Delhi Transport Department which makes the rules itself is taking the lives of the public - A bus operated by Delhi Transport Department in Punjabi Bagh today again extinguished the young lamp of a family

Parivahan Vishesh News

Buses of private companies running in the name of Delhi Transport Department - Operation changed without prior notice Report Navdeep Singh

Presenter Sanjay Kumar Bathla Editor-in-Chief

- Operator: Delhi Transport Department - Reality: Without any prior notice, Delhi Transport Department has stopped the operation of Delhi Transport Corporation in Delhi and started operation by writing its own name on buses of private companies, now Delhi Transport Department will be written on all buses

- Registration: Delhi Transport Corporation currently does not have a single bus to run / get run on the roads and all buses running on the roads on which Delhi Transport Department is written are registered in the name of private companies

- Accident: Today morning on 28.10.2026 in Punjabi Bagh, a bus operated by a private company by Delhi Transport Department (Route 906 - Kashmere Gate, blue electric bus) caused an accident and killed 22-year-old Sonu

- Evidence from the spot: In the pictures taken by the public along with the accident (from 10:28 AM to 12:16 PM) it is clearly visible written as Transport Department

Detailed Editorial Analysis:

1. What is the game? Public still thinks that DTC buses are running on the road, while in reality DTC does not exist at all.

All buses running on the roads of Delhi are of private operators on which Delhi Transport Department is written to deceive the public. The biggest question that arises here is who is responsible for such daily accidents?1. Delhi Transport Department which is the operator of these buses?2. The private company in whose name the bus is registered?3. Or the driver who was driving the bus at the time of the accident?

2. Today's accident - Mirror of the system -

The accident in Punjabi Bagh and the continuous daily accidents are the result of this mismanagement because when the department itself which decides the rules, acts, fitness, permit, speed limit, its own buses operated by Delhi Transport Department run unchecked, then from whom should justice be expected?

3. Our Demands:

- Transparency: Delhi Government should make public whose are the public passenger service buses running on the roads of Delhi on which the name of Delhi Transport Department is written and in whose name they are registered.

- Fix Responsibility: Along with the name of the operator, the name of the

Tragic Accidents on Roads by Buses Operated by Transport Department Public Anger - Who is Accountable?

FACT / FACT

- Not DTC, now private buses operated by Delhi Transport Department
- All buses have 'Delhi Transport Department' written on them

PUBLIC DEMANDS / DEMANDS

1. Transparency - White Paper
Detailed information on bus operation, contracts and safety standards should be made public

2. Driver Training and Speed Governor Check
Mandatory training for all drivers speed control devices check of

2. Transparency-White Should Be Issued
Detailed information

3. Driver Taming
Driver for all drivers (theoretical) regular check devices

3. CCTV Dashcam Check
Every bus should have CCTV and dashcam installed, regular audit of footage

4. Justice and Compensation for Victim Family
Immediate financial assistance and justice process ensured for accident victim families

Road Safety is Our Responsibility | Stop Negligence, Fix Accountability | Safe Journey — Safe Delhi

For information: Transport Department, Delhi Government • Citizens be alert, follow rules | Edition: October 2026 • Issue 26/10 • Public Interest Publication

PARIVAHAN VISHESH NEWSPAPER - PUBLIC INTEREST INFORMATION | OCTOBER 2026

registered company should be compulsorily written on every bus.

- Investigation: The investigation of Sonu's death should not be limited to the negligence of the driver but should go up to the role of the officials of Delhi Transport Department and in cases of such accidents, cases should be registered against Delhi Transport Department, the registered company of the vehicle and the driver, all three, and not just a formality.

- Compensation: Delhi Transport

Department should immediately give compensation to the bereaved family from its own fund.

4. Judicial inquiry of the accident
A judicial inquiry should be conducted by an impartial investigating agency against:1. Delhi Transport Department which is seated in the main role of operator2. The vehicle involved in the accident in whose name it is registered3. The driver and4. The officer who authorized the driver by considering him eligible for public passenger service.

Editorial Note: These accidents happening by public passenger service buses on the roads of Delhi are not just road accidents, but also a matter of policy deception. The public does not even know whose bus it is and who is operating it, so how much hope for justice in the end? On behalf of the people of Delhi, we Parivahan Vishesh newspaper demand that the Delhi Government and Delhi Transport Department issue a white paper on this entire operational change.

Parivartan Scheme Fair in Burari - Whose Crowd?

Parivartan Scheme Fair in Burari - Whose Crowd?

Delhi Transport Department Inspection & Certificate Branch, Burari | PNB PARIVARTAN MELA 28.10.2026

FACTS

- SARAL Vehicle Scrapping Facility stall with safe scrapping, cleaner tomorrow banner
- Kotak Commercial Vehicle Finance stall, presence of bank for commercial vehicle finance
- PNB PARIVARTAN MELA 28.10.2026, presence of bank officials under Punjab National Bank banner

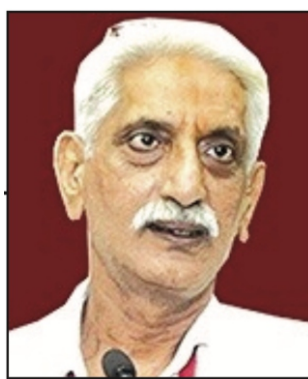

ISSUE

- Bharat Sarkar vs Delhi Sarkar scheme dilemma
- Confusion among vehicle owners: Which scheme benefit to take? Certificate from which department?
- Confusion due to lack of information, questions over different processes

DEMAND

- Transparent policy — uniform guidelines should be issued
- Remove fear, vehicle owners should get clear guidance
- Need for joint helpdesk, Delhi Transport Department and banks should resolve together

Presented by: Sanjay Kumar Bathla | Editor in Chief, Parivahan Vishesh Newspaper | October 2026 - Burari, Delhi - Special Report | Issue: 28 | Year 2026 | Edition: Special | Page 01

Parivahan Vishesh News

Fair organized as per Ministry of Road Transport and Highways guidelines, companies-banks-scrap dealers seen at stalls, but vehicle owners missing

Presenter: Sanjay Kumar Bathla, Editor-in-Chief

Main Facts:-

- Location: Inspection and Certificate Branch of Delhi Transport Department, Burari

- Event: Fair for Parivartan Scheme, as per MoRTH guidelines

- Present: Gathering of vehicle manufacturing companies, vehicle

scrap dealers, loan-providing banks and financier companies - **Missing:** Common vehicle owners who want to get their vehicles converted - very low presence

Detailed Analysis:
1. Fair held, customers did not come:

Dozens of stalls were set up at the Burari branch. Companies put up posters of new vehicles, scrap value, loan offers. But the very vehicle owner for whom this scheme is meant is in a dilemma.

2. Two schemes, one dilemma:

The difference between the scheme announced by the Central Government (Government of India) and the scheme announced by the Delhi Government is not clear. The vehicle owner is not able to understand under which scheme to apply, what are the benefits,

what are the conditions. This confusion is creating fear.

3. Politics of pressure?

The Delhi Government, administration and transport department are going beyond the rules and pressurizing to convert vehicles under this scheme. The question arises - if the scheme is so attractive then why is there fear among the owners? It is imperative to remove the fear, not to increase the pressure.

Editorial Demand:-

Shortcomings of the scheme should be removed, a single clear simple process should be implemented- Fear of vehicle owners should be removed, transparent information and security should be ensured- This scheme is for vehicle owners, not for any particular section - this message should be clear

The official launch of liquor home delivery services offers convenience to consumers,

but it may also create opportunities for cybercriminals to revive old fraud schemes. In 2022, the Delhi Police Outer North District busted a major cyber fraud racket in which a Mewat-based gang used fake advertisements of reputed liquor shops to lure customers through Google and YouTube ads. The fraudsters then siphoned money from victims' bank accounts through QR code and OTP-based scams. More than 200 people were allegedly cheated in the fraud. Remember "Before ordering liquor

