E-rickshaw in Delhi: Convenience or Crisis? Rules and laws on paper, arbitrariness on road

Parivahan Vishesh News

The e-rickshaw born out of need of last-mile connectivity has now become the biggest question of jam, safety and compliance of law - problem is not driver, failure is of system*_

- Presentation: Editorial Department, Parivahan Vishesh Samachar Patra Daily_

Main facts - At a glance*- _Issue:_ Uncontrolled operation of e-rickshaw in Delhi, complaints of jam, illegal stands, overloading, arbitrary fare and misbehavior- _Legal status:_ E-rickshaw is a motor vehicle, not a toy or non-motor vehicle- _Rule:_ Under Section 2A of Motor Vehicles Act, 1988 provisions of Act apply on e-rickshaw- _Technical limit:_ Maximum speed 25 km per hour, motor power up to 2000 watt, maximum four passengers besides driver and 40 kg luggage- _New initiative:_ Delhi Government's draft - Delhi E-rickshaw (Registration and Operation) Scheme, 2026, issued for public suggestions- _Editorial stand:_ We are not against e-rickshaw, we are against irregularity. Employment of poor driver is also right, and safety of pedestrian, cyclist, woman, elderly and other vehicle driver is also right._Introduction - The facility that connected Delhi is now stopping Delhi_ E-rickshaw did that work to reach from metro station to home, market to hospital, school to locality in Delhi, which big buses could not do._Door to door service, low fare, pollution-free travel - this is true utility of e-rickshaw_ But when same facility starts running without rule, without route, without stand and without accountability, then it does not remain facility, it becomes crisis. Summary of complaints received from readers, drivers, passengers and local residents is same._This editorial is not against any one driver, any one stand or any one community. It is a question asked to system - when law is clear, why compliance is not happening?_> _Editorial Clarification:_ In this report wherever there are allegations like illegal extortion, protection or intentional jam, we are recording them as complaint / alleged allegation. Before holding any person or institution guilty, impartial investigation, evidence and hearing is necessary. This is dharma of journalism.*1. What are complaints of public? - Ground experience* Main complaints told by readers are as follows:_1. Intentional jam and illegal stands on intersections_ Crowd of e-rickshaws at any intersection, metro gate, market entrance and outside hospital. Standing occupying one lane, calling for passengers, blocking traffic behind._2. Running on high speed roads_ Prescribed maximum speed of e-rickshaw is 25 km per hour, still complaint is that many drivers run on high speed roads, under flyovers and main roads. This is fatal for driver himself, passenger and other vehicles._3. Complaint of operation without license, without registration, without insurance, without pollution certificate_ As per law valid driving license, registration, fitness, insurance and PSV badge is necessary to run e-rickshaw. In draft scheme also same condition has been repeated that having valid e-rickshaw driving license and PSV badge with driver will be mandatory. Complaint is that large number of vehicles are running without these conditions._4. Exorbitant fare and refusal to passenger_ Same complaint had come in case of Delhi Vidhan Sabha Metro Station also - preference to passengers of one route, refusal to passengers of other route. This is against basic principle of public transport - service without discrimination._5. Collision / crowding anytime, anywhere, with anyone_ Entering in opposite direction in crowded lane, taking sudden turn, stopping without indicator - due to this there is fear in pedestrians, two-wheeler drivers and women-children.*2. What does law say? - Rules already exist* There was no need of new law for e-rickshaw, compliance of old law itself was enough._A. Motor Vehicles Act, 1988_- _Section 2A:_ E-cart and e-rickshaw defined. It is battery operated three-wheeler special vehicle, whose power should not be more than 4000 watt. After coming of this section provisions of Act apply on e-rickshaw.- _Section 39:_ No motor vehicle can be used at public place without registration.- _Section 66:_ Transport vehicle cannot be used without permit.- _Section 146:_ Third party insurance is mandatory. In case of no insurance it becomes difficult for victim to get compensation in accident.- _Section 3, 4, 9:_ Driving vehicle without valid license is offence.- _Section 207:_ Power to seize vehicle without permit / without registration._B. Central Motor Vehicles Rules, 1989_- _Rule 2(cb):_ In e-rickshaw maximum four passengers besides driver, maximum 40 kg luggage, net motor power up to 2000 watt and maximum speed 25 km per hour.- _Rule 126:_ Type approval of model is mandatory._C. Delhi Motor Vehicles Rules, 1993 and Delhi E-rickshaw Service Scheme_ In Delhi earlier also system was made to register e-rickshaw as transport vehicle and give contract carriage permit. In that also there was condition of four passengers limit, fitness certificate and owner's name-address to be marked on vehicle._D. Draft Scheme, 2026 - What new is proposed?_ Delhi Government in October 2026 issued draft scheme for public suggestions. This is not final law yet, it is proposal. It says:- No e-rickshaw will run without registration and valid E-rickshaw Compliance Certificate (ECC)- ECC will be digital, will be valid for two years, linked to one vehicle and one driver- Valid license and PSV badge will be necessary with driver- Maximum four passengers, no passenger beside driver, no standing travel- Maximum speed 25 km per hour, motor power up to 2000 watt- No operation on notified restricted roads, no parking obstructing traffic / pedestrians- Proposal of immediate seizure and disposal as per rules of vehicles without registration- Owner's name, address, phone number to be marked on vehicle, high security number plate, yellow reflective strip behind_This draft shows that Government also accepts that problem is serious. But question is same - will draft remain on paper or will come on road?_*3. What do judicial orders say? - Court has already warned* Delhi High Court has repeatedly said in case of e-rickshaw that uncontrolled e-rickshaw without license, registration and insurance cannot be allowed and Government should ensure that there is no uncontrolled traffic in Delhi._In another order court had said_ that battery operated e-rickshaw will have to follow law, they cannot run without registration, insurance and valid license of drivers._Summary of court's comment was_ - What is prohibited in law cannot be allowed. Motor Vehicles Act cannot be suspended.Therefore saying that there is no law on e-rickshaw is wrong. Law is there, orders are there, rules are there. Lack is of implementation.