers through ANAP. He told how shortage of fuel and spare parts has forced them to use animals again for ploughing land. In 2023, attempt by Food and Agriculture Organization (FAO) to import tractors from Puerto Rico failed, because manufacturers did not dare to take risk of US sanctions. We were told that due to non-availability of machinery, fertilizer and pesticides apart from production-increasing technology, agricultural yield, especially grain yield has fallen by more than 40 percent. Havana is very much dependent on tourism and due to restrictions its livelihood has ended. Compared to Havana, crisis is less in village areas, because for rural communities dependent on agriculture, there is not so much interruption in everyday life like in city, although income has decreased.*Imperialist blockade's hit on humanity*According to Cuba government, the cost of two hours of blockade is equal to about 14 lakh US dollars, which is equal to the cost of purchase of medicines used for treatment of psychiatric, neurological and heart diseases, as well as cost of food for children with genetic defects and endocrine metabolic diseases; cost of 16 days of blockade is equal to about 33.9 crore US dollars, which is equal to funds

necessary to meet needs of national list of essential medicines for country; cost of two months of blockade is equal to 1.6 billion US dollars, which is equal to cost of fuel necessary to meet regular electricity demand of country. This cost also sits equal to funds necessary for guarantee of sending food basket distributed to rationed families in population in a year.Beans, sugar, coffee, oil, milk powder, soya curd, meat products, chicken, beef, and domestic fuel (coal and natural gas), medical food, which is given on priority basis to children struggling with chronic diseases and pregnant women -- all these are not able to come due to blockade. It is estimated that Cuba needs about 1800 tons of powdered milk every month for this department. Powdered milk and food items are now available only for children 0 to 2 years and it is impossible to guarantee powdered milk even for children above this age. It is becoming difficult to guarantee edible oil as well. From 1 March 2024 to 28 February 2025, estimates of Cuba government show that due to blockade Cuba has suffered loss up to 7.56 billion US dollars, which is 49 percent more than previous time.*Cuba will live; just let us become those veins, which cannot be cut!*Cuba has been facing the harshest sanctions like economic blockade and stopping humanitarian help for more than six and a half decades. US imperialism has deliberately imposed food and fuel shortage on it, so that clearly unrest is created and conditions are created to overthrow Cuba's government. But intention to cut all veins giving life again to Cuba has not succeeded till now. This includes cutting all possible resources of external income, harming tourism, obstructing travel and income from family and at the same time intimidating and trying to isolate potential investors and those helping Cuba. Cuba has been alive without presence of Soviet Union since 1991 for almost four decades. Soviet Union was a strong source of its help for three decades after Cuban revolution in 1959. Today, socialist China and Russia are trying to meet Cuba's food and fuel needs.*Cuba will live; just let us become those veins, which cannot be cut!*Cuba has been facing the harshest sanctions like economic blockade and stopping humanitarian help for more than six and a half decades. US imperialism has deliberately imposed food and fuel shortage on it, so that clearly unrest is created and conditions are created to overthrow Cuba's government. But intention to cut all veins giving life again to Cuba has not succeeded till now. This includes cutting all possible resources of external income, harming tourism, obstructing travel and income from family and at the same time intimidating and trying to isolate potential investors and those helping Cuba. Cuba has been alive without presence of Soviet Union since 1991 for almost four decades. Soviet Union was a strong source of its help for three decades after Cuban revolution in 1959. Today, socialist China and Russia are trying to meet Cuba's food and fuel needs.However, what has sustained the people of Cuba is their political-ideological clarity and a socialist state, which guarantees food basket, free education and health care as basic right to every citizen. This is main reason why people despite great difficulties keep government close to their hearts. It is the never-breaking revolution under Fidel's leadership, which has given firm belief to people of Cuba that they cannot be forced into colonial slavery of their past. The battle of survival is not at all easy, but we have returned with this belief that Cuba will live despite all its challenges.