Parivahan Vishesh News

online, verify the seller. Before scanning a QR code, verify its purpose. Before sharing an OTP, remember that it can empty your bank account."Likely Modus Operandi of Fraudsters 1. Fake Google and Social Media Advertisements • Creating advertisements in the names of popular liquor stores. • Displaying mobile numbers instead of official websites. • Offering attractive discounts and instant delivery.2. Fake Websites and Apps • Cloning genuine liquor delivery portals. • Using look-alike domain names. • Collecting payment credentials and personal information.3. QR Code Fraud • Sending QR codes claiming they are necessary for order confirmation. • Victims unknowingly authorise payments by scanning the code.4. OTP Fraud • Requesting OTPs under the pretext of order confirmation, delivery verification, KYC, or refunds. • Using OTPs to transfer money or gain access to banking services.5. Fake Customer Care Numbers • Posting fraudulent customer support numbers in Google search results. • Exploiting customers seeking

delivery updates or refunds.6. Advance Payment Scams • Demanding full payment before confirming the order. • Disappearing after receiving the money.Essential Cyber Safety Measures • Mobile number shown as the only contact option. • Pressure for immediate payment. • No physical address or licence details. • Communication only through WhatsApp. • Request to scan a QR code to receive a refund. • Request for OTP to "confirm" an order. • Delivery promised within minutes after advance payment. • Use Secure Payment OptionsWhere available, use credit cards or secure payment methods that offer better dispute resolution than direct bank transfers.Red Flags of Fraud • Protect Personal InformationAvoid sharing: • Aadhaar details • PAN details • Debit/Credit card photographs • Banking screenshotsunless required through a verified and legitimate process. • Check Website SecurityBefore making payment: • Ensure the website uses https:// • Verify correct domain spelling. • Check for licence and GST details where applicable. • Beware of Unrealistic

DiscountsOffers such as: • "50% discount today only" • "Buy One Get One Free" • Premium liquor at half price"are often used as bait by cybercriminals. • Verify Customer Care Numbers • Obtain support numbers only from official websites and apps. • Do not rely solely on Google search results. • Avoid Paying to Personal Accounts • Make payments only to verified merchant accounts. • Be cautious if asked to transfer money to: o Personal UPI IDso Individual bank accounts o Unverified wallets Understand QR Code RisksScanning a QR code generally means you are making a payment, not receiving one.Golden Rule:To receive money, you never need to scan a QR code or enter your UPI PIN. • Never Share OTPsRemember:An OTP is meant for authorising transactions, not for placing orders.If anyone asks for: • OTP • UPI PIN • CVV • Internet banking passwordit is likely a fraud • Do Not Trust Search Engine Advertisements Blindly • Fraudsters can purchase sponsored advertisements. • Verify website URLs

independently before making payments. • Prefer official apps and government portals. • Use Only Government-Authorised Platforms • Order liquor only through licensed vendors and government-approved websites or applications. • Verify the platform through official government notifications or Excise Department websites. • Excessive discounts and unrealistic offers.If You Become a VictimImmediately:1. Call the National Cyber Crime Helpline at 1930.2. Report the incident on www.cybercrime.gov.in.3. Contact your bank and request that the transaction be frozen.4. Preserve: o Screenshots o Payment receipts o Mobile numbers o WhatsApp chatso QR codeso Website links5. Inform the nearest Cyber Police Station.*"Liquor may now be delivered to your doorstep, but never hand over your OTP, UPI PIN, banking credentials, or trust blindly. Verify the seller, verify the platform, and verify before you pay. A genuine liquor delivery service will never ask for your OTP or UPI PIN."*

Pre-Diwali Skincare: Prepping Your Skin For The Glow

Shahnaz Husain

Parivahan Vishesh News

Want glowing skin for Diwali without a last-minute panic?

Between festive shopping, cleaning, late nights and endless preparations, skincare often gets pushed aside.

The week before Diwali often means cupboard cleaning, picking rangoli designs, deep in Dhanteras shopping, painted diyas and house cleaning. These everyday factors can leave your skin feeling dry, congested, or tired. Diwali is undoubtedly a festival full of lights and sweets to enhance our mood and energy levels, but to make our skin glow and shine, we need to start

preparing it well in advance so that it can be protected from dust, pollution, and other environmental stressors. Starting a pre-Diwali skincare routine is very essential for achieving glowing, healthy skin, making it to deal with environmental stressors, and ensuring you look radiant throughout the celebrations.

1----Nighttime Routine:-----
After removing your makeup and cleansing your skin, nighttime is your opportunity to focus on hydration and barrier support. Double cleansing at night

can help remove stubborn pollutants and makeup residues, ensuring your skin breathes freely. Apply oil-based cleansers to dry skin and massage gently in circular motions for one minute to dissolve waterproof makeup, glitter, sunscreen, and oil buildup. Wet your hands with a little water to emulsify the product until it turns milky, then rinse thoroughly with lukewarm water. Follow with a gentle hydrating or vitamin C face wash to clear away remaining soot, dust, and pollution residue

2----Exfoliation-----

Gentle exfoliation 1 week before Diwali helps remove dead skin cells and allows festive makeup to sit smoothly without causing irritation or breakouts. Exfoliation is optional, not a compulsory step for glowing skin. Choose gentle exfoliation like mandelic acid or lactic acid, which are well-tolerated by Indian skin tones or enzyme powders like papain. Choose a skin-friendly DIY mask based on your skin type. Always follow up exfoliation with hydrating and barrier-repairing ingredients like glycerin, hyaluronic acid, or ceramides, and never skip daytime

sunscreen. Do not combine multiple acids, a scrub and a strong retinoid in the same week just because Diwali is approaching. If you have never exfoliated before, this is not the ideal time to experiment. Never exfoliate over sunburn, cuts, active irritation or freshly waxed skin. Avoid trying multiple new treatments immediately before Diwali.

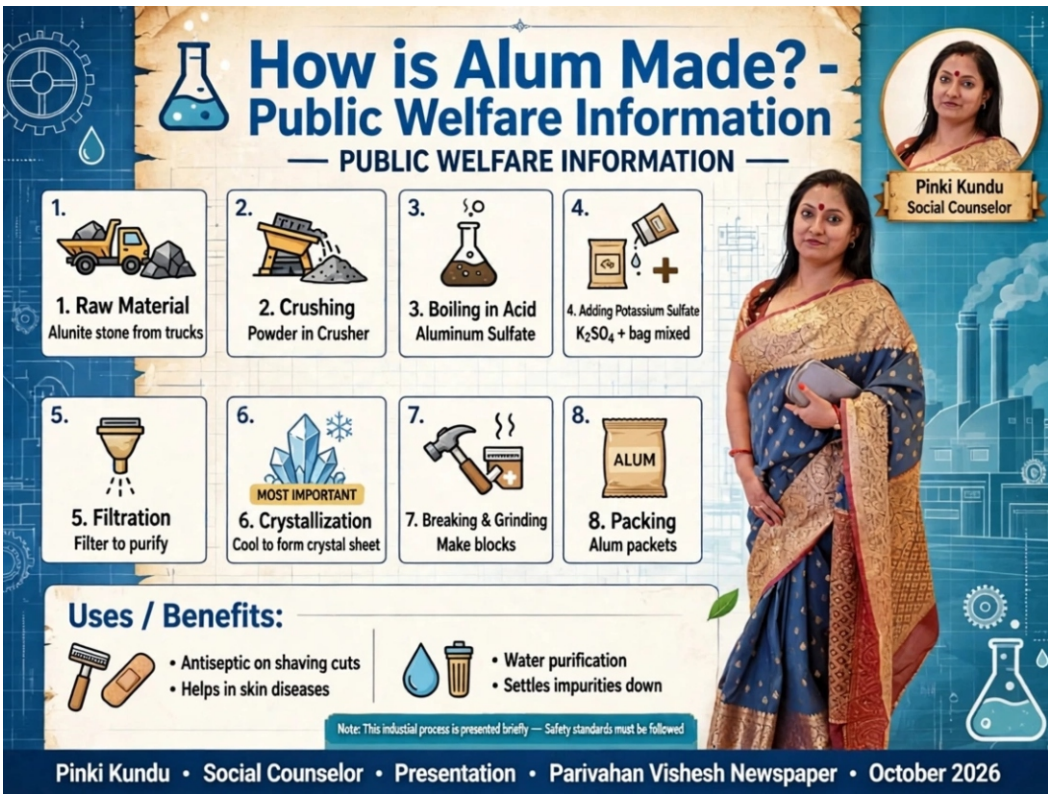

3---- Under-eye care -----
Prepare your under-eye area for Diwali with targeted hydration, gentle ingredients, and natural products to reduce puffiness, dark circles, and fatigue. Use a light moisturiser if the area feels dry and avoid rubbing. A cool, clean compress can feel soothing after a long day, but it will not permanently remove dark circles. Apply a chilled teaspoon, cool cucumber, cold washcloth, bag of frozen veggies or ice roller for 5 to 10 minutes to constrict blood vessels and reduce swelling. Before applying, wrap your compress with a soft cloth to protect your skin from getting too cold. Steep two tea bags for 5 minutes. Let the tea bags chill in the refrigerator for 5 minutes. Then, squeeze out the extra liquid and apply it to your under-eye area. Leave the tea bags on for half an hour

4-----Home remedies -----
As Diwali and winter approach, try some home remedies to relieve dryness. Apply honey on the face daily for 10 minutes and wash off

with water. If you have an aloe vera plant at home, the gel, found in the inner portion of the leaves can be applied on the face to moisturise it. Grate carrots and apply on the face for 15 to 20 minutes. Carrot is rich in Vitamin A and good for nourishing the skin in winter. It suits all skin types. Mix half a teaspoon of honey, one teaspoon of rose water and one teaspoon of dried milk powder. Mix into a paste and apply on the face. Remove after 20 minutes with water. Suits normal to dry skin. Applying mayonnaise or egg yolk on the skin also helps to relieve dryness. Suits dry skin. Nourish the hair with oil treatments. Heat olive oil and apply on the scalp and hair. Then dip a towel in hot water, squeeze out the water and wrap the hot towel around the head, like a turban. Keep it on for 5 minutes. Repeat the hot towel wrap 3 or 4 times. This helps the hair and scalp absorb the oil better. Egg white is a wonderful natural cleanser for oily hair, and its protein content helps to add body. Apply egg white to the hair about half an hour before your shampoo. To nourish dry hair, massage egg yolk or mayonnaise into the scalp. Leave it on for half an hour and then wash the hair. It helps soften hair and is especially useful for hair damaged by colouring, straightening, or perming.