*4. Constitutional and Fundamental Rights - This is not only matter of traffic*_A. Article 19(1)(d) - Right to move freely anywhere in India_ Citizen stuck in jam, patient reaching hospital late, child reaching school late - movement of all gets obstructed._B. Article 21 - Right to life and personal liberty_ Supreme Court has also considered right to clean environment, safe road and health in Article 21. Travelling in overloaded e-rickshaw without brake-light, without insurance is direct danger on right to life. Person dying in road accident is not only statistic, it is life of some family._C. Article 14 - Right to Equality_ Service to passenger of one route and refusal to other on same metro gate - this is complaint against equality. There cannot be discrimination on basis of religion, region, language or route in public service._D. Article 19(1)(g) - Right to business, but with reasonable restriction_ E-rickshaw driver also has right to employment. Under Article 19(6) State can impose reasonable restriction for public interest, safety and order. That is, asking for license is not snatching driver's right, but protecting right of all._E. Article 47 and 48A - Duty of State_ Improvement in nutrition, standard of living and public health is duty of State. Protection of environment is also duty of State. E-rickshaw reduces pollution, this is its positive side. But disorganized operation increases noise, dust and jam, this is negative side._F. Consumer Rights_ Proper fare, safe travel, dignified behavior - this is passenger's consumer right. Demanding arbitrary fare is violation of this right.*5. Gazetted Notification and Administrative Responsibility - Who should do what?* Under Article 239AA of Constitution, in Delhi police, public order and land are under Lieutenant Governor, while transport is with elected Government. Therefore case of e-rickshaw is not of only one department._Responsibility of Delhi Transport Department:_ Registration, fitness, permit, license, PSV badge, route determination, stand determination, ECC checking._Responsibility of Delhi Traffic Police:_ Removing jam, action on illegal parking / stand, overloading, without license, high speed, wrong direction challan and seizure, accident investigation._Responsibility of Delhi Government / MCD / DDA:_ Making valid e-rickshaw stands near metro station, market, hospital, putting sign boards, making fare list public, increasing last-mile bus service._Role of LG Office:_ Constitutional role in gazetted notification, approval of rules and review of law and order. Meaning of any notification is not that compliance of law is stopped._Notification cannot be above law_ If any notification or order stops compliance of law, then it is subject to judicial review. This is rule of law.*6. Why is public of Delhi compelled? - Root cause* Most bitter truth of editorial is this. Public travels on e-rickshaw keeping life on palm because there is no option.- There is no regular, safe, fixed fare bus / share service for last two-three km from metro to home.- In many colonies roads are narrow, big bus cannot go, there is lack of small electric bus / rural service.- There is lack of safe public transport for women at night.- Fare list, helpline number, complaint number is not written at public place.When Government fails to give public ride service from door to door, then irregular private service itself becomes option. Then allegation of protection to same irregularity arises.Therefore solution is not only challan. Solution is - _Regular Service + Strict Enforcement._*7. Editorial Demand - Ten Concrete Points*_1. Valid e-rickshaw stand should be fixed at every metro station, market, hospital:_ Not on road, at marked place away from road. Fare list, route list, complaint number should be written in big letters at stand._2. Fare and route should be fixed:_ Fare from metro to locality should be fixed. There should be system of immediate complaint and action on refusal to passenger._3. Digital checking of documents should be there:_ There should be QR code on every e-rickshaw, on scanning which registration, insurance, fitness, driver's license and PSV badge should be seen. No e-rickshaw should be on road without QR._4. List of restricted roads should be public:_ List of on which high speed roads, flyovers, main roads e-rickshaw is prohibited should be on every police station, every metro gate and website of transport department._5. There should be impartial investigation on complaint of illegal extortion:_ On complaint of alleged extortion at any place including Delhi Vidhan Sabha Metro Station, joint investigation of Transport Department, Vigilance and Delhi Police should be there. On being found guilty legal action should be taken, innocent should not be defamed._6. Vehicles without license / without registration should be seized, but rehabilitation of driver also should be there:_ Seizing illegal vehicle is law. Along with that poor driver should get government help in license training, insurance and registration, so that he can become legal driver. Not only punishment, reform also should be there._7. Special attention should be on safety of school children:_ Seating seven-eight children in one e-rickshaw should be stopped. There should be system of fixed route, fixed driver, fixed number with schools._8. There should be special arrangement for women safety:_ Arrangement of GPS, panic button, helpline should also be implemented in e-rickshaw for women passengers at night._9. Last-mile public service should be increased:_ Number of metro feeder bus, small electric bus, rural service should be increased, so that public does not have to depend on e-rickshaw._10. Monthly public report should come:_ Every month Transport Department and Traffic Police should tell - how many e-rickshaws registered, how many challans, how many seized, how many complaints disposed. Transparency only will end allegation of protection._Editorial Comment__Delhi needs e-rickshaw, but not anarchic e-rickshaw._ Driver also is citizen of Delhi, passenger also is citizen of Delhi. Right of both is equal. Employment of one cannot be at cost of life of other, and employment of other also cannot be snatched in name of convenience of one._Government, police and transport department will now have to decide - are they standing with law or with arbitrariness?_ Because when law loses on road, then trust of public breaks and when trust breaks, then jam is not only on road, it gets jammed in system also._Delhi needs jam-free, safe and dignified transport. This is constitutional right of public.__

