Initiative of Delhi Transport Commissioner Appreciable - Diwali Milan Celebrated with Officers and Employees of Transport Department

Parivahan Vishesh News

Transport family gathered at Burari Vehicle Inspection Branch - More than four hundred officers - employees participated, wonderful confluence of mutual meeting, cooperation and team spirit

Presenter- Sanjay Kumar Bathla, Editor in Chief

Introduction: Festival is not only name of lighting lamps, festival is name of connecting hearts. This spirit was realized by Delhi Transport Department. Diwali Milan function organized on Wednesday at Burari Vehicle Inspection Branch was not only a formal program, but a historic moment of transport family uniting, understanding each other and strengthening departmental harmony.

This program organized on direction of Transport Commissioner Niharika Rai erased distance between officers and employees and brought them on one platform as a family.

Main Facts - At a Glance:
- Place: Burari Vehicle Inspection Branch, Delhi
- Event: Diwali Milan Celebration
- Organizer: Delhi Transport Department
- Participating Departments: Delhi Transport Department and Delhi Infrastructure and Tourism Development Corporation
- Participation: More than four hundred officers and employees
- Special Invitation: Delhi Transport Minister was also invited to the function
- Special Arrangement: Proper arrangement of tea and water for all at conclusion

Detailed Description of Program:

1. Beginning with Welcome: Program began in very dignified atmosphere. Additional Commissioner felicitated Special Commissioner and Commissioner by draping shawl. On stage guests discussed various issues in cordial atmosphere. This scene itself was telling that this meeting is not only formality, but symbol of intimacy.

Smile on faces of officers sitting on stage and feeling of mutual respect was clearly visible.

2. Grand Event at Burari: On Wednesday on direction of Transport Commissioner all officers and employees of entire Delhi Transport Department and Delhi Infrastructure and Tourism Development Corporation gathered. Whole premises was decorated according to festival of lights.

Delhi Transport Minister was also invited in this function, which further increased dignity of program.

3. Participation of More Than Four Hundred Officers-Employees: More than four hundred officers and employees participated in Diwali Milan program. All enjoyed festival of lights with joy and enthusiasm.

In program, from senior officer to junior employee, all sat together, ate together and gave Diwali greetings to each other. Wall of post and level was seen breaking here.

4. Food Arrangement: At conclusion of event, proper arrangement of food was made for all. This community feast with traditional dishes and sweets also became symbol of mutual love.

Main Points - Why is This Initiative a Milestone?

A. Initiative of Mutual Meeting: In government departments often due to work pressure officers-employees are able to meet each other only formally. This event gave them opportunity to meet, talk and understand informally.

B. Strength to Team Spirit: This initiative of Transport Commissioner Niharika Rai proved to strengthen team spirit. When officers and employees work like a family, Delhi's transport service will be stronger.

C. Increase in Morale: Employees appreciating this initiative said that enthusiasm and positive energy has been communicated in department due to this. Coordination and cooperation at workplace increases with such events.

D. Harmony in Organization: All expressed confidence that harmony in organization will increase with such events in future also.

Editorial Comment: Transport Department is not only department of vehicle inspection, license and permit. It is lifeline of Delhi. Lakhs of people daily depend on transport department's system on Delhi's roads.

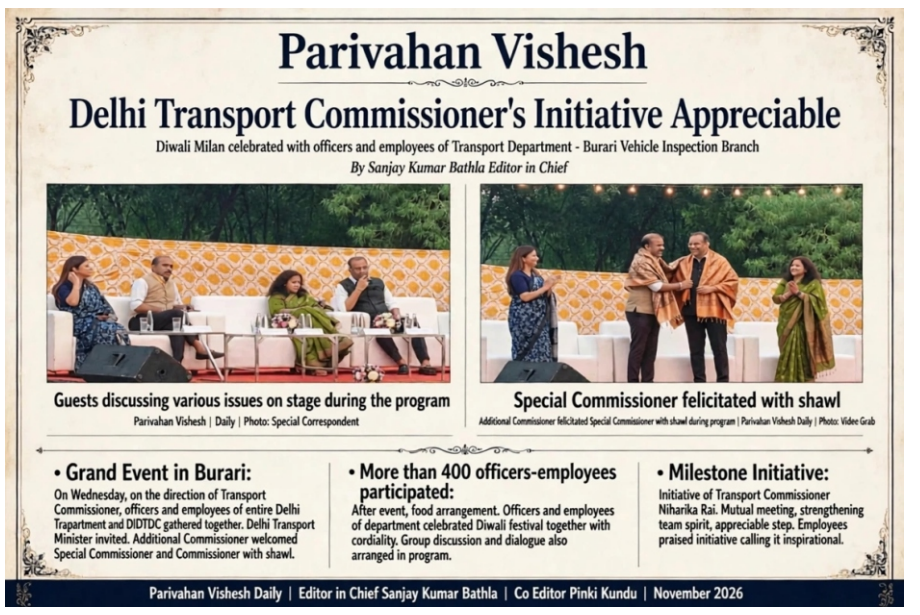

In such situation, if family of department itself will not be united, then how will service to public be strengthened? That is why this initiative of Transport Commissioner Niharika Rai is not only a Diwali Milan, but proof of visionary leadership.

Leadership is meaningful only when it connects its people, increases their morale and makes them feel like family. On this criterion this event proved completely successful.

Conclusion: This Diwali Milan function of Burari will be remembered as an inspiring chapter in history of Transport Department. In light of lamps, officers and employees resolved to further strengthen Delhi's transport service with unity and cooperation.

This is true message of Diwali - From darkness to light, from distance to closeness, and from formality to intimacy.

Heartiest Diwali greetings to Transport Commissioner Niharika Rai and entire transport family from Parivahan Vishesh family.

Mistakes of Delhi Government, Delhi Government Departments and Agencies - Punishment to Public

When guard on pollution itself is only on paper, how will air become clean?

Parivahan Vishesh News

Pollution's procession is going on, administration is playing band

Air is poisonous, but government action is completely healthy

Writer and Presenter - Sanjay Kumar Bathla, Editor in Chief

Introduction - Crisis on Breath
As soon as winter comes, air of Delhi-NCR again becomes poisonous. In morning, not fog but smoke is visible. Burning in eyes, sore throat, difficulty in breathing - this has now become identity of season.

On papers our rules are so strict that breath of polluter should stop. Fines are heavy, sections are scary, commissions are formed. But go on ground then same rules are seen staggering like a sick man. Courts reprimand, officers hold meetings and then everything continues as it is.

It seems system of expressing concern over pollution has developed more than stopping it. Real question is why despite rules being so strict, their compliance is so weak?

Main Facts - At a Glance
- **National Clean Air Programme:** Very big expenditure has been done for years, but results have not been as per expectations.
- **Condition of Cities:** Most cities are still suffering pollution above National Air Quality Standards. Only few cities could reach prescribed standards. In many cities pollution increased despite expenditure.
- **Vacant Posts in Boards:** Almost half posts are vacant in Pollution Control Boards. Due to shortage of scientists, engineers and inspectors, regular inspection

of factories and pollution spreading units is affected.
- **Fine and Recovery:** Heavy fines were imposed for construction related violations in Delhi, but very less recovery could be done. Fast in imposing fine and slow in recovery - what kind of strictness is this?
- **Progress of States:** States of Delhi-NCR have completed only slightly more than half of prescribed action plans. Progress of one state remained most behind, while other state remained relatively ahead.
- **Comment of Supreme Court:** Supreme Court also clarified that problem will not be solved only by issuing orders, they should be complied on ground.

Detailed Analysis - Part One: Money Spent, Why Air Not Clean?
Public has right to know where money was spent and how much improvement came from it. Big amount of government expenditure does not automatically become proof of success.

When results are not visible in air, then review of schemes should also be as strict as their rules are.

Problem is that meaning of pollution control has remained only making schemes, holding meetings and preparing reports. Action gets completed in file, but dust keeps flying on road.

Road cleaning, sprinkling of water at construction sites, ban on burning garbage, checking of vehicle smoke - all these works appear complete on paper, incomplete on ground.

Detailed Analysis - Part Two: Security of House Without Watchman Condition of Boards on whom responsibility of pollution control is, is also worrying. It is like expecting security of house without watchman. When there will be no inspector, then who will keep watch on smoke of factories and industrial waste? System to make rules exists, but there are not sufficient employees to implement them. Vacant posts give open exemption to those spreading pollution. Until institutions get sufficient employees, modern equipment and independent functionality, paper strictness will have no meaning. Many monitoring centres remain closed and violation of rules continues at construction sites. **Detailed Analysis - Part Three: Mistakes of Delhi Government, Departments and Agencies - Punishment to Public Most painful aspect of this issue is this - Punishment of mistakes of Delhi Government, Delhi Government departments and agencies falls on public in form of diseases and reverse penalty also and it is public only who suffers.** Departments do not work on time, agencies do not coordinate, monitoring centres remain closed, rules are not got followed at construction sites, cleaning of roads remains incomplete, burning of garbage does not stop, and when pollution increases then restrictions are imposed on public. School closed, ban on construction work, restrictions on vehicles, effect on market - common man bears burden of all these. No solid action is taken on officers who do not fulfill their responsibility. But public which is already bearing poisonous air has to bear more trouble. This is double injustice - first mistake of department, then punishment to public.

Detailed Analysis - Part Four: Constitutional Rights - Clean Air Not a Favor, But a Right Article Twenty One - Right to Life: Under Article Twenty One of Constitution, right to breathe in clean air is also included in right to live. Supreme Court has clarified in many orders that living in polluted air is violation of right to life.

Article Forty Eight A - Environment Protection: It is duty of State to protect environment, protect forests and wildlife. **Article Fifty One A - Citizen Duty:**It is fundamental duty of every citizen to protect natural environment and have compassion for all living beings. Therefore giving clean air is not favor of government, it is constitutional obligation. And protecting environment is not only of government, it is duty of all of us also.

Detailed Analysis - Part Five: Law, Acts and Judicial Orders Air Act: Air Act was made for prevention and control of air pollution. Under it Pollution Control Boards got right to inspect factories, fix standards and take action on violation. **Environment Protection Act:**This Act gives comprehensive powers to Central Government for protection of environment. Under it making rules, fixing standards and giving punishment on violation is possible. **National Green Tribunal Act:**Tribunal was formed for quick disposal of cases related to environment. **Gazetted Notifications and Graded Response Action Plan:**In Delhi-NCR when pollution increases, system of implementing phased restrictions is there. Through notifications, instructions of construction, vehicle, industry and dust control are issued. **Judicial Orders:**Supreme Court and High Courts have been giving orders from time to time for pollution control. Supreme Court has clearly said that problem will not be solved only by issuing orders, they should be complied on ground.

Question is same - when Constitution, Acts, Notifications and Court orders - all are present, then why compliance is not happening? Detailed Analysis - Part Six: State vs State - Air Does Not Recognize Boundaries Pollution is not problem of one city or state, but as soon as responsibility to stop it comes, all confine in their own circles. One state accuses stubble burning, other holds smoke of vehicles and construction dust responsible. Delhi counts its problems and neighbouring states their compulsions. In this blame game pollution keeps increasing. Commissions and meetings have no special meaning, until common action plan and responsibility is fixed. Air does not recognize boundaries of state, therefore responsibility to keep it clean also cannot be divided in boundaries. **Detailed Analysis - Part Seven: Inequality in Action** One big reason for weakening of rules is also inequality in action. Action on small contractor or shopkeeper is easy, but in cases of big industrial units process gets stretched long. Somewhere legal appeal, somewhere technical investigation and somewhere in name of departmental permission action keeps getting postponed. Meanwhile pollution continues. Effect of law will be only when it will be applied equally on all small and big. Also, by holding one reason responsible for pollution, other problems cannot be ignored. Along with stubble, smoke of vehicles, industrial emission, dust of construction, burning of garbage and bad cleaning of roads also increase pollution. Problem arises due to many reasons, therefore solution also should be comprehensive and continuous. **Solution - What Should Happen Now? - Compliance of Old Orders:** Now need is more of compliance of old orders than new orders.**- Vacant Posts Be Filled:** Vacant posts of Pollution Control Boards be filled and monitoring centres remain active.**- Full Recovery of Fines:** Strict action be taken on units violating rules again and again.**- Responsibility Be Fixed:** Responsibility of each department and officer be fixed. Not only orders but solid results also be asked from officers.**- Transparency:** Expenditure on schemes and their results be made public.**- Coordination:** Coordination among states should increase and regular monitoring of sources of pollution should be there.**- Participation of Public:** Public should get simple medium for complaint and suggestion.**- Measure of Success:** Success of pollution control should be measured not by meetings and reports, but by improvement in air quality. **Conclusion - Paper Tiger and Breath of Public** Irony is that on which air everyone has equal right, most negligence is shown in fulfilling responsibility to keep it clean. Public gets assurance of clean air, but in return it has to bear cost of masks, medicines and diseases. Success of government should be decided not by number of rules or budget spent, but by improvement come in life of common man. Until violators of rules have to face punishment and officers avoiding responsibility have to face accountability, situation will not change. After all purpose of law is not to show strictness in files, but to secure life of people. Otherwise rules will remain tigers on papers, officers will keep narrating their roar and public will remain forced to breathe in poisonous air. **Appeal from Parivahan Vishesh Family - Clean Air is Our Right, it is Not to be Demanded, it is Duty of Government to Provide it.**

Public Interest Message / Court Order Special - Source: Hon'ble Allahabad High Court, Lucknow Bench, Order dated 28.10.2026, WPIL No. 329 of 2026

Parivahan Vishesh News

High Court strict on Lucknow jam - 1.33 lakh e-rickshaws become major reason, decision on ban on new registration in 4 weeks

IIT-BHU will do traffic study in 4 months for Kamta crossing and Polytechnic-Kamta-Chinhat road, SIT instructed to get order dated 12.05.2022 complied

Editor in Chief: Sanjay Kumar Bathla - Parivahan Vishesh Daily Newspaper

Lucknow - Allahabad High Court, Lucknow Bench has given important directions in Public Interest Litigation on deteriorating traffic system of capital Lucknow. Court clearly said that uncontrolled number of e-rickshaws is one of main reasons of jam in city, and now time has come for solid action on it.