How is Alum Made? - Factory journey from stone to antiseptic block

Parivahan Vishesh News

From barber shop to water plant - Big uses of a small lump Presentation: Pinki Kundu, Social Counselor

Facts at a Glance:- Chemical Name: Potash Alum $KAl(SO_4)_2 \cdot 12H_2O$ - Raw Material: Alunite mineral stone- Main Process: Crushing, boiling in sulfuric acid, adding potassium sulfate, filtering, cooling and crystallization- Final Product: Transparent crystal block

Detailed Description - 8 Steps:

1-2. Mining and Grinding: Red-brown Alunite stones come to the factory by trucks, and are made into fine powder in a crusher machine.

3-4. Chemical Reaction: The powder is boiled in hot sulfuric acid in iron tanks to make Aluminium Sulfate solution, then Potassium Sulfate is added in the correct quantity.

5. Purification: The solution is filtered through cloth to separate mud and sand.

6. Crystallization - Most Important: The clean hot solution is cooled for hours in open concrete tanks. Slowly, a shiny hard sheet like ice freezes - this is the pure alum crystal.

7-8. Manufacturing and Packing: It is broken with hammers, polished to make a smooth block and packed according to use.

Uses / Benefits:- Health: Stops bleeding on shaving cuts, antiseptic, helpful in skin diseases- Water Purification: Settles impurities in dirty water and brings them down - main use in Municipal Water Treatment

Editorial Comment: According to Pinki Kundu Ji, this process shows how a natural mineral becomes everyday safety. Adherence to safety standards is essential.

Ignoring these 16 symptoms of the body can prove costly!

Parivahan Vishesh News

1. Constant pain in the lower back = Could be a problem related to kidneys or muscles.

2. Excessive fatigue without reason = Could be due to anemia or thyroid problem.

3. Numbness in fingers = Could be due to nerve compression or Vitamin B12 deficiency.

4. Burning sensation in the soles of the feet = Could be related to diabetes or nerve damage.

5. White part of the eyes turning yellow = Could be a sign of a problem related to liver or bile ducts.

6. Frequent urination = Could be due to diabetes or a urinary problem.

7. Swelling in ankles = Could be a problem related to heart, kidney or blood circulation.

8. Constant itching in the skin = Could be related to a skin problem or sometimes liver and kidney disease. 9. Blood in urine = Could be a sign of kidney stones, infection or other urinary tract problems. 10. Feeling excessively thirsty = Could

be due to diabetes or dehydration in the body.

11. Skin turning yellow or pale = Could be a sign of lack of blood or some other disease.

12. Constant bloating or heaviness in the stomach = Could be a problem related to the digestive system.

13. Losing weight without trying = Could be related to thyroid, digestive system or some other disease.

14. Weakness in muscles = Could be due to electrolyte imbalance in the body or a nerve-related problem.

15. Easily getting blue bruises even with a minor injury = Could be due to effect of some medicines or a blood-related problem.

16. Constant excessive sweating at night = Could be related to infection, effect of medicines or some other medical condition.

Remember: These symptoms do not always mean a serious illness. But if any symptom persists continuously, occurs repeatedly or appears without any clear reason, then consult a doctor. Identifying symptoms on time and getting the right check-up done is very important for your health.

The Shocking Truth of Soya Oil - Chemical Journey from Mandi to Bottle

Parivahan Vishesh News

How is oil at 110 Rs/liter from 60 Rs/kg soybean?

The game of 6 chemical steps in the name of refined

Part 1: Shocking Facts- Soybean price in mandi: 60 Rs/kg, 60/kg board clearly visible on weighing scale in video- Only 180-200 grams of oil is extracted from 1 kg soybean, proven by experiment in beaker- If calculated directly, the cost comes to about 350-400 Rs/liter- Then how is Fortune, Soya refined oil being sold at 110 Rs/liter in the market? This is the first question of economics

Part 2: Factory Process - 6 Chemical Steps

1. Hexane: Petroleum Solvent - to pull oil from seed. Sprinkled on bean flakes in tanks.

2. Phosphoric Acid: Degumming with acid - to remove gum, resin present in the oil. Brown foam seen forming in the lab.

3. Caustic Soda (NaOH): Neutralization by adding caustic soda/base - Free fatty acids are converted into soap and separated. Brown soap-like lumps form in the tank.

4. Bleaching Earth: Colour absorption with Multani Mitti + Activated Carbon - Black-brown oil is made to look golden and transparent.

5. Deodorization: Strong bad smell is removed with steam at more than 200°C. Residues are removed with a loud sound in the steam tower.

6. Result: What is left? Empty refined oil without taste, without smell, without nutrition.

Part 3: Where does the real earning come from? - From DOC. Oil is only 20% of total production. 80% earning is from De-Oiled Cake (DOC):- Soya chunks / protein products- Animal feed - DOC cake- Lecithin - Emulsifier in chocolate, food products- Soap / Detergent - from by-product- Vitamin E capsules - from extraction of refining

Part 4: Health Message - Public Interest- Eat less refined oil, avoid frying/roasting- Adopt cold press alternatives: Kacchi Ghani mustard, groundnut, sesame - oil extracted from wooden kolhu in traditional ghani, shown at the end of the video- On packet, don't look for 'refined', look for 'cold pressed / kacchi ghani'

Headmaster Keshav Kumar from Muzaffarpur suggests displaying traditional pallu on Goddess Sita's wax statue at Ayodhya's Ramayana Wax Museum, demands display of traditional veil

Parivahan Vishesh News

Teacher honoured with State Teacher Award 2026 sends request to concerned authorities; Appeals to consider the form of the statue in accordance with Indian cultural traditions

Parivahan Vishesh Newspaper Daily

Muzaffarpur, Bihar. Regarding the form of the wax statue of Mata Sita installed at the Ramayana Wax Museum located in Ayodhya, Head Teacher Keshav Kumar of Muzaffarpur district of Bihar has given a cultural suggestion. He has made a humble request to display the traditional pallu or veil on the head in the statue of Mata Sita as per Indian tradition. In this regard, he has sent a letter to the museum management, District Magistrate of Ayodhya, Divisional Commissioner and the Director of the Environment Department mentioned in his request. He has also attached pictures taken by himself during his Ayodhya visit along with the request.

Idea came during visit with family

Keshav Kumar had reached the Ramayana Wax Museum located in Ayodhya for a visit with his family on 24th October 2026 at around 9:30 am. During this journey, his father Marut Nandan Trivedi, mother Renu Devi, father-in-law Bachcha Prasad Singh, mother-in-law Jamuna Devi, wife Jyoti Kumari and son Shivanand Trivedi were also with him. During the visit with his family, he saw the statues installed in the museum. In this sequence, his attention went to the form of the wax statue of Mata Sita. With his cultural understanding and sense of respect for traditional attire, the idea came up that the traditional pallu or ghunghat on the head of Mata Sita can also be displayed in the statue. After this, he decided not to limit his suggestion to just a personal thought but to convey it to the concerned authorities and the museum management. For this purpose, he also attached pictures taken from his mobile along with the request letter, so that his suggestion can be

considered by looking at the present form of the statue.

Honoured with State Teacher Award 2026 for better work in the field of education

Keshav Kumar is working as Head Teacher at Primary School Mohanpur Urdu located in Muraul block of Muzaffarpur district. He has been honoured with the State Teacher Award 2026 for better work in the field of education. This honour was presented on 5th September 2026 on the occasion of Teacher's Day at Shri Krishna Memorial Hall, Patna, by the hands of Hon'ble Education Minister of Bihar, Shri Mithilesh Tiwari. Along with school leadership, improving children's learning process and encouraging educational activities, Keshav Kumar also plays an active role in teacher-collaboration and educational innovation related activities. He serves as District Technical Team (PBL) and District Resource Person (TaRL). Under these roles, he cooperates in project-based learning (PBL) and educational efforts related to improving children's learning competencies. In addition, he is working as State Team Coordinator in Teachers of Bihar (ToB). Through this platform, he contributes to activities related to coordination among the teacher community, exchange of educational experiences and sharing of innovations.