Car Roof Carrier: Is it legal or challan? Understand difference between private and taxi, don't run on rumor, run on law

Parivahan Vishesh News

Fitting carrier is not crime, wrong method is crime - Removable carrier + own luggage = Legal, Permanent welding + commercial goods = Action*_-

Presentation: Editorial Department, Parivahan Vishesh Samachar Patra Daily_*

Main facts - At a glance*- _Basic Principle:_ There is no direct ban on fitting luggage carrier on private car in Motor Vehicles Act, 1988 and Central Motor Vehicles Rules, 1989.- _Private Car (White Number Plate):_ No need of permit to carry own / family personal luggage.- _Taxi / Commercial Car (Yellow Number Plate):_ Subject to conditions of permit. What is written in permit, that only is legal.- _Biggest Confusion:_ Challan is not cut for carrier, it is cut for wrong use of carrier - protruding luggage, loose-open luggage, number plate / light hidden, overloading.- _Editorial Warning:_ State-wise rules may be different. In some states like Rajasthan, Gujarat news of strictness / ban has been coming. Must check rule of your state RTO before travel._Introduction - Family going on holiday and fear of police_ Summer vacation, marriage, or preparation to go to village. No space in boot, children, suitcases, bags. Carrier fitted on top, tied with rope, and fear in mind - police will stop and cut challan of Rs 5000 somewhere.On other side taxi driver thinks - if I keep tourist's luggage on roof then will permit get cancelled?_To remove this confusion is objective of this editorial. We are neither saying police is wrong, nor driver. We are placing law in simple language._> _Editorial Clarification:_ Many claims spreading on social media - like carrier gets entered in RC in Rs 300-500, or 3.8 meter height is applicable on every car - are not established uniform rules for whole country. Below we are writing what is there in central law, and where state rule may be different, we are clearly writing there. If you want to challenge a particular challan in court, then take advice from lawyer with copy of challan and notification of state.*1. Private Car (White Number Plate) - What is legal?*_Legal Basis:__1. Section 66(3), Motor Vehicles Act, 1988 - Exemption of Permit_ According to this section, vehicle used for private use does not require permit like transport vehicle. That is, carrying own luggage in own car is not commercial transport. Therefore carrying family suitcase, bag, bedding, tent is considered legal.Fitting luggage carrier on private car is not illegal, there is no need to take separate permit for it. Challan is not cut for fitting carrier, but for using it in wrong manner._2. Section 52 - Rule of Alteration_ Section 52 says that owner will not make such alteration in vehicle due to which details of manufacturer entered in Registration Certificate (RC) get changed. Alteration means - such change in structure of vehicle due to which its original form gets changed.Therefore:- _Legal:_ Company / standard clamp type, fitted on roof rail, removable carrier. There is no drilling / welding in it, basic structure of vehicle does not change.- _Illegal / Risky:_ Making permanent cage by making holes in roof, by welding, permanently changing width-length-height of vehicle. This can be considered as unauthorized alteration under Section 52.Carrier should be fitted in such a way that it does not permanently change structure of vehicle._3. Central Motor Vehicles Rules, 1989 - Rule 93 and Rule 92 - Size and Weight_ Rule 93 fixes limit of total width, length, height and overhang of vehicle. In Rule 93 itself there is mention of luggage carrier fitted on passenger vehicle not carrying more than seven passengers, from which it is clear that correctly fitted carrier in itself is not prohibited.Along with that in Rule 93(8) there was principle that load should not protrude outside body of vehicle. After petition of Save Life Foundation in Supreme Court, Central Government ended provision of exemption of protruding iron rod / load through notification dated 5 March 2014, that is, protruding dangerous load is now generally not legal._4 Practical Rules for Private Car:__1. Luggage should be own, not commercial_ Only family luggage - suitcase, bag, household goods. Shop goods, cartons, cement, furniture, commercial parcels carrying in private car can be considered as permit violation. If you are caught carrying commercial goods in private car, then police can take action._2. Luggage should not protrude outside, should not be loose_ Luggage should not protrude outside fixed width and length of vehicle. Luggage should not be tied in such a way that there is danger to vehicles behind or driver stops seeing in mirror._3. Number plate, light, indicator, mirror should not be hidden_ Number plate, back light or indicator should not be hidden due to luggage. Hiding of number plate can become cause of challan under Section 177 / 182 and state rules._4. Weight limit should be followed_ Most manufacturers tell roof load limit 50-75 kilogram. Total weight of passenger + luggage + carrier should not be more than permitted capacity of vehicle. Overloading disturbs balance of vehicle, affects braking and turning._When can challan be cut?_- Luggage protruded from side, hanging in front-back- Open, loose, falling luggage- Number plate / light hidden- Welding / permanent change in structure of vehicle- Commercial goods caught in private car - then action can be taken under Section 66 / 192A for permit violation_Claim of getting carrier entered in RC - What is truth?_ It is said at many places that go to RTO in Rs 300-500 and get Roof Carrier written in RC, police will not stop. This is not mandatory central rule for whole country. General rule is that for removable carrier there is no need of separate RTO permission.Still, if in your state / RTO there is system of mention / permission of carrier, then taking written permission from there is safest. Keeping bill, proof of carrier and RC together is always beneficial.*2. Taxi / Commercial Car (Yellow Number Plate) - Why is it not easy?*_Legal Basis:__1. Section 74 - Contract Carriage Permit_ Taxi runs on contract carriage permit under Section 74. In permit itself it is fixed - for what purpose vehicle is, how many passengers, in which area, on what conditions. Going outside condition of permit is permit violation._2. Section 84 - Conditions of Permit_ Fitness, insurance, driver's license, condition of vehicle - all are conditions of permit. On violation of these permit can be suspended / cancelled._3. Section 86 and Section 207 - Power of Action_ Power of permit suspension / cancellation on violation of permit conditions and seizure of vehicle without permit is there in law._Practical Rules for Taxi:_- _See in Permit:_ Whether permission of luggage / roof carrier is there in your permit? If not, then first take amendment / permission in permit from RTO. Fitting carrier without permission is risky.- _State rule is supreme:_ In many states there have been special restrictions / conditions regarding carrier on taxi / jeep. News of strictness has been coming in states like Rajasthan. Therefore rule of Delhi will not be applicable in Rajasthan, and rule of Rajasthan will not be in Delhi.- _Weight and Passenger Limit:_ How much passenger capacity and load capacity is written on permit, that much only is legal. Increasing passenger capacity by keeping luggage on roof is not legal. Making man sit on roof is fully prohibited.- _Commercial Goods:_ Carrying passenger's luggage in taxi is legal, but carrying only commercial goods without passenger, if permission of goods carriage is not there in permit, then it can be violation._Claim of Rs 5000 challan - What is truth?_ In Section 182A(4) there is provision of fine up to Rs 5000 / rectification for unauthorized alteration. But there is not Rs 5000 challan on every carrier. Challan depends on in which section violation is - wrong loading, number plate hidden, unauthorized alteration, permit violation. Therefore one figure of social media is not applicable in every case.*3. Confusion of height - On whom 3.8 meter is applicable?* In central rules limit of total height of vehicle is fixed according to category of vehicle. Limit of 3.8 meter generally comes in Rule 93(4) for big vehicles / vehicles different from double decker, there is no separate exemption of 3.8 meter for roof carrier of car.Practical principle for car is same - _Total height of vehicle + carrier + luggage should not be so much that there is danger in bridge, electric wire, toll, parking, and balance of vehicle gets disturbed._ For goods carrier vehicles, in gazetted notification dated 13 May 2026 - Central Motor Vehicles (Seventh Amendment) Rules, 2026 - limit of total height up to 4.5 meter has been fixed for some goods vehicles of N2 and N3 category carrying white goods / solar panels. This rule is not applicable on private car. This tells that rule of height changes according to category of vehicle and type of goods.*4. Notifications and Judicial Principles - What do they say?*_A. Notification of Ministry of Road Transport dated 7 December 2017 - Bull Bar / Crash Guard_ In this, direction was given to states for action on unauthorized crash guard / bull bar under Section 52. Principle is same - Accessory which changes basic structure and safety of vehicle is not legal without permission. Same principle applies on welded carrier also._B. Supreme Court - RTO vs K. Jayachandra (2019)_ Supreme Court in interpretation of Section 52 said that alteration changing basic structure of vehicle without permission is not legal. Removable, safe, within limit of manufacturer carrier does not come in this category, but permanent change comes._C. Section 110 - Power of Central Government to make rules_ Central Government can make rules on width, height, length, overhang, weight, light, brake etc of vehicle. Under this power Central Motor Vehicles Rules have been made._D. Power to State Government to make rules - Section 138, 139_ State Government can fix enforcement, permit conditions, fees, local restrictions in its state. Therefore rule of one state is not same in other state.*5. What should public do? - Gagar me Sagar, 4 Rules*_For Private Car:_1. _Take company carrier:_ Clamp type, fitted on roof rail, no drill / welding.2. _Keep only own luggage:_ Suitcase, bag. No commercial goods.3. _Size and tightness:_ Should not protrude from side, tie tight with rope + tarpaulin / net. Number plate, light, mirror should be clearly visible.4. _Keep papers together:_ Bill of carrier, RC of vehicle, insurance, pollution certificate. Check rule of travel state first._For Taxi:_1. _First see permit:_ Whether permission of carrier / luggage is there in permit or not.2. _Take written permission from RTO:_ If permission is not there, then get amendment in permit.3. _Don't break limit of passenger + luggage:_ No passenger on roof, no overload.4. _Know rule of state:_ Follow rule of same state in which you are running._What should police do?_- Action should be not by seeing only carrier, but by seeing wrong use.- Challan should have mention of section, reason and notification, so that driver can understand it and challenge it.- Immediate investigation should be done on complaint of bribe / arbitrary recovery.*6. Editorial Demand - Five Concrete Points*_1. There should be One Country, One Clear Guideline:_ Ministry should issue a simple Hindi / English guideline - when carrier is legal on private car, when illegal. This guideline should be pasted in every RTO and police station._2. State-wise list should be public:_ List of what restriction is there on carrier in which state should be on website of Transport Department._3. There should be column of carrier in permit:_ In application of permit of taxi itself there should be column of permission of carrier / luggage, so that rounds of RTO again and again are not needed._4. There should be transparency in challan:_ Section, photo and reason should be written on e-challan. Accountability should be fixed on challan without reason._5. There should be safety awareness campaign:_ Accidents happen every year due to falling of loose luggage. Correct method of tying carrier should be taught at school, driving school and petrol pump._Editorial Comment_Fitting carrier is not crime. Crime is - putting safety at stake, putting other's life in danger, and making private car into commercial truck.Family of private car also is citizen, taxi driver also is citizen, bike rider running behind also is citizen. Right of all is equal._Therefore funda is straight -__In Private = Removable Carrier + Own Luggage + Tight Tying = Legal.__In Taxi = Written Permission in Permit + Following of Limit = Legal._Understand law, avoid rumor, drive safely._Because correctly tied luggage is sign of safe journey.__And wrongly hanging luggage is warning of accident.**- Sanjay Kumar Bathla, Chief Editor**