Facts at a Glance

Point | DetailsCasel Public Interest Litigation (PIL) Number - 329 / 2026
Petitioner | Prashant Sharma and others
Respondent | Government of Uttar Pradesh, Principal Secretary, Urban Development and 25 others
Bench | Hon'ble Justice Alok Mathur and Hon'ble Justice Abdhesh Kumar Chaudhary
Date of Order | 28 October, 2026
Next Hearing | 09 December, 2026
Court Number | 05, Lucknow Bench

Main Points - What Common Public Should Know
1. Chairman of SIT appointed - DCP Crime given command Police Commissioner, Lucknow on previous direction of Court has appointed _Mr. Anil Kumar Yadav_ presently posted as DCP (Crime) as Chairman of SIT. He appeared in Court and told that he has read entire order file and understands his responsibility well. **2. IIT-BHU will do study for Kamta crossing**It was told to Court that _IIT (BHU)_ has been engaged to give opinion on construction of underpass, clover leaf etc. for improving traffic situation of Lucknow. IIT-BHU will do independent evaluation of traffic study, multi directional traffic flow, traffic simulation study and action plan for permanent and long term solution on _Kamta crossing and Polytechnic-Kamta-Chinhat Road_. Opinion is likely to come _in next 4 months_. **3. 1,33,000 e-rickshaws in Lucknow - big reason for jam**In Court during several deliberations all parties agreed on point that _about 1,33,000 e-rickshaws_ plying on roads of Lucknow are a main cause of jam in city. **4. Order to ban new e-rickshaw registration possible - Decision in 4 weeks**Court has directed _Additional Chief Secretary, Government of Uttar Pradesh, Lucknow_ to consider this aspect. If he feels that number of e-rickshaws in Lucknow or any other city of state is far more than required, then he can order Regional Transport Officers to _immediately stop registration of new e-rickshaws_ under _Section 39 of Motor Vehicles Act, 1988_, till review of this decision. This decision has to be taken _in next 4 weeks_. **5. Central Government's reply - Registration mandatory, only fee exemption**On letter of State Government, Central Government replied that only exemption in prescribed _fee_ has been given, but _mandatory requirement of registration under Section 39 has not been ended_. **6. Order dated 12.05.2022 not implemented - SIT will get it complied**Under _Rule 178 of Motor Vehicles Rules, 1998_ State has power to control operation of vehicles on any road / route. Order dated 12.05.2022 already exists, in which there is ban on plying e-rickshaws on many roads, but in general information this order has not been fully implemented. Court has directed _SIT to ensure compliance of this order_ and to reconsider to extend this order to other areas also if needed. **7. Common citizen should not face trouble - Alternative route necessary**Court clarified that whenever any order regarding e-rickshaw is passed under Rule 178, it should be ensured that _alternative route / routes are marked_, so that common citizens do not suffer. **Detailed Description - In Editorial Style** This order is a ray of hope for citizens stuck in hours of jam daily on roads of Lucknow. Court not only commented, but fixed time-bound action - on one hand responsibility has been given to SIT to get old order implemented on ground, on other hand scientific solution has been sought from technical institute like IIT-BHU. Biggest message is for e-rickshaw drivers, owners and Transport Department. Now running e-rickshaw without registration and increasing uncontrolled number in every street will not be easy. Stand of Court is clear - _Employment is also necessary, but rules and facility of common public is above that._ At same time Court has also kept humanitarian aspect for common passengers. On imposing ban, giving alternative route will be mandatory, so that school going children, office going employees, patients and elderly do not suffer. Next hearing will be on _09 December, 2026_, in which compliance report will be presented. In Court on that day Chief Engineer (PWD) Mr. Ravindra Singh, RTO (Enforcement) Lucknow Mr. Prabhat Pandey, DCP Mr. Anil Kumar Yadav and Additional Commissioner, Municipal Corporation Lucknow Mr. Pankaj Srivastava have been again directed to remain present.

Public Interest Message - Appeal of Parivahan Vishesh Daily Newspaper Citizens are requested to follow official information of their Regional Transport Office and Traffic Police for information of registration, restricted routes under Rule 178 and alternative routes. E-rickshaw drivers should not drive vehicle without registration and should not go on restricted roads. For jam-free Lucknow, following rules is biggest cooperation.

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, 'Parivahan Vishesh News Doordarshan,' from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Governmant of India, various State Governments, and all political organizations before anyone else.

Get Ready — We're Coming Soon!

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world.
After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Where do worms in guava come from? - Attack does not come from outside, it is born inside

Parivahan Vishesh News

Guava looks fine from outside, worms come out on cutting - Female fruit fly gets attracted by sweet smell of ripening guava Pinki Kundu, Social Consultant Introduction - Fine from outside, spoiled from inside. You must have ever bought a guava, perfectly fine, beautiful and ripe from outside. On cutting, small white worms were seen crawling inside. Mood got spoiled, whole guava had to be thrown. Question arises - How did these worms reach inside guava? Did someone put worms in it? Did shopkeeper sell bad guava? Truth is that these worms do not come from outside. They are born inside guava itself. Reason for this is a small fly - Fruit Fly.

Main Facts - At a Glance - Name of insect: Fruit Fly- Size: Very small, about five to eight millimeter long - that is slightly bigger than a mosquito- When attack: When guava starts ripening and sweetness and smell comes in it- How attack: Female fly pierces guava peel with its pointed organ - Ovipositor, that is egg-laying needle and lays eggs inside- Eggs at one time: Five to ten eggs in one hole- Identification: Guava looks fine from outside, hole is so fine that it is not visible to eye- Damage: Guava starts rotting from inside, does not remain edible

Detailed Description - Complete Life Cycle of Fruit Fly

Step One- Arrival of Female Fly: Sweet smell of ripening guava spreads in air. Smelling it, female fruit fly sits on guava. She chooses such guava which is ripening, soft.

Step Two - Hole in Peel and Laying Eggs: Female fly makes very fine hole in guava peel with its needle-like organ. In this hole she puts her eggs. Hole is so small that we cannot see it. Therefore we feel guava is fine.

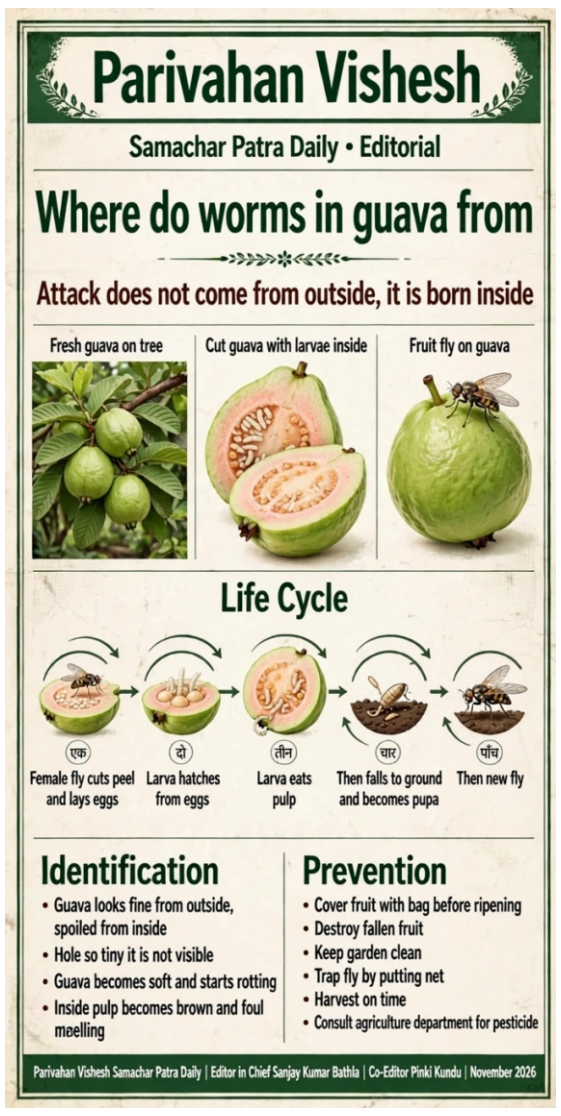

Step Three - Larva Hatching from Eggs: Within one to three days small white worms come out from these eggs. They are called Larva. These are same worms which we see on cutting guava.

Step Four - Larva Eating Pulp: Larva for about four to thirteen days remains inside guava itself and keeps eating its sweet pulp. As it eats, guava becomes soft, mushy and rotten from inside.

Step Five - Falling on Ground and Becoming Pupa: When larva becomes fully grown, then it leaves guava and falls on ground. Going in soil of ground it gets closed in a hard shell. It is called Pupa.

Step Six - Becoming New Fly: After seven to eighteen days a new fruit fly comes out from this shell. It again flies in search of some new ripening guava. In this way this cycle keeps going. That is, attack started from one fly, spreads in whole garden in few days.

Main Points - Why does this attack spread so fast? A. Invisible Hole: Hole of fly is so fine that both farmer and customer do not come to know. By the time worms are visible, it is too late. **B. Fallen Fruits - Biggest Reason:** In rotten guavas that remain fallen under tree, thousands of larvae grow. From them only new flies are formed and again attack on tree. **C. Ripening Together:** When many guavas ripen together in garden, then flies get plenty food and place to lay eggs. **D. Hot and Humid Weather:** Fruit fly grows fast in heat and humidity. This is reason that in rainy and summer season worms are found more in guava.

Precaution in Public Interest - What should Farmer and Consumer do? For Farmers:
- Covering Fruit with Bag: Cover guava with paper or cloth bag when it is small itself. Due to this fly will not be able to make hole. This is safest and most effective method.
- Destroy Fallen Fruit: Do not leave any guava fallen under tree. Pick it and bury in pit or destroy far.
- Cleaning of Garden: Do not let rotten fruits, leaves and garbage accumulate in garden.
- Putting Trap: Put traps in garden that attract fruit fly. From this number of flies is also known and control also happens.
- Harvesting on Time: Pluck guava before it becomes overripe. Overripe guava attracts fly more.

For Consumers: - While buying guava, press it lightly and see. Do not take more soft, stained or holed guava.- Eat guava only after cutting and seeing properly.- Do not keep guava open for many days at home.

For Chemical Spraying: Before using any pesticide, definitely take advice from experts of Agriculture Department or Krishi Vigyan Kendra. Spraying without advice can cause harm to fruit, soil and health.

Editorial Comment: Worm in guava is not any magic, it is a scientific process. Until we understand this process, we will keep throwing only bad fruits. Real solution is not in medicine, but in understanding and cleanliness. Covering with bag, destroying fallen fruit and harvesting on time - these three small works only can save from big loss.

Conclusion: Worms in guava do not come from outside, they are born inside itself. A small hole of female fruit fly spoils whole guava in few days. Therefore if farmer will be aware, then garden will be saved. If consumer will be aware, then plate will be saved.

Heart Treatment Without Stents: Can Balloon Technology Change the Future of Cardiac Care?

Parivahan Vishesh News

Dr. Vijay Garg

Medical science is continuously developing new and innovative ways to treat heart diseases. Among the major advances in cardiology is the use of balloon-based techniques to treat narrowed or blocked coronary arteries. Traditionally, many patients with coronary artery disease have been treated with angioplasty followed by the placement of a stent. However, newer technologies, particularly drug-coated balloons, are creating possibilities for treating selected patients without leaving a permanent metallic implant inside the artery.

This development has raised an important question: Can balloon technology become an effective alternative to stents and transform the future of heart treatment?

How Does Balloon-Based Treatment Work?
A drug-coated balloon (DCB) is a specialised medical device designed to open narrowed coronary arteries. During the procedure, a thin catheter carrying the balloon is guided through a blood vessel towards the affected area of the heart.

Once the balloon reaches the narrowed section, it is carefully inflated to widen the artery and improve blood flow. Unlike a conventional stent procedure, the balloon is then removed without leaving a permanent metallic structure behind.

The special feature of a drug-coated balloon is that its surface contains medication that is transferred to the artery wall during inflation. This medicine helps prevent excessive growth of cells that can cause the artery to narrow again.