Request to display traditional pallu in the statue of Mata Sita

Keshav Kumar says that Mata Sita holds a special place of reverence and respect in Indian cultural tradition and the story of Ramayana. Ideals like sacrifice, dignity, patience and grace are associated with her personality. Keeping this cultural spirit in mind, he has suggested that in the wax statue of Mata Sita

installed in the museum related to Ramayana, consideration be given to displaying a traditional pallu or ghunghat on the head as per traditional Indian attire. He has clarified that his request is only regarding the statue of Mata Sita. No demand for any change in the form of Lord Shri Ram's statue has been made. According to him, in the presentation of statues related to religious and cultural importance, it can be useful to show sensitivity towards Indian traditions and public sentiments. His objective is not to criticize any artist, institution or museum management, but to convey a humble suggestion to the concerned authorities on the basis of his cultural understanding.

Women Honoured on the occasion of Karwa Chauth in Ranjit Nagar

Parivahan Vishesh News

Report: Navdeep Singh,

Parivahan Vishesh Newspaper

This evening, a special felicitation ceremony was organized in the Ranjit Nagar area on the auspicious occasion of Karwa Chauth festival. The chief guest of this program was renowned social worker Rajkumari Devi. During the ceremony, social worker Rajkumari Devi honoured the women of the area by gifting

bangles and mehndi on the eve of Karwa Chauth. The aim of this initiative was to promote mutual harmony among women and to make the culture of this traditional festival more joyful. The women present at the program expressed their gratitude to Rajkumari Devi for this affectionate gift and honour. During this, the entire atmosphere was seen coloured in the colours of festivity and women welcomed the festival with traditional songs and music.

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

29 OCTOBER 2026 | Day vibration: 4 — Structure, discipline, stability, practicality and steady progress

Moolank 1

Money & Career: Day 4 asks your leadership energy to become disciplined and methodical. Organise finances, set priorities and strengthen the foundation of a project before pushing for faster growth.
Relationship: You may want immediate action, while the day favours patience and consistency. Show reliability and involve the other person in practical decisions.
Precaution: Avoid impatience, rigid authority and spending simply to force faster results.
Make Your Day Better: Turn one major goal into a realistic step-by-step plan and begin with the first step.

Moolank 2

Money & Career: Day 4 grounds your sensitive nature and helps you deal with practical details. Review bills, agreements, savings or joint finances carefully rather than relying only on feelings.
Relationship: Stability and dependable actions matter more than repeated reassurance today. Small consistent gestures can strengthen trust.
Precaution: Avoid insecurity, procrastination and allowing someone else to make every practical decision for you.
Make Your Day Better: Create one simple routine that improves financial or emotional stability.

Moolank 3

Money & Career: Day 4 gives structure to your creative and communicative energy. A good idea can become profitable when you add deadlines, budgeting and disciplined execution.
Relationship: Your natural lightness may meet a more serious mood. Keep warmth alive, but honour promises and practical responsibilities.
Precaution: Avoid scattered focus, unnecessary entertainment spending and leaving important work unfinished.
Make Your Day Better: Finish one creative task completely before beginning another

Moolank 4

Money & Career: Your Moolank 4 strongly resonates with Day 4, amplifying discipline, structure, practicality and long-term planning. Excellent for budgeting, systems and steady progress when flexibility is not forgotten.
Relationship: Reliability is your strongest quality today. However, routines should support the relationship rather than make the other person feel controlled.
Precaution: Avoid rigidity, pessimism, excessive criticism and resistance to a reasonable change.
Make Your Day Better: Strengthen one foundation and consciously allow one useful adjustment.

Moolank 5

Money & Career: Day 4 slows your fast-moving energy and asks for consistency. Review contracts, schedules and expenses before changing direction or chasing a fresh opportunity.
Relationship: Freedom and routine may feel at odds. Clear communication about your plans can stop a practical issue from turning emotional.
Precaution: Avoid impulsive purchases, missed commitments and changing plans at the last minute.
Make Your Day Better: Complete one pending responsibility before looking for the next excitement.

Moolank 6

Money & Career: Day 4 supports practical security around home, family and work. Review recurring expenses and create a plan that protects comfort without weakening savings.
Relationship: Love is best demonstrated through dependable action today. Keep promises, but do not take responsibility for every detail of another person's life.
Precaution: Avoid over-responsibility, perfectionism and spending merely to keep everyone comfortable.
Make Your Day Better: Create stability through one practical act of care and one sensible financial choice.

Moolank 7

Money & Career: Day 4 gives form to your analytical ideas. Research is useful, but today favours converting insight into a workable system, schedule or financial plan.
Relationship: You may retreat into thought when responsibilities feel heavy. Explain what you need instead of becoming emotionally unavailable.
Precaution: Avoid over-analysis, isolation and delaying action while waiting for complete certainty.
Make Your Day Better: Put one well-researched idea into a simple, practical structure.

Moolank 8

Money & Career: Day 4 works strongly with your disciplined ambition. Focus on systems, compliance, budgets and long-term assets rather than quick gains; steady effort can strengthen your position.
Relationship: Responsibilities may dominate your attention. Make sure efficiency and control do not replace warmth or mutual decision-making.
Precaution: Avoid work obsession, harsh expectations and using money as a measure of commitment.
Make Your Day Better: Secure one long-term priority and deliberately make time for one personal connection.

Moolank 9

Money & Career: Day 4 grounds your generous and passionate nature. Complete pending obligations, organise resources and put clear boundaries around where your time and money are going.
Relationship: You may want to solve everything for others. Practical support is valuable, but allow loved ones to carry their own responsibilities too.
Precaution: Avoid rescue behaviour, guilt-based spending and holding burdens that no longer belong to you.
Make Your Day Better: Bring order to one unfinished matter and release one unnecessary responsibility.

Maharishi Valmiki Prakatotsav Celebrated at GB Pant Hospital

Parivahan Vishesh News

Director and Medical Superintendent Offer Flowers to Maharishi Valmiki's Statue; Community Feast Organised for Patients

Swatantar Singh Bhullar New Delhi

Parivahan Vishesh Newspaper Daily

New Delhi: Maharishi Valmiki Prakatotsav was celebrated with devotion and enthusiasm at the GB Pant Hospital premises on Tuesday. The programme was jointly organised by the Hospital Employees' Family, the Employees' Union, and the SC/ST/OBC

and Minorities Association (Registration No. 3103).The programme, held in front of the Medical Superintendent's Office, commenced with the lighting of a ceremonial lamp by hospital Director Dr. Pooja Sakhuja. She also offered flowers to the statue of Maharishi Valmiki. Addressing the gathering, she said that Maharishi Valmiki's teachings convey the message of social harmony, equality and humanity. His life serves as an inspiration for dedication and commitment to one's duties.Medical Superintendent Dr. Dharmendra Gupta also paid floral tribute to Maharishi Valmiki. He said that following the path of truth and righteousness helps healthcare professionals provide better services to patients.Community Feast Arranged for Patients and Their AttendantsHeads of various hospital departments, senior doctors, administrative officers and employees attended the programme. On the occasion, the Employees' Union organised a community feast (bhandara) for patients, their attendants and hospital staff. Hundreds of people received prasad during the event.Union office-bearers Kishore Rana, Naresh, Nitin Chaudhary, Deepa Arora, Rampravesh Rai, Vijendra Chandeliya, Rajendra and Rahul Chauhan contributed to the distribution of food.The organisers expressed their gratitude to the hospital administration and officials for their support. The programme concluded in an atmosphere of harmony and goodwill.