Cuba is not alone!We will be those veins, which imperialism will not be able to cut!!**

US imperialism, leave Cuba!!!

Tight Security for Bithoor Nagar Nagar Panchayat Chairperson By-Election Today; Instructions Issued

Parivahan Vishesh News

Sunil Bajpai

Kanpur. Preparations have been finalized to conduct the by-election for the post of Bithoor Nagar Panchayat Chairperson peacefully, fairly, and safely amidst tight security arrangements. Police officials have issued necessary directives in this regard.Strict police surveillance will be maintained at all polling centers and booths during the voting today (Tuesday). Special vigilance will be exercised at sensitive and hyper-sensitive centers, and the movements of suspicious individuals and vehicles will be monitored. The police are ensuring that no one attempts to intimidate or pressure voters, allowing all voters to exercise their franchise without fear.On Monday, Deputy Commissioner of Police (West), SM Qasim Abidi, briefed police officers and personnel regarding the security arrangements for the by-

election. He detailed the responsibilities of the deployed police personnel, instructing them to reach their assigned duty locations on time and perform their duties with utmost alertness. He made it clear that negligence at any level during the election would not be tolerated and directed all personnel to perform their duties with impartiality and discipline, adhering to election-related guidelines.Special instructions have been issued to maintain heightened vigilance at sensitive and hyper-sensitive polling centers during this prestigious by-election. Police officials have been directed to remain constantly mobile in their respective areas and monitor activities around the polling centers. They have been instructed to reach the spot immediately and take effective action in the event of any suspicious activity, dispute, or tension. Overall, the police appear fully committed to conducting this election in a fair and peaceful manner.

Author: Advocate Kishan Sanmukdas Bhavnani, Gondia (Maharashtra)

1. Introduction: 12 October 2026 - A Turning Point*The day of 12 October 2026 emerged in Indian politics with a big question over youth discontent, electoral transparency and the role of democratic institutions.On the same day three events happened simultaneously:1. Demand for resignation of Chief Election Commissioner in Delhi2. March of opposition leaders towards the Supreme Court3. Order to remove Jantar-Mantar from the list of designated protest sitesThis is a coincidence or a signal? This is the question that is creating a stir in the corridors of power today.*2. Jantar-Mantar: Not a ban, but a change - but many questions*Delhi Police, through its order of 11 October 2026, removed Jantar-Mantar from the list of official protest sites and fixed three new places in its place - Ramlila Maidan, Burari Maidan and CBD Ground in East Delhi.This order made a partial amendment to the old standing order of 28 April 2022. The administration's argument is - recommendation of the committee of Ministry of Home Affairs, crowd management and alternative arrangement.But Jantar-Mantar is not just a road. It has been a symbol of the country's movements for decades. The voice raised from here used to reach directly to Parliament. Now the question is:Will the new places give equal practicality to the right to peaceful protest, or will they push the voice away from the centre of the capital?To say that the government took this decision out of fear is not proven by facts.

But its evaluation will be from how much facility the protesters get at the new sites.*3. Gen Z's anger and NDA's dilemma*The centre of protest is not just Jantar-Mantar, but electoral credibility. Allegations of large-scale deletion of names during the Special Intensive Revision (SIR) of voters list have angered youth groups.- Opposition's side: This is a question of right to vote and fairness.- Election Commission's side: Purity of list and adherence to procedure has happened.Signals are also different within NDA. Chirag Paswan is talking about listening to youth's questions, while Jitan Ram Manjhi is standing in support of the Centre. This is not proof of crisis in the alliance, but it is definitely a signal that youth will not tolerate being ignored by any party.Youth want - employment, fairness in recruitment exams, education, control over inflation and accountability.*4. Bangladesh and Nepal: When youth on streets change power*Two events in the neighbourhood are important to understand India's Gen Z:Bangladesh, August 2024: Student movement started against reservation in government jobs turned into a widespread anti-government struggle. On 5 August 2024, Prime Minister Sheikh Hasina had to resign and leave the country. 15 years of rule ended.Nepal, September 2025: Youth protest against corruption, unemployment and inequality. Ban on social media added fuel to fire. Prime Minister had to resign.India is different: Here there are regular elections, multi-party democracy and judicial review. But message is clear - remembering youth only at election time is not enough.*5. March towards Supreme Court: Test of democracy*The march of opposition leaders towards Supreme Court on 12 October became a constitutional debate. CJI Suryakant refused to meet the delegation and said judiciary should not be dragged into political dispute.Here it is important to understand the difference:- Criticizing an institution and seeking legal relief is