Mistakes of Delhi Transport Department Operations Branch costing public heavily

Parivahan Vishesh News

Repeated loss of life and property happening

Fire in Zedex Kia showroom in front of Saket Metro Station, Saidulajab, many vehicles burnt, many people saved

- no death confirmed, cause under investigation

- Presentation: Editorial Department,

Parivahan Vishesh Samachar Patra Daily

Editorial Warning: In any fire news, number of injured / dead, time and cause keep changing in initial hours. We are writing only what official sources have said so far. Final confirmation will be only from investigation report of fire department. *Main facts - At a glance* - _Place:_ Zedex Kia - Saket, Plot P2, Mehrauli-Badarpur Road, Saidulajab, Syed Ul Ajaib Village, in front of Saket Metro Station, New Delhi- _Incident:_ Massive fire in Kia car showroom, many new vehicles burnt to ashes- _Loss:_ Many vehicles burnt, initial information of loss worth crores of rupees- _Rescue:_ In initial report 2 people were saved, later according to District Magistrate 12 to 15 people were saved- _Injured:_ 7 people injured, 4 admitted in Max Hospital, 3 admitted in Madan Mohan Malviya Hospital- _Death:_ No death has been confirmed so far- _Fire situation:_ Fire has been extinguished, cooling operation was going on- _Cause:_ Initial estimate said to be short circuit, but according to fire department cause is still under investigation. *1. What happened? - Sequence of events* On Friday, 6 November 2026, fire broke out in big Kia showroom located in front of Saket Metro Station in Saidulajab area of South Delhi. According to Delhi Fire Service, information of fire in showroom was received and 10 fire tenders were sent to spot. Fire was so massive that black smoke spread in entire building. People were rescued from surrounding buildings with help of ladders. Some people also tried to jump down from building to save their life, due to which they got injured. Many teams of Delhi Police and Fire Department remained present on spot. Complete search was done to check if anyone else was trapped in building. *2. Confusion regarding time* - It was said quoting District Magistrate Lakshya Singhal that information was received at around 3:45 AM that fire broke out in Kia showroom located in front of Saket Metro Station. _In other source:_ It was said quoting Delhi Fire Service that information of fire was received at 3:47 PM and 10 fire tenders were sent. In another news it was said that fire broke out at around 4 PM in evening. _Editorial Conclusion:_ It is possible that in one report morning / afternoon time has been printed wrongly, or there has been mistake in AM / PM. _Confirmed:_ On 6 November 2026 fire broke out in Kia showroom in Saidulajab. Day and place is confirmed, time will be final truth only from official log book of fire department. *3. Injured, rescued and death - what is correct?* 2 people have been rescued, later District Magistrate of South Delhi Lakshya Singhal said - so far 7 people have been injured, 4 have been admitted to Max Hospital and 3 to Madan Mohan Malviya Hospital. 12 to 15 people have been saved. There is no news of anyone's death so far. *4. What is cause of fire? - Short circuit or investigation pending?* According to District Magistrate it seems fire broke out due to short circuit while according to Delhi Fire Service cause of fire has not been found yet, investigation is going on. _Editorial Explanation:_ Short circuit is still initial estimate, not final cause. Showroom has large number of electric wiring, battery, fuel, tyres, paint and plastic. Once fire breaks out it spreads rapidly. To know cause, forensic investigation, wiring check, CCTV footage and fire safety audit of building is necessary. Therefore it cannot be said now whether fire was set intentionally, or due to someone's negligence. This is subject of investigation. *5. Why is this incident important? - Not just fire of a showroom* _A. Second fire on same day - Karol Bagh, Gaffar Market_ On same day massive fire also broke out in Puri Plaza in Gaffar Market of Karol Bagh, where 22 fire tenders were sent. There initial estimate was said to be overheating of mobile battery. _Two major commercial fire incidents in Delhi on same day raise questions on fire safety system in Delhi._ _B. Traffic and safety on MG Road_ MG Road in front of Saket Metro Station is one of busiest roads of Delhi. When fire breaks out in showroom, traffic jam, smoke, chaos and hindrance in rescue work - all this happens together. _C. Fire safety of showroom_- Did showroom have Fire NOC?- Were sprinklers, alarms, emergency exits, fire extinguishers working?- Were safety standards followed regarding battery / fuel of vehicles?These questions should be asked in investigation because _Delhi Transport Department whose basic responsibility is to provide trade certificate after checking all these things is zero in fulfilling its responsibility, reason they would know better because written complaint in this regard has been given to Transport Commissioner before also but result is zero_ *6. Editorial Demand - Five concrete points* _1. Investigation report of fire department should be made public:_ Cause of fire in showroom, status of Fire NOC, and report of deficiency in safety should be made public. _2. Treatment and compensation of injured should be ensured:_ Treatment of injured should be at government expense, and if negligence in safety is found then compensation should be given as per rules. _3. Fire audit of all car showrooms should be done:_ Immediate fire safety audit of all big car showrooms, service centers and godowns of Delhi should be done. _4. Emergency lane on MG Road should remain empty:_ There should be arrangement of emergency corridor on MG Road to give way to fire tenders when fire breaks out. _Editorial Comment_ Fire in Saidulajab has once again reminded - Delhi has arrangement to extinguish fire, but arrangement to prevent fire from breaking out is weak. We salute fire personnel, police and local people, who risked their life and saved 12 to 15 people. _But question is same_ - Till fire safety is not followed in every showroom, every market, every building, fire will continue to break out every day in some Gaffar Market or Saket. _Do not consider fire news as only breaking news - consider it as warning.