Clouds of uncertainty over Rourkela Municipal Corporation elections

Parivahan Vishesh News

Time passes, wait for democratic system continues; Questions raised on administrative accountability in absence of elected representatives

Report: Dr. Rajkumar Yadav, Parivahan Vishesh News Paper, Rourkela

The election of the Rourkela Municipal Corporation, which is linked to the city's development, civic amenities and local democracy, is once again at the centre of discussion. Even after the formation of the Municipal Corporation, questions being raised about the system of regular elected representation have intensified the debate on administrative functioning and democratic accountability. With the passage of time, the wait for elections is getting longer, but the path to converting the expectations of common citizens into concrete political representation is still not clear. The basic objective of local self-governance is not just to run the

administration, but to directly listen to the problems of citizens, get development works done as per priorities and ensure accountability to the public. Elected public representatives become the voice of the people at the ward level. It is their important responsibility to take problems related to roads, drains, drinking water, sanitation, lighting, drainage and other basic amenities to the concerned departments and to exert pressure for their solution. In such a situation, the question of delay in elections does not remain limited to only political parties or potential candidates. It is directly related to the participation of common citizens and the accountability of the local administration. When the public does not get the opportunity to elect the representative of their ward, the question of accountability regarding the redressal of complaints and the priorities of development works naturally arises. In a rapidly developing industrial city like Rourkela, the need for effective city administration is even greater. Amidst growing population, urban expansion and

increasing demand for civic amenities, the role of elected representatives becomes important. The administrative system is essential, but it cannot be a permanent alternative to democratic representation. Now the question is, when will a clear timeline regarding the Rourkela Municipal Corporation elections come to light? The concerned administration and the state government should take citizens into confidence by clarifying the status of the election process. After all, the strengthening of local democracy is ensured not only by announcements, but by timely elections and a system accountable to the public.

Vigilance Awareness Week organized in Sundargarh, oath of integrity taken against corruption

Parivahan Vishesh News

District-level program organized with the message of 'Probity for Prosperity', students felicitated with awards

Report: Dr. Rajkumar Yadav, Parivahan Vishesh News Paper, Sundargarh

With the aim of building a corruption-free society and promoting transparency in administrative functioning, a district-level vigilance awareness program was organized in Sundargarh. In this program organized at the local Vikas Bhavan under the joint auspices of the Sundargarh branch of the Vigilance Department and the district administration, officials described collective responsibility, honesty and accountability as essential for the eradication of corruption. The theme for this year's Vigilance Awareness Week being observed across the state from 26th October to 1st November is 'Probity for Prosperity'. On this occasion, the Chief Minister administered an oath of honesty against corruption to the officers and employees of the state headquarters, district headquarters and block headquarters through virtual medium from the state-level program organized in Bhubaneswar. Additional District

Collector Suraj Patnaik, Sundargarh Divisional Forest Officer Khushwant Singh, Additional Superintendent of Police of Rourkela Vigilance Division Somnath Jena, DSP of Sundargarh branch of Vigilance Department Daitari Ghadai, DSP Rajendra Singhal and District Chief Medical Officer Dr. Suresh Chandra Mahanti were present as guests in the program. District Information and Public Relations Officer Nandini Mundari gave the welcome speech. DSP Daitari Ghadai shed light on the objectives of Vigilance Awareness Week and called

for public cooperation to eradicate the roots of corruption from society. Additional Superintendent of Police Somnath Jena appealed to every person to discharge their duties with honesty and stay away from corrupt conduct. Additional District Collector Suraj Patnaik gave a message to citizens and government employees to remain vigilant for the eradication of corruption. He emphasized the need for awareness and active participation against corruption.

Students felicitated

Various competitions were organized among students of schools, higher secondary schools and colleges under Vigilance Awareness Week. Successful participants were awarded and felicitated in the program. Vigilance Inspector Vrindavati Tandi gave the vote of thanks, while teacher Swagatika Panda conducted the program. District-level officers, members of self-help groups, ASHA workers, senior citizens, employees of the vigilance department and students of various educational institutions were present in the program.

The message is clear — curbing corruption is possible not only through government action, but through administrative honesty, transparency and public participation.

Spreading net of fly ash dumping: Government land and forests also targeted!

Parivahan Vishesh News

Allegations that ash emanating from Jharsuguda is reaching not only Sundargarh but also bordering states; Questions raised over hundreds of trips of dumping in Bansjor Questions raised over monitoring by pollution control department, concern raised over administration's role and NGT's activism

Report: Dr. Rajkumar Yadav, Parivahan Vishesh News Paper,

Rourkela For how long will the common public continue to pay the price of industrial development with their health, environment and quality of life? The case of alleged illegal dumping of fly ash is no longer limited to just pollution, but is raising serious questions about government land, forest area and the credibility of administrative monitoring. It is alleged that after a ban or restriction on local disposal, fly ash emanating from industrial establishments in Jharsuguda district is being dumped fearlessly in Sundargarh district as well as in bordering districts and areas of Chhattisgarh and Jharkhand. In the Bansjor area of Simdega district of Jharkhand, adjacent to Rourkela, hundreds of trips of fly ash have reportedly been dumped along the roadside. If this claim is correct, then it is not just disregard for rules, but a big test of environmental accountability.

Heaps of ash along roadside, where is the monitoring mechanism?

The most serious question is who transported such a large quantity of fly ash and with whose permission it was dumped in the open? If the dumping has taken place on government land or

forest land, then how did the nature of the land, movement of transport vehicles and continuously accumulating heaps of ash escape the eyes of the concerned departments? Was regular inspection not done, or was there a serious lapse in the monitoring system? The answers to these questions should come only after investigation. Open accumulation of fly ash poses the risk of fine particles spreading in the air, affecting the surrounding soil and water sources and having adverse effects on the health of local people. In such a situation, it cannot be ignored by considering it as merely industrial waste thrown on the ground.

Accountability of Pollution Control Department and NGT

The responsibility of the Pollution Control Department cannot be limited to just taking reports from industries. It should ensure monitoring from source to transportation and final disposal site. At the same time, the question also arises before the National Green Tribunal (NGT) as to how effective the system of effective implementation of environmental rules and action on violations is on the ground. Now there is a need for the administration, forest department and pollution control agencies of the concerned states to conduct a joint investigation, identify dumping sites, trace vehicles and related industrial sources and take action as per rules if found guilty.

The question is straightforward — who will pay the price for the environment?

If it is confirmed that fly ash is being dumped on government and forest land in this manner, then accountability of those responsible should be

fixed. It is not appropriate to conclude administrative collusion without investigation, but silence on such a large alleged activity cannot be acceptable either. Now it remains to be seen whether the government and regulatory bodies take action or the rules for environmental protection remain limited to papers only.

Yellow claw runs on illegal colony in Barwala, ARP-2 colony developed in 6.5 acres demolished

Parivahan Vishesh News

Action taken under the leadership of District Town Planner Dinesh Kumar, appeal to general public not to invest in illegal colonies

Haryana/Hisar (Rajesh Saluja)

The team of District Town Planner Office, Hisar, took action against the ARP-2 colony being developed in an area of about 6.5 acres located on Jind Road in Barwala, running the yellow claw and demolishing the construction and development works done in the colony. This action was taken under the leadership and guidance of District Town Planner Hisar, Dinesh Kumar. According to the department, the concerned colony was being developed illegally. During the action, Junior Engineer from the District Town Planner Office, Patwari Shamsher and Block Agriculture Officer Shyam Bihari as Duty Magistrate were present. The departmental team reached the spot and took action to remove the development works done in the illegal colony.

Do not risk your life's savings by investing in illegal colonies: Dinesh Kumar

District Town Planner Dinesh Kumar, while cautioning the general public, said that illegal colonizers lure innocent people, especially economically weaker families, by showing big dreams and making attractive promises to buy plots. Many times people invest their life's savings in such properties, whose legal status is not clear, in the hope of low price and a better future. Later they may have to face problems like basic amenities, permission for construction and validity of the property. He said that common citizens must thoroughly check the validity of the property before investing their hard-earned money. Do not decide to buy a plot only on the basis of verbal

assurances, advertisements or attractive claims of the colonizer. Invest only after verifying the license of the concerned colony, approved layout plan and other necessary permissions from the concerned department. Dinesh Kumar appealed to the citizens of District Hisar not to buy plots in illegal colonies by getting misled or lured by anyone. To keep their lifetime earnings safe, invest only in duly approved and valid properties. He said that awareness and timely investigation can save the general public from financial loss. Through this action of the District Town Planner Office, a message was given to the general public that it is necessary to check the legal status of illegal colonies before investing in them, so that they do not have to face any kind of trouble in the future.

Tampering with the existence and constitution of the historic club.

Parivahan Vishesh News

Rules thrown to the wind, arbitrariness worth crores, ancient heritage and sports infrastructure destroyed.