The approach is often described as a "leave-nothing-behind" strategy because it avoids placing a permanent implant in the treated section of the artery. PMC +1

Advantages of Drug-Coated Balloon Technology
Drug-coated balloons offer several potential advantages for appropriately selected patients.
• No permanent metallic implant: The treated artery does not need to contain an additional metal stent.
• Preservation of natural artery movement: The artery may retain more of its natural flexibility and ability to respond to changes in blood flow.
• Reduced metal burden: This can be particularly useful for patients who have already received multiple stents.
• Potentially shorter medication requirements: Some patients may need a shorter duration of dual antiplatelet therapy, although the treatment duration depends on individual clinical circumstances.
• Useful for small arteries: Balloon-based treatment can be particularly beneficial in certain small coronary vessels where placing a stent may be technically challenging.

These advantages make the technology an important development in interventional cardiology. Springer Nature Link +2

Where Can This Technology Be Used?
Drug-coated balloons are particularly useful in treating in-stent restenosis, a condition in which an artery becomes narrow again inside a previously implanted stent.

They are also increasingly being used for selected cases of coronary artery disease involving small blood vessels. In these situations, avoiding another permanent implant may offer clinical advantages.

However, not every patient is suitable for balloon-only treatment. The success of the procedure depends on the location, size and severity of the blockage, the condition of the artery and the patient's overall health.

If the artery does not remain sufficiently open after balloon treatment, the cardiologist may need to insert a stent to ensure adequate blood flow. Springer Nature Link +2

Is Balloon Treatment as Effective as Stenting?
This is one of the most important questions in modern cardiac care. Research comparing drug-coated balloons with drug-eluting stents has produced encouraging but mixed results.Some clinical studies suggest that balloon treatment can provide comparable outcomes in carefully selected patients, particularly those with small-vessel disease. However, other studies indicate that drug-eluting stents offer better protection against the need for repeat treatment in certain coronary lesions.

A 2026 review published in npj Cardiovascular Health highlights that drug-coated balloons have important applications but that their effectiveness varies according to the type and location of the blockage.

For many patients with larger coronary arteries and complex blockages, drug-eluting stents remain an established standard treatment. Therefore, balloon technology should be considered an additional treatment option rather than a universal replacement for stents. PMC +2

Challenges and Future Possibilities
Although balloon technology has made considerable progress, certain challenges remain. Successful treatment requires careful preparation of the narrowed artery, appropriate selection of the balloon and considerable expertise on the part of the cardiologist.

Researchers are also working to improve drug coatings, develop better balloon materials and identify which patients are most likely to benefit from stent-free procedures.

Advances in medical imaging, artificial intelligence and personalised treatment planning may further improve the selection of suitable patients and the safety of these procedures.

In the coming years, a combination of balloon-based treatment and selective stent placement may become an increasingly important approach in personalised cardiac care.

Conclusion
Drug-coated balloon technology represents an important step forward in the treatment of coronary artery disease. It offers the possibility of opening narrowed arteries, delivering medication directly to the affected area and avoiding a permanent metallic implant in selected patients.

However, the future of heart treatment is unlikely to depend on one technique alone. Stents and drug-coated balloons will continue to have complementary roles in modern cardiology.

The ultimate objective of medical science should not simply be to introduce newer devices but to provide safer, more effective and affordable treatment tailored to each patient's needs.

The real achievement of modern cardiac care will be measured not by the number of stents avoided, but by the number of lives protected and the quality of life restored.

Stress-Free Life, Happy Future :- Dr Roop

Parivahan Vishesh News

Gorakhpur. In today's fast-paced life, mental peace is getting lost somewhere amidst comforts and facilities. On 4th November on occasion of 'National Stress Awareness Day', experts have warned that stress is not only a mental condition, but also root of serious physical diseases. In this regard Homeopathic doctor Dr Roop Kumar Banerjee told that stress is not visible, but its symptoms are clear. Mentally restlessness, irritability and lack of concentration, while physically headache, fatigue and muscle strain are its major signs. If attention is not paid to them in time, it can become cause of problems like high blood pressure, heart disease and diabetes. He told that for stress relief meditate at least 15-20 minutes daily. Daily 30 minutes walk increases energy. 7 to 9 hours deep sleep is essential for mental health. Take nutritious food and sufficient water. Do not keep excessive expectations from self and others. Leave worry of past and enjoy today. Share your heart's talk with near ones. Take time for music, gardening or works of your choice. Avoid excessive use of social media and mobile. Do not hesitate to consult psychologist if needed. Homeopathic doctor Dr Roop Kumar Banerjee told that retirement is not end of life, but a new chapter of experiences. Instead of feeling loneliness, elderly should revive their interests. Their experience is strength of family and their smile is biggest capital of home. Beginning of stress-free life starts with loving self and making present moment meaningful. Let us, on this Stress Awareness Day, resolve to give priority to our mental health.

This Dhanteras, investment in health is family's biggest prosperity - This Dhanteras, go beyond gold-silver and invest in health - Shri Prataprao Jadhav

Parivahan Vishesh News

Prataprao Jadhav (Union Minister of State (Independent Charge) for Ayush and Minister of State for Health and Family Welfare)

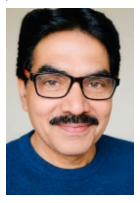

Shubham Karoti Kalyanam Arogyam Dhanasampada.'

(Santosh Kumar Singh)

Varanasi :- Prataprao Jadhav, Minister of State (Independent Charge) for Ayush and Minister of State for Health and Family Welfare, in his writing told that these familiar words of Sanskrit prayer very beautifully express the deep relation of health, welfare and prosperity in our traditions. They remind us that true prosperity is measured not only by material wealth, but also by health and happiness of our loved ones. Every year as soon as Dhanteras comes, preparations for Diwali start in our houses, cleaning and decoration of houses is done, festive enthusiasm is seen in markets and people buy new things as symbol of prosperity. Amidst these festivals, a simple question often arises in my mind that when we make so many preparations to secure prosperous future of our family, how much attention do we give to protection of their health?We save for future, get our property insured and make plans for financial investment, but the habits on which health of our coming years depends, often get least attention. Not eating food on time becomes part of our daily routine, not taking sufficient sleep starts being considered identity of busy life and health check-up is postponed till some problem takes serious form. Dhanteras gives us opportunity to reconsider these priorities.Dhanteras has special relation with Ayurveda. This festival is connected with appearance of Lord Dhanvantari who is worshipped as physician of Gods and original propagator of Ayurveda. His appearance carrying pot of nectar during Samudra Manthan is symbol of humanity's eternal aspiration for health and longevity. This relation gives Dhanteras much wider meaning than purchase of gold, silver or household items. It reminds us that real joy of prosperity is only when we have good health to experience it and share it with our loved ones.While discharging responsibility of both Ayush and Health and Family Welfare ministries, I well understand importance of this message in my daily life. Our talk about health often starts when disease has already knocked in our life. We discuss hospitals, medicines and treatment which undoubtedly are necessary, but an equally important talk should start much before this, in our houses, kitchens, workplaces and everyday routine.Can we give as much importance to prevention of diseases as we give to treatment?This same question is at core of Ayurveda's health-related thinking. Ayurveda's principle 'Swasthasya Swasthya Rakshanam', that is to protect health of healthy person, is extremely relevant for today's public health system also. It tells us that our health is affected by what we eat, how much sleep we take, how much physically active we are and how regularly we take care of ourselves. Today when non-communicable diseases, inactive lifestyle and stress are coming as big health challenges, then it has become necessary to pay more attention to preventive health services.For example, a simple meal taken with family can also be opportunity to increase awareness towards health. Through it we can develop habit of nutritious food in children and can take care of nutritional needs of elders of family. Similarly walking daily, doing regular yoga practice or keeping fixed time for sleeping and waking, though may seem small efforts, but following them for long time can bring meaningful change in health. Real power of preventive health services often lies in such simple and everyday decisions.India's Ayush medical systems can play important role in taking forward this culture of health protection and holistic welfare. Through initiatives like Ayushman Arogya Mandir (Ayush), efforts are being made to increase reach of Ayush-based health services at community level. At same time, promoting scientific research, quality standards and evidence-based medical practices is also necessary, so that India's traditional medical knowledge can contribute responsibly and effectively in present health services.However, no health initiative can be fully successful without active participation of families and communities. A healthy India cannot be built only through institutions and health facilities. For this every individual will have to give priority to health in his everyday habits and decisions. When India will complete hundred years of its independence in year 2047, then our vision of developed India should also have citizens who are more healthy, aware and capable of protecting themselves from preventable diseases.Here the spirit of Dhanteras can inspire us for a meaningful change. We see this festival as bringing something new in our house, then why not this year we also bring a new good habit in our house? This habit can be of eating nutritious food thoughtfully, can be of regular yoga practice, can be of taking sufficient sleep or can be of inspiring a family member to get long-pending health check-up done.On this auspicious occasion I appeal to every citizen to take personal resolve to make preventive health services part of his life. Let us start at least one positive change in our daily routine and inspire one other member of family also to do so. Pay special attention to health of our elders and children, take medical advice on time when needed and make healthy lifestyle shared responsibility of whole family.This Dhanteras when we light lamps in our houses, then its light should also remind us of our responsibility towards ourselves and our loved ones. The jewellery we buy can be inherited from one generation to another, but good health-related habits that we develop in our family can also become equally valuable legacy for coming generations.This Dhanteras let us bring not only symbols of prosperity in our house, but also new habits of healthy life. Take care of your loved ones, adopt healthy lifestyle and make preventive health foundation of bright future of your family. (Author Shri Prataprao Jadhav is Union Minister of State (Independent Charge) for Ayush and Minister of State for Health and Family Welfare)"

Dhanteras, the great festival of faith, culture and health

Parivahan Vishesh News

Dr. Mushtaq Ahmad Shah Sahaz Harda, Madhya Pradesh

Salutations and greetings! Dhanteras, the sacred festival that falls just before Diwali, is not just a festival of gold, silver, utensils, or shopping; it is also a vibrant expression of our deep faith, unwavering devotion, love, values, culture, and mutual brotherhood. In the Indian context and rural-urban fabric, this festival brings the message of warmth in relationships and health in life.

In Indian culture, every festival holds a profound social, philosophical, and scientific message. The festival that marks the beginning of the sacred Diwali festival series is Dhanteras (Dhantrayodashi). It is not just a day of material comforts and aspiration for wealth, but a celebration of prosperity, contentment, and health in every aspect of life.

From our villages and small towns to the metropolises, Dhanteras is a sight to behold. With crops thriving in the fields and festive preparations in the courtyards of homes, this festival in the Indian context is a means of family bonding.

Tradition and joy, the whitewashing, cleaning and decorating of houses with rangoli on this day symbolizes that we are all set to welcome positivity in our lives.

Even though today's modern age has seen people increasingly shopping online, going to the market on Dhanteras to buy brass, copper, or clay utensils, or bringing home a small item as per one's means, is still a part of our rituals. This tradition demonstrates our strong connection to our ancient roots and culture.

On Dhanteras, there is a special ritual for worshipping not only Kubera but also Lord Dhanvantari. During the churning of the ocean, Lord Dhanvantari appeared with a pot of nectar in his hands.

Health is the greatest wealth, our elders have always said, "Health is wealth." Lord Dhanvantari symbolizes that material wealth is of no value if a person's health is not good.

This festival teaches us that real wealth is not gold and silver, but a healthy body, a calm mind and cultured conduct.

On the evening of Dhanteras, when a lamp (diya) is lit for Yamraj at the main entrance of the house and in the courtyard, it is not just the spread of light, but it is also a prayer for freedom from the fear of untimely death and for the long life of the family.

On this day, when all the family members light lamps together and wish each other, it further strengthens the bond of mutual love, harmony and brotherhood.

Sharing sweets with neighbours and relatives, visiting each other's homes to enquire about well-being, this is an example of our shared culture which frees us from loneliness and makes us feel like a part of a big family.

Dhanteras reminds us that life isn't just a race for material success, but a celebration of emotions, traditions, and love for one another. When we hold on to this thread of culture, our values remain alive and our future generations remain connected to their soil.

This Dhanteras, let us resolve to not only light diyas in our homes but also spread the light of love and brotherhood in the hearts of our loved ones.

Come, let's light a lamp in someone's house too!

Parivahan Vishesh News

This is the festival of Diwali, let us
bring the message of happiness,
Along with your home, brighten up
someone else's home too.
Drive away darkness by lighting
earthen lamps.
Bring 'light' into the lives of those
who live in poverty.
Some may have sweets at home,
some may have dishes,
The joy of new clothes, desires
lying empty somewhere.

Brightness in someone's courtyard,
moisture in someone's eyes,
Let us share the lamp of love, so that
all helplessness vanishes.

It is not necessary that we buy gifts
worth lakhs,
Neither bring expensive garlands nor
fill the house with gold and silver.

A lamp and some sweets, a gift of
some clothes,
It can bring a smile on the face of a
needy person.

