02 Lack of Platelets in Blood: Causes, Symptoms, Prevention and Correct Treatment

06 The Mirror of Conscience: Privilege Is a Responsibility, Not an Entitlement

08 Vacate the throne, for the people are coming!

How long will public trouble increase in the name of Delhi-NCR? Why 15 years road tax, ban in 10 years?

How justified is it to remove PUC-passed vehicle on basis of age? — Pollution control is necessary, but rules should also be transparent, practical and just

**Parivahan Vishesh News**

Temple of Liberalization and Welfare Allied Trust (Registered)

Demand for right from Vice President K K Chhabra and National General Secretary Pinki Kundu

Demand for right from Vice President K K Chhabra and National General Secretary Pinki Kundu

Facts at a glance

- Problem: In Delhi-NCR ban on 10 year old diesel and 15 year old petrol cars on basis of NGT / Supreme Court orders

- Public's argument: Road tax is taken for 15 years, insurance, fitness, PUC — all valid, then why scrap vehicle in 10 years?

- Two main demands:

1. Vehicles passing pollution standards should not be removed on basis of age, option to increase validity should be given.
2. Pure Petrol without ethanol should also be available as option at petrol pump

- Slogan: Reducing pollution is necessary, but voice of public will not be suppressed!

Main Points — Constitutional and Legal Basis

- 1. Fundamental Rights — Article 19(1)(g) and 21: Any citizen has right to use property earned by his hard work — right to protection of life, livelihood and property

- 2. Article 300A — Right to Property: No person can be deprived of his property without authority of law. Tax-paid vehicle is legally property

- 3. Motor Vehicles Act 1988 and Central Motor Vehicles Rules 1989: Basis of fitness of vehicle — its technical standard and PUC, not only age. Provision of renewal of registration under Rule 52

- 4. Judicial order vs Gazette Notification: NGT order 2015 (Vardhaman Kaushik vs Union) and Supreme Court order in MC Mehta case — but these are for environment protection, emphasis in these is on removing PUC -failed vehicles, not passed vehicles. Public demands reconsideration on scientific basis

- 5. Ethanol Blending Policy: Government's E20 policy (20%

ethanol) for environment, but complaints of mileage and engine problem in old vehicles and 2-wheelers — Right to choose option under Consumer Protection Act 2019

Detailed Analysis — Demand for Right

1. Tax 15 years, use 10 years — what kind of justice is this? Middle class buys vehicle with its hard work. 15 years road tax in advance, insurance every year, PUC. If vehicle is PUC passed, fitness is okay, then sending it to scrap just by looking at calendar is against natural justice. In Germany, UK, USA also age is not seen, emission test is seen.

2. What should be the real parameter of pollution? Pollution is measured by PUC machine. If a 12 year old diesel car is passing BS-4 standard and a 3 year old car is failing, then which should be removed? Policy should be — Pollution Based, Not Age Based.

3. Public's questions to Government

- Should not more importance be given to actual pollution level of vehicle than age of vehicle?
- When owner pays tax, green tax, toll then who will protect his interests?
- Is giving option of pure petrol along with E20 not consumer right?
- Were opinions of small traders, transporters, middle class taken while making policies?

4. Two-point demand of Temple Trust — K K Chhabra and Pinki Kundu

First Demand: Vehicle which fulfills prescribed PUC/BS standards should not be banned on basis of age. Option should be given to increase its validity by 3-5 years on basis of fitness test, as is there in other states.

Second Demand: Along with E20, pure petrol without ethanol should also be made available at all petrol pumps, so that consumer can choose according to compatibility of his vehicle. This is respect for consumer's right to choose.

5. Way to solution Government should hold public discussion, include vehicle owners, technical experts, environmentalists in a high-power committee. Proper compensation, tax refund, and fitness based system should be implemented in scrap policy.

Proposed Ban on BS-IV Diesel Taxis and Tourist Buses Poses Serious Threat to Tourism Industry: Sanjay Samrat

Parivahan Vishesh News

Writes to Chief Minister Rekha Gupta, Seeks Urgent Intervention and Meeting

President of the Delhi Taxi & Tourist Transporters Association (Regd.), has written to Delhi Chief Minister Mrs. Rekha Gupta, urging her to intervene in the proposed restrictions on BS-IV diesel tourist taxis and buses and address various pressing issues affecting the transport sector.

Sanjay Samrat stated that the proposed restrictions on BS-IV diesel vehicles from 1 November 2026 could threaten the livelihoods of thousands of transporters and drivers. The transport and tourism industry suffered severe losses during the COVID-19 pandemic, when business remained disrupted for nearly two years. The industry has continued to face several challenges since then. Tourist vehicles generally receive regular business for only five to six months a year, while expenses such as bank EMIs, taxes, insurance and maintenance must be paid throughout the year.

He emphasized that vehicle owners have invested lakhs of rupees in purchasing their vehicles. Imposing sudden restrictions would cause substantial financial losses to transporters and adversely affect the livelihoods of thousands of families.

The Association has also sought relief from heavy traffic challans, a review of provisions relating to stringent action against vehicles when challans remain unpaid for 45 days, affordable and transparent Panic Button/VLTD systems, and solutions to other pending transport-related issues.

Sanjay Samrat has requested the Chief Minister to grant the Association an early meeting and facilitate a meeting with the Chairman of the Commission for Air Quality Management (CAQM). The objective is to discuss the problems faced by the transport and tourism industry and work towards practical and fair solutions. He stated that the Association is not opposed to pollution control measures. However, environmental protection must go hand in hand with safeguarding the financial interests of transporters, protecting drivers' employment and ensuring the future of the tourism industry.

President Delhi Taxi & Tourist Transporters Association (Regd.)

One WhatsApp Chat, Screenshot Murder Allegation and Supreme Court's Decision!

Parivahan Vishesh news

Chat in mobile itself is not proof of guilt! Big question of justice in digital era

Analysis - Advocate Kishan Sanmukdas Bhavnani, Gondia

In digital revolution investigation has changed, but principle of justice has not - In the era of AI, Deepfake, screenshot, courts will have to take strict test of truthfulness. This decision is not against WhatsApp, but judicial caution against punishment without solid proof.

Facts at a glance

- Case: Kusumal Sav vs State of Chhattisgarh | Criminal Appeal No. 4994/2026 (SLP CrI 11542/2026)

- Bench: Justice Manoj Mishra and Justice Vijay Bishnoi | Neutral Citation: 2026 INSC 1148

- Judgment date: 13 October 2026 (Discussion 23 October 2026)

- Original incident: 9 February 2019

- Body of Saurabh Panda found in open field, motorcycle and rope nearby

- Lower court: Convicted under IPC 302 (Murder) and 201 (Destruction of evidence), High Court upheld

Main Points

1. WhatsApp message: Message of night of 7-8 February between phones of PW-5 and PW-6, in which alleged dispute mentioned - Prosecution made it main basis

2. Witnesses turned hostile: Both witnesses denied eyewitness incident, one said I did not send such message at all

3. Interpretation of Section 6: Res Gestae - When time of death itself is not fixed, then how is message part of same transaction?

4. Section 65-B / 61-63: Existence of electronic record is different, truth of what is written in it is different - Certificate and source necessary

5. Contradiction in physical evidence: Blood-stained soil, iron rod, recovery of shirt - contradiction regarding place, no DNA match, alternative possibility of falling from motorcycle not ruled out

Historic decision of Supreme Court

- WhatsApp chat/screenshot alone cannot prove murder
- Difference between suspicion and conviction
- benefit of doubt to accused

October 2026 | Parivahan Vishesh Newspaper | Legal Special - Digital Evidence Special

One WhatsApp Chat is NOT Proof of Murder! - Historic Verdict of Supreme Court

Chat in Mobile is not proof of guilt - No punishment on suspicion

Supreme Court Verdict

2-Judge Bench: Justice Manoj Mishra and Justice Vijay Bishnoi

- Verdict: Mere WhatsApp chat cannot be considered as evidence of murder

- Benefit of doubt to accused - reiterated "No punishment on suspicion"

Decision: Appeal Accepted | Accused Acquitted

2026 INSC 1148 | 13.10.2026

Legal Importance & Evidence Rules

Digital Evidence - WhatsApp Chat

- Single chat message is not proof, corroboration and verification necessary

Evidence Act - Section 65B

- Certificate mandatory for electronic record

Evidence Act - Section 6 (Res Gestae)

- Only immediate statement connected to incident is valid under Res Gestae

Supreme Court's Main Observation: "Mere presence of WhatsApp chat in mobile is not sufficient to prove crime. Conviction without other solid scientific/physical evidence is not legally tenable."

Advocate Kishan Sanmukdas Bhavnani, Gondia Analysis

Sanjay Kumar Bathla, Chief Editor

Pinki Kundu Sub-Editor

Publication: Parivahan Vishesh Newspaper | October 2026 Edition | For Legal Awareness | Note: This verdict is for educational/informational purpose only — 2026 INSC 1148

- Complete chain of circumstantial evidence necessary, authenticity of digital record, identification of author and source will have to be proved
- Appeal accepted, accused acquitted

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, **'Parivahan Vishesh News Doordarshan,'** from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Government of India, various State Governments, and all political organizations before anyone else.

Get Ready — We're Coming Soon!

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world. After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Can Lost Eyesight Be Restored? A New Hope from Science

What Are the Vedas, and What Have They Given the World?