GEN Z'S ANGER: STIR IN CORRIDORS OF POWER

OCTOBER 2026 / Will Gen Z become kingmaker of 2027? • Decision to remove protest site from Jantar Mantar

Chief Editor: Sanjay Kumar Bathla • Parivahan Vishesh • Janhit Vishesh

democratic.- Putting pressure on judiciary for a particular political conclusion is a different thing.Opposition will have to prove allegations with evidence and documents. The Commission will have to give transparent answers.*6. Electoral arithmetic of 2027: Will youth change the game?*In 2027, assembly elections are likely in seven states - Uttar Pradesh, Punjab, Uttarakhand, Goa, Manipur, Gujarat and Himachal Pradesh.The biggest arena will be Uttar Pradesh - 403 seats. Here share of Gen Z voters is considered to be about 15 percent. In 2022, the margin of victory-defeat on 99 seats was less than 10,000 (verifiable from official results).If this figure is correct, then youth vote can prove decisive on close seats.But caution: Only size of youth population does not ensure victory. Their priorities will be different according to region, class and local candidates. Gen Z is not property of any one party.*7. Conclusion: Fear of government or test of democracy?*Removal of Jantar-Mantar's name from the list in itself is not proof of

SPECIAL REPORT

Across the country, the Gen Z group has become active regarding its role. After the decision to remove the protest site from Jantar Mantar in Delhi, deep anger is seen in youth organizations. From social media to the streets, this new generation is demanding change.

YOUTH ISSUES

- Demand for improvement in employment and education
- Political pressure through digital activism
- Possibility of decisive role in 2027 election

Jharkhand to develop IT park on 100 acres of land

Parivahan Vishesh News

Jharkhand IT department to visit Bengaluru, Odisha has established IT infrastructure

Kartik Kumar Parichha, State Head Jharkhand

Ranchi: To build the first IT park in the state, the team of Information and Technology Department will visit the IT park in Bengaluru and submit the

related report to the government.

This process is scheduled to be completed in October. The government plans to develop a Global Capability Center in Jharkhand, similar to the one in Bengaluru, and make it operational by 2029. The team, consisting of department officials and experts, will be traveling to Bengaluru. In addition to studying the IT ecosystem and investment models there, state government officials will also meet with representatives of

companies building digital infrastructure for the Ranchi IT Park.

Remove AdsRead News Only
This IT park is to be established on 100 acres of land near the Assembly in Ranchi. Its first phase will begin in the next two years, creating approximately 20,000 new jobs. Recently, a meeting was held between the Secretary of the IT Department and other officials with leading companies like Google and Microsoft. The potential for semiconductor design in Jharkhand

was discussed. Neighbouring Odisha has a strong digital infrastructure in place and companies are working on semiconductor manufacturing. Jharkhand has abundant resources due to the presence of rare earth minerals. Additionally, several investors have given initial consent for nuclear energy. After returning from the Bengaluru tour, a conference of representatives of other IT companies from across the country will also be organised in Ranchi to discuss the investment possibilities..