Parivahan Vishesh Samachar Patra Daily - Breaking - Legal Correspondent - Delhi

Parivahan Vishesh News

Big decision of Delhi High Court - NCR lawyers exempted from BS-6 rule, relief to court staff also

Exemption will be applicable only on working days of court - Justice Amit Mahajan's order on Bar Association's petition stating access to justice as part of Article 14 and 21 | Awaiting detailed order

Presenter Special Correspondent Parivahan Vishesh Samachar Patra

New Delhi - Delhi High Court in an important order on Friday, 6 November 2026 said that advocates and judicial staff residing in National Capital Region (NCR) will get exemption from ban imposed on non-BS-6 vehicles registered outside Delhi. This exemption will be applicable only on working days of the court.

Facts at a glance - Point - Details

Case - Delhi High Court Bar Association v. Government of NCT of Delhi
Date of Order - 6 November 2026, Friday
Bench - Justice Amit Mahajan
Petitioner - Delhi High Court Bar Association (DHCBA)
On behalf of Petitioner - Senior Advocate N. Hariharan, President DHCBA, through Advocate Amit Chaudhary
Who is exempted - Advocates residing in NCR + Judicial / Court Staff
On what exemption - Vehicles registered outside Delhi, Pre-BS-6 / not meeting BS-6 standards
When exemption - Only on working days of court
Original Ban- Notification dated 23 June 2026 of Delhi Government, Department of Environment and Forest
Duration of ban - From 1 November 2026 to 31 January 2027
Detailed Order - Yet to come

Main Points _1. What was the ban?_ In view of pollution, Delhi Government on 23 June 2026 decided that from 1 November to 31 January, all motor vehicles from outside Delhi not meeting BS-6 emission standards will not be allowed entry into Delhi. _2. Why was petition filed?_ DHCBA demanded that vehicles of lawyers residing in NCR and coming to Delhi for bona fide professional work be exempted from this restriction. _3. Who were affected?_ Large number of lawyers come to Delhi courts from NCR areas like Gurugram, Faridabad, Noida and Ghaziabad. They commute daily for court appearances, client meetings, consultation with seniors and chamber work. _4. What was court's argument?_ Lawyers and judicial staff perform Essential / Judicial Functions. If they are not able to reach court, entire system of delivery of justice will be affected and clients will suffer loss. _5. Constitutional Basis_ Petition mentioned Supreme Court's _Anita Kushwaha vs Pushap Sudan_ case, in which access to justice has been considered as part of Article 14 (Equality) and Article 21 (Life and Personal Liberty) of the Constitution. *Detailed Description - What happened in hearing?* _DHCBA's side:_ Senior Advocate N. Hariharan said that notification of government itself already has provision to exempt certain categories of vehicles. Notification gives power to Environment Department to exempt additional categories. Therefore exemption for lawyers can also be considered separately. He said that during Covid-19 pandemic also lawyers were allowed to travel for court work by showing identity card. Order of Delhi High Court of 2021 was also cited. _Proposal of Regulated Exemption:_ DHCBA did not ask for blanket exemption. It proposed that:- Every eligible advocate be allowed to use _one nominated vehicle_- Professional identity card be verified- Vehicle papers be checked- Valid _PUCC - Pollution Under Control Certificate_ be mandatory _Respect for Environment:_ It was clearly said in petition that DHCBA is not seeking complete exemption from environmental rules, nor seeking exemption from GRAP (Graded Response Action Plan) or any binding judicial order. It was said in petition - clean air is necessary, but access to justice is equally necessary. _Court's Order:_ After hearing, Justice Amit Mahajan gave exemption to advocates and judicial staff residing in NCR. Court clarified that this exemption will be applicable only on working days of court. Detailed order is yet to come, in which conditions and process of exemption will be clear. *What does this decision mean? - For common man* _1. Relief for lawyers:_ Lawyers coming from NCR will now be able to come to Delhi in their old vehicle on court days, provided they fulfill conditions of detailed order._2. Relief for clients:_ If lawyers reach court on time then hearing will not be postponed, there will be no delay in case._3. Relief for court staff:_ Judicial employees will also come under purview of this exemption, due to which daily work of court will run smoothly._4. No change for general public:_ This exemption is not for general public. Ban on general vehicles from 1 November to 31 January will remain as before. *Public Interest Message - Be Careful* _1. Wait for detailed order:_ Only oral / brief order has come now. Conditions of papers, identity card, PUCC and nominated vehicle will be decided only from detailed order._2. Must keep PUCC:_ Do not claim exemption without valid pollution certificate._3. GRAP rules are separate:_ In case of strictness under GRAP, separate orders may apply._4. Avoid fake identity:_ Showing fake Bar ID or papers can be punishable. *Editorial Conclusion* This decision is an attempt to balance between environment and justice. It is necessary to stop pollution, but vehicle of justice should also not stop. Court has struck this balance by giving limited, controlled and only working days exemption. Now everyone's eyes are on detailed order, in which it will be clear how, with what proof and with what process exemption will be available. _Public Interest Appeal:_ Lawyer colleagues should keep patience till detailed order comes, keep all papers complete and to reduce pollution, wherever possible, give priority to public transport, carpooling and BS-6 vehicles. _Source: Based on reports of hearing in Delhi High Court, Bar and Bench, PTI, Aaj Tak, Patrika. Conditions may change after detailed order comes, please confirm with official order._

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, 'Parivahan Vishesh News Doordarshan,' from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Governmant of India, various State Governments, and all political organizations before anyone else.