Parivahan Vishesh News

Radhe-Radhe ji! Hari Bol! Jai Shri Radhe Krishn!
The Vedas occupy a foundational place in Sanatana Dharma and are among the most important sources for understanding ancient Indian religious, philosophical, and intellectual traditions.

1. What are the Vedas?

The four Vedas are:

- **Rigveda (ऋग्वेद)** — hymns addressed to

various deities, including hymns exploring the nature and origins of existence.

- **Yajurveda (यजुर्वेद)** — mantras and

instructions associated with Vedic rituals. - **Samaveda (सामवेद)** — verses

arranged primarily for chanting and singing in ritual contexts.

- **Atharvaveda (अथर्ववेद)** — hymns,

prayers, domestic rites, and material relating to healing and everyday concerns.

2. How old are the Vedas?

The Vedas were transmitted orally across generations before being preserved in written manuscripts. The Rigveda is generally regarded by historians as the oldest of the four. Its composition is commonly placed in the second millennium BCE, although the precise chronology and development of Vedic literature remain subjects of scholarly research.

In Hindu tradition, the Vedas are regarded as Shruti and are understood by many traditions to be apauruseya — not authored by an ordinary human being.

3. What did the Vedic tradition contribute to the world?

Vedic literature is important for the study of ancient Indian language, poetry, ritual, religious thought, oral transmission, and intellectual history. The wider Indian knowledge tradition also made substantial contributions to mathematics, astronomy, linguistics, philosophy, and medicine.

However, historical accuracy matters: not every later Indian scientific achievement can automatically be attributed to the four Vedas themselves. Specific claims about discoveries, inventions, or technologies must be examined against the relevant texts and

(Karva Chauth Humorous Satire) Gaath-Gaath Ras Hoy

Parivahan Vishesh News

Dr. Vinod Babbar

As Karva Chauth approaches, everywhere on social media humour, jokes, satire, sarcasm are seen scattered. It is true that as many poems, satires, jokes are on husband-wife bickering, perhaps hardly on any other subject. There may be thousand reasons but main reason is the liveliness like in this relationship is perhaps hardly in any other relationship. Almost every wife says - 'It is only me who has managed with someone like you. If there was any other woman then.....!'

Husband also is no less - 'Leave it, I will get thirty-six like you.'

Look carefully. If second one is needed then husband wants exactly like the same one. We wanted to know from a learned woman about above proud statement of every wife, then she said, 'If there was another woman then.... then... she also then...!'

Where is anything wrong in it. Once a decent police officer said to a dacoit, 'Beware!

If you take even one step forward then.. then..!' The dacoit asked, 'Then.. then.. what?' The decent man's answer was, 'Then.. then.. I will go two steps back.' Oh brother, she is Indian woman. If there was another woman, she also would be endowed with same sanskars. She also would have managed but would definitely say, 'If there was

What Are The Vedas and What Have They Given to the World? — What Are The Vedas?

❖ What Are The Vedas?

The Vedas are the most ancient sacred scriptures of India, composed in Sanskrit thousands of years ago by rishis. They are eternal knowledge (Sanat) that form the foundation of Indian philosophy, spirituality, science, culture, and way of life. Passed down orally for generations on palm-leaf manuscripts, the Vedas guide humanity toward truth, duty, wisdom, and harmony with nature.

❖ What They Gave to the World

- Yoga & Meditation	→ Mind-body balance, inner peace
- Mathematics & Astronomy	→ Concept of zero, time cycles, celestial observations
- Medicine & Healing	→ Ayurveda, herbal knowledge, natural healing
- Music & Arts	→ Foundations of classical music, rhythm, and dance
- Ethics & Dharma	→ Duty, morality, justice, and harmonious living
- Language & Literature	→ Sanskrit, grammar, and profound poetry

❖ Core Message
The Vedas teach unity of all life, respect for nature, pursuit of knowledge, and living in harmony with dharma and the universe. Their wisdom continues to inspire science, art, philosophy, and spirituality worldwide.

❖ The Four Vedas

Rigveda

Hymns of Praise

- Knowledge of creation, nature, and the cosmos.
- Over 10,600 hymns to natural forces and deities

Yajurveda

Rituals & Sacrifices

Procedural knowledge for ceremonies

- Guidance for righteous actions and duties

Samaveda

Melodies & Chants

- Roots of Indian classical music
- Hymns sung in rhythmic musical form

Atharvaveda

Healing & Everyday Life

- Knowledge of herbs, wellness, protection
- Practical wisdom for health and society

historical evidence.

4. Did the Vedas contain all modern scientific knowledge?

This claim should not be accepted or rejected without examining the evidence. Ancient texts may contain profound observations, philosophical insights, and ideas that remain meaningful today. But a modern scientific discovery can be credited to an ancient text only when a clear, verifiable passage supports that interpretation.

Scientific claims require evidence, precise definitions, and reproducible testing. Symbolic or spiritual interpretations should not automatically be treated as scientific proof.

5. What can we learn from studying

the Vedas?

We can explore their hymns, philosophy, ideas about existence, relationship with nature, spiritual practices, and place in the development of Indian civilization. Studying them carefully can deepen our understanding of our heritage while encouraging thoughtful inquiry.

Our guiding principle should be: respect our ancient wisdom, study original sources, verify historical claims, and distinguish spiritual belief from scientifically established fact.

True appreciation of our heritage does not require exaggeration. Truth, knowledge, and sincere inquiry strengthen it.

Jai Shri Radhe Krishn!

Parivahan Vishesh News

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

24 OCTOBER 2026 | Day vibration: 8 — Ambition, authority, finance, discipline and responsibility

Moolank 1

Money & Career: Day 8 strengthens ambition, authority and material focus around your natural leadership. Good for taking responsibility, negotiating terms and making a practical business move, provided ego does not replace strategy.

Relationship: Two strong energies can make you decisive but less patient. Include the other person in important decisions instead of announcing the outcome.

Precaution: Avoid dominance, status spending and turning disagreement into a contest of authority.

Make Your Day Better: Lead with discipline and let results—not ego—prove your strength.

Moolank 2

Money & Career: Day 8 asks your sensitive nature to become financially firmer. Review joint money, fees, payments or professional boundaries and speak clearly about what is fair.

Relationship: You may feel pressure from stronger personalities today. Stay gentle without surrendering your needs or allowing guilt to shape decisions.

Precaution: Avoid underpricing yourself, emotional spending and agreeing simply to avoid conflict.

Make Your Day Better: Pair intuition with firm boundaries in one important conversation.

Moolank 3

Money & Career: Day 8 gives commercial direction to your creativity and communication. Present your ideas professionally, discuss value confidently and focus on work that can produce measurable results.

Relationship: Your expressive style can soften the day's serious tone. Use warmth, but do not joke away an issue involving money, responsibility or commitment.

Precaution: Avoid showy spending, exaggerated promises and chasing recognition without substance.

Make Your Day Better: Turn one creative idea into a practical value proposition.

Moolank 4

Money & Career: Day 8 works strongly with your disciplined nature. Budgeting, systems, property, contracts or long-term business planning can benefit from patient, methodical action.

Relationship: Responsibility may dominate your attention. Make sure rules and practical concerns do not make the relationship feel like another project to manage.

Precaution: Avoid rigidity, pessimism and excessive control over shared money or routines.

Make Your Day Better: Strengthen one long-term foundation while remaining open to reasonable input.

Moolank 5

Money & Career: Day 8 asks your fast-moving energy to become commercially disciplined. A deal, sales opportunity or business contact may be useful, but verify numbers before taking a financial risk.

Relationship: Freedom may clash with expectations around responsibility. Be transparent about plans, money and commitments so spontaneity does not look unreliable.

Precaution: Avoid speculation, impulsive purchases and changing direction because of short-term excitement.

Make Your Day Better: Use flexibility to negotiate better—not to escape responsibility.

Moolank 6

Money & Career: Day 8 brings strong focus to money, value and responsibility. Your eye for quality can help in client work or financial planning, but luxury and comfort must stay within limits.

Relationship: Love may be expressed through security and practical support today. Do not let money become the measure of affection or appreciation.

Precaution: Avoid overspending on loved ones, possessiveness and taking on financial burdens to maintain harmony.

Make Your Day Better: Create security with a sensible decision rather than an expensive gesture.

Moolank 7

Money & Career: Day 8 pushes your analytical nature toward practical results. Research investments, contracts or career strategy carefully, then convert insight into a clear decision rather than remaining in analysis.

Relationship: You may become private when pressure rises. Explain what you are thinking so silence is not mistaken for mistrust or emotional distance.

Precaution: Avoid suspicion, financial secrecy and delaying necessary action while seeking perfect certainty.

Make Your Day Better: Use one verified insight to make a practical, measured move.

Moolank 8

Money & Career: Your Moolank 8 strongly resonates with Day 8, amplifying ambition, discipline, authority, finance and karmic responsibility. Excellent for serious business planning, collections or long-term decisions when ethics remain central.

Relationship: Intensity and control can increase. Respect the other person's voice and remember that stability grows through fairness, not pressure.

Precaution: Avoid power struggles, harsh judgments, risky financial leverage and work obsession.

Make Your Day Better: Use power responsibly and complete one important financial or professional obligation.

Moolank 9

Money & Career: Day 8 gives material structure to your purposeful energy. Channel generosity into planned giving, complete financial obligations and focus resources where they can create lasting impact.