Hariom Bajpai

Pilibhit. In the historic and prestigious club of the city, established in the year 1910, the constitution and rules are being flouted these days. Serious allegations of large-scale arbitrariness and irregularities by the executive committee have come to light, keeping aside the original form of the club, its historical heritage and democratic processes. According to the information received, the executive committee has changed the original constitution of the club, made in the year 1910, without consensus for its own convenience and private benefit. From the selection of new members to the administrative

decisions of the club, open arbitrariness and favouritism are at play. In this sequence, the historic 'Fire Place' built at the time of the club's establishment, which was the identity of the club's ancient architecture, has also been demolished. The sports infrastructure of the club has also been heavily damaged, under which the permanent lawn tennis pitch established for years has been demolished and converted into a simple flat ground. Along with this, the original pitch of the table tennis court has been removed and tiles have been laid there in an unplanned manner, due to which the original form of the game has been affected. On the other hand, lakhs of rupees of suspicious expenditure has been shown in the name of maintenance and beautification of the billiards table, while the club's old, very strong and valuable historic furniture made of precious wood has been thrown into scrap. Moving ahead in the matter, administrative rules of the club have been violated and people of the executive

committee went to the residence of a minister and made him an 'honorary member'. Sources claim that this was done so that by using the influence of power and administration, undue benefits could be given to the club's favourite contractors and financial irregularities could be hidden. The situation is such that the democratic system of the club has been completely abolished, while as per rules the annual executive committee elections to be held every year have been cancelled and the present executive committee has been 'renewed' arbitrarily without any transparent process. There is deep resentment among the senior members of the club and local citizens regarding this entire arbitrariness and working system. The members say that this priceless heritage of 1910 will not be allowed to be sacrificed for private gain and corruption, and preparations are being made to submit a memorandum to higher officials for a fair investigation of the matter and action against the executive committee.

The High Court held that the murder of his son by 88-year-old Gomha Gop was culpable homicide.

Parivahan Vishesh News

Ordered the immediate release of Gomha, who is serving a life sentence, from jail

Kartik Kumar Parichha, State Head - Jharkhand

The Jharkhand High Court has granted a significant reprieve to an 88-year-old father accused of stabbing his 20-year-old son to death. A division bench of Justices Anand Sen and Pradeep Kumar Srivastava amended the lower court's life sentence, reclassifying the case as Section 304 (Part II) of culpable homicide not amounting to murder, rather than Section 302 (murder). Considering the man's advanced age and the nearly 13 years of imprisonment he has already served, the bench commuted his sentence to time already served and ordered his immediate release from prison. Advocate Alpana Verma, the amicus curiae appointed for appellant Goma Gope, argued before the bench that the appellant has been falsely implicated based solely on conjectures and suspicions. She also argued that the appellant has been imprisoned for a long time without any solid basis, and therefore, the trial court's conviction and sentence should be set aside and he should be released. Additional Public Prosecutor (Tarun Kumar), appearing for the state, opposed the petition. He argued that the trial court's decision was justified as the accused had stabbed his son to death and blood-stained soil

and a knife were recovered from the scene of the crime. After analyzing the witnesses and the doctor's medical report, the division bench held that the deceased had suffered only one stab wound. The incident occurred in a moment of sudden altercation and anger under the influence of alcohol, which did not establish any premeditated intent to kill. The court held that this case fell under Exception 4 (an act done in a fit of sudden anger and rage, without cruelty) of Section 300 of the Indian Penal Code. Therefore, it was considered culpable homicide not amounting to murder under Section 304, Part II, rather than Section 302, which applies to murder. Section F noted that when the appellant's statement was recorded under Section 313 of the CrPC, he was approximately 80 years old. He is now approximately 88 years old and remains in prison, having faced criminal proceedings for approximately 13 years. Therefore, considering the time already served as punishment, he was ordered to be released immediately if he is not wanted in any other case. Along with this, the court appreciated the efforts of Amicus Curiae Advocate Alpana Verma and directed the Jharkhand High Court Legal Services Committee i.e. HCLSC to pay her a remuneration of Rs 7,500. This case is from Chhota Lagiya village, under the jurisdiction of the Mufussil police station in West Singhbhum district. On November 21, 2013, the appellant, Goma Gop, was drunk at home after drinking Hadiya, a local traditional liquor. When his 20-year-old son, Pratap Gop, objected to his drinking, an argument broke out between them. In a fit of rage, the father stabbed his son in the stomach with a vegetable knife, killing him instantly. In 2018, a Chaibasa court sentenced the accused to life imprisonment and a fine of 5,000, against which an appeal was filed in the High Court. FIR No. 120/2013 was registered in the Mufussil police station in Chaibasa on November 22, 2013.

Dr. Vijay Garg

Agriculture is the backbone of rural India, while solar energy is emerging as an important source of clean electricity. Traditionally, farming and solar power generation have competed for land. Solar installations occupy large areas that could otherwise be used for growing crops. However, an innovative approach called agrivoltaics offers an opportunity to combine both activities on the same land. It allows farmers to cultivate crops beneath or between elevated solar panels while generating electricity above them. The concept raises an important question: can Indian farmers harvest food and solar energy from a single field without reducing agricultural productivity?

What Is Agrivoltaics?

Book Travel: Exploring Worlds Through Words

Parivahan Vishesh News

Dr. Vijay Garg

Travel is one of the most enriching experiences of life. It introduces us to new places, cultures, traditions and people. However, travelling does not always require a train ticket, an aeroplane or a passport. Sometimes, all we need is a book. Through reading, we can explore distant lands, discover ancient civilizations, understand different cultures and travel across centuries without leaving our homes. Books are wonderful companions that open doors to countless worlds. A travel book can take us to the snowy mountains of the Himalayas, the deserts of Rajasthan, the beautiful valleys of Kashmir or the busy streets of London. A historical book can transport us to ancient India, the Roman Empire or the fascinating world of Egyptian civilization. With every page, our imagination takes flight. Book travel is more than reading; it is an adventure of the mind. When we read a story, we imagine its characters, visualize its settings and experience its emotions. A good writer makes us feel as though we are walking through unfamiliar streets, climbing mountains, crossing rivers or meeting people from different backgrounds. This imaginative journey makes reading both enjoyable and educational. Books also help us understand cultures different from our own. By reading about other countries, we learn about their food, festivals, languages, beliefs and ways of life. Such knowledge develops respect for diversity and reduces prejudice. It teaches us that although people may speak different languages and follow different traditions, their hopes, dreams and emotions are often similar. For students, book travel is especially valuable. Textbooks provide essential knowledge, while biographies, travelogues, novels and historical accounts broaden their horizons. Reading about scientists, explorers,

Two Harvests from One Field: Combining Solar Power with Agriculture

Agrivoltaics is the practice of integrating agricultural production with solar photovoltaic systems on the same land. Solar panels are installed at suitable heights and spacing to allow farming operations beneath or between them. Depending on the design, farmers can grow vegetables, fodder, medicinal plants and certain shade-tolerant crops while producing renewable electricity. Unlike conventional solar parks, which may replace agricultural activity, agrivoltaic systems aim to preserve farming alongside energy generation. This approach could be particularly valuable in India, where agricultural

land is essential for food security and rural livelihoods.

Benefits for Indian Farmers

One of the most significant advantages of agrivoltaics is the possibility of earning income from two sources. Farmers may receive revenue from agricultural produce and electricity generated on their land. Depending on the ownership model, electricity can be sold to the grid, supplied to nearby consumers or used for irrigation pumps and other farm operations. Solar panels also provide partial shade, which can reduce excessive exposure to sunlight and

lower soil moisture loss under certain conditions. In hot and dry regions, this may help some crops withstand heat stress. However, the benefits depend on crop variety, local climate, panel height, spacing and the amount of sunlight reaching plants. Agrivoltaics may also support more efficient water use. Reduced evaporation can help conserve moisture, although the effect varies with soil conditions and panel arrangement. Rainwater distribution must also be managed carefully because panels can concentrate rainfall in particular areas.

Will Crop Yields Suffer?

Editorial

My Thought

The greatest challenge is balancing electricity production with agricultural productivity. Plants require sufficient sunlight for photosynthesis, growth and grain formation. Excessive shading can reduce yields, particularly in crops that need abundant sunlight. Therefore, agrivoltaics cannot be introduced uniformly across all farms. Crop selection is essential. Leafy vegetables, certain fodder crops and shade-tolerant plants may perform well under appropriately designed systems, while wheat, rice and other sun-demanding crops may require more careful evaluation. For Punjab, where wheat and rice are major crops, large-scale adoption should follow local field trials rather than assumptions. Researchers must measure crop yields, grain quality, water consumption, electricity generation and farmers' profits over several growing seasons.

Challenges and Practical Solutions

The initial investment in elevated solar structures can be substantial. Farmers may also face difficulties operating tractors, harvesters and irrigation equipment beneath panels. Installation must therefore accommodate farm machinery, drainage, crop height and routine agricultural activities. Government support, affordable financing, cooperative ownership and partnerships with renewable-energy companies could make these systems more accessible.

Agricultural universities and research institutions should develop region-specific models and demonstrate their performance through pilot projects. Farmers must also receive clear agreements concerning electricity prices, maintenance costs, land ownership and responsibility for repairing damaged equipment. Small farmers should not be excluded because they lack the capital required for installation.