Those guilty of conversion and love jihad in KGMU should get death penalty - Gopal Rai

Parivahan Vishesh News

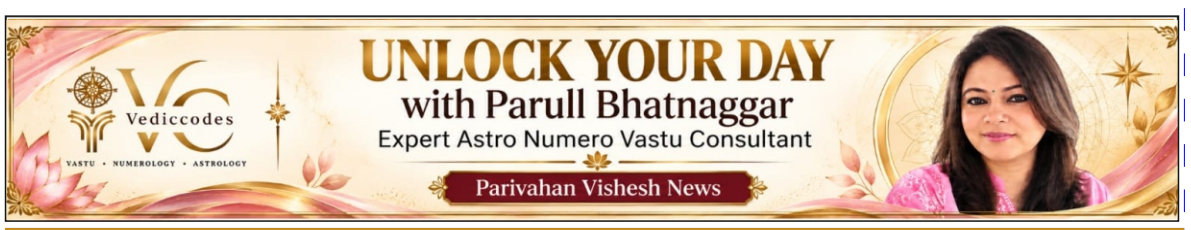

Voice raised in Lucknow against conversion network under leadership of International Vice President of Vishva Hindu Raksha Parishad, Manish Rai from Kashi

Targeting Hindu girls in KGMU through deceit, exploitation and love jihad is extremely shameful, request to Yogi government that guilty should not be spared at any cost

(Santosh Kumar Singh)

Varanasi :- The news that has come to light regarding conversion network in Lucknow, contact with girls through WhatsApp group, attempts of religious conversion under guise of love relations and role of people connected with big medical institutions like KGMU is extremely serious and worrying. Vishva Hindu Raksha Parishad strongly condemns it and demands fair, transparent and time-bound investigation of the matter. The Varanasi team of Vishva Hindu Raksha Parishad submitted a memorandum to the District Magistrate of Varanasi under the leadership of International Vice President Manish Rai. In this memorandum, the issue of love jihad in KGMU was targeted. Hindu girls are being forced for religious conversion through love, marriage, job, financial assistance or any other temptation, such act is highly condemnable. Deceiving the faith, freedom and dignity of Hindu sisters and daughters cannot be acceptable under any circumstances. Elimination of these jihadis targeting Hindu sisters-daughters is necessary. Establishing contact with girls through social media and WhatsApp and making them prey and forcing them for religious conversion is a very big crime. Strictest legal action should be taken against jihadis found involved in it.Vishva Hindu Raksha Parishad will not tolerate jihadi activities happening under the guise of medical institutions. Vishva Hindu Raksha Parishad demands that the role of jihadi network in institutions like KGMU should be investigated thoroughly. Jihadis should not get protection due to any post, profession or influence. On the said occasion all office bearers of the organization at national and state and district level were present.

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

05 NOVEMBER 2026 | Day vibration: 8 — Ambition, authority, money, discipline and material achievement

Moolank 1
Money & Career: Day 8 strengthens ambition, authority and financial focus around your leadership energy. Take charge of an important professional matter, but base decisions on numbers and long-term value rather than pride.
Relationship: Strong personalities may clash if both sides want control. Lead with respect and make room for the other person's priorities.
Precaution: Avoid ego battles, status spending and taking a financial risk merely to prove confidence.
Make Your Day Better: Use authority responsibly and make one financially disciplined decision.

Moolank 2
Money & Career: Day 8 asks your sensitive nature to become more practical with money and responsibility. A partnership or financial discussion can progress when emotions are separated from facts.
Relationship: You may feel pressure from another person's expectations. State your needs calmly instead of becoming passive or overly accommodating.
Precaution: Avoid emotional spending, fear-based decisions and surrendering financial control to keep peace.
Make Your Day Better: Balance sensitivity with firmness and clarify one money or responsibility issue.

Moolank 3
Money & Career: Day 8 gives commercial direction to your creativity and communication. Present results, negotiate value or promote your work confidently, but support every claim with realistic numbers.
Relationship: Your words can carry unusual authority today. Use them to encourage rather than dominate, especially during practical or money-related discussions.
Precaution: Avoid exaggeration, expensive showmanship and making promises that depend on uncertain income.
Make Your Day Better: Communicate your value clearly and convert one idea into a measurable result.

Moolank 4
Money & Career: Day 8 combines with your structured nature to favour systems, budgets, property, compliance and long-term planning. Persistent effort can produce solid progress when you remain adaptable.
Relationship: Responsibilities may become the centre of conversation. Discuss duties fairly rather than turning the relationship into a list of rules.
Precaution: Avoid rigidity, pessimism and controlling every detail because you fear a mistake.
Make Your Day Better: Strengthen one financial or professional system and delegate one responsibility wisely.

Moolank 5
Money & Career: Day 8 asks your fast-moving energy to become financially strategic. Negotiations and business opportunities can be productive, but read terms carefully before committing money or changing direction.
Relationship: Freedom and control can become sensitive themes. Be transparent about plans, especially where shared money or responsibilities are involved.
Precaution: Avoid risky deals, impulsive purchases and assuming that speed will compensate for weak planning.
Make Your Day Better: Channel your adaptability into one opportunity with clear numbers and boundaries.

Moolank 6
Money & Career: Day 7 turns your attention from outer comfort toward deeper value. Review long-term financial priorities and distinguish genuine needs from lifestyle habits or emotional spending.
Relationship: You may seek meaningful closeness rather than social activity. A quiet, honest conversation can strengthen trust more than an elaborate plan.
Precaution: Avoid over-giving, withdrawing when unappreciated and spending to create emotional comfort.
Make Your Day Better: Simplify one expense and give one relationship your undistracted attention.

Moolank 7
Money & Career: Day 8 brings practical pressure to your analytical nature. Research investments, contracts or career strategy carefully and translate insight into a firm, measurable decision.
Relationship: You may become reserved when practical pressure rises. Explain what you are processing instead of allowing silence to look like emotional distance.
Precaution: Avoid suspicion, analysis paralysis and secretive financial decisions.
Make Your Day Better: Use research to support one concrete action and communicate your reasoning clearly.

Moolank 8
Money & Career: Your Moolank 8 strongly resonates with Day 8, amplifying ambition, discipline, authority, money management and karmic accountability. Excellent for serious business decisions when power is used fairly and patiently.
Relationship: Intensity may increase around control, commitment or shared responsibilities. Respect and fairness will protect closeness better than authority.
Precaution: Avoid power struggles, work obsession, harsh judgement and high-risk financial moves driven by ambition.
Make Your Day Better: Handle power with integrity and strengthen one long-term financial foundation.

Moolank 9
Money & Career: Day 8 gives structure and material focus to your generous nature. Complete obligations, collect what is due and direct resources toward causes or goals that have sustainable value.
Relationship: You may want to protect or provide for others, but support should not become control. Allow loved ones to share responsibility for their choices.
Precaution: Avoid guilt-based spending, financial rescue patterns and anger when generosity is not acknowledged.
Make Your Day Better: Give with boundaries and close one pending financial or professional matter.

Application Linkharyanagoodgovernanceawards.haryana.gov.in . The application will be forwarded through the concerned Head of Office or Head of Department. The Head of Department will forward the application with his detailed comments to the concerned Administrative Secretary. The

Administrative Secretary will then submit the application with his comments and recommendation to the General Administration Department (Research Unit). Applications for awards at the state level will not be submitted directly to the Empowered Committee. The concerned Administrative Secretary will also be able to recommend the names of eligible employees or teams in consultation with the Heads of Departments.*These necessary documents must be submitted along with the application*Applicants must submit a project description of up to 200 words with their application. This should include the program or initiative, implementation strategy, implementation period, notable achievements, results, positive impact, expansion potential, and sustainability. Additionally, a PowerPoint presentation of up to 10 slides, along with the employee's name, designation, place of posting, and payee code as per HRMS, will be required.These committees will thoroughly examine the applications received.The DC stated that for state-level awards, an Empowered Committee constituted by the government will review applications and recommend nominees for the awards. Final approval will be granted by the Haryana government. At the district level, a District-Level Empowered Committee, chaired by the Deputy Commissioner, will consider applications. This committee may include the Superintendent of Police or Deputy Commissioner of Police (Headquarters), the Additional Deputy Commissioner, and other officers co-opted by the Chairman.The Deputy Commissioner stated that the objective of the Haryana Good Governance Awards Scheme 2026 is to encourage government employees to promote better administration, innovation, transparency, and effective public service. The government hopes that this initiative will strengthen the culture of good governance in the state and encourage employees who perform outstanding work.

Children displayed their talent on the second day of the Children's Festival

Parivahan Vishesh News

A wonderful confluence of art, dance and creativity

Children enthusiastically participated in various competitions at Bal Bhavan, captivating the audience with their brilliant performances.

Jhajjar, November 4

Under the guidance of Varsha Khanwal, Deputy Commissioner of Police and Chairperson of the District Child Welfare Council, various competitions were held at the Bal Bhavan campus on the second day of the four-day district-level Children's Festival. Children from various schools showcased their talent, creativity, and artistic skills in the competitions. The children's captivating performances in various disciplines, including dance, music, writing, painting, and acting, captivated the audience.On the second day, Wednesday, the program was inaugurated by District Child Welfare Officer Surekha Hooda. Coordinator Sanjay Sharma, Program Officer Akshama, andThe members of the jury jointly started the program by lighting the lamp.Children displayed their talent in various competitions.On the second day of the festival, several competitions were held, including Best Dramabaaz, Hindi and English Handwriting, Sketch on the Spot, Poster Making, Group Dance, Solo Dance, Clay Modeling, Declamation Contest, Classical Solo Dance, Patriotic Group Song, and Mehndi Rachao. Children from other groups also participated enthusiastically in the handwriting competition. During the competitions, the children showcased their imagination, artistic expression, dance, music, and writing skills. The audience applauded and encouraged the participants with applause. The children's confidence and talent filled the Children's Festival atmosphere with excitement and enthusiasm.*The aim is to provide a platform to children to showcase their talent: Surekha*District Child Welfare Officer Surekha Hooda expressed her gratitude to all the participants, jury members, and the team that supported the event. She said that Bal Bhavan plays a vital role in identifying children's hidden talents and providing them with a platform to thrive. Such events not only boost children's self-confidence but also contribute to their overall development. She expressed hope that children will continue to showcase their talents with the same enthusiasm and excitement in the upcoming days of the festival.*Here it is*On this occasion, representatives associated with the activities including Neeraj Bhagat, Narish Kumar, Sumita Devi, Rakesh Chawla, Sonam, Pinky, Dharamveer, Anupam, Rahul, Pankaj Kumar, Kiran Kumar Vashisht, Rakhi, Babita, Anoop, Mukesh Kumar, Monica, Arvind, Pradeep Kumar, Naruttam, Ishwar, Chetna, Dalwanti, Jaswanti, Dr. Mahavir and Nisha were present.

DC reached Bahadurgarh to conduct public hearing for the convenience of the subdivision residents.

Parivahan Vishesh News

DC Varsha Khanwal held a public hearing at her camp office in the Bahadurgarh Mini Secretariat. After listening to the problems of the citizens, she directed the officials to take immediate action.

Bahadurgarh, November 4

Providing better administrative facilities to citizens and ensuring prompt resolution of their problems near their doorsteps is a priority of the district administration. Toward this end, DC Varsha Khangwal visited the camp office of the Mini Secretariat in Bahadurgarh on Wednesday and heard the grievances of the area's citizens through a public hearing. She directed the officials of the concerned departments present on the spot to take serious cognizance of the complaints and resolve them as per the rules and within the stipulated timeframe.The DC said that the administration is providing public hearings in the Bahadurgarh subdivision so that citizens don't have to travel to the district headquarters in Jhajjar to resolve their problems, whether large or small, in their area. He gave clear instructions to officials that public complaints should not be left unnecessarily pending and that effective action should be taken on each complaint on a priority basis.Departmental coordination will solve people's problemsDuring the public hearing, citizens from urban and rural areas of Bahadurgarh presented their various problems to the Deputy Commissioner. The Deputy

Commissioner listened carefully to each complaint and issued necessary instructions to the concerned officials. He stated that resolving citizens' problems is the administration's responsibility, and negligence at any level will not be tolerated. He instructed officials to work in coordination and departmental cooperation, and said that in complaints involving multiple departments, all concerned departments should take joint action. Instead of sending complaints from one office to another, special attention should be paid to their resolution, so that people can receive timely relief.Public hearing strengthens the dialogue between the administration and the public.DC Varsha Khanwal said that the main objective of the public hearing is to give citizens the opportunity to present their views directly to the administration and to make the process of resolving complaints simple, transparent, and effective. Officials should work with sensitivity and accountability, keeping public interest paramount, so that citizens do not have to repeatedly visit government offices to resolve their problems. She said that the district administration is committed to providing a transparent, accountable, and public-friendly system. All officials should take action on complaints as per rules and ensure their timely disposal.The residents expressed their gratitude to the administration.Citizens from both rural and urban areas who attended the public hearing held in Bahadurgarh praised DC Varsha Khanwal's initiative to reach out to their areas and listen to their problems. Residents said this arrangement by the district administration allows them to raise their issues directly with higher officials and seek solutions. This not only saves time but also reduces the hassle of commuting to the district headquarters.This officer was presentOn this occasion, SDM Bahadurgarh Abhinav Siwach, Tehsildar Sudesh Mehra, former District President of BJP Rajpal Jangra, Convener Sanjeev Saini and officers of various departments were present.

The district will be pollution free only with public cooperation: DC

Parivahan Vishesh News

Those who burn garbage in the open will no longer be spared; strict action will be taken against those spreading pollution.

DC Varsha Khanwal said that negligence in controlling air pollution will not be tolerated, the administration will keep an eye on those who break the rules.