Relationship: You may feel responsible for protecting everyone. Support loved ones, but allow them to make their own choices and carry their share.

Precaution: Avoid guilt-based spending, rescuing others financially and reacting dramatically to unfairness.

Make Your Day Better: Direct your strength toward one meaningful result without carrying everyone's burden.

Effectively curb drug trafficking, give positive direction to youth power: DC

Parivahan Vishesh News

DC Varsha Khanwal reviewed drug trafficking cases in the ENCORD meeting and issued necessary guidelines to the concerned departments.

Education department plays an important role in the campaign against drug abuse, instructions given to make students aware*DC said- Increase awareness in educational institutions and rural areas along with monitoring drug networks.

Jhajjar, October 23

DC Varsha Khanwal said that all relevant departments should work in coordination to effectively control the drug problem. While ensuring strict action against those involved in drug trafficking, a comprehensive campaign should also be launched to raise awareness among youth about the ill effects of drug abuse.The Deputy Commissioner was reviewing drug control-related work during the ENCORD (Narcotics Coordination) meeting in the Mini

Secretariat auditorium on Friday, giving necessary guidelines to officials. Earlier, Chief Secretary Anurag Rastogi reviewed ENCORD with all deputy commissioners in the state via video conferencing.The DC stated in the meeting that all relevant departments, including the police, administration, health, and education, play a vital role in the fight against drug abuse. All departments should work diligently, in accordance with their assigned responsibilities, and contribute to the creation of a drug-free society. He directed that drug trafficking-related activities be monitored and prompt action be taken upon receiving information about suspicious activities. He also directed that awareness activities be promoted in schools, colleges, and rural areas to keep youth away from drug abuse.*Drug abuse will be stopped with the participation of the general public*The DC said that the concerned departments should work in coordination to provide treatment and counseling facilities to those affected by drug addiction. Public participation can make the campaign against drug addiction more effective.He urged officials to regularly review drug

control efforts and take concrete steps to achieve set goals. The district administration is committed to raising awareness about the ill effects of drug abuse and curbing drug trafficking.*Awareness through e-pledge and prayer assembly in school*DC Varsha Khanwal stated that the Education Department is encouraging students to stay away from drugs and play their role in building a drug-free society. In this regard, students have been administered an e-pledge in educational institutions. Additionally, school prayer meetings are being held to raise awareness about the ill effects of drug abuse, its social and health risks, and the importance of abstaining. Regarding the continuation of these awareness activities, the DC emphasized that it is essential to develop awareness about drug abuse among students from an early age. Awareness programs conducted at the school level can inspire children to make informed decisions and spread the anti-drug message to their families and society.Monitoring and effective action against drug trafficking is essential.The DC directed the concerned departments to closely monitor drug trafficking activities and take prompt action upon receiving information, as per the regulations. Better coordination should be maintained between departments to curb the illegal drug trade. Necessary steps should also be taken to connect individuals affected by drug addiction with treatment and counseling facilities. He stated that the participation of the administration, educational institutions, parents, and the general public is crucial to achieving the goal of a drug-free Jhajjar. Collective efforts and continued awareness will help keep youth away from drugs and build a healthy society.*Here it is*On this occasion, DCP Faisal Khan, SDM Jhajjar Ravi Meena, SDM Beri Renuka Nandal and other concerned officers were present.

Complete transparency is being maintained in voter list revision: District Election Officer

Parivahan Vishesh News

Final voter list will be released on November 6

DC Varsha Khanwal reviewed the work of SIR with the officials.

Remaining notice hearing to be completed by October 28

Jhajjar, October 23

he Special Intensive Revision (SIR)-2026 is being carried out in a transparent and systematic manner in Jhajjar district. The administration's primary objective is to ensure that no eligible voter is deprived of enrolment. To this end, all concerned officials are working within the established timeframe.On Friday, Haryana Chief Electoral Officer A. Srinivas reviewed the SIR campaign via video conferencing with the Deputy Commissioners of all districts in the state. During the video conferencing, the progress made so far in Jhajjar district was also reviewed. During the video conferencing, DC and District Election Officer Varsha Khanwal provided detailed information to the Chief Electoral Officer about the ongoing activities and work under SIR in the district.Following the video conference, DC Varsha Khanwal held a meeting with the concerned officials to review the progress of the SIR process and provide necessary guidance. She emphasized that voter list purification is a crucial part of the democratic process, and therefore, all officials should discharge their duties with utmost seriousness, transparency, and responsibility. She clarified that no eligible voter's name should be left out of the list and that all revision work should be completed within the stipulated timeframe.The DC stated that hearings on notices issued under the SIR process are ongoing. Instructions have been given to complete hearings on the remaining notices by October 28. He instructed officials to ensure there is no laxity in delivering notices to the concerned voters and in the hearing process, and to ensure each case is resolved according to the rules.The District Election Officer stated

that during the SIR process, applications received through Form 6, Form 7, and Form 8 are also being processed as per the rules. Applications have been received for inclusion in the voter list through Form 6, for deletion claims through Form 7, and for amendments to details through Form 8, among other prescribed services. Officials have been instructed to ensure the timely disposal of these applications according to the prescribed procedures.Providing information regarding the voter list, the DC stated that a total of 668,832 voters in the district are registered in the draft voter list issued as of July 31, 2026. Booth-level officers have been deployed at all 807 polling stations in the district. Supervisors have also been appointed to monitor their work, so that the progress of the SIR campaign can be continuously monitored and any problems can be resolved in a timely manner.DC Varsha Khanwal stated that, as directed by the Election Commission of India and the Chief Electoral Officer, Haryana, the final voter list will be published on November 6, 2026. She directed all concerned officials to complete the remaining revision work within the stipulated timeframe. Furthermore, it is important to ensure that all procedures related to voter registration are followed to ensure the final voter list is error-free and reliable.SDM Jhajjar Ravi Meena, SDM Bahadurgarh Abhinav Siwach, SDM Badli Vishal Kumar, SDM Beri Renuka Nandal, CTM Ritu, Sub Tehsildar Election Kuldeep and other concerned officers were present in the meeting.

Pensioners should submit life certificates at the Treasury Office from November 1: DTO

Parivahan Vishesh News

-Online certificates can be submitted through smartphone
- District Treasurer Sanjay Phogat gave the information

Jhajjar, October 23.

All pensioners receiving pensions from the District Treasury Office and Sub-Treasury Offices can submit their life certificates at the respective Treasury Offices, as well as through other means, according to District Treasury Officer Sanjay Phogat.

He stated that this facility is also being made available at all post offices and at home, for which a prescribed fee has been set. This online life certificate facility is also available at all Common Service Centers and Atal Seva Kendras. The online certificate can also be submitted via smartphone. There is no fee of any kind for this process; it is free.

The Treasury Officer informed that any member of the family can do the above work himself through his smartphone. For this, both the Jeevan Pramaan Patra Face App and the second Aadhar Face RD software will have to be installed from the Play Store on his smartphone, after which

the life certificate of any pensioner can be submitted online. He informed that in order to avoid overcrowding in the Treasury office in the initial days, you are informed that older and respected senior citizens should consider coming themselves for their life certificate, so that more trouble can be avoided in the initial days.

Pensioners must bring with them Aadhar Card (original), PAN Card and photo copy of PPO and also bring the mobile phone which is linked to the pension account for OTP.

The Scientific Understanding of Beauty: The Equation of Objects and Architecture

Parivahan Vishesh News

Dr. Vijay Garg

Beauty is an essential part of human life. We experience it in the colours of nature, the design of buildings, the arrangement of objects, the patterns of flowers and the harmony of music. Although beauty is often considered a matter of personal taste, science reveals that our perception of beauty is also influenced by mathematical patterns, biological responses, psychological processes and cultural experiences. Understanding the relationship between objects and architecture offers an interesting way to explore the science of beauty. ### Beauty Beyond Appearance Beauty is not merely about external appearance. It also involves balance, proportion, symmetry, harmony, functionality and the relationship between different elements. A beautifully designed building, for example, is not necessarily one with expensive materials or elaborate decoration. Its beauty may arise from the intelligent use of space, natural light, ventilation, suitable proportions and a meaningful connection with its surroundings. Similarly, an ordinary object can become aesthetically appealing when its shape, colour, texture and function work together. A well-designed chair, a simple clay pot or a neatly arranged study table demonstrates how beauty can emerge from simplicity and thoughtful design. The scientific study of beauty therefore encourages us to look beyond appearances and examine the principles that make something attractive, useful and meaningful. ### The Mathematics of Beauty Mathematics plays a significant role in the perception of beauty. Symmetry, proportion, patterns and geometric relationships are found throughout nature and human-made structures. The spiral arrangement of sunflower seeds, the branching of trees, the patterns of shells and the symmetry of many flowers demonstrate how mathematical principles influence natural forms. In architecture, proportion helps create visual balance. The relationship between the height and width of a building, the spacing of windows, the arrangement of columns and the design of entrances can influence how people perceive a structure. Geometric patterns and repeated forms can produce a sense of order and coherence. The golden ratio is frequently discussed in connection with artistic and architectural beauty. Although it has appeared in various designs, it should not be treated as a universal formula for beauty. Human preferences are diverse, and attractive designs can follow many different proportions. The deeper lesson is that mathematical order can contribute to beauty, but beauty cannot be reduced to a single equation. ### Objects and Architecture: An Interconnected Relationship Objects and architecture are closely connected. Objects occupy spaces, while architecture provides the setting in which those objects are used, displayed and experienced. Their relationship can strengthen or weaken the overall aesthetic effect of an environment. Consider a room with carefully selected furniture, harmonious colours, appropriate lighting and sufficient open space. Each object may be attractive individually, but the room becomes truly appealing when all its elements complement one another. Conversely, too many decorative objects, conflicting colours or poorly arranged furniture can create visual confusion. This relationship may be described as the object–architecture equation: the aesthetic quality of a space depends not only on its individual components but also on how those components