ECoR Honours Three Railway Employees for Alertness in Ensuring Train Safety

Parivahan Vishesh News

Manoranjan Sasmal , State Head Odisha

Bhubaneswar : East Coast Railway General Manager Parmeshwar Funkwal felicitated three railway employees for their exceptional alertness, presence of mind and commitment to duty in identifying potential safety concerns during July and August 2026. Their timely action and prompt communication enabled the concerned railway authorities to take necessary preventive measures, reinforcing the importance of vigilance in ensuring safe and smooth train operations.

The employees honoured were:
• Sri Sarada Prasad Sahoo, Track Maintainer-IV, Badabandha, under SSE/P.Way/Gorakhnath, Khurda Road Division
• Sri Trinath Selma, Track Maintainer-IV, Kantabanji, Sambalpur Division
• Sri Subham Sa, Track Maintainer-IV, under SSE/P.Way/Mahasamund, Sambalpur Division

The employees demonstrated commendable vigilance while performing their assigned duties and promptly brought safety related concerns to the notice of the concerned railway officials. Their timely reporting facilitated appropriate intervention and necessary corrective measures, highlighting the importance of alertness and effective communication in preventing potential safety risks. Their actions reflect the high level of responsibility expected from railway

personnel, particularly those working in the field, where timely observation and reporting play a crucial role in maintaining operational safety.

East Coast Railway continues to emphasise a strong safety culture, encouraging railway employees at all levels to remain vigilant, promptly report any unusual observations and coordinate effectively with the concerned authorities. Such proactive efforts contribute significantly to the safe and reliable operation of trains and help strengthen the overall safety framework of the railway system.

While felicitating the employees, General Manager Shri Parmeshwar Funkwal appreciated their alertness, dedication and devotion to duty. He highlighted the vital role of frontline railway personnel in ensuring train safety and encouraged employees to maintain the same level of vigilance, sincerity and commitment in discharging their responsibilities. He also underscored that a strong safety culture is built through individual responsibility, collective effort and prompt action at every level of railway operations.

Press Release - Nav Shri Keshav Ramlila Committee

Parivahan Vishesh News

Cricketer Abhishek Sharma will definitely come to see Nav Shri Keshav Ramlila - Rajkumar Sharma

On the second day of Ramlila, people thoroughly enjoyed the staging of Ram Janm and Tadaka Vadh

New Delhi: In front of Japanese Park, Sector 11, Rohini, in the capital Delhi, with the invocation of Lord Ganesha, on the second day of the ten-day-long Nav Shri Keshav Ramlila Committee, people thoroughly enjoyed the staging of Ram Janm and Tadaka Vadh. People stood at their places and encouraged these artists with loud applause. On the stage, the audience was overwhelmed to see the scenes of forest, mountains, rivers etc. through 3D animation on a huge 120 feet LED screen during the staging. As the chief guest, Rajkumar Sharma, who is the father of famous cricketer Abhishek Sharma, was present. He said that Abhishek will definitely come to see this Ramlila one day. Rajkumar Sharma was also felicitated by all the dignitaries of the organization by giving a memento. On this occasion, Chairman of Nav Shri Keshav Ramlila Committee, Pushpendra Rastogi said that through this theatre, his effort is to inspire

highly sensitive small children to adopt their culture and values. He told that this time the Leela is being staged on a grand three-storey stage on the Tridev theme. On this occasion, the inspiration of the organization and Mayor of Delhi Praveesh Wahi, Chairman Pushpendra Rastogi, President Jai Kishan Bansal, Additional Chairman Sanjay Kumar Gupta, General Secretary