Get Ready — We're Coming Soon!

Parivahan Vishesh News Doordarshan

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world.

After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Do you boil tea for too long?

Parivahan Vishesh News

Caution! Wrong habits of drinking tea can affect your health.

Pinki Kundu, Social Counselor

As soon as winter season comes, consumption of tea increases. Many people's morning doesn't even start without tea. Some people drink tea many times a day.But do you know that method of making tea and its quantity, both are important for health?

1. Do not boil tea for too long.
Boiling tea for longer time can release more tannin and other polyphenol components present in it. This can make taste of tea bitter. Some people may have problem of acidity or heartburn from drinking tea.

2. What is tannin?
Tannin is a natural polyphenol component found in tea.

Some of its important effects:
Absorption of iron obtained from food may decrease.
In some people stomach trouble may increase from drinking tea.
People troubled by acidity or acid reflux should keep tea consumption limited.

3. How much tea should be drunk in a day?
Keep tea consumption limited according to your health condition and sensitivity to caffeine.
Avoid drinking tea again and again.
Do not drink very strong or k adak tea.
Avoid drinking tea with food.
Do not drink tea before sleeping.

4. Who should take special precautions?
Person troubled by acidity.
Patients of acid reflux.
Personwith low hemoglobin.
Person troubled by sleep problem.
Person sensitive to caffeine.

Remember!
For good health it is not only important to know what we eat, but what we drink, how much we drink and in what manner we consume, this is also important.
1. Health itself is true wealth!
2. Stay healthy, stay aware!
3. Healthy body itself is true wealth.

Along with purity of body, also understand importance of purity of soul. Stay healthy yourself and inspire others also to stay healthy!"

One Body, Different Treatments: The Changing Landscape of Personalised Medicine

Parivahan Vishesh News

Dr. Vijay Garg

Every human body is unique. Although the basic structure of the human body is similar, each individual differs in genetic makeup, lifestyle, body functions, medical history and response to medicines. This is why two people suffering from the same disease may require different treatment approaches. Modern medicine is increasingly recognising this reality and moving towards personalised healthcare. Traditionally, patients with similar symptoms or the same disease were often prescribed similar medicines. However, experience and scientific research have shown that a medicine beneficial to one patient may be less effective for another or may even cause unwanted side effects. Therefore, modern healthcare increasingly emphasises designing treatment plans according to the individual needs of each patient.

Why Does Treatment Differ from Person to Person? The human body's response to diseases and medicines depends on several factors.

1\. Genetic Differences Genes influence many processes within the human body. They also play an important role in determining how a medicine works, how quickly it produces an effect and how it is processed and eliminated from the body. Certain genetic tests can help doctors select appropriate medicines and doses for specific patients.

2\. Age and Physical Condition Children process medicines differently from adults. Similarly, changes in kidney and liver function among elderly people may require adjustments in medication doses. Body weight, nutritional status and the presence of other diseases can also influence treatment decisions.

3\. Lifestyle and Environment Diet, physical activity, sleep, stress, smoking, alcohol consumption and environmental exposure influence health. Therefore, even when two people suffer from the same disease, differences in their lifestyles may require different treatment plans.

4\. Previous Medical History Past illnesses, allergies to medicines, current medications and family medical history are important considerations when selecting treatment. A medicine that is safe for one patient may cause an allergic reaction or harmful drug interaction in another.

Practical Applications of Personalised Medicine Personalised medicine is bringing significant changes to several areas of healthcare. In cancer treatment, doctors sometimes examine the genetic characteristics of a tumour to identify treatments that may be more effective. Targeted therapy focuses on specific molecules or changes involved in the growth of cancer cells. Similarly, pharmacogenomics is an important branch of medical science that studies how a person's genes influence their response to medicines. This information can help doctors select suitable medicines and appropriate doses in certain cases. In conditions such as diabetes, high blood pressure and heart disease, treatment plans can also be adjusted according to a patient's age, risk factors, lifestyle, previous treatment and response to medication.

The Role of Artificial Intelligence Artificial intelligence (AI) and digital healthcare technologies are creating new opportunities for personalised treatment. By analysing medical records, laboratory reports, genetic information and other health-related data, these technologies can assist doctors in making informed decisions.

Smartwatches and other wearable devices can monitor physical activity, heart rate and sleep patterns. Such information may help identify changes in health and support timely medical attention. However, the purpose of technology is not to replace doctors but to improve their decision-making. Accurate information, scientific evidence and professional medical assessment will remain essential.

Challenges of Personalised Medicine Although personalised medicine offers several benefits, it also faces important challenges. Genetic testing and advanced treatments can be expensive and may not be accessible to everyone. Protecting the privacy and confidentiality of personal health information is another major concern. It is also essential to ensure that treatment recommendations are based on reliable scientific evidence. Genetic testing is not necessary for every patient, nor does every disease require highly specialised treatment. Doctors should recommend investigations and treatments according to the actual needs of each individual.