Stubble management is mandatory during the peak paddy harvesting season; farmers should not burn crop residue.

Bahadurgarh, 04 November.

The district administration has adopted a strict stance to control the increasing air pollution in the NCR region. DC Varsha Khanwal clarified that any kind of negligence will not be tolerated towards those who harm the environment by burning garbage in the open. She warned the general public and farmers to adopt the prescribed measures for stubble management during the peak paddy harvesting season and completely avoid burning solid waste in the open. The DC gave necessary guidelines regarding air pollution control in the Municipal Council Bahadurgarh auditorium.The DC stated that open burning of garbage poses a serious threat to the environment as well as public health. The toxic smoke from burning garbage releases harmful gases and particulate matter into the atmosphere, increasing the risk of respiratory diseases. This has the greatest adverse impact on the health of children, the elderly, and those with pre-existing medical conditions. Therefore, no one should endanger the health of others by burning garbage.Ban on burning of plastic and solid waste, citizens should dispose it off properlyThe DC stated that burning solid waste, including plastic, increases air pollution and adversely affects soil and water quality. Citizens should separate wet and dry waste in their homes, shops, and commercial establishments. Separate recyclable materials and utilize municipal waste disposal systems.Farmers should give priority to stubble management during the paddy harvesting season.DC Varsha Khanwal said that paddy harvesting is currently at its peak in Jhajjar district. Farmers should ensure proper management of crop residues and avoid stubble burning. She added that controlling air pollution is not possible through administrative efforts alone; farmers, citizens, and all relevant institutions must understand their responsibilities.The concerned departments should also increase surveillance along with awareness.The DC directed the concerned departments to conduct awareness campaigns to prevent open burning of garbage, as well as to maintain effective waste collection and disposal systems. Officials should monitor their respective areas and ensure compliance with environmental protection regulations.The DC appealed to the public to avoid polluting activities and to raise awareness about them. He stated that clean air and a healthy environment are every citizen's right, and protecting them is our collective responsibility. Only with public support can Jhajjar be made clean, healthy, and pollution-free.

Haryana's Industry and Commerce Minister Rao Narbir Singh's visit to Jhajjar today

Parivahan Vishesh News

Will preside over the monthly meeting of the District Public Relations and Grievance Committee

Jhajjar, 04 November

The District Public Relations and Grievance Committee, formed for the quick and effective resolution of public complaints, will meet at 11 a.m. on Thursday, November 5th, at Samvad Bhawan in the Mini Secretariat complex. The meeting will be chaired by Haryana's Minister for Industries and Commerce, Forests and Environment, Rao Narbir Singh.

CTM Ritu stated that the District Public Relations and Grievance Committee meeting is an important forum for resolving public issues, ensuring effective action on matters of public interest. She stated that a total of 15 complaints will be presented at the meeting. She instructed officials from the relevant departments to attend the meeting on time and with complete information regarding the complaints, so that citizens' problems can be resolved promptly and permanently.

Illegal Dumping of Fly Ash in Koida! Hundreds of Trucks of Black Ash Polluting Land, Water and Air

Parivahan Vishesh News

Allegation of bringing waste from industrial plant of neighbouring district and dumping in open; Anger among villagers, Tehsildar assures investigation and action within 48 hours

Report Dr Rajkumar Yadav Parivahan Vishesh Daily Banei/Koida

If the cost of industrial development has to be paid by local environment and health of common people, then this is not development but a serious environmental crisis. A case of allegedly dumping hundreds of trucks of fly ash (black ash) near Dhubalbeda village on Kasira to Kadodiha road under Koida tehsil of Sundargarh district has come to light. Huge heaps of ash on roadside are raising questions on administrative accountability along with environmental concern.

According to information surfaced at local level, fly ash is being brought through trucks from an industrial plant of neighbouring Keonjhar district and being dumped in Koida area. Due to this, fear of pollution of nearby land, water sources and air has been expressed. Villagers are worried that its adverse effect may also be on cattle and agricultural land along with human health.

Pictures show not only heaps of ash, but also challenge of environmental monitoring.

What Do Law and Environmental Rules Say? According to Central Government's 31st December 2021 notification on fly ash utilization, coal-based thermal power plants have to ensure environmentally friendly utilization of ash. In its transportation, storage and disposal, it is mandatory to take all necessary measures to prevent air and water pollution. Prior permission of State Pollution Control Board is also necessary for filling ash in low-lying areas. Responsibility of monitoring is of district administration also along with Pollution Control Boards.

Assurance of Action Within 48 Hours, Now Test for Administration Regarding the matter, Koida Tehsildar Tinky Das has told that within next 48 hours, truthfulness of complaint will be investigated and necessary action will be taken.In local news report, an instruction of Barbil tehsil administration of neighbouring Keonjhar district has also been mentioned, according to which unauthorised dumping of industrial waste or black ash on land has been said to be punishable.

Now Some Important Questions Before Administration:

- From which industrial plant is ash being brought?
- Do vehicles transporting it have valid documents and permission or not?
- Has approval of Pollution Control Board been taken for dumping site or not?
- Who will do scientific assessment of potential damage caused to environment?

In mineral-rich area like Koida, along with industrial activities, environmental protection is equally important. Tehsildar's assurance of investigation within 48 hours is welcome, but public does not want only assurance, but result of action.

Why should burden of industrial waste fall on land, water and breath of local villagers?

Now eyes are fixed on district administration, mining department and Odisha State Pollution Control Board. After 48 hours it should be clear what is reality behind these heaps of ash and what action has been taken on those responsible.

Rain Exposes Poor Condition of Roads, ADM Rourkela Comes into Action; Inspection of 40 Wards, Picture of Dandiapali Also Needs to be Seen

Parivahan Vishesh News

Administration's activeness on citizens' complaints appreciable, but questions rising on ground reality even after tenders worth crores

Report Dr Rajkumar Yadav Parivahan Vishesh Daily Rourkela

The dilapidated condition of city roads after heavy rain has once again raised questions on urban development system and quality of construction works of Rourkela Municipal Corporation. However, in the meantime, RMC's Commissioner-cum-ADM Rourkela's activeness and initiative of himself coming into field and taking stock of citizens' problems gives hope.

Main Points of Inspection:

- Inspection of 40 Wards: Inspection of condition of roads, drains and other civic amenities in all 40 wards of Municipal Corporation is being done by ADM Rahul Kila.

- Visit to Civil Township: During inspection he met local residents and heard their complaints and problems.

- Instructions to Officers: Instruction given to speed up repair of damaged roads and complete pending drainage works soon.

- Hope of Relief to Public: People struggling with waterlogging, road damage and commuting problems after rain are expecting relief from this initiative of administration.

This effort of ADM Rourkela is definitely appreciable. An administrative officer coming out of office and reaching among public is an important identity of good governance. But significance of inspection will be proved only when solution of complaints is visible on ground.

Dandiapali: Distance Between Claims of Development and Ground Reality Situation of areas like Dandiapali of city should also come in special cognizance of administration. If despite tenders worth crores being allotted in the name of improving road, drainage and basic civic amenities, dilapidated condition is visible at local level, then it is not only matter of damage caused by rain, but also subject of quality of construction works, monitoring and accountability.

Pictures of Dandiapali can be an important indication for administration. These pictures tell how much gap has remained between schemes sanctioned on papers and facilities actually received by public. Question is also why permanent benefit of works on which government money was spent is not reaching local citizens?

Now Accountability Also Necessary Along With Inspection It is expected from ADM Rourkela that he should also get on-site inspection done of all such affected areas including Dandiapali, where despite projects worth crores, problems of road and drainage remain.
- Technical audit of construction works should be conducted.
- Quality of contractors' works should be checked.
- Responsibility should be fixed on defective construction.
- Permanent solution should be given priority instead of repair.

City does not need only system of filling potholes after rain, but such strong roads and drainage system, which does not test administration again in next rain.

ADM's activeness is welcome, but public now wants to see results beyond pictures of inspection. Real success of administration will be when picture of Dandapali will change and development will be visible on ground in every ward of city.

If your name is not in the draft voter list, then former voters should also fill Form-6: DC

Parivahan Vishesh News

DC and District Election Officer Varsha Khanwal said that citizens can apply afresh if their names are left out during SIR.

Election Commission clears the air, says previous registration in voter list will not be a hindrance in filing Form 6

Jhajjar, 04 November.

DC and District Election Officer Varsha Khanwal said that as per the guidelines issued by the Election Commission of India, if a citizen's name is not included in the draft voter list during SIR 2026, they need not worry or fear any legal action. Previously eligible citizens can also apply to have their name included in the voter list by filling out Form 6. No legal action will be taken against the individual merely because their name was previously included in the voter list.If the name is not in the draft list, then a fresh application will have to be made.The DC stated that the Election Commission of India, in a clarification issued on November 3, 2026, clarified that eligible citizens whose names are not included in the draft voter list published during the SIR will be required to apply afresh by filling out Form 6 as per the prescribed procedure to have their names included in the final voter list. This arrangement will apply equally to all eligible citizens, whether they are applying to become voters for the first time or have previously been included in the voter list.There will be no fear of wrong declaration or litigation on filling Form-6The DC clarified that filing Form-6 despite having previously been included in the electoral roll does not in itself constitute a false declaration. The Election Commission has clarified that no Electoral Registration Officer (ERO) will take action under Section 31 of the Representation of the People Act, 1950, merely on the ground that the applicant's name was previously included in the electoral roll and that he or she submitted Form-6 during or after the SIR. However, the person concerned must not already be included in the electoral roll of any other parliamentary or assembly constituency, and the declaration made by him or her must be in accordance with the law.Opportunity to add names will be available even after the publication of the final voter list.DC Varsha Khanwal said that eligible citizens whose names are not included in the final voter list of SIR, can apply for inclusion of their names by filling Form-6 during the upcoming special campaign or continuous updating of the voter list as per the instructions of the Election Commission after the publication of the final list.He directed all concerned officials to ensure widespread dissemination of information issued by the Election Commission, so that every eligible citizen receives accurate information. He also appealed to citizens that if their names are not included in the SIR draft voter list, they should, without fear of any legal action, fill out Form-6 as per the prescribed procedure and get their names included in the voter list. No eligible citizen should be deprived of their right to vote due to lack of information or any confusion.

The shop selling earthen lamps and decorations is ready, now it is just waiting for customers.

Parivahan Vishesh News

I wish that Diwali is celebrated for them too.

The shop selling earthen lamps and decorations is ready, now it is just waiting for customers.

The hard work of these potters, the fragrance of their clay and the light of their dreams reside in these lamps.

This Diwali, light an earthen lamp too, so that their Diwali is celebrated too.

Entrepreneurs should become active partners in public interest by fulfilling social responsibility: DC

Parivahan Vishesh News

DC Varsha Khanwal, in a meeting with entrepreneurs in Bahadurgarh, urged them to participate in activities related to social concerns.

Bahadurgarh, 04 November

With the aim of overall development of the industrial city of Bahadurgarh and providing better facilities to the citizens, DC Varsha Khanwal held a meeting with local entrepreneurs in the Bahadurgarh Municipal Council auditorium on Wednesday. She called upon the industrialists to cooperate in development and public welfare works through Corporate Social Responsibility (CSR). Municipal Council Chairperson Saroj Rathi welcomed DC Varsha Khanwal.

During the meeting, DC Varsha Khanwal stated that the industry, by fulfilling its social responsibility and working with the administration, can play a vital role in the development of the region. She added that immediate assistance to those in need who, for some reason, are not covered by government schemes is possible under CSR.The DC said that through CSR funds, education, Anganwadi centers, hospitals, environmental protection, sanitation, and other public welfare projects can be accelerated. Industrialists, as part of their organizations' social responsibility, should come forward and support such projects that can directly benefit the public. He said that through coordination between the administration and the industry, development work can be made more effective.

Industry participation is essential in works related to public welfare

DC Varsha Khanwal urged industrialists to identify priority areas for CSR activities, keeping in mind the needs of their surrounding areas. The administration will also provide necessary coordination and guidance for public welfare projects. She said that industrialists' participation in social development can bring positive change to the region.

SDM Bahadurgarh Abhinav Siwach, MSME Officer Sanjeet Kaur, officers of the concerned departments and industrialists of the area were present on the occasion.

Due to irregularities, the Sarpanch of village Dimana has been suspended

Parivahan Vishesh News

**** Jhajjar, 04 November.****

DC Varsha Khanwal, exercising the powers vested in her under the provisions of the Haryana Panchayati Raj Act, 1994, has suspended Jyoti, Sarpanch of village Dimana of Beri block, from the post of Sarpanch with immediate effect.According to the orders issued, serious allegations have been made against Jyoti, and a regular investigation has been ordered. The Sub-Divisional Officer (Civil), Beri, has been appointed as the investigating officer in the case.The Sarpanch has been suspended from his post by Deputy Commissioner Varsha Khanwal, exercising powers vested in him under Section 51(1) of the Haryana Panchayati Raj Act, 1994. He has also been barred from participating in any proceedings of the Gram Panchayat under Section 51(2) of the Haryana Panchayati Raj Act, 1994.The orders also directed that the movable and immovable properties, records and other material of the Panchayat which are under their control should be handed over to the Panch having majority in the Gram Panchayat with immediate effect as per the provisions of the Act..