Krishna Jindal, Treasurer Dinesh Sarraf, Leela General Secretary Hari Kishan Mittal, Office General Secretary Purushottam Lal Singhal and many other dignitaries were present. This is the 30th year of the grand program organized by the organization. He told that the entire Ramlila is being organized with the cooperation of all the members of the committee, he told that in the grand staging of Ramlila, the dialogues of all the characters of Ramayana are being presented by the famous artists of Shri Ram Pathik Kala Kendra. From 13th October 2026 to 18th October 2026, every day dignitaries from various fields will come here and every day well-known artists of Bollywood and TV serials will give their presentations, in which many famous personalities will be present including child artist Vihaan from the film Hanuman Ansh. Bollywood actress Delnaaz Irani, star poet Dr. Anamika Jain Amber, film artists Varun Kasturia, Akshita Vatsayan from Anupama serial, Tanisha Mehta from Kyunki Saas Bhi Kabhi Bahu Thi serial. Strong security arrangements have also been made here. Security is arranged under the leadership of Delhi Police jawans along with private volunteers, CCTV cameras, hand metal detectors. More than 100 stalls have been set up in it and there are all kinds of swings in the fair, which have become the center of attraction for children.

A scuffle broke out between an advocate and an RPF sub-inspector in the court premises.

Parivahan Vishesh News

The Bar Association demanded action against the police personnel involved.

Kartik Kumar Parichha, State Head Jharkhand

Ranchi, Dhanbad, turned into a battlefield when a dispute arose between a lawyer and a Railway Protection Force sub-inspector over the detention of an accused. The dispute quickly escalated into a physical altercation, and chaos erupted in the court premises. Police from several police stations arrived at the scene and brought the situation under control.

The Bar Association has expressed outrage over the incident and demanded action against the police officer involved. The

incident occurred at the Dhanbad court premises, where a dispute erupted while an accused was being taken to the court to surrender. According to advocate Santosh Singh, he was taking the accused to the court to surrender. A man claiming to be a RPF officer insisted on detaining the accused. This sparked an argument between the two sides, which quickly escalated into a physical altercation.

The association has demanded action against the police officer involved. Meanwhile, the police say that further action will be taken after receiving a written complaint. Currently, the written complaint and further police action are awaited. Now, it remains to be seen what action the police take regarding this dispute that occurred in the court premises.

This time (2026) the official theme of International Day for Disaster Risk Reduction (IDDRR) is "Resilience Starts at Home"

Parivahan Vishesh News

Report - Navdeep Singh, Parivahan Vishesh Newspaper

This day is celebrated every year on 13th October. The main objective of this year's theme is to tell that safety from disasters and preparedness to deal with them starts first from our own homes, safe houses and family awareness. Prepare a report on this and give complete information, on spreading public awareness.

A special public awareness report has been prepared on International Day for Disaster Risk Reduction (IDDRR) 2026:

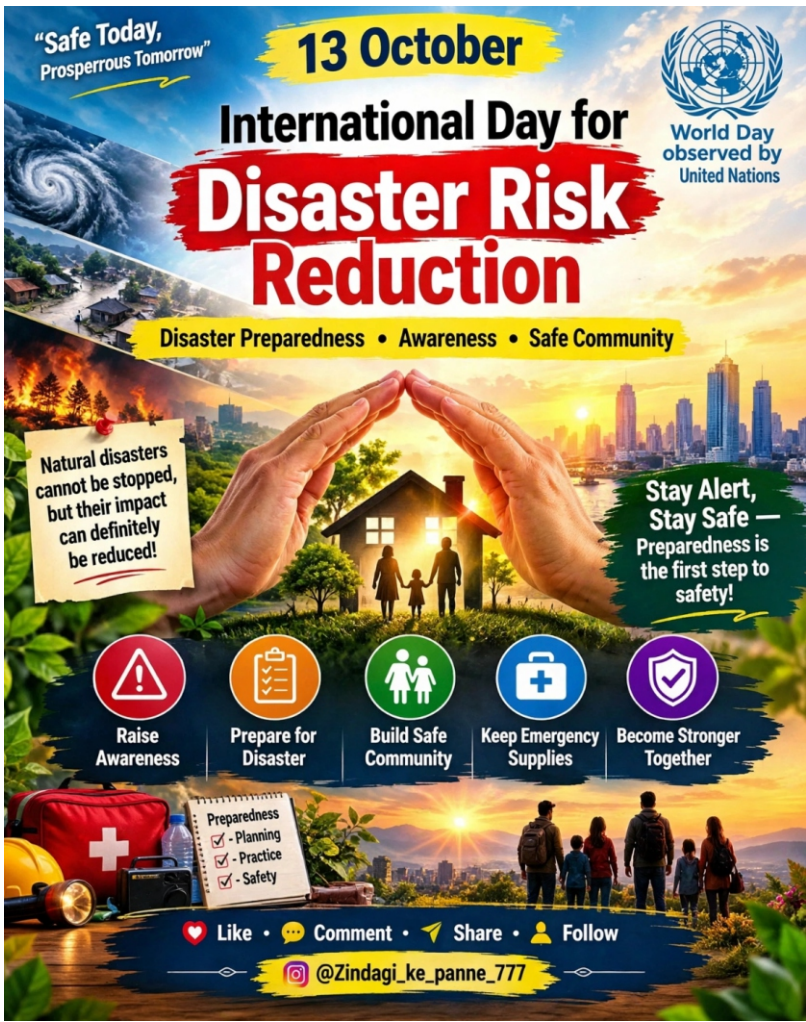

Special Report: International Day for Disaster Risk Reduction 2026

Theme: "Resilience Starts at Home"

Date: 13th October 2026

1. Main Message and Objective (Overview)
International Day for Disaster Risk Reduction (IDDRR), celebrated every year on 13th October, provides an opportunity at the global level to reduce the impact of disasters and promote preparedness.

The main objective of the official

theme of the year 2026 — "Resilience Starts at Home" — is to give the message that the first wall of protection from any major natural or man-made disaster (like earthquake, flood, fire, or storm) is our own home and family. Until our homes are not safe and families are not aware, safety at community or city level remains incomplete.

2. 4 Main Pillars of 'Resilience Starts at Home'
Pillar Description

1. Safe Housing Construction of houses capable of withstanding earthquake, flood or storm and timely checking of house strength.

2. Family Emergency Plan A clear plan for all family members to gather at a safe place and contact in case of emergency.

3. Domestic Emergency Kit Keeping basic material ready for at least 72 hours.

4. First Aid & Training Knowledge of first aid and identification of things causing risk inside the house (gas leak, open electric wires).

3. Essential Steps for Every Home (Actionable Steps for Public

Awareness)
Every family should immediately adopt the following measures for safety from disasters:

A. Keep a Household Emergency Kit (Go-Bag) Ready

Every house should have the following material in a waterproof bag:

Drinking water: At least 3 days supply per person.

Dry food: Like biscuits, chickpeas, nuts etc.

Medical kit: First aid kit, essential regular medicines and band-aids. Equipment: Torch (with extra batteries), whistle (to call for help), and power bank.

Important documents: Waterproof copy of Aadhaar card, passbook, insurance papers etc.

B. Make a Family Emergency Plan*Decide safe place: Decide a gathering place inside the house (like under a strong table) and outside the house.

Remember emergency numbers: Write 112 (National Emergency Number), local ambulance, fire brigade and

police number at a visible place in the house.

Do mock drills: At least twice a year practice "Drop, Cover, and Hold On" or safe exit with family.

C. Identify and Remove Domestic Risks
Secure heavy items: Tie high almirahs, glasses and heavy pictures tightly to the wall so that they do not fall in earthquake.

Electricity and gas safety: Keep checking gas cylinder hose and learn to immediately close main valve when LPG leaks.

Drainage and waterlogging: Clean house roofs and drains before monsoon so that waterlogging does not happen.

4. Public Awareness Call to Action*"It is not in our hands to prevent a disaster every time, but preparation to avoid it is completely in our hands."Community cooperation: Help your neighbors, especially elderly, children and disabled persons in safety planning.

Share verified information: During any disaster, trust only information received from government or official sources and do not spread rumours.