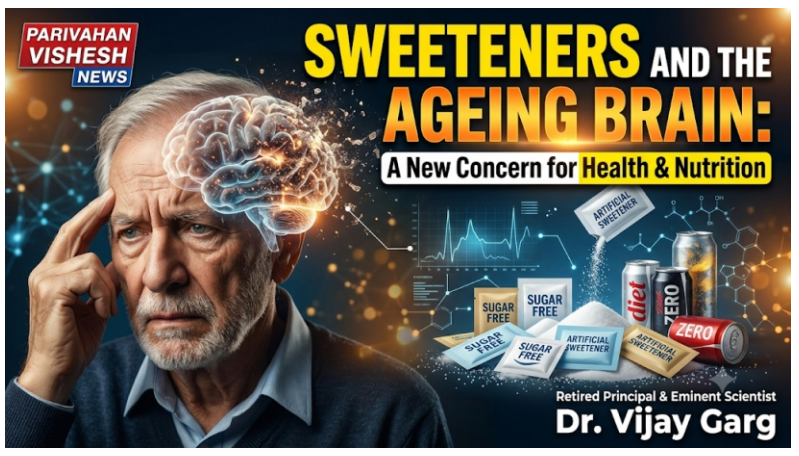

The Future of Healthcare The future of medicine will increasingly move beyond the principle of providing identical treatment to everyone. It will give greater importance to each patient's individual circumstances, including genetic makeup, lifestyle, environment and medical history. The purpose of personalised medicine is not simply to prescribe different medicines to different people. Its real objective is to provide the right medicine, at the right time and in the right dose to the right patient, thereby reducing side effects and improving treatment outcomes. Although the basic structure of the human body is similar, every individual's health journey is different. Understanding these differences is an important step towards safer, more effective and patient-centred healthcare. Having one type of human body does not mean that everyone requires the same treatment. The real foundation of future medicine lies not merely in understanding the disease, but in understanding the patient as an individual.

Sweeteners and the Ageing Brain: A New Concern for Health and Nutrition

Parivahan Vishesh News

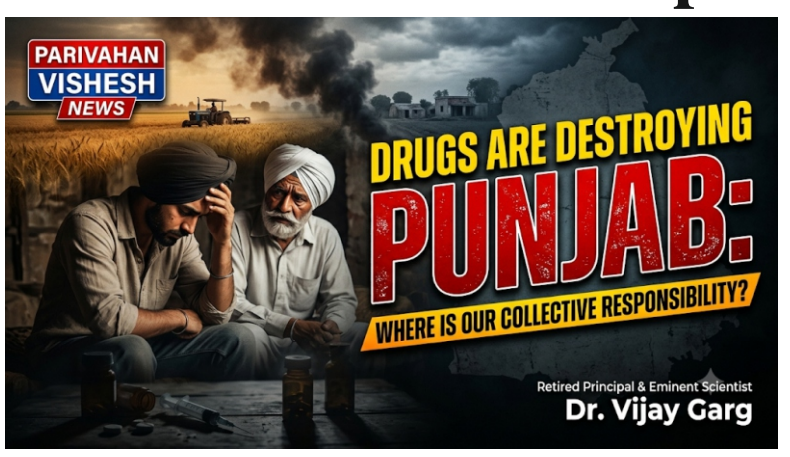

Dr. Vijay Garg

Sugar substitutes are often promoted as healthier alternatives to ordinary sugar. They are widely used in diet soft drinks, sugar-free sweets, flavoured yoghurt, packaged foods and other low-calorie products. For people trying to control their weight, blood sugar or calorie intake, these sweeteners may appear to be an attractive choice. However, emerging scientific research is raising an important question: Could frequent consumption of certain sugar substitutes have unexpected effects on brain health and accelerate cognitive ageing?The human brain is one of the most energy-demanding organs in the body. It requires a balanced supply of nutrients, healthy blood circulation and proper metabolic functioning to maintain memory, concentration, learning and decision-making abilities. As people grow older, protecting these functions becomes increasingly important. Therefore, any possible connection between dietary habits and brain ageing deserves attention.A major study published in the medical journal Neurology has brought this issue into focus. Researchers analysed data from 12,772 adults in Brazil who were followed for approximately eight years. Their average age at the beginning of the study was 52 years. The researchers examined the consumption of seven low- and no-calorie sweeteners and assessed participants' memory, language and thinking abilities over timeSix sweeteners under scientific scrutinyThe study examined seven commonly used sugar substitutes:* Aspartame: Commonly found in diet soft drinks, sugar-free chewing gum and low-calorie products.* Saccharin: One of the oldest artificial sweeteners, frequently used in tabletop sweetener products.* Acesulfame-K: Used in beverages, desserts and many packaged foods.* Erythritol: A sugar alcohol found in sugar-free sweets and low-calorie food products.* Xylitol: Commonly used in chewing gum, mints and dental-care products.* Sorbitol: Found in sugar-free candies, chewing gum and certain processed foods.The seventh sweetener, tagatose, was also examined but was not associated with cognitive decline in this study. This does not establish that tagatose is completely safe or offers protection to the brain. ScienceDaily +1What did the researchers discover?The findings attracted attention because participants with the highest overall sweetener consumption experienced a 62 per cent faster decline in memory and thinking abilities than those with the lowest consumption. This difference was estimated to be equivalent to approximately 1.6 additional years of cognitive ageing over the study period.Even participants with moderate consumption showed a faster decline than those with the lowest intake. The association was particularly noticeable among adults younger than 60 and appeared stronger among people with diabetes.The researchers also observed changes in verbal fluency, working memory and the ability to recall information. These findings suggest that frequent consumption of certain sugar substitutes deserves further investigation in relation to long-term brain health.However, an important distinction must be made: the study identified an association, not proof of cause and effect. It does not establish that artificial sweeteners directly damage the brain or cause dementia.Why might this matter for brain health?Scientists are investigating several possible explanations for the relationship between sweeteners and cognitive health. These include possible effects on metabolism, insulin regulation, gut microbiota and inflammatory processes. However, the precise biological mechanisms remain uncertain and require further research.The findings also raise questions about whether replacing sugar with artificial alternatives always provides the expected long-term health benefits. A product labelled sugar-free or diet-friendly should not automatically be considered beneficial in every respect.What should consumers do?The findings do not mean that everyone must immediately stop consuming sugar substitutes. Instead, they highlight the importance of moderation and informed food choices.Some practical steps can help:* Reduce dependence on excessively sweet foods and beverages.* Prefer plain water over artificially sweetened soft drinks.* Choose fresh fruits instead of frequently consuming sugar-free desserts.* Read food labels carefully to identify different sweeteners.* Avoid excessive consumption of highly processed foods.* Maintain a balanced diet rich in vegetables, fruits, whole grains, nuts and other nutritious foods.* People with diabetes should consult their doctors or dietitians before changing their sweetener consumption.It is also important to remember that replacing artificial sweeteners with large quantities of ordinary sugar, honey or other calorie-rich sweeteners is not necessarily a healthier solution.The Need for Further ResearchThe Brazilian study has opened an important area of scientific discussion, but it has certain limitations. Dietary information was collected through participants' own reports, which may not always be accurate. Moreover, researchers cannot completely rule out the influence of other lifestyle and health-related factors.Further long-term studies and clinical research are necessary to understand whether particular sweeteners directly influence brain ageing, whether some are more harmful than others and what levels of consumption may be appropriate.Brain health depends on many factors, including genetics, physical activity, sleep, nutrition, education and social engagement. No single food ingredient determines how quickly the brain ages.Sugar substitutes were introduced as alternatives to ordinary sugar, but their long-term health effects deserve continued scientific attention. The emerging evidence reminds us that reducing calories does not automatically mean improving overall health.The real goal should not simply be to eliminate sugar from our diet but to develop healthier eating habits that protect the body and mind. Sweetness may make food enjoyable, but protecting memory, intelligence and cognitive health should always remain a greater priority.A healthy diet is not about finding a sweeter substitute; it is about making wiser choices for a healthier and sharper mind throughout life

Drugs Are Destroying Punjab: Where Is Our Collective Responsibility?