interact. The equation is conceptual rather than a fixed mathematical formula. It highlights the importance of coordination, proportion, function and context in creating beautiful surroundings. ### The Psychology of Beauty Human perception plays a crucial role in determining what appears beautiful. Research in psychology suggests that people often appreciate visual clarity, familiar patterns, balanced compositions and certain forms of symmetry. However, individual preferences also depend on experience, emotions, upbringing and cultural background. A traditional Punjabi courtyard may evoke feelings of belonging and nostalgia for one person, while a minimalist modern house may inspire another through its simplicity. Both can be beautiful because beauty involves more than physical structure; it also includes emotional and cultural meaning. Colour is another important factor. Soft colours may create a sense of calm, while contrasting colours can attract attention and communicate energy. Lighting changes how colours, textures and shapes are perceived. Natural light can make a space feel open and welcoming, whereas poorly planned lighting may diminish its visual appeal. Beauty, therefore, emerges through an interaction between the physical environment and the human mind. ### Nature as a Teacher of Design Nature offers valuable lessons for architects, artists and designers. Trees demonstrate the relationship between structure and stability. Flowers reveal the expressive potential of colour and symmetry. Mountains illustrate the beauty of scale, while rivers and landscapes show how irregular forms can create harmony. Natural beauty is not always symmetrical. Clouds, rugged mountains, flowing rivers and weathered stones possess distinctive appeal precisely because they are irregular. This reminds us that perfection does not always mean uniformity. Modern architecture increasingly explores natural light, greenery, natural materials and energy-efficient designs. Such approaches can improve the visual quality of buildings while supporting comfort and environmental responsibility. Beauty becomes more meaningful when it works in harmony with nature rather than against it. ### Functionality and Sustainability A beautiful object or building should ideally serve its purpose effectively. A chair that looks attractive but is uncomfortable is an incomplete design. A magnificent building that wastes energy, blocks natural light or ignores accessibility may also fail to meet important human needs. Good design brings aesthetics and

functionality together. It considers the needs of children, older people and persons with disabilities. It makes efficient use of available space, reduces unnecessary waste and encourages sustainable construction. Similarly, choosing durable materials, repairing useful objects and avoiding excessive decoration can promote both environmental responsibility and aesthetic simplicity. In this sense, beauty is not merely something to look at; it is something to experience through comfort, usefulness and harmony. ### Can Beauty Be Measured? Science can measure several features associated with beauty, including symmetry, proportions, colour contrast, lighting levels and spatial relationships. Researchers can also study people's responses to different designs through surveys, experiments and physiological observations. However, no scientific instrument can completely capture the emotional, historical and cultural significance of every beautiful object or building. Two people may observe the same structure and experience entirely different feelings. Beauty is therefore partly measurable and partly subjective. Scientific principles help explain why certain designs appeal to many people, but they do not eliminate the diversity of human taste. ### Conclusion The scientific understanding of beauty reveals a fascinating relationship between objects, architecture, mathematics, psychology and nature. An attractive environment is rarely the result of a single feature. It emerges from the thoughtful interaction of proportion, colour, texture, light, functionality and human experience. The equation of objects and architecture teaches us that beauty lies not only in individual things but also in the relationships among them. A simple object placed thoughtfully in a well-designed space may create greater harmony than expensive decoration without purpose. Ultimately, the science of beauty encourages us to design with intelligence, sensitivity and responsibility. When aesthetics combine with usefulness, sustainability and human values, beauty becomes more than visual pleasure—it becomes an expression of a balanced and thoughtful way of living.

Jharkhand's young cricketer Shikhar has been selected in the Indian team for the New Zealand tour.

Parivahan Vishesh News

Kartik Kumar Parichha, State Head - Jharkhand

Ranchi, Jharkhand's young batsman Shikhar Mohan has made a name for himself with his performances in domestic cricket. The 21-year-old left-handed opening batsman, who grew up in Doranda, Ranchi, has been selected for the India A Test team for the New Zealand tour. This selection is being considered a significant milestone in his cricketing career. A consistent run-scorer in domestic competitions, Shikhar will now be expected to perform well in future occasions. However, he will need to continue to prove his mettle to secure a place in the Indian senior team.Shikhar began playing cricket at a young age. He began training at the Ranchi Cricket Academy at the age of six. He is a student of Jawahar Vidya Mandir, Shyamali, the same school where former Indian cricket captain Mahendra Singh Dhoni also studied. Representing the Jharkhand domestic team, Shikhar has caught the attention of selectors with his batting.Shikhar's performance has also been discussed in connection with his last Ranji Trophy season. Playing for Jharkhand in the 2025-26 season, he scored 613 runs at an average of 55.72. During this period, he scored a double century against Nagaland and a century against Baroda. These performances established him as one of Jharkhand's emerging batsmen.Additionally, he scored 85 runs for East Zone in the final of the Duleep Trophy. He also earned a place in the Rest of India squad for the Irani Cup, scoring 60 runs. Consistently playing and scoring runs in various domestic competitions has given him the opportunity to showcase his talent on a larger stage.Jharkhand Cricket Association Vice President Sanjay Pandey described Shikhar Mohan's selection as a matter of pride for the state. He said that Jharkhand continues to produce better cricketers. Shikhar is a talented player with a bright future. He hopes he will make it to the Indian team in the future. He wished Shikhar all the best for his future performance.

Shikhar Mohan has been included in the India A squad as a replacement for the injured Rishabh Pant. The Jharkhand State Cricket Association (JSCA) has confirmed this. Mohan has been selected for the second and third unofficial Test matches, both of which will be four-day matches. He has been named in the squad following Pant's injury.Selection in the India A Test team is another opportunity for Shikhar to prove his talent. Performance at this level could help him gain experience and strengthen his claim for the future. However, selection into the senior Indian team will depend on his performance, the team's needs, and the selectors' decision. Currently, Shikhar faces the challenge of capitalizing on the opportunity presented during the New Zealand

tour and maintaining his consistency. Jharkhand cricket fans will also be closely monitoring the performance of this young batsman from Ranchi.Ranchi, Jharkhand's young batsman Shikhar Mohan has made a name for himself with his performances in domestic cricket. Parivahan Vishesh News

Dr. Vijay Garg

Every society has people who enjoy privileges because of their wealth, education, social position, family background, professional achievements or influence. Privilege can open doors, create opportunities and make life more comfortable. However, an important question deserves reflection: what do we do with the advantages we possess? Do we use them only for personal comfort, or do we recognise our responsibility towards those who have fewer opportunities? The mirror of conscience asks us to look beyond our achievements and examine our character. It reminds us that privilege should inspire gratitude, humility and service rather than arrogance, superiority and entitlement. ### Understanding Privilege Privilege does not always mean possessing enormous wealth or holding a powerful position. A good education, a supportive family, a safe home, access to healthcare, freedom to express opinions and the opportunity to pursue one's

ambitions are also forms of privilege. Some people receive these advantages through circumstances beyond their control, while others work hard to create better opportunities for themselves and their families. The problem begins when people mistake their advantages for proof of their inherent superiority. Someone born into a wealthy family may assume that success is entirely the result of personal merit, overlooking the opportunities and support that made it possible. Similarly, a person occupying a powerful position may begin to believe that special treatment is a natural right. Such attitudes gradually weaken empathy and create divisions within society. ### Privilege Must Bring Responsibility Privilege becomes meaningful when it is accompanied by a sense of duty. Education should

encourage enlightened thinking and social awareness. Wealth should create opportunities for others. Authority should protect fairness and justice. Professional success should inspire mentorship and knowledge-sharing. A teacher who has gained knowledge has a responsibility to guide students. A doctor who possesses medical expertise can contribute through compassionate care and public awareness. An influential citizen can speak against injustice, while a successful entrepreneur can create employment and support community development. These actions do not require people to abandon their personal ambitions. Rather, they encourage individuals to understand that personal success and collective well-being can strengthen each other. A society progresses when its successful members

help others rise instead of using their advantages to maintain distance from them. ### The Danger of Entitlement Entitlement develops when people believe they deserve special treatment simply because of their position, wealth, family connections or social identity. It can appear in everyday behaviour: expecting others to wait unnecessarily, ignoring rules, misusing public resources, demanding favours or treating workers with disrespect. When privilege becomes entitlement, accountability disappears. People begin to expect obedience instead of cooperation and admiration instead of earning respect. This attitude is particularly damaging when it influences public institutions. Positions of authority exist to serve people, not to provide personal comfort or unrestricted power.