From the Village Council to Parliament: The Powerful Voice of Women

Dr Vijay Garg

Retired Principal Educational columnist Eminent Educationist street kour Chand MHR Malout Punjab

Parivahan Vishesh News

Dr. Vijay Garg

The true strength of Indian democracy can be ensured only when every section of society receives equal opportunities to participate in the decision-making process. Women's political participation is an important step in this direction. For centuries, social traditions, economic dependence and gender discrimination restricted women's voices. However, circumstances are changing today. From village councils to Parliament, women are making their presence felt and setting new examples of leadership.

Women in India have always made significant contributions to family life, agriculture, education, healthcare and social development. In rural areas, they work in fields, manage households and strengthen the local economy. Despite these contributions, their participation in political decision-making remained limited for a long time. Reservations in Panchayati Raj institutions and local bodies have now opened new opportunities for women to assume leadership roles.

The 73rd and 74th Constitutional Amendments provided for at least one-third reservation of seats for women in Panchayati Raj institutions and urban local bodies. Several states have increased this reservation to 50 per cent. As a result, millions of women have entered public life as village heads, panchayat members, councillors and local representatives.

The role of elected women representatives is not limited to attending meetings. Many women leaders are prioritising issues such as drinking water, sanitation, education, healthcare, road construction and women's safety in their villages. Through self-help groups, women are also moving towards economic independence. These initiatives have strengthened their confidence, leadership abilities and social awareness.

However, several challenges remain. In some places, husbands or male family members make decisions on behalf of elected women representatives. This practice is commonly known as the 'Sarpanch Pati' phenomenon. Illiteracy, economic dependence, social pressure and a lack of administrative knowledge also create obstacles to effective women's leadership. Therefore, merely providing political positions is not enough. Women must receive proper training, knowledge of their rights and the freedom to make independent decisions.

Increasing women's participation in national politics is equally important. The representation of women in Parliament and State Legislative Assemblies is still below the desired level. The Nari Shakti Vandan Adhiniyam, passed in 2023, is an important initiative in this direction. It provides for one-third reservation for women in the Lok Sabha and State Legislative Assemblies. Its implementation is linked to the constitutional provisions concerning the census and delimitation process.

Women's political participation is not merely a matter of representation; it is an issue of social justice and equal opportunity. When women participate in decision-making, issues concerning families, children, education, nutrition, healthcare and safety also receive appropriate attention.

Political parties must therefore provide more election tickets to women, offer leadership training and assign them important organisational responsibilities. Families and society must also support women's political aspirations and encourage them to participate actively in public life.

Today, the need is to ensure that the voices raised by women in village councils reach the corridors of Parliament. Women's empowerment does not simply mean giving them respect; it means ensuring their rights, opportunities and freedom to make decisions. When women lead, democracy becomes more inclusive, sensitive and stronger.

Media in the Age of AI: Opportunities, Challenges and the Future of Journalism

Parivahan Vishesh News

Dr. Vijay Garg

Artificial Intelligence (AI) is transforming almost every aspect of modern life, and the media industry is among the sectors experiencing the most significant changes. From gathering news and writing reports to editing videos, analysing public opinion and delivering personalised content, AI is reshaping how information is created, distributed and consumed. The age of AI has opened exciting opportunities for journalism, but it has also raised serious questions about truth, credibility, ethics and the future of human creativity.### The Changing Face of JournalismTraditionally, journalism depended on reporters, editors, photographers and news organisations to collect, verify and publish information. Today, AI-powered tools can analyse large amounts of data, prepare news summaries, translate articles, generate headlines and assist in producing audio and video content within minutes.Automated journalism can help media organisations report routine developments, such as weather updates, sports results and financial statistics. AI can also help journalists identify emerging trends, examine government data and investigate complex issues. This saves time and allows reporters to concentrate on deeper investigations and meaningful storytelling.### Opportunities for Media OrganisationsAI offers several advantages to the media industry:1. *Faster News Production:* AI tools can process information quickly and assist in preparing reports.2. *Personalised Content:* Digital platforms can recommend news according to readers' interests.3. *Language Accessibility:* AI-powered translation makes news available in different languages, helping information reach wider audiences.4. *Data Journalism:* AI can analyse large datasets and identify patterns that may otherwise remain unnoticed.5. *Improved Accessibility:* Speech-to-text, text-to-speech and automatic subtitles help people with different needs access information.6. *Cost and Time Efficiency:* Automation can reduce repetitive work and improve newsroom productivity.These developments can strengthen journalism if technology is used responsibly.### The Growing Threat of Fake News and DeepfakesOne of the biggest challenges in the age of AI is the rapid spread of misinformation. AI can generate realistic photographs, videos, voices and news reports that may appear genuine but are completely fabricated. Deepfake technology can make a person appear to say or do something that never happened.Such content can damage reputations, create social tension, influence public opinion and undermine democratic institutions. During elections, emergencies and international conflicts, misleading information can have particularly serious consequences.The speed at which false information spreads through social media makes verification more important than ever. Readers must learn to question sensational headlines, check original sources and avoid forwarding unverified messages.### Can AI Replace Human Journalists?AI can assist journalists, but it cannot completely replace the human qualities that make journalism meaningful. Human journalists bring experience, empathy, curiosity, judgement and an understanding of social realities.Investigative reporting often requires courage, personal interaction, sensitivity and the ability to understand the human consequences of events. A machine may process information, but it cannot independently replace the moral responsibility of a journalist.The future of journalism will therefore depend on cooperation between human intelligence and artificial intelligence. Journalists who learn to use AI effectively will be better equipped to work in an increasingly competitive media environment.### Ethics and Responsibility in AI-Driven MediaThe use of AI in media must follow strong ethical principles. News organisations should clearly disclose when AI-generated content is used in ways that could mislead audiences. Human editors must verify facts before publication, particularly when reporting sensitive matters.Media organisations should also protect personal data, respect copyright, avoid algorithmic bias and maintain transparency. AI-generated images and videos should not be presented as authentic records of real events.Technology must serve the public interest rather than merely increase clicks, views and advertising revenue.### The Role of Media LiteracyIn the age of AI, media literacy has become an essential life skill. Students, teachers and ordinary citizens must understand how digital information is produced, manipulated and circulated.Educational institutions should teach students how to identify fake news, recognise manipulated images, verify sources and distinguish facts from opinions. Critical thinking is the strongest defence against digital deception.Parents and teachers must also encourage responsible social media habits among young people. A well-informed society is less vulnerable to propaganda and misinformation.### The Future of MediaThe future media landscape will increasingly combine human creativity with AI-powered technology. Newsrooms may use intelligent systems for research, translation, transcription, editing and data analysis. Virtual presenters, automated subtitles and personalised news platforms may become more common.However, the success of media will not be measured only by speed or technological sophistication. Its real strength will continue to depend on credibility, independence, accuracy and public trust.### ConclusionArtificial Intelligence is neither an enemy nor a substitute for journalism; it is a powerful tool that must be used wisely. It can make media faster, more accessible and more informative, but irresponsible use can threaten truth and public confidence.In the age of AI, the responsibility of journalists has become even greater. Technology may generate information, but human beings must provide wisdom, judgement and accountability. The fundamental purpose of media must remain unchanged: to inform people truthfully, educate society, question injustice and strengthen democracy.*The future belongs not to media organisations that simply use AI, but to those that combine technological innovation with human values, journalistic integrity and public responsibility.*Dr Vijay Garg Retired Principal Educational columnist Eminent Educationist stre

Women's Economic Power Shines Bright in Diwali Markets

Parivahan Vishesh News

Dr. Vijay Garg

Diwali is a festival of lights, happiness and prosperity. Every year, markets come alive with colourful decorations, traditional lamps, sweets, clothes and festive gifts. Behind this vibrant celebration, an inspiring story of women's economic empowerment is also emerging. Women entrepreneurs, self-help groups and small business owners are using the festive season to strengthen their financial independence and support their families.Across towns and villages, many women prepare and sell handmade candles, clay lamps, decorative items, rangoli materials, traditional sweets, embroidered clothes, jewellery and gift packages. Their creativity, hard work and business skills turn Diwali markets into important opportunities for earning an income.For many women, festive sales are more than a temporary business activity. They provide an opportunity to contribute to household expenses, support children's education, manage family needs and build financial security. Even small earnings can increase confidence, self-respect and decision-making power within families.Self-help groups play an important role in this transformation. By working collectively, women can arrange raw materials, share skills, develop products and reach more customers. Government initiatives, local organisations and digital platforms can further support their efforts by providing training, financial assistance and marketing opportunities.Social media and online marketplaces have also opened new doors. Women can now promote their products through WhatsApp, Facebook and other digital platforms, reaching customers beyond their neighbourhoods. Digital payments have made transactions easier and helped small businesses become more organised.Consumers also have an important role to play. Purchasing handmade products, locally produced decorations and traditional items from women entrepreneurs can directly support their livelihoods. Choosing locally made products instead of mass-produced goods also encourages traditional crafts, reduces dependence on large commercial markets and strengthens the local economy.However, women entrepreneurs still face challenges such as limited capital, inadequate marketing facilities, competition from large businesses and difficulties in balancing household responsibilities with business activities. They need better access to affordable loans, skill development, business guidance, digital literacy and organised marketplaces.Diwali should not be limited to lighting homes and exchanging gifts. It should also become an occasion to spread the light of opportunity, equality and economic independence. Families should encourage women to pursue their business ideas, while society should recognise their contribution to economic development.The true spirit of Diwali lies not only in the brightness of lamps but also in the happiness and prosperity they bring into people's lives. When women earn, families become stronger, children gain better opportunities and communities move towards progress.*This Diwali, let us celebrate women's talent and entrepreneurship by supporting their products and businesses. Empowering women is not merely helping individuals; it is strengthening families, transforming communities and building a more prosperous nation.*

ASDC and Daimler Initiative, Training 240 Youth from Four States to Drive Heavy Vehicles

Parivahan Vishesh News

New Delhi. Automotive Skills Development Council (ASDC) and BharatBenz truck and bus maker Daimler India Commercial Vehicles (DICV) have partnered to provide training to 240 youth for driving heavy commercial vehicles. Youth from Assam, Maharashtra, Jharkhand and Andhra Pradesh will be included in this program started under CSR.Under the program, 60 candidates will be selected from each state and given residential training. Training will include classroom studies, practical driving practice and training through simulator. Its objective is to prepare youth as professional drivers and increase employment opportunities for them. During training, candidates will be assisted in obtaining heavy motor vehicle driving license, skill assessment and getting employment. Daimler India Commercial Vehicles will arrange training, accommodation, food, license, assessment, certification and insurance. Under the program, special attention will be given to road safety and responsible driving.ASDC Chairperson Vinkesh Gulati said that skilled commercial vehicle drivers play an important role in the country's transport system and economic development. It is necessary to give drivers training in road safety, traffic rules and safe driving techniques. He said that through this partnership, 240 youth will get opportunity to become professional drivers by providing practical training, certification and employment assistance.Managing Director and CEO of Daimler India Commercial Vehicles Torsten Schmidt said that drivers are the backbone of the country's economy. They play an important role in maintaining movement of goods across the country and contact between people. He said that this initiative will increase the employability of youth and promote responsible driving and road safety. ASDC will help in establishing contact with industry and getting employment. Follow-up will also be done for three months after appointment to monitor the employment status of candidates who get jobs. The aim of this initiative is to remove shortage of trained heavy commercial vehicle drivers and develop an effective model of employment-linked skill training.

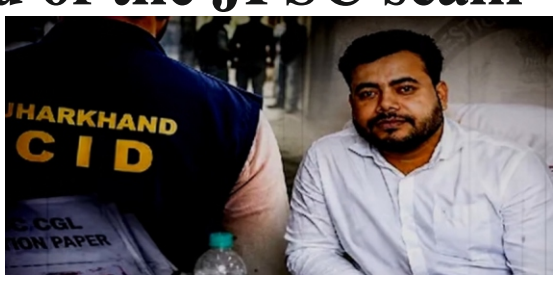

3.89 crore in the account of the mastermind of the JPSC scam

Parivahan Vishesh News

Others also have lakhs and crores in their accounts, CID filed chargesheet today

Kartik Kumar Parichha, State Head -Jharkhand

Ranchi: A sum of ₹3.89 crore was deposited in the accounts of Abhay Tiwari, the mastermind of irregularities in the JPSC exam. The CID chargesheet mentions that approximately ₹1.21 crore was deposited in Abhay's ECAF account (2024-26), more than ₹1.21 crore in an SBI account between 2019 and 23, more than ₹4.66 lakh in another CBI account in 2026, more than ₹33.10 lakh in 2022-2023 in the IDFC account of Sagar Palace with partner Umesh and more than ₹94.49 lakh in 2021-2024 in the account of Prakash Residency.

The CID has stated that this amount significantly exceeds his known sources of income. According to the chargesheet, Abhay Tiwari's ECAF account received ₹19.96 lakh in 2024, over ₹81.49 lakh in 2025, and over ₹19.73 lakh as of July 19, 2026. The deposits were primarily made during the ACF, FRO, and JPSC PT examinations. This is considered an indication of extortion during the exam. According to the chagesheet, Abhay collected ₹140,000 in three installments from agent Lalu Yadav. Meanwhile, regular deposits were received from his brother-in-law Saurabh's firm, Saanvi Supply and Service, between September and November 2025. The CID is also looking for Saurabh in this case.