A Sustainable Future

Agrivoltaics represents an opportunity to connect India's agricultural heritage with its clean-energy ambitions. It could diversify farm incomes, improve land-use efficiency and contribute to lower-carbon electricity generation. Nevertheless, its success depends on scientific planning rather than simply placing solar panels over cultivated land. The way forward is to begin with carefully selected pilot projects, compare crop yields with conventional farming, and expand only where economic and environmental benefits are demonstrated. The future of farming may not require choosing between food and electricity. With appropriate technology, suitable crops and farmer-centred policies, one field could produce two valuable harvests – strengthening rural livelihoods while helping India move towards a cleaner and more sustainable energy future.

Sewing Skills: Empowering Lives, Every Stitch Tells a Story of Hope

Parivahan Vishesh News

Dr. Vijay Garg

Sewing is much more than the simple act of joining pieces of fabric with a needle and thread. It is a valuable life skill that combines creativity, patience, precision and practical knowledge. For millions of people, especially women from economically disadvantaged backgrounds, sewing has become a powerful instrument of empowerment, financial independence and social transformation. Every stitch represents not only craftsmanship but also a step towards dignity, confidence and a better future.

Sewing as a Pathway to Independence

In many communities, financial insecurity limits opportunities for individuals to improve their living conditions. Women, particularly those living in rural areas and underprivileged households, often face barriers to formal employment because of limited education, family responsibilities or a lack of accessible jobs. Sewing offers a practical solution by enabling them to earn an income while managing their domestic responsibilities. With basic training, a sewing machine and a little determination, a woman can begin stitching clothes, repairing garments, making school uniforms or creating household textile products. These small activities can gradually develop into sustainable sources of income. Some women work from home, while others establish tailoring shops, boutiques or small garment businesses. Such opportunities reduce financial dependence and strengthen women's participation in household decision-making. When women contribute to family income, they often gain greater respect, confidence and control over their lives.

Education Through Practical Skills

Education does not always take place within the four walls of a classroom. Practical skills such as sewing provide valuable learning opportunities for people who may not have access to advanced academic education. Sewing training develops concentration, hand-eye coordination, measurement skills, problem-solving abilities and an understanding of design. Learners become familiar with measurements, fabric types, patterns, colour combinations and garment construction. These activities also encourage creativity and independent thinking. Vocational training centres, schools, charitable organisations and community groups can play an important role in making sewing education accessible. Short-term courses, affordable training programmes and workshops can help young people and adults acquire marketable skills. When practical training is combined with financial literacy, digital marketing and basic entrepreneurship education, learners become better equipped to turn their skills into successful livelihoods.

From a Sewing Machine to Entrepreneurship

A sewing machine can become the foundation of a small business. Initially, a person may accept orders from neighbours and relatives. As experience and customer trust grow, the business can expand through referrals, social media and local markets. Entrepreneurial opportunities include customised clothing, embroidery, alterations, children's garments, reusable shopping bags, cushion covers and other fabric products. Specialised services, such as traditional embroidery and customised occasion wear, can also create opportunities for skilled workers. Digital platforms have made it easier for small entrepreneurs to display their products, communicate with customers and receive orders beyond their immediate

neighbourhoods. Even a home-based tailoring enterprise can gradually build a wider customer base. However, success requires more than stitching ability. Quality, punctuality, fair pricing, customer service and financial planning are equally important. Access to affordable equipment, raw materials, training and small loans can further support aspiring entrepreneurs.

Sewing and Social Transformation

The impact of sewing extends beyond individual earnings. When women become economically independent, entire families benefit. Additional income can help provide nutritious food, better healthcare, educational resources and improved living conditions for children. Sewing groups and self-help groups also encourage cooperation and mutual support. Women can share equipment, purchase materials collectively, exchange ideas and accept larger orders together. Such collaboration builds social connections and reduces isolation. For widows, single mothers, persons with disabilities and individuals facing employment difficulties, sewing can offer a flexible route towards economic participation. With accessible workspaces and suitable equipment, many people can use this skill to develop greater independence. Sewing can also support environmental sustainability. Repairing damaged clothes, reusing old fabrics and transforming discarded textiles into useful products reduce waste and encourage responsible consumption. In a world increasingly concerned about pollution and excessive consumption, these traditional skills have renewed importance.

Turning Hope into Opportunity

Despite its potential, sewing-based livelihoods face challenges. Workers may struggle with low prices, irregular orders, expensive materials and competition from mass-produced clothing. Many talented individuals

also lack the resources to purchase sewing machines or access professional training. Governments, educational institutions, non-governmental organisations and community leaders can help overcome these barriers by providing affordable training, equipment support, market access and entrepreneurship guidance. Schools can introduce basic sewing and other vocational skills to help students appreciate the dignity of practical work. Society must also recognise that skill-based occupations deserve respect. The value of a person should not be measured solely by academic qualifications or professional titles. Honest work, creativity and self-reliance are equally worthy of appreciation.

Every Stitch, A New Beginning

Sewing teaches us an important lesson: meaningful change often begins with small actions. A simple stitch can repair a torn garment, but a learned skill can help repair broken hopes and open doors to new possibilities. Behind every handmade garment may be a story of determination, sacrifice and courage. A mother may be stitching school uniforms to educate her children. A young woman may be building her first independent income. A struggling family may be discovering a new source of stability through a home-based enterprise. Sewing skills are therefore not merely about fabric and thread; they are about people, possibilities and progress. By investing in vocational education and supporting skilled workers, society can transform a humble sewing machine into an instrument of empowerment. Every stitch tells a story of hope, and every empowered individual brings us one step closer to a more inclusive, self-reliant and compassionate society.

Kashi immersed in devotion with chants of Maa Bhagwati, flood of faith and reverence at Mata Ki Chowki

Parivahan Vishesh News

Message of respect for women given by performing Kanya Pujan, devotees engrossed in worship of Maa Jagdamba

(Santosh Kumar Singh)
Varanasi :- A wonderful confluence of the grace and devotion of Maa Adishakti was seen in Kashi, the city of Devadhidev Mahadev, when a divine and grand event of Mata Ki Chowki and Kanya Pujan was held at Hotel Amaya located in Cantonment. The thunderous chants of "Jai Mata Di", auspicious bhajans of Maa Durga and an atmosphere full of devotion transformed the entire premises into a sacred abode of Shakti worship. Devotees bowed their heads at the feet of Maa Jagdamba and wished for happiness, prosperity, health and universal welfare. The program started with the praise, worship and lighting of the lamp of Maa Durga, after which Kanya Pujan was performed methodically as per the sacred tradition of Sanatan Dharma. The devotees washed the feet of the girls, considering them as Goddess, applied tilak, offered chunari, offered food and prasad and received their blessings. During this, the entire atmosphere appeared full of devotion and reverence. After this, the Mata Ki Chowki that began created such an atmosphere of devotion that the devotees remained immersed in the glory of the Mother for hours. The bhajan singers enthralled the gathered crowd with many devotional presentations including "Ambe Tu Hai Jagdambe Kali", "Meri Naiya Paar Laga De Maa". Amidst the sweet tunes of dholak, jhanjh and claps, the devotees kept dancing immersed in devotion and the entire premises lit up with spiritual energy. Dr. Rajlakshmi Rai, founder of Mahila Bhumihar Samaj, said that Mata Ki Chowki and Kanya Pujan are not only religious rituals, but invaluable heritage of our Sanatan culture, respect for women and family values. She said that through Kanya Pujan we see the form of Maa Bhagwati in girls and give the message of

respect for women to the society. Vandana Singh, Soni Rai, Chandrakala Rai, Pratima Rai and Poonam Singh played a special role in making the program successful. On this occasion, a large number of devotees were present including Dr. Rajlakshmi Rai, Dr. Manjula Chaudhary, Kiran Singh, Seema Rai, Vandana Rai, Anita, Vinita Rai, Rashmi, Priya,

Pushpa Rai, Sarita Rai, Kusum Rai, Suman Rai, Asha Rai, Prachi Rai, Babita, Poonam Rai, Chhaya Rai, Ritu Rai, Rimjhim, Neelu and Swati. In the end, the program concluded with the aarti of Maa Bhagwati, after which prasad was distributed and Dr. Rajlakshmi Rai expressed her gratitude to all the devotees and collaborators.