The Skills Young People Need to Succeed at Work

Parivahan Vishesh News

Dr. Vijay Garg

In today's rapidly changing world, academic qualifications alone are no longer sufficient to guarantee professional success. Education remains essential, but employers increasingly seek young people who can communicate effectively, think critically, solve problems, work in teams and adapt to new technologies. The transition from classrooms to workplaces requires a combination of knowledge, practical abilities, personal values and a willingness to learn throughout life. For generations, students have been encouraged to obtain good marks, earn degrees and secure respectable jobs. Although these achievements remain important, the modern workplace demands much more. A degree may help a young person enter an organisation, but the ability to perform, collaborate and respond to challenges determines long-term growth. Communication and Interpersonal Skills Effective communication is among the most important workplace skills. Employees must express their ideas clearly, listen carefully, write professional messages and communicate respectfully with colleagues, customers and supervisors. Good communication prevents misunderstandings, strengthens relationships and improves teamwork. Young people should develop confidence in speaking, writing and presenting their ideas. Equally important is the ability to listen to different viewpoints and accept constructive criticism without becoming defensive. Critical Thinking and Problem-Solving Employers value individuals who can analyse situations, identify problems and develop practical solutions. In an age when artificial intelligence can generate information and perform routine tasks, independent thinking becomes especially valuable. Students should learn to ask meaningful questions, examine evidence, compare alternatives and make informed decisions. Education must therefore move beyond memorisation towards understanding, experimentation,

creativity and real-life problem-solving. Digital Literacy and Artificial Intelligence Technology is transforming almost every profession, from healthcare and agriculture to banking, education and manufacturing. Young employees need basic digital literacy, familiarity with relevant software, data interpretation skills and awareness of cybersecurity. Artificial intelligence is creating new opportunities while changing existing jobs. Young people should learn to use AI tools responsibly, verify the accuracy of generated information and protect confidential data. However, technology should support human judgement rather than replace independent thinking, ethical responsibility and creativity. Teamwork, Adaptability and Emotional Intelligence Most workplaces depend on cooperation among people with different backgrounds, experiences and responsibilities. Teamwork requires mutual respect, reliability, patience and a willingness to share responsibilities. Emotional intelligence helps individuals understand their own emotions, recognise the feelings of others and manage disagreements constructively. Adaptability is equally important because job roles, technologies and organisational expectations change continuously. Young people must accept that learning does not end with graduation. Those who remain curious, flexible and open to new experiences are better prepared to face uncertainty and professional change. Time Management and Professional Ethics Meeting deadlines, arriving punctually, completing assignments and prioritising responsibilities demonstrate professionalism. Time management improves productivity and reduces unnecessary stress. Honesty, accountability, respect and integrity are equally important. Employers need people who can be trusted to fulfil commitments, handle information responsibly and acknowledge mistakes. Technical excellence without ethical conduct can damage careers and organisations alike. Practical Experience and Financial Awareness Internships, apprenticeships, volunteering, project

work and part-time employment help students understand workplace expectations. Such experiences should establish stronger partnerships with industries and local businesses. Career guidance, mock interviews, communication workshops and skill-based projects can prepare students for employment more effectively. Basic financial literacy is also valuable. Understanding salaries, budgeting, taxation, savings and responsible borrowing helps young professionals manage their earnings and make sensible financial decisions. The Role of Educational Institutions and Families Schools and colleges must recognise that employability is not the responsibility of students alone. Curricula should combine academic learning with practical training, digital competence, entrepreneurship, teamwork and ethical education. Teachers can encourage students to participate in discussions, undertake research, solve community problems and present independent projects. Families should also help young people explore their interests rather than pressuring them to follow a single definition of success. Governments and employers must expand affordable vocational training, apprenticeships and opportunities for continuous reskilling. Conclusion Preparing young people for work requires more than distributing degrees. It demands an education system that develops capable, confident, responsible and adaptable individuals. Qualifications may open doors, but skills, character and continuous learning help people progress through them. The real objective of education should not simply be to produce job seekers, but to develop problem-solvers, innovators and responsible citizens who can contribute meaningfully to society.

Editorial

My Thought

Public office is a trust, not private property. Similarly, educational qualifications and professional designations should inspire competence and ethical conduct rather than become instruments of superiority. The true measure of a person's character is not how many people serve them, but how respectfully they treat those who can offer them nothing in return. ### The Role of Family and Education The values associated with privilege are often learned during childhood. Children who grow up with material comfort must also learn gratitude, empathy, discipline and respect for people from different backgrounds. Parents can teach these values by encouraging children to appreciate the efforts of domestic workers, respect public spaces, share resources and understand the difficulties faced by disadvantaged communities. Educational institutions also have a vital role. Education should not merely prepare students for examinations, employment and financial success. It should develop responsible citizens who understand equality, justice, cooperation and social responsibility. Community service, environmental protection, volunteering and interaction with disadvantaged groups can help young people recognise that society's progress depends on mutual support. ### Holding the Mirror Before Ourselves Real change begins with honest self-examination. Each person should ask: Do I use my position fairly? Do I respect people regardless of their social status? Do I acknowledge the support that contributed to my success? Do I help create opportunities for others? Do I accept criticism and remain accountable for my actions? These questions are not intended to produce guilt about having advantages. Instead, they encourage people to use those

advantages wisely. Privilege itself is not a moral failing. The ethical question is how it is acquired, exercised and shared. Some advantages arise through hard work, while others result from unequal social structures or circumstances of birth. Recognising these differences helps us appreciate our achievements without ignoring the challenges faced by others. ### Building a More Responsible Society A fair society does not require everyone to possess identical resources or live identical lives. It requires equal dignity, fair opportunities, accountable institutions and respect for human rights. Governments must ensure that public services reach those who need them. Institutions should prevent discrimination and misuse of authority. Individuals should contribute according to their abilities and opportunities. Small acts of responsibility can create meaningful change: mentoring a student, supporting a needy family, sharing professional knowledge, protecting the environment or refusing to participate in unfair practices. Ultimately, the mirror of conscience reflects a truth that wealth, status and power cannot conceal: privilege gains moral value through responsible action. Privilege is not a certificate of superiority; it is an opportunity to make a difference. When advantages inspire service rather than entitlement, success becomes more meaningful, leadership becomes more humane and society becomes more just. The question is not simply what privilege gives us, but what we give back because of it.

Read to Remember: The Science of Lasting Memory

Parivahan Vishesh News

Dr. Vijay Garg

Reading is one of the most powerful ways to acquire knowledge, develop critical thinking and broaden our understanding of the world. Yet, many people experience a common problem: they read a chapter, an article or even an entire book, but forget much of its content within a few days. This raises an important question: how can we transform reading into lasting memory? The answer lies not in reading more pages, but in understanding how the brain learns, stores and retrieves information. By applying a few scientifically supported techniques, we can make reading more meaningful, effective and memorable. Why Do We Forget What We Read? The human brain receives an enormous amount of information every day. However, not everything we encounter is stored as a lasting memory. Information that receives little attention or is not meaningfully processed is more likely to be forgotten. Psychologist Hermann Ebbinghaus's pioneering research on memory demonstrated that forgetting can occur rapidly after learning, particularly when information is not revisited. This general pattern is known as the forgetting curve. Although the rate of forgetting varies with the nature of the material and the learner, the principle remains important: information needs reinforcement to become more durable. Reading passively, especially while distracted by mobile phones, notifications or unrelated thoughts, often produces only a superficial understanding. Our eyes may move across the words, but the brain may not process their meaning deeply enough to retain them. Read with a Clear Purpose Effective reading begins before the first sentence. Ask yourself why you are reading a particular text and what you want to learn from it. Are you preparing for an examination, understanding a scientific concept or exploring a new idea? A clear purpose directs attention towards relevant information. Before starting a chapter, examine its headings, subheadings and summary. Turn headings into questions and read to find their answers. This simple approach makes reading an active process rather than a passive activity. For students, a useful practice is to identify three to five important questions before studying a chapter. After completing the reading, they should be able to answer those questions without looking at the book. Active Recall: Make Your Brain Work One of the most effective ways to strengthen memory is active recall. Instead of repeatedly reading the same passage, close the book and try to remember its main ideas. For example, after reading a chapter on photosynthesis, explain in your own words how plants convert light energy into chemical energy. If you cannot recall an important step, return to the text, clarify the concept and test yourself again. This process strengthens the ability to retrieve information when it is needed. It also reveals gaps in understanding that passive rereading may conceal. Students can practise active recall by writing short answers, solving questions, using flashcards or

explaining a topic aloud without referring to their notes. The objective is not to reproduce every sentence but to remember and understand the essential concepts. Spaced Repetition: Review at the Right Time Memory becomes more durable when learning is revisited over spaced intervals rather than concentrated in one long session. This technique, known as spaced repetition, is particularly useful for examinations and long-term learning. A practical review schedule might involve revisiting newly learned material after one day, three days, one week and two weeks. These intervals are a flexible starting point, not a universal formula. Difficult material may require more frequent practice, while familiar concepts may need less. Each review should involve recalling the information before checking the original text. Simply looking at familiar notes can create an illusion of mastery without ensuring that the information can be retrieved independently. Short, regular revision sessions are often more effective than last-minute cramming, especially when the aim is long-term retention. Understand Rather Than Memorise Meaningful learning is more powerful than memorising isolated sentences. When new information connects with existing knowledge, the brain has more opportunities to organise and retrieve it. Suppose a student is learning about electricity. Instead of memorising a definition alone, the student can connect voltage, current and resistance with familiar examples, diagrams and practical applications. Ask questions such as: Why does this happen? How does it work? What evidence supports this explanation? How is it connected to something I already know? Summarising an idea in simple language, drawing a concept map or comparing related concepts helps build these connections. However, summaries should be written after thinking about the material, not copied mechanically from the book. Teach What You Learn Explaining information to another person is an excellent way to test understanding. When we teach, we must organise our thoughts, identify essential points and make relationships between ideas clear. A student can explain a lesson to a classmate, teach a younger sibling or pretend to deliver a short classroom lecture. If the explanation becomes confusing, it may indicate that some concepts need further study. This approach is often associated with the Feynman technique: explain an idea simply, identify gaps in your explanation, return to the source and refine your understanding. Teaching