According to the CID, Abhay was issued a marketing manager identity card by TDPL. This was recovered from the Lalpur residence-cum-office in the seizure list. His original authorization letter from the registered office in Lucknow was also recovered. It is alleged that he was a local link for TDPL and acted as a liaison between candidates and agents. The investigation also revealed that the rent for TDPL's residence-cum-office in Ranchi was paid from Abhay's account. A total of 2.20 lakh rupees was paid between May and November 2025. The money was transferred from his account to TDPL employees Mo Usman, Pradeep Kumar Singh, and Sanjay Kumar.

The investigation revealed that Abhay's personal assistant, Arvind Kumar, scored 292 marks in the 14th JPSC PT exam by solving 85 questions in Paper 1 and 87 in Paper 2. He attempted only 12 and 35 questions in the main exam. CCTV footage showed several candidates not filling out their OMRs, yet their OMRs contained 91-92 answers. The mobile CDRs of 13 successful candidates in the 14th JPSC PT exam confirmed contact with the accused's numbers.

Priya Asija Files Complaint with NHRC Over Alleged Beating of Children in Bal Seva Ashram and Inaction of CWC

Parivahan Vishesh News

Social activist Priya Asija sent complaint to National Human Rights Commission member Priyank Kanoongo, demands independent inquiry and action against culprits

Haryana Bhiwani // Rajesh Saluja

The case of alleged beating and physical torture of children living in the city's Bal Seva Ashram has now reached the National Human Rights Commission (NHRC). Social activist Priya Asija has sent a detailed complaint to the Hon'ble Member of the Commission Shri Priyank Kanoongo demanding immediate intervention and impartial investigation in the matter.

According to Priya Asija, on 30th October she had gone to Bal Seva Ashram to celebrate birthday of a family member. During this, some children living in the ashram complained in conversation about being beaten by an alleged office bearer of the ashram. Children told about being beaten with slaps and punches and such incidents having happened earlier also.

CWC's Inspection Note Raises Serious Questions
The most important aspect of the complaint is the inspection note dated 18th October 2026 of Child Welfare Committee (CWC), Bhiwani. According to Priya Asija, in this handwritten inspection detail it is itself recorded that during inspection of ashram, a child told members of the committee that an alleged office bearer of ashram had beaten him with slaps and punches.

Despite this, what immediate action was taken by the committee on this complaint, its clear description is not visible in the inspection note. In such a situation, question arises that when the child himself had complained of beating in front of the committee, why were immediate steps not taken to ensure his safety and to get allegations investigated?

Priya Asija alleged that Child Welfare Committee, Bhiwani is not showing expected seriousness towards complaints of children and has failed to effectively discharge its statutory obligations.

Complaint Was Also Sent to Haryana Commission for Protection of Child Rights
Priya Asija told that she had also sent a written complaint on 31st October to the Chairperson of Haryana State Commission for Protection of Child Rights, Panchkula, demanding inspection of ashram and independent and confidential interaction with children in absence of management.

This matter was also prominently published by daily newspaper Amar Ujala on 1st November. Despite this, serious concern remains regarding safety of children and effective action on complaints.

Main Demands Made to NHRC
In the complaint sent to National Human Rights Commission, demand has been made to get independent and surprise inspection of ashram conducted, to talk to children in confidential environment, to get impartial investigation of alleged beating conducted, to preserve CCTV footage and other evidences and to get medical examination of affected children done as per requirement.

In addition, it has been requested to investigate the role of Chairman and members of Child Welfare Committee, Bhiwani and determine why effective action was not taken despite children complaining of beating. If negligence or dereliction of duty of any officer or committee member comes to light, action against him has also been demanded.

Priya Asija said that children living in child ashrams are entitled to special protection and care. If they feel unsafe in those same institutions and institutions that are supposed to act on their complaints also remain inactive, then it is a serious question mark on the entire child protection system.

She said that ensuring safety, respect and fear-free environment for children is primary responsibility of administration and child protection institutions. Any kind of negligence in this matter should not be acceptable.

Big Gift to Agniveers - 6 Years Job Instead of 4 Years, Permanent Job on Better Record

Parivahan Vishesh News

Tenure of Agniveers Increased by 2 Years, Now 6 Years Service - CDS Says, Job Will Be Permanent on Better Performance

About 3.18 Lakh Agniveers in Country - Big Change in Scheme, New Direction to Youth's Future

Presenter: Pinki Kundu | Social Consultant

Introduction: Biggest news related to army has come for youth of country. Making big change in Agniveer scheme, tenure has been announced to be increased from 4 years to 6 years. Chief of Defence Staff (CDS) has said that Agniveers with better performance and better record will be made permanent in job. This decision is not just expansion of job for lakhs of youth, but message of trust related to their future, respect and security.

Main Facts - What Changed?

1. Expansion in Tenure:
Earlier - 4 years service
Now - 6 years service, i.e. increase of 2 years

2. Path for Permanent Clear:
According to CDS, Agniveers who prove better in discipline, training, fitness, operational performance and conduct will be given priority for keeping in regular service (Permanent). Now just completing time is not enough, performance will decide permanence.

3. Number:
At present about 3.18 lakh Agniveers are serving in various forces in country. This change will directly affect these jawans and upcoming batches.

4. Why Was Change Necessary?
- In 4 years after training itself it took time for jawan to get fully prepared.
- Units had pressure to train new jawans again and again.
- There was insecurity and resentment among youth about future.
- With 6 years army will get experienced, trained and operationally strong jawans.

What is Agniveer Scheme? - Brief Background Agnipath scheme started in June 2022. Under this, youth of 17.5 to 21 years were recruited as Agniveer in Army, Air Force and Navy. Earlier 4 years service, then provision to keep 25% in regular service. Now with expansion of 6 years this structure will be stronger.

Constitutional, Legal and Policy Analysis:

A. Constitutional Basis:
- Article 16 - Equality of Opportunity: Equal opportunity to all in recruitment in government service. Performance based permanence strengthens this principle.
- Article 19(1)(g) - Right to Profession: Service in army is right of employment along with service to nation.
- Article 21 - Right to Life and Dignity: Secure future, respectable service and economic security is part of this right.
- Article 33: Power to Parliament to impose reasonable restrictions on fundamental rights of members of armed forces - for dignity of discipline and duty.
- Article 51A - Fundamental Duties: To be ready for defence of country and national service is duty of every citizen.

B. Laws, Rules and Acts:
- Army Act, 1950, Navy Act, 1957, Air Force Act, 1950: Recruitment, service conditions and discipline in three forces governed by these acts.
- Agnipath Scheme - 2022, MoD Policy Guidelines: Rules of recruitment, salary, Seva Nidhi package, insurance and permanence of Agniveers decided by these guidelines.
- Seva Nidhi Package: Provision of lump sum amount, skill certificate and rehabilitation assistance will be stronger after 6 years service.
- Reservation: Centre and many states have given 10% reservation to Agniveers in police, CAPF, other government jobs.

C. Judicial Perspective:
- Delhi High Court 2023 - Challenge to Agnipath Scheme: Court upheld scheme as constitutional and policy-wise correct, said - It is government's right to make policy for national security and young army.
- Supreme Court: Kept petitions filed on Agnipath focused on Delhi High Court's decision itself, refused to interfere in scheme. Court's stand - Judicial interference limited in army's need and policy decision.

Impact on Army, Youth and Society:
- For Youth: 2 years more in job = more salary, more experience, more saving, more chance to become permanent. Trust in army will increase among youth of villages and towns.
- For Army: Stability in units with longer service, availability of trained jawans, operational preparedness will be stronger.
- For Society: A large army of disciplined, trained and patriotic youth will come back to society - who will also be useful in police, security, disaster management and other fields.

Challenges and Questions - Which Need Attention:
- What will be percentage of permanent? Will it remain 25% or increase? Clear SOP on this is still pending.
- What will be criteria of performance? Transparent evaluation system necessary, so that there is no discrimination with anyone.
- What will be plan for rehabilitation, skill and job of those who come out after 6 years?
- Clarity necessary on salary, pension, medical facility and facilities to family on martyrdom.

Conclusion: This change is not just expansion of 2 years, it is expansion of trust. Government and army have heard voice of youth. Now need is to implement this decision with transparent rules, clear evaluation and strong rehabilitation policy.

Agniveer is not just a job, first line of defence of country. When their future is secure, only then border of country will be secure.

Today's Cybersecurity Thought

The Hidden Danger Behind the Sale of Hacked Email Accounts The illegal trade of hacked email accounts has become a powerful enabler of cybercrime.

Pinki Kundu

Parivahan Vishesh News

Once criminals gain control of a legitimate email account, they exploit the trust associated with it to carry out a wide range of illegal activities.Tracing the sale and misuse of hacked email accounts is often far more difficult than investigating conventional cybercrimes because criminals deliberately create multiple layers of separation between themselves and their victims. Why Is Tracing So Difficult?1. Multiple Criminal ActorsThe individual who hacks an email account is often not the same person who ultimately uses it.• Hacker A compromises the email account.• Hacker B sells the stolen credentials on dark-web forums.• Hacker C purchases and uses the account for phishing, bomb threats, fraud, or impersonation.This division of roles creates a complex chain of attribution, making it difficult for investigators to identify the real offender.2. Use of VPNs, Proxies, and Tor NetworksTo conceal their identities, criminals often route their activities through:• VPN services• Proxy servers• The Tor network• Compromised devices belonging to innocent usersAs a result, login records may point to multiple countries and IP addresses, obscuring the attacker's true location.3. Cross-Border OperationsIn many cases:• The victim may be in India,• The email service provider may be in the United States,• The VPN server may be located in Germany,• And the attacker may operate from an entirely different country.Investigations therefore require:• Mutual Legal Assistance Treaty (MLAT) requests,• International law-enforcement coordination,• Data preservation requests,all of which can significantly prolong the investigative process.4. Cryptocurrency PaymentsHacked email accounts are frequently bought and sold using:• Bitcoin• Monero• Other cryptocurrenciesPrivacy-focused cryptocurrencies and mixing services can make financial trails extremely difficult to trace.5. Disposable InfrastructureCybercriminals commonly rely on:• Temporary email addresses• Burner phones• Fake identities• Short-lived cloud serversBy the time investigators identify a lead, the digital infrastructure may already have been abandoned or deleted. Key Risks1. Bomb Threats and Hoax MessagesCompromised email accounts can be used to send bomb threats, extortion demands, or fake emergency alerts, making it difficult to immediately identify the real culprit.2. Phishing and Financial Fraud• Criminals send highly convincing phishing emails to colleagues, friends, customers, and business partners using trusted accounts.• Victims may be tricked into sharing passwords, OTPs, or transferring money.3. Identity TheftAttackers gain access to personal information, documents, contact lists, and private communications, which can be exploited for further fraud and impersonation.4. Corporate EspionageBusiness email accounts may contain confidential information, contracts, intellectual property, and strategic plans that can be stolen and sold.5. Money Mule RecruitmentFraudsters use trusted email accounts to recruit unsuspecting individuals to move or conceal proceeds derived from cybercrime.6. National Security ConcernsCompromised accounts may be used to spread disinformation, issue threats, or disrupt critical institutions and public services.How Can This Threat Be Mitigated?For Individuals Enable Multi-Factor Authentication (MFA) on all email accounts. Use strong, unique passwords and a password manager. Change passwords immediately if a compromise is suspected. Exercise caution with suspicious links and attachments.Regularly review login activity and security settings. Keep devices and software up to date.Make MFA mandatory for all employees. Implement phishing-resistant authentication methods. Conduct regular cyber awareness training.Monitor unusual login patterns and email activities.Deploy email security controls such as SPF, DKIM, and DMARC. Maintain a robust incident response plan for account compromise.For Law Enforcement and Regulators Enhance monitoring of dark-web marketplaces selling stolen credentials. Strengthen international cooperation in cybercrime investigations. Conduct public awareness campaigns on email security. Encourage timely reporting of email compromise and cyber fraud."A hacked email account is not merely a stolen identity; it is a weaponized trust relationship. Cybercriminals exploit legitimate accounts to spread fraud, fear, and disinformation. Strong passwords, Multi-Factor Authentication, and cyber awareness remain our most effective defenses against this growing threat."

It is important to be aware of the issues of democratic rights and social justice: Mohammad Aish

Parivahan Vishesh News

\New Delhi: Following the call of Congress leader Rahul Gandhi, a large number of workers, led by Mohammad Aish, State Secretary of the Uttar Pradesh Congress Minority Department, participated in the mega rally and march held at Ramlila Maidan in New Delhi on November 1st. Minority Department workers from various regions of Uttar Pradesh participated in the rally.

On this occasion, Mohammad Aish stated that unity among workers is essential to protect the Congress Party's ideology, the Constitution, and democratic values. The participation of workers in this rally, organized at Rahul Gandhi's call, sends a message that people are aware of their democratic rights and social justice issues. He added that Minority Affairs workers are working tirelessly to disseminate the party's policies and ideology to the masses. Strengthening the organization and addressing the concerns of ordinary people are their priorities.