ISTP of grit being generated on royalty of sand extracted from Yamuna river in the name of Janta Transport

Parivahan Vishesh News

Saharanpur - By creating a mining ID in the name of Janta Transport, persons named Sameer and Saddam Tyagi are generating ISTP of blast grit and thick boulders on the royalty of mining happening from the Yamuna river of Haryana and duping the government as well as the contractors of the department. It is said that both these persons are selling fake ISTP to babus and contractors of departments in most districts of Uttar Pradesh without giving any mining material. It is said that the Uttar Pradesh government collects revenue in the form of 150 transit passes per cubic meter and 25 cubic meters of minor mineral is loaded in one vehicle, whose revenue is Rs. 3750, and the owners of Janta Transport ID, Sameer and Saddam Tyagi, are giving transit pass ISTP for only Rs. 1500. Which is a matter of investigation. According to information received from sources, a case of royalty with fake security paper from Moradabad has also come to light. It is said that minor mineral is being loaded from stone crushers of Ramnagar and other places in Uttarakhand and royalty is being issued in a fake manner in the name of Janta Mineral and Satveer Moradabad Mines from Moradabad as royalty with security paper. It is said that minor mineral is loaded in vehicles from many areas including Ramnagar of Uttarakhand, whereas on the royalty of Uttarakhand, ISTP of UP should have been generated, but instead of ISTP being issued, in a fake manner, royalty with security paper from Moradabad is being given to vehicles for Rs. 2500 and is being extracted on a large scale. The names of those giving

Moradabad royalty to vehicles are said to be Munajir and Sameer Ghaziabad. How big a fraud is happening right under the nose of Bijnor mining department, but Bijnor Moradabad mining department has kept its eyes closed. Revenue personnel posted at the checkpost by the administration are also taking illegal entry of Rs. 500 per vehicle and allowing vehicles with fake royalty to pass unchecked. And the matter does not end here, the same royalty which was given for Rs. 2500 is being taken back for Rs. 500 and being sold to contractors by Amjad, driver Sabir Saddam Tyagi of Saharanpur, Muzaffarnagar. Whereas no minor mineral comes from Moradabad to Saharanpur for any government or non-government work, but the royalty sold in a fake manner from there is being uploaded unchecked on the department's portal by the departments of Saharanpur, Muzaffarnagar, Shamli without any investigation. Meerut STF had on 16 June 2026 registered a case against a gang of 23 people who were making fake royalty, exposed a black business worth crores of rupees and sent some people to jail, in which the names of some employees of construction divisions were also recorded in the FIR. According to information received from sources, some of these same people involved in the business of fake royalty are said to be on the radar of Meerut STF.

Big and aggressive protest by TGT-PGT candidates in Prayagraj - broke barricading and entered Education Directorate

Parivahan Vishesh - Delh / Prayagraj | October 2026 | Breaking News

BREAKING NEWS: Aggressive protest by TGT-PGT candidates in Prayagraj - Break barricading and enter Directorate of Education
Demand to restore old recruitment rules, four-layer barricading broken, scuffle with police

Prayagraj, 23 October 2026 | Hundreds of TGT-PGT candidates staged a strong protest outside the Directorate of Education this morning. Candidates have been protesting for several days demanding restoration of old rules. Today protest turned aggressive when protesters broke four layers of barricading and tried to enter the Directorate premises. Scuffle and altercation took place between police and protesters. Police deployed additional force to control the situation. Candidates say thousands of aspirants' future is at stake due to new rules.

Parivahan Vishesh | Editor in Chief Sanjay Kumar Bathla | Co Editor Pinki Kundu | October 2026

Parivahan Vishesh News

Hundreds of students removed four-layer barricading and forcibly entered the premises, scuffle with police, adamant on demand to implement old rules in recruitment

Special Correspondent Prayagraj Parivahan Vishesh Education Bureau

Fact - What happened? Candidates are pulling down yellow iron barricades, police are trying to stop them, scuffle is taking place. This incident is of today Tuesday 27 October afternoon...* - Location: Education Directorate, Prayagraj (UP Education Directorate)- Time: Dharna started from Monday 26 October 3 pm, turned aggressive on Tuesday.- Crowd: Hundreds of TGT-PGT candidates, including young women - Police arrangement: 4 layer barricading was put up, which was forcibly broken by the candidates. Additional force had to be deployed on

the spot.

Main points - Why did candidates get angry?

1. Demand for old rules: Uttar Pradesh Education Service Selection Commission (UPESSC) has issued advertisement for more than 17 thousand posts under new rules. Candidates allege that due to this lakhs of eligible candidates will be excluded.

2. Specific demands:
- Restore old rules, give one opportunity
- Include Technical Art
- Remove 50% marks compulsion in graduation
- Give chance to Single Subject candidates
- Remove BFA/MFA, TET, B.Ed/Non-B.Ed anomalies

3. Reason for anger: In the previous 19-day agitation, the government had given verbal assurance that they will give opportunity under old rules, but written Government Order (GO) has not been issued till date. Chief Minister Yogi Adityanath had also spoken in favour, yet officers are acting arbitrarily - allegation by agitator Ashutosh Pandey.

4. Slogan: "Will not return home until written order is issued." **Editorial analysis:** This is not just an issue of recruitment, but a question of the future of lakhs of B.Ed, BA, arts stream youth of Uttar Pradesh. Prayagraj, which is the capital of competitive students, the gherao of the Education Directorate there is a sign that lack of dialogue is increasing. Breaking barricading by police is not legally appropriate, but officials not coming for talks for 24 hours also shows administrative apathy. **Appeal of Parivahan Vishesh:** The government should immediately issue a written clarification and save the future of students from hanging in balance.

716 students showcased talent in North Eastern Railway's essay and painting competition

Temple is not a center of fashion, but of faith and dignity - Dilip Singh

(Santosh Kumar Singh)

Varanasi :- A temple is not just a place for darshan and worship, but is the center of our faith, religion and culture, where darshan is important, the dignity of attire in the temple is equally important. Today it is a matter of concern that temples are gradually becoming centers of attire and fashion, whereas while going to the temple, especially women's attire should be dignified and cultured. On this serious issue, a delegation of the Shiv Baraat Committee met the Deputy Collector of Kashi Vishwanath Temple, Shambhu Sharan, and said that this is not a restriction, but respect for our culture. The committee said that the committee is not talking about a dress code for temple darshan but requests the temple administration for

decent dress. During the meeting with Deputy Collector of Kashi Vishwanath Temple Shambhu Sharan, Dilip Singh, Kamal Kumar Singh, Shammii Khatri, Sanjay Agarwal, Dr. S K Khanna, Manish Mishra and Vivek Shukla of Shiv Baraat Committee were present.

Jaleswar Minor Girl Murder Case: Congress Delegation Meets Odisha Human Rights Commission Chairperson, Demands Crime Branch Probe and ₹50 Lakh Compensation

Manoranjan Sasmal , State Head Odisha

Key Demands of the Congress

Bhubaneswar: Seeking justice in the case involving the disappearance and brutal murder of a 14-year-old Class IX student from Paschimabad village under Jaleswar block in Balasore district, a delegation of the Odisha Pradesh Congress Committee (OPCC) met the Hon'ble Chairperson of the Odisha Human Rights Commission (OHRC), Shri Shatrughna Pujari, today and submitted a memorandum.

The delegation expressed serious concern over the alleged delay in police action despite the family members and villagers informing the police about the girl's disappearance on October 16 and providing information about a suspected person. An FIR was registered on October 17, while the girl's partially burnt body was recovered on October 22.

Raising serious questions about the local police's investigation and impartiality, the Congress delegation demanded a fair and independent investigation to ensure that no one involved in the crime, including any influential person, escapes the law. It also called for stringent legal action against those found guilty.

The delegation stated that its discussion with the OHRC Chairperson was satisfactory. According to the delegation, the Chairperson assured them that necessary directions would be considered for an appropriate investigation and that steps would be taken regarding compensation for the victim's family, taking into account the concerns and demands raised by the delegation.

1. Crime Branch Investigation: A Crime Branch probe should be ordered to ensure a fair and impartial investigation into the case.

2. Action Taken Report: A time-bound Action Taken Report (ATR) should be submitted, detailing the progress of the investigation, forensic findings and steps taken by the authorities.

3. Action Against Negligent Police Officials: If negligence or dereliction of duty by police personnel is established, disciplinary and legal action should be initiated against the officials concerned.

4. ₹50 Lakh Compensation: The victim's family should be provided compensation of ₹50 lakh.

5. Employment or Livelihood Assistance: Appropriate employment or livelihood support should be provided to the victim's elder sister, in accordance with her educational qualifications and applicable rules.

6. Protection of Evidence and Rehabilitation: All evidence should be preserved, and the victim's family should receive necessary legal assistance and rehabilitation support.

The Congress delegation included senior advocate and OPCC Vice-President Shri Shivananda Ray; President of the Panchayati Raj Organisation, Odisha, Shri Sudarshan Das; OPCC General Secretary Shri Bankanidhi Behera; OPCC spokesperson Dr. Manisha Das Patnaik; and advocate Alok Nanda.