does not merely demonstrate what we know; it can also help us discover what we have not yet understood. Protect Your Brain's Learning Capacity Memory is influenced by more than reading techniques. Sleep, physical activity, nutrition, stress and attention all affect our ability to learn. Adequate sleep helps consolidate newly acquired memories. Regular physical activity supports overall brain health, while excessive stress and frequent interruptions can interfere with concentration. Students should therefore avoid sacrificing sleep for prolonged study sessions. A quiet reading environment, short focused study periods and planned breaks can improve attention. Keeping a mobile phone away during reading may also reduce unnecessary distractions. Technology can support learning through digital flashcards, quizzes and spaced-repetition applications. However, technology is useful only when it encourages genuine thinking and retrieval rather than replacing them. A Simple Daily Reading Strategy Readers can follow a practical five-step routine: 1. Preview: Spend two minutes examining the topic and identifying what you want to learn. 2. Read actively: Focus on a short section and ask questions about its meaning. 3. Recall: Close the book and write or explain the main points from memory. 4. Verify: Reopen the text, correct mistakes and clarify missing information. 5. Review: Test yourself again after suitable intervals. Even 20 to 30 minutes of focused reading followed by recall and periodic revision can produce meaningful progress when practised consistently. Conclusion The ability to remember what we read is not simply a gift possessed by a fortunate few. It is a skill that can be improved through attention, understanding, active recall, spaced repetition and regular practice. Reading provides access to information, but reflection and retrieval help transform that information into usable knowledge. In an age of endless digital content, the real challenge is not how much we read, but how much we understand, retain and apply. The ultimate purpose of reading is not to turn pages quickly or finish more books. It is to allow ideas to shape our thinking, influence our decisions and enrich our lives. Read with curiosity, recall with effort, revise with consistency and apply with wisdom. That is the science of lasting memory.

BJP's Dr. Aastha sent smiling, and SP's Hemraj ate tea and pakoras laughing with great affection

Parivahan Vishesh News

Will 'Pakora Diplomacy' create an earthquake in Pilibhit politics? Is the electoral war just a show.

Hariom Bajpai, 'Naadaan'.

They say that in politics there is no permanent friend and no permanent enemy. But an interesting incident that happened during the MLC election has given a new twist to this proverb. Here in the electoral battlefield, standing chest to chest face to face, between arch-rival parties, 'hot tea and pakoras' played such a trick that political distances vanished in a moment. During the MLC election, the atmosphere was completely heated up. Both BJP and SP camps were pitching their 'electoral beds' and searching for each and every voter as if some lost treasure was being searched with a telescope. Verbal arrows were about to be fired when suddenlyBJP's Municipal Chairperson Dr. Aastha Agarwal sent a parcel of tea and pakoras smiling directly from her table to SP's tent. There in SP camp, former minister Hemraj Verma, Nafees Ahmed Ansari and other veteran leaders were solving their electoral mathematics, when hot pakoras arrived in a plate in front of them. At first SP leaders were startled - what is this, is there an attack from BJP's tent - but the reply came, Netaji, this is not an attack,

this is a 'treaty of taste'! Then what, the leaders who were preparing sharp speeches against each other, started laughing taking sips of tea and bites of pakoras. Perhaps they also had this thought in mind - whether the party symbol is 'Lotus' or 'Cycle', but the symbol of pakora with tea is evergreen! Where on global platforms of diplomacy, the Russia-Ukraine war is not stopping, there in Pilibhit, pakora erased the bitterness of two arch rivals in one stroke. When this unique 'alliance' of tea-pakora happened, public is asking whether the chutney was green or sweet, because sweetness had openly dissolved in the whole atmosphere! The common voter of the city is surprised, troubled, confused that - hey brother! Are you contesting election or 'MasterChef' - should we go to vote or pay the bill of these leaders' tea-party. The most painful and truth-

revealing aspect of this whole incident is that the common workers of both camps are now silent and astonished. Seeing the upcoming assembly elections ahead, workers are thinking in their mind - we are getting on the roads and unnecessarily taking enmity with each other and spoiling mutual relations, while sitting above our leaders are all one! Politics may burn the heart and mind of common public, but this 'tea-pakora diplomacy' of Pilibhit has made it clear that elections will come and go, parties will keep changing, but when it comes to mutual convenience, every opposition in Indian politics will become watery and mix in tea! Now the decision is in the hands of the public as to from what perspective it sees this 'electoral tea-party'!

Successful Organization of District Level Shooting Trial at Malik Shooting Range, Hisar

Parivahan Vishesh News

Haryana Hisar // Rajesh Saluja

District level shooting trial was successfully organized at Malik Shooting Range, Hisar. Around 200 participants enthusiastically took part in this competition and displayed their sports talent and shooting skills. Coach Kajal, Yogesh, Range Operator and Coach Sanjay Malik played important role in this event. In this event Kalpana Chawla Shaurya Awardee, honored with Bharat Gaurav Award and Everest Winner Meenu Kaliraman gave special role playing and gave her important contribution. Her active participation played important role in making the event successful. With her guidance and cooperation the trial was conducted in a systematic manner. During the competition players showed

discipline, concentration and sportsmanship. The main objective of such events is to provide opportunity to talented players to display their ability and to promote shooting sport. District level trial is an important step in direction of encouraging young players and preparing them for future

competitions. On successful conclusion of event, efforts of all participants, coaches and associates connected with event were appreciated. This successful organization will help in increasing awareness towards shooting sport in region and inspiring emerging sports talents to move forward.

Youth Are the Backbone of the Nation, But Are They Getting Justice and Equal Opportunities?

Parivahan Vishesh News

Dr. Vikram Chaurasia

India's independence was the result of the sacrifices and dedication of Mahatma Gandhi, Shaheed Bhagat Singh, Netaji Subhas Chandra Bose, and countless other freedom fighters. Their dream was not merely an independent India, but a nation where every citizen would enjoy dignity, justice, and equal opportunities. Today, the question is: Are we moving in the right direction towards realising their dream of India?Democracy is not just about voting; it is about ensuring that justice reaches every citizen, including the last person in society. When a poor or middle-class family has to struggle to get its complaint heard at a police station, or a victim feels neglected, the system must engage in serious introspection. Every citizen is equal in the eyes of the law. Caste, religion, attire, or financial status must never determine access to justice.On the other hand, reports of paper leaks and irregularities in recruitment examinations hurt the aspirations of young people who work hard for years and rely on their families' sacrifices to build a better future. When an examination paper is leaked, it is not merely the confidentiality of the examination that is compromised; the faith of honest and hardworking candidates in the system is also shaken. Therefore, a transparent system and strict action against those responsible, in accordance with the law, are essential.From politics to employment, opportunities should be based on merit, hard work, and integrity—not on undue recommendations or influence. Transparency in the electoral process and accountability of

Parivahan Vishesh News

Dr. Vikram Chaurasia

Thinker | Mentor | Activist | TV Panelist

Are we moving in the right direction? Transparent systems, justice, and the protection of young aspirants' dreams are the true measures of our progress toward a developed India.

constitutional institutions are also essential to strengthening public trust in democracy.India is committed to becoming a developed nation by 2047. However, development is not merely about modern buildings, technology, and economic prosperity. Where roads are modern but access to justice remains difficult, and where talent exists but equal opportunities are lacking, development remains incomplete.Along with rights, fulfilling our duties is equally important. If we expect honesty from the system, we must

be honest ourselves. If we oppose discrimination, we must practise equality in our own conduct and raise our voices against injustice through constitutional means. Nation-building is not the responsibility of the government alone; it is the responsibility of every citizen.Today, the need is not merely for the slogan of a Developed India, but for a nation where the voices of the poor are heard, the hard work of young people is protected, and justice does not depend on a person's status or influence.The true tribute to the

sacrifices of our freedom fighters will be paid only when every citizen receives justice, dignity, and equal opportunities. For the true greatness of a nation is measured not by the height of its buildings, but by the dignity of its citizens. The real strength of democracy lies not in power, but in justice.