According to reports, the Uttar Pradesh Congress Minority Department leadership entrusted Mohammad Aish with the important responsibility of appointing him in charge of the rally in Sultanpur district. He fulfilled this responsibility by organizing a large number of workers. Under his leadership, thousands of workers participated in the mega rally and march held at Ramlila Maidan on November 1st. Mohammad Aish expressed his gratitude to all the workers who participated in the rally.

In view of the upcoming Uttar Pradesh Assembly elections, the party may intensify its organizational activities. Consequently, there is discussion in political circles about the possibility of Mohammad Aish being given some important responsibility at the state level.

Enthusiasm of Gita Gyan Competition in Sunbeam Academy, Samne Ghat

Parivahan Vishesh News

With Gita knowledge new generation will become characterful and India will become great - Akhilesh Kumar Rai

(Santosh Kumar Singh)

Varanasi :- 'We become characterful and India again becomes great' - To establish beautiful human values in new generation and awaken this sacred feeling, Gita Gyan competition was organized in Sunbeam Academy located at Samne Ghat under joint auspices of Mahamana Malaviya Mission (BHU) and Mahamana Sanskar Library, Varanasi, in which children participated with great enthusiasm. The program started with worship of Gyan Ganpati with sacred feeling and lighting of lamp. In the divine and grand premises of the school, with encouraging participation of hundreds of children in Gita Gyan quiz competition and Gita Shloka singing competition, being emotionally overwhelmed, Chief Guest and Chief Coordinator of Gita Gyan Competition Akhilesh Kumar Rai expressed gratitude to all while appreciating the heartfelt efforts of teacher Smriti Upadhyay with guidance of school administration and cooperation of all. He said that the grandeur and divinity of this program clearly shows dedication of Principal Mrs. Shashwati Sharma towards character building of students.As external examiner of Gita Shloka singing competition, Shri Rai while appreciating participants said that all recited such shlokas with devotion which gives positive thinking towards life and broad vision, heart becomes pure and feeling of beautiful character becomes strong, inspiration of high life values is received, with far-sightedness and firm determination, resolve towards a great goal in mind becomes firm, even in environment full of ups and downs and distractions in life, concentration of mind and sharpness of intellect gets strength. If every drop of Gita Gyanamrit is received from childhood, then flowers of best sanskar start blooming in his personality, from which characterful personality is created, who while walking on path of humanity and working as Karmayogi doing great works glorifies entire society and nation and our mother Bharati is again calling such gems in her lap. This is reason that founder of Banaras Hindu University, Bharat Ratna

Mahamana Malaviya, considering Bhagavad Gita as best guide, inspired and encouraged students for Gita self-study throughout life. He believed that Gita knowledge is science of best human creation in society. Participants of Gita Gyan quiz competition told that participating in this competition is a pleasant experience like a festival, hearing which Shri Rai became delighted. He recited the motto of this competition "Will read Gita, will move forward and we will also climb on peak of success" which energized children. It is noteworthy that inspired by Mahamana Malaviya and with cooperation of Mahamana Malaviya Mission (BHU), Gita Gyan competition is being organized in 100 schools of city from Gandhi Jayanti by Mahamana Sanskar Library, Varanasi, whose theme is "Gita Gyan is science of life management" which children have liked so much that with tremendous participation they have made it Gita Gyanotsav - Mahamana Mahotsav.Academic Coordinator Kalam Khan along with all teachers praised this sacred program and described it as very useful for emotional, moral and character development of children.

Four thousand earthen lamps will illuminate huts of tribal families

Parivahan Vishesh News

For a decade distributing happiness on Diwali - Youths buy lamps and toys from potters of Chandauli

Shaping future by giving education material to children

Distributing happiness on Diwali for a decade

Employment to potters, light to tribal families and support of education to students

Go to house of potter brothers and buy 4000 lamps

Those lamps light up 150 tribal huts

(Santosh Kumar Singh)

Chandauli (Chakia) :- With objective of taking happiness of Diwali to huts of poor and promoting indigenous, unique initiative of youth of Chandauli is continuing for last 11 years. This year also youth of Poorvanchal Post Foundation Uttar Pradesh will illuminate huts of 150 tribal families with four thousand earthen lamps and will also give support of employment to them by buying lamps and toys from potters. On behalf of foundation established in year 2016, lamps and toys are bought from potters on Diwali. With this traditional artisans get financial help along with promotion of indigenous products. Jitu Prajapati associated with pottery art tells that youth directly reaching home and buying lamps and toys is respect for hard work of artisans and supports their livelihood.

Festival material along with lamps

Along with delivering lamps bought from potters to tribal families, oil, candle, matchbox, lai and sweets are also distributed. Happiness of Diwali is shared by giving earthen toys and sparklers to children. Copy, pen, pencil, general knowledge and spoken English books are also made available to students. This campaign has been run in many villages of area including Naugarh, Baghi, Gahila, Vinayakpur, Jamsoti, Godtutwa, Musakhad, Peetpur, Shikarganj, Mubarakpur, Hinautghat, Chakia Dharkar Basti, Direhu, Lalpur. In Hinautghat village Diwali service campaign is continuing continuously for last seven years.

Campaign will run on 6 and 7 NovemberThis year on 6 and 7 November campaign will be run in Hinautghat and Direhu villages and about 150 tribal families will be distributed four thousand earthen lamps and Diwali material. Education material will also be given. Manager of foundation Prashant Kumar says that objective of institution is to respect hard work of potters, promote indigenous and share happiness of Diwali with needy families. His effort is that due to economic lack Diwali of any family should not remain dull and through education of children help in shaping their future also.

NIA raids Hazaribagh in nationwide search for fake currency notes

Parivahan Vishesh News

Raid at the house of Pradeep Sao and Uday Sao

Kartik Kumar Parichha, State Head -Jharkhand

The Patna branch of the National Investigation Agency raided two homes in Ranchi and Hazaribagh on Wednesday morning. Both homes are located on Subhash Barla Road, off Baba Path in Hurhuru, under the Bara Bazar police station area. These homes are said to belong to two brothers, Pradeep Saw and Uday Saw. The team arrived at the scene early in the morning with local police.

A search of both homes was then launched. The entrances to the homes were sealed during the operation, restricting entry and exit for outsiders. Even residents of the neighborhood were not allowed inside. This sudden action created a stir in the area.

According to preliminary information, the NIA team is investigating a case related to a nationwide counterfeit currency network. The agency received information that this area of Hazaribagh may be linked to the counterfeit currency trade. It is also investigating possible hawala transactions.

Based on this input, the team conducted simultaneous raids at both locations. The investigating agency is investigating whether the individuals involved have any links to the counterfeit currency network. However, no official involvement has been confirmed in this case yet.

During the raid, the team conducted separate searches at both homes. The search, which began this morning, has been completed. No arrests have been made.

The team then left. According to sources, the officers examined documents and electronic devices.

Documents related to financial transactions were also examined. People present in the house were questioned. The investigation is focused on gathering evidence related to the counterfeit currency trade and a possible hawala network. However, the details of the findings so far have not been released.The relationship between the two homeowners is also unclear. Preliminary information describes them as brothers. However, whether they are real brothers or distant relatives has not been officially confirmed.

Senior NIA and local police officials have yet to issue any official statements regarding the raid. Only after the search is complete will it be clear whether the team has found any suspicious documents, cash, or other incriminating material. The investigation is currently ongoing.

violence of plant We Boi , now Fruit after seeing Astonished Are

[Children Of Hand dyed There are , but Stain Our Are]

[Childhood To Needed care , get doing Is Supervision]

Parivahan Vishesh News

Kriti RK Jain

We are deeply concerned about our children's future. The search for a good school begins as soon as they are born. Then comes coaching , competition, and the pursuit of a career. But in this entire exercise, an important question is often left behind: is the child becoming a good human being ? In a government school in Panchkula, an eight-year-old boy attacked an innocent six-year-old girl with a brick and a flower pot. The incident, captured on CCTV, awakened society. Debates erupted on TV, and newspapers expressed concern. But the question is: where did so much violence come from in a child so young ? Who instilled in him the idea that hurting someone is power ? And what have we been doing all this time ?As soon as the incident came to light, the school's security system came under scrutiny. Cameras were installed , but who was monitoring them ? How many staff members were there, and who was responsible for the children's safety ? Where did the administration fail ? Questions are important , but after every major incident, we find one culprit and absolve everyone else. The school will be prosecuted , an officer will be suspended , an investigation committee will submit its report, and then the matter will be buried under the next news story. But what about those schools where threats and violence occur daily ? There , neither footage is released , nor is any debate sparked. Families also shrug their shoulders, saying, "They're children , they fight." Until blood is shed , we ignore violence, considering it mischief.Our responsibility towards our children at home is no less. The child asks for a mobile phone, and we hand it over. When the child becomes quiet, the house becomes peaceful. The parents get busy with work, and the mobile phone becomes their companion. Who cares about what the child watches , what games they play , and what impact it has on their mind ? Introducing technology and entrusting a child to it are two different things. The child sees violent scenes , plays aggressive games, and hears angry language. We don't think about what they are learning from it. In the Panchkula incident, the accused child was found to be playing violent games. This is not the only reason , but the question is: who is monitoring the children's digital world ?The situation is no different in schools. Discipline has become synonymous with sitting quietly and obeying orders. Teachers are preoccupied with the curriculum , management with exam results, and parents with marks. Meanwhile, a child's mind is overlooked. If a child threatens , hits, or suffers abuse , it is dismissed as a simple quarrel. Teachers teach lessons but fail to understand the child's state of mind. A person who scores good marks is considered talented , but how much importance is given to good behavior ? We teach solving math problems , not controlling anger ; we teach moving forward , not accepting defeat. Then, we are surprised by the children's behavior.The problem isn't just with the children who commit violence , but also with those who silently endure it. How many parents know that their child remains silent in school out of fear ? How many teachers understand the pain of a child who faces daily humiliation ? In villages and small towns, many incidents are suppressed in the name of defamation or compromise. The victim is silenced. The family's honor is saved , but the child's self-confidence is shattered. On the other hand , the child who commits violence believes that everything will return to normal after a little noise. This further deepens the problem. Along with holding such a child accountable, it is also necessary to understand the reasons behind their behavior and establish a system for correction.The attitude of governments is also familiar. As soon as an incident occurs, the Child Rights Commission takes cognizance , the Education Department requests a report , the police investigate, and officials convene meetings. Then, directives are issued to install cameras , increase security, and provide counseling. Everything appears fine on paper , but what is the reality ? How many schools have trained counselors ? How many offer regular psychological counseling ? How many teachers have received training to recognize signs of stress and aggression ? How many schools have camera surveillance and a secure complaint system ? Without answering these questions, considering suspension and investigation as the solution is complacency. The purpose of security is not to gather evidence , but to prevent incidents.We keep shifting the responsibility of making children good citizens to each other. Parents blame the school , school blames the values of the home and society blames the government. Everyone has complaints , but no one takes responsibility. Children get a lot of sermons , but less examples. We want them not to get angry , but we ourselves talk angrily in front of them. We expect respect from them , while at home we use abusive language. We want them to stay away from mobile phones , but every member of the family is engrossed in their screens. Before teaching children, we have to improve our school of conduct.It's easy to forget the Panchkula incident by making it a sensational news story. A few days later, another incident will occur , debates will ensue, and we'll return to our daily routine. But childhood problems become deeply ingrained in children's minds. Therefore, communication in homes with cameras and increased sensitivity in schools are essential. Trained counselors , security inspections , effective complaint mechanisms , teacher training, and parental guidance are essential. Children must be taught that real strength lies not in intimidating others , but in controlling their anger and respecting others. Children don't suddenly become violent ; their upbringing , education, and social environment also shape their behavior. The future of children is shaped by the society which gives them the right direction today.

You Haven't Built the Road in Two Years; Now Let Us Merge with Andhra Pradesh," Villagers Say

Parivahan Vishesh News

Manoranjan Sasmal , State Head Odisha

Bhubaneswar : Government apathy is clearly visible in the villages along the Odisha-Andhra Pradesh border. A glaring example of this neglect has emerged from Empalwalsa village under Rayagada block, where villagers have expressed strong resentment over the delay in road construction.

Around two years ago, the Andhra Pradesh government had started constructing a road to the village. However, the Rayagada district administration stopped the work. Subsequently, the Odisha administration assured villagers that the state government would construct the road. But even after two years, the construction work has not begun.

As a result, villagers are forced to carry pregnant women, patients and elderly people to hospitals through muddy and waterlogged roads. Frustrated by the continued neglect, residents of Empalwalsa village have appealed to the administration to either fulfil its promise and construct the road immediately or allow them to merge with Andhra Pradesh.

On Thursday, villagers staged a protest by displaying posters at the entrance of the village.

Due to the absence of a proper paved road, residents of Empalwalsa face numerous difficulties, particularly during the rainy season. Accessing medical facilities has become extremely difficult. Located along the Odisha-Andhra Pradesh border, Empalwalsa village was to be connected by a road from Padaguwalsa by the Andhra Pradesh administration around two years ago. However, after learning that Andhra Pradesh was constructing a road in Odisha territory, the Rayagada administration intervened and stopped the work. The administration subsequently assured the villagers that a permanent road would be constructed. However, despite the passage of two years, the promised road remains unbuilt, leaving villagers deeply frustrated and dissatisfied with the government's in