Dr. Vikram Chaurasia

105 Cadets of Sainik School Khara Kheri did educational tour of LUVAS

Parivahan Vishesh News

Haryana Hisar // Rajesh Saluja

105 cadets of class 10th of Sainik School Khara Kheri, District Fatehabad, did educational tour at Lala Lajpat Rai University of Veterinary and Animal Sciences (LUVAS), Hisar. The purpose of this tour organized under guidance of University Vice Chancellor Prof. (Dr.) Vinod Kumar Verma and Dean of College of Veterinary Sciences Prof. (Dr.) Anish Yadav was to make students aware of progress happening in field of veterinary and animal science and academic and professional opportunities available in future. During the tour cadets observed various departments of College of Veterinary Sciences. Especially in museum of Department of Veterinary Anatomy they obtained important information related to anatomical structure of animals. Apart from this, they visited various sections of University's animal farm and understood processes of management, care and rearing of domestic animals. After this cadets visited Veterinary Clinical Complex (VCC), where they closely saw process of treatment of sick animals and obtained information about veterinary services. During this educational tour cadets were also given information about various courses of veterinary education, admission process in them and career opportunities available in future. This tour was extremely useful for students, because it will help them

in choosing their academic stream and future career after class 10th board examination. This educational tour was conducted by Dr. Gaurav Gupta of LUVAS. Along with cadets, Commandant of Sainik School Colonel (Dr.) D.V. Nehra (Retd), teachers Mr. Rohit Nandal and Ms. Monika and instructors Naik Sanjeev (Retd) and Mr. Ajay Kayat were also present.

Landmark Punjab & Haryana High Court Judgment (October 2026)In Haryana 24 News Network Pvt. Ltd. v. Union of India, the Punjab & Haryana High Court set aside the blocking of a news organization's Facebook page that had been restricted following a notice issued by a Superintendent of Police. The Court held that the officer lacked the statutory authority to issue such a notice, as takedown directions under Rule 3(1)(d) of the IT Rules can only be issued by specially authorized senior officers of the prescribed rank. The Court further observed that mandatory review requirements for such notices had not been complied with, rendering the action legally unsustainable. Most significantly, the Court ruled that although the IT Rules do not expressly require affected users to be informed of takedown notices, notification to the affected party is an essential component of natural justice. The Court held that a person cannot effectively challenge a takedown order unless they are informed of the grounds and material relied upon for the action. Accordingly, the Court directed the restoration of the Facebook page and held that any future takedown action must be accompanied by prompt communication of the notice to the affected user.

Today's Cybersecurity Thought

Transparency in Social Media Takedown Orders: A Significant Step Towards Natural Justice

When the government decides to remove a social media post, page, or account, or restrict its access within India, the order is generally sent directly to the platform rather than to the individual who posted the content. As a result, affected users often become aware of the action only after their content has been removed or access to it has been blocked.

Two Key Legal Mechanisms for Content Removal

- Section 69A of the Information Technology Act, 2000
 - Empowers the Central Government to block online content in the interests of sovereignty, national security, public order, and related concerns.
 - Operates under the IT (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009.
 - Such orders are treated as confidential, limiting public transparency.
- Section 79(3)(b) of the IT Act and Rule 3(1)(d) of the IT Rules, 2021
 - Authorizes the government to direct intermediaries to remove unlawful

content.

- Following the February 2026 amendment, platforms must act on such notices within three hours.
- Many notices are issued through the Sahyog Portal, operated by the Ministry of Home Affairs' cybercrime coordination framework.

Landmark Punjab & Haryana High Court Judgment (October 2026)In Haryana 24 News Network Pvt. Ltd. v. Union of India, the Court set aside restrictions imposed on a news organization's Facebook page.

The Court made several significant observations:

- Only duly authorized senior officers can issue takedown notices.
- Such notices must be subject to mandatory periodic review.
- Most importantly, affected users must be informed of takedown orders, even if the rules do not expressly require such notification.

The Court held that removing content without informing the affected user violates the principles of natural justice,

as it deprives the individual of the opportunity to challenge the action.

Significance of the October 2025 Amendment

Under the government's amendment:

- Only senior-level officers are authorized to issue takedown notices.
- Notices must be written and reasoned.
- They must clearly specify the legal provision invoked and the URL targeted for removal.
- Monthly review of all notices is mandatory.
- Police notices can only be issued by specially authorized officers of DIG rank or above.

However, the amendment did not include a requirement to notify affected users. The High Court's ruling effectively fills this gap by reading the requirement into the principles of natural justice. Section 69A and the Question of Secrecy Blocking orders issued under Section 69A are generally not made public. Consequently, affected individuals often do not know the grounds on which action has been taken against their content. Digital rights advocates have long argued that greater transparency and scope for judicial scrutiny are essential to ensure accountability.

Regulating unlawful online content is necessary, but transparency and due process are equally important safeguards in a democratic digital ecosystem.“In the digital age, a balance between freedom of expression and national interests can be achieved only when affected citizens are informed of the action against them, given an opportunity to be heard, and provided access to legal remedies.”

Industry Centre Awareness Camp

Parivahan Vishesh News

Khunti. District Industries Centre, Khunti organized a one-day Awareness Camp for Udyam Registration. In which District Industries Centre's EODB Manager gave information to a large number of women and men about self-employment related to industry. Vacate the throne, for the people are coming!

Parivahan Vishesh News

(Article: Rajendra Sharma)

On the occasion of elections in Bihar, Prime Minister Narendra Modi does not forget to remember Ramdhari Singh Dinkar. But, it seems that the Prime Minister has found his advantage in adopting a posture of pretending not to understand, even after understanding, this timeless line of the great poet. Otherwise, the way for about the last week the ruling regime, by making a completely false noise of not only indigenous but even foreign conspiracies of its removal, has tried to cover up the anti-constitutional, anti-democratic conspiracy to render meaningless the very elections held in its own regime, it would have declared the said line of Dinkar as anti-national long ago. Because the poet has talked about vacating the throne for the wish of the people, but he has not added in clear words the condition that the people (the wish) comes through elections! It is even more ironic that the accusations of conspiring to change power through undemocratic methods, instead of through the democratic method of changing power through elections, are being levelled against their opponents and critics by the same ruling Sangh-BJP gang, against whom the allegation itself is that it has conspired, together with a completely biased Election Commission, to block the very path of change of power through elections. In other words, the accusation of the rulers against the opposition of attempting to change power through undemocratic methods is actually complementary to the arrangements of the present regime to render elections themselves meaningless in the country. The rulers are worried that they have made the arrangement that they cannot be removed from power through elections, but this also does not give full security against the 'people barging in'. Dictators always need state violence for security against the coming of the people and to make every activity of the people, every movement, into a criminal conspiracy for full security from the people. The present Modi-Shah regime has achieved great mastery in making every movement of the people against it, every serious criticism of it, into a criminal conspiracy. It will be enough to recall here only three special examples of this anti-people and in the basic sense anti-democratic game. Its first example is the Bhima Koregaon conspiracy case, in which a mainly Dalit mobilisation, to defend completely unprovoked violence of upper-caste Hindutva gangs, was turned into a conspiracy to overthrow the regime and to remove Prime Minister Modi. The second example is the historic movement of the farmers of the country against the three black laws, which was attempted to be described as the product of conspiracy of what not, from "Khalistani terrorism" to foreign toolkit. The third example is the so-called Delhi riots larger conspiracy case, through which the entire strength of the regime has been put to prove as a conspiracy, the opposition of the general public and especially the minority Muslims against a thoroughly unjust and unconstitutional, communal change in the definition of Indian citizenship. Of course, there are many more such examples, but here these three examples are being mentioned only to underline that the Modi regime has made it a rule to try to prove every mobilisation of the people outside its control as an anti-national conspiracy. And what is more, the present regime has every time tried to make the exposure of business frauds and irregularities of Adani, the most blessed by Modi, the mega-rich, also as an anti-India conspiracy. Therefore, it is not surprising that the mobilisation of especially youth or Gen Z in the country, which had happened around the concerns of youth about restoration of education and lack of employment on the pretext of NEET exam leak and at the initiative

of Cockroach Janta Party and leftist student organizations, keeping the demand for resignation of Education Minister Dharmendra Pradhan in the centre, the Modi Raj also tried every possible attempt to make it a domestic-foreign conspiracy against itself and to suppress it by the strength of governance. It is another matter that its repressive tactics backfired for it and cracks started appearing even in its own middle-class support base, in an attempt to handle which it had to leave its dictatorial swagger of "there are no resignations in our regime" and take Pradhan's resignation. But, by then, through the help of the Election Commission which had openly become the watchman of the ruling side, the game of influencing elections through adding names of choice and deleting disliked names on a large scale in voter lists, was taken to the level of voters as per the rulers through Special Intensive Revision or SIR of voter lists, and that too by doing openly arbitrarily. In the Bengal elections this game came out completely openly, where to ensure victory of BJP ruling at the Centre, not only the entire electoral machinery and administrative machinery during elections was hammered and made loyal to the central power but elections were conducted while openly snatching the voting rights of as many as twenty-seven lakh voters, which was being done in a targeted manner, which put the election itself in the circle of questions. These lakhs of voters are still swinging in the swing of uncertainty even months after the elections, while since the regime change or change of power conducted with the help of Election Commission in Bengal, question marks have also been put on their citizenship. In this very background, when the fact came to light that in the process of SIR, by which a part of the country is still not covered, as many as 13 crore 30 lakh names in previous voter lists have been removed, which is a number more than the population of all other countries except the eight-ten largest countries of the world, then the suspicion of "vote theft" which had been there from the beginning with this process turned into belief and its criticisms into a public outrage. In the capital Delhi, where every third voter came under its scissors and votes of many VIP voters including two Election Commissioners came under danger, for whom the Election Commission had to make special arrangement separately in the concerned App and on the other hand, at many polling stations almost all votes came under the scissors of SIR, relatively more and sympathetic coverage to voters in media underlined this horror deeply in front of the whole country. The revelations of Indian Express and other publications that came in this background presented proofs of the truth of the worst apprehensions of the opposition. Now it was clear that the entire process of change in voter lists, independent of the Election Commission's own processes, had become concentrated in the hands of a particular group or coterie, which was operating this process in a completely arbitrary and non-transparent manner. It was being operated directly by the wish of the Chief Election Commissioner, sidelining the majority

of Election Commissioners themselves and the wires of this system were connected to the top of power. The control of the computer network of ECINET through which this entire process was being operated was limited entirely to a few special ones of the Centre. On the other hand, the EROs who are legally responsible for adding-removing names in voter lists, had been made completely without authority in this process. And the state of arbitrariness was such that in Bengal, more than 16 lakh voters' names were filed appeals for removal from the list after the entire process by the Election Commission itself, which was being done through the computer system at the centre and actually keeping two Election Commissioners in the dark. Later in Uttarakhand etc. many other states also, information of voters' names being cut through Form 7 by the Election Commission's "system" itself came to light. On the other hand, news also came to light of names of opposite or politically suspicious voters being got cut in bulk through Form 7 by especially BJP and various arms of Sangh family from Uttarakhand to Telangana and Karnataka, and lakhs of names being similarly added through Form 6 from Uttar Pradesh and many other states. In total, through SIR, the Election Commission has destroyed its own as well as the credibility of election itself. It is obvious that it is doing this because it has to please the Modi-Shah duo sitting at the top of the executive, who have taken the right of their appointment in their own hands by changing the law and they can do so without caring for legal accountability, because through the same law they have been given protection from legal action for life for works done while in office in the Election Commission. This overall is an attempt to make election itself meaningless, to block the path of democracy itself in the expression of people's wish. Naturally all forces caring for democracy, despite all their differences, are coming forward to resist this hijacking of democracy. The experience of Emergency is witness that the scope of forces valuing democracy in this country is very large. And this is the real reason for the bafflement of Sangh-BJP and their present regime. They will not be able to stop this storm even by trying all their weapons from defaming to suppression through state-private armies. It should also be remembered that it is they who are trying to block the path of change of power through reliable election in our democratic system. They cannot suppress the wish of the people forever by the force of power, yes! By blocking the path of its expression through elections, with their fascist methods, they can definitely push the wish of the people towards other paths of its manifestation. The forces which are fighting today for protection of credibility and sanctity of elections, are the only guarantee that regime change in India does not happen like Bangladesh or Nepal. Otherwise the ruling Sangh-BJP is leaving no stone unturned to push India on the path of Bangladesh or Nepal. For them there is only one message of history - Vacate the throne, for the people are coming!

Historic Judgment of Delhi High Court: Retired MCD Driver Gets Relief, Municipal Corporation Will Pay Full Compensation of Rs 22 Lakh

Justice Anish Dayal correctly interpreted Section 146(2) of Motor Vehicles Act in MAC Appeal 402/2023 — Government vehicle is exempt from third party insurance, then responsibility of compensation also lies with Government

Sanjay Kumar Bathla, Chief Editor and Legal Advisor: Temple of Liberalization and Welfare Allied Trust

This judgment keeps alive that basic spirit of justice that "Justice delayed is not justice denied". Relieving a retired, spotless record driver from burden of 22 lakh and putting responsibility on that institution which is legally bound to maintain fund — this is correct interpretation of law. This judgment is also warning for all bodies like MCD that they keep their mandatory accident fund active and transparent.

Facts at a glance

- **Court:** Delhi High Court, Hon'ble Judge Justice Anish Dayal
- **Case:** MAC Appeal No. 402/2023 — Rohtas Kumar vs Sangeeta Verma & Others
- **Date of Judgment:** 16 October 2026
- **Original FIR:** Police Station Dwarka South, Death of a young man in accident with MCD's Tata Truck
- **Trial Court Order:** Dwarka MACT ordered MCD and driver Rohtas Kumar (Resident Village Jharoda, Najafgarh) to jointly/severally pay compensation of Rs 22 lakh
- **Appeal:** MCD did not appeal, driver Rohtas Kumar challenged in High Court

Main Points — Arguments of Lawyers

- 1. Protection of Section 146(2):** Advocates Mr. Vikasdeep Sharma and Mr. Shafiq Khan argued that under Section 146(2) of Motor Vehicles Act Central Government, State Government and their undertakings like MCD are Exempted from Third Party Insurance.
- 2. Mandatory Fund:** Law says that such Governments/Bodies will have to maintain a mandatory fund, from which compensation to deceased/injured in accident by their vehicles will be given from that fund itself.
- 3. Driver's record:** Driver has now retired from MCD, his service record has been excellent, no accident in past.
- 4. MACT ignored:** Dwarka Tribunal had ignored

Historic Judgment of Delhi High Court: Retired MCD Driver Gets Relief

Justice Anish Dayal's decision in MAC 402/2023 - 22 Lakh Compensation to be paid by MCD, Driver Relieved

Rohtas Kumar vs Sangeeta Verma — Delhi High Court Judgment on MAC Appeal 402/2023

What was the case?

- Retired MCD driver Rohtas Kumar facing MCD case in road accident matter
- Question of liability under Motor Vehicle Act
- Challenge to order previously issued by Tribunal

Court's Judgment

- Court held — MCD will have to pay compensation under vehicle insurance & liability
- Driver Rohtas Kumar relieved from personal liability
- Total compensation amount: Rs 22 Lakh fixed

Legal Basis

- Motor Vehicle Act Section 146(2)
- No motor vehicle shall be used in public place without insurance
- Liability of insurer/owner

Delhi High Court

Symbolic Justice Fair Hearing

Compensation: Rs 22,00,000

MCD Tata Truck Accident Vehicle - MCD's commercial vehicle, insurance liability on MCD

FIR Dwarka South

- FIR No: 194/2022, Police Station Dwarka South
- Incident: 15 March 2022
- Police report accepted as evidence by court

Arguments of Advocates Vikasdeep Sharma & Shafiq Khan successfully presented in court accepted

Sanjay Kumar Bathla | Chief Editor Parivahan Vishesh Newspaper

This is for information only. For detailed judgment visit Delhi High Court official website | Publication: October 2026 | MAC Appeal 402/2023

this legal provision. What is Historic Judgment? After reading entire record, testimonies of Trial Court and Section 146 in detail, Hon'ble Justice Anish Dayal:

- Accepted appeal of Rohtas Kumar.
- Ordered that full compensation with interest will be paid by MCD only, driver will not have to pay anything personally.
- Also terminated Execution Petition going on in Dwarka District Court.

Far-reaching impact of this judgment After this judgment, this law has become clear throughout India:

- In accident cases of those Government vehicles which do not have Third Party Insurance, because they are exempted under Section 146(2), Government/Body itself will be responsible for full compensation.
- Drivers driving Government vehicles will get relief from personal economic burden.
- Victim families and injured will get claim faster, because responsibility of fund is fixed.

Note: This report has been prepared on basis of available documents and information given by advocates. Readers must see copy of order on official website of Delhi High Court for final decision

Demand for holiday on Bhagwan Valmiki Prakatotsav intensifies, disappointment among followers

Parivahan Vishesh News

Local bodies employees federation and sanitation workers union demanded from Chief Minister Yogi Adityanath Maharaj Ji to declare gazetted holiday on 26th October

Agra. There is disappointment among his followers due to non-declaration of holiday on Prakatotsav of great creator of Ramayana, Adikavi Maharishi Valmiki. Demand has been raised from Central and Uttar Pradesh Government to declare holiday on Prakatotsav Day in honor of Maharishi Valmiki, who kept ideals of Lord Prabhu Shri Ram alive in public mind for ages and bearer of glorious tradition connected with life of Mata Sita and Lav-Kush.

Regarding this demand, meeting of Uttar Pradesh Local Bodies Employees Federation and Uttar Pradesh Sanitation Workers Union was held at IDH, Rajnagar in Agra. Speakers said that Prakatotsav of Lord Maharishi Valmiki is not just a religious event, but a glorious occasion connected with Indian culture, literature, social consciousness and human values. Declaring public holiday on Prakatotsav of such great personality will give wide respect to his

contribution and ideals. In meeting, referring to notification number 671/three-2025-39(2)/2016, dated 17 November 2025 of General Administration Section of Uttar Pradesh Government, it was said that in list of gazetted holidays for year 2026, holiday of Maharishi Valmiki Prakatotsav is not included under Negotiable Instruments Act, 1881.

Appeal to Chief Minister to take immediate decision

In meeting, demand was made from Chief Minister Yogi Adityanath Maharaj Ji that on 26 October 2026, Monday, holiday should be declared under Negotiable Instruments Act, 1881 on Bhagwan Maharishi Valmiki Prakatotsav Day. Speakers said that in accordance with historical, literary and cultural contribution of Maharishi Valmiki, his Prakatotsav should get respect at government level. Vinod Ilahabadi, Sundar Babu Chanchal, Bhulle Narwar, Rohit Lavania, Jaikishan Kachwah, Raju Dagaur, Samrat Chaudhary, Anil Rajauria, Basant Lal Pathre, Resham Singh Chahar, Rajesh Chauhan, Sharad Thanwar, Sonu Chauhan, Anil Rampuria, Sunny Chauhan, Devendra Devu, Abhishek Chauhan and Kanha Thakur among others were present in meeting