Parivahan Vishesh News

Dr. Vijay Garg

Punjab is a land known for its courage, hard work, rich culture, agricultural prosperity and vibrant spirit. Its people have made remarkable contributions to the nation in agriculture, defence, sports, education and industry. However, behind this proud identity lies a serious social challenge that threatens the future of the state: drug abuse. The growing problem of substance addiction is damaging families, weakening communities and putting an entire generation at risk. Drug addiction is not merely an individual weakness; it is a complex social, psychological, economic and public-health problem. It affects people from different backgrounds, age groups and economic sections. Young people, who should be building careers, developing skills and contributing to society, sometimes become trapped in substance dependence. What begins as experimentation, peer pressure or an attempt to escape stress can gradually turn into a destructive habit. The consequences extend far beyond the individual. Families experience emotional suffering, financial difficulties and social isolation. Parents who dream of seeing their children succeed may find themselves struggling to protect them from addiction. Siblings, spouses and children of people with substance-use disorders also experience insecurity, anxiety and distress. In some cases, addiction contributes to unemployment, domestic conflict, crime and serious health complications. One of the biggest challenges in addressing this crisis is the tendency to blame others. Families blame society, society blames the government, political groups blame one another, and authorities may point towards international drug networks or neighbouring regions. Although every factor deserves investigation, repeatedly shifting blame does not solve the problem. The important question is: Who is willing to accept responsibility and take meaningful action? The government has an important responsibility to control drug trafficking, identify supply networks, strengthen law enforcement and ensure that those involved in organised drug distribution face legal consequences. Drug supply chains must be investigated professionally, and action should be transparent and accountable. At the same time, strict enforcement alone cannot eliminate addiction. Prevention, treatment, rehabilitation and social reintegration must receive equal attention. Educational institutions also have a significant role to play. Schools and colleges should not limit their responsibilities to academic performance and examination results. They must create awareness about the physical, psychological and social consequences of substance abuse. Students should be encouraged to discuss stress, anxiety, peer pressure and personal difficulties without fear of humiliation. Teachers, counsellors and parents must work together to identify warning signs and provide timely support. Parents are equally important in preventing addiction. Children need more than financial facilities and academic pressure; they need emotional security, understanding and open communication. Parents should remain aware of changes in their children's behaviour, friendships, habits and emotional well-being. Instead of reacting only with anger or punishment, they should try to understand the underlying problems and seek professional help when necessary. Society must also change its attitude towards people struggling with addiction. Addiction should not be treated simply as a matter of shame or moral failure. Substance-use disorders are health conditions that often require medical treatment, psychological counselling and long-term support. Insulting, isolating or rejecting affected individuals can push them further into despair. Compassion, combined with accountability and appropriate treatment, offers a better path towards recovery. Healthcare institutions and rehabilitation centres must provide professional, ethical and accessible services. Treatment should be based on scientific evidence, qualified medical supervision and individual needs. Rehabilitation does not end when a person stops using drugs. Recovering individuals also need family support, education, vocational training, employment opportunities and acceptance within society. Without these opportunities, the risk of relapse may increase. Religious and community organisations can contribute by organising awareness programmes, supporting affected families, encouraging healthy activities and helping people access treatment. Sports clubs, youth organisations, libraries and cultural institutions can provide positive environments where young people develop confidence, discipline and a sense of belonging. A young person who finds purpose, opportunity and encouragement is better equipped to resist harmful influences. We must also recognise that unemployment, lack of opportunities, social pressure, mental-health difficulties and hopelessness can make some individuals more vulnerable to substance misuse. Creating meaningful employment, strengthening vocational education, promoting sports and improving access to mental-health services are therefore important parts of a comprehensive response. Media organisations and social media platforms also have a responsibility. Sensational reporting and the repeated circulation of disturbing images may create fear without offering solutions. Instead, the media should highlight successful recovery stories, provide reliable information about treatment facilities and encourage informed public discussion. Awareness must be based on facts rather than rumours and stigma. Punjab does not need another cycle of accusations. It needs a coordinated movement involving government departments, educational institutions, healthcare professionals, families, community organisations and responsible citizens. Every village, town, school and college should become part of a sustained effort to prevent drug abuse and support recovery. The future of Punjab cannot be protected through slogans alone. It requires effective law enforcement, accessible treatment, responsible parenting, quality education, employment opportunities and compassionate social support. Every individual and institution must examine what it can contribute. The most important question is not simply who is responsible for Punjab's drug crisis, but what each of us is prepared to do to overcome it. If we continue to blame one another, another generation may suffer. If we share responsibility and act together, recovery and hope remain possible. Punjab's real strength lies not only in its fertile fields or brave history, but in the health, dignity and dreams of its people. Saving its youth from drugs is not the responsibility of one government or one organisation; it is a collective responsibility of the entire society.

Today is birthday of Rishi Dhanvantari!!

Parivahan Vishesh News

Rishi Dhanvantari is considered originator of Ayurveda. He studied vegetations across world and revealed their good and bad effects-qualities. Lord Dhanvantari wrote many scriptures, one of them is Dhanvantari Samhita which is original scripture of Ayurveda. Adi Acharya of Ayurveda Sushrut Muni had obtained knowledge of this medical science from Rishi Dhanvantari only. Later Charak etc. carried forward this traditionBut in slavery period Hindu forgot real meaning of this day and made it day of buying things.Due to not understanding Vedic knowledge we don't know in how many more hypocrisies we will fall!!Rishi says follow Ayurveda then prosperity will come in your life.We took opposite meaning and started shopping.Ayurveda has considered healthy body itself as wealth."First happiness is healthy body and second happiness is wealth in house"Dhan Lakshmi has been given second status.Meaning of Dhanteras i.e. Lord Rishi Dhanvantari Jayanti:In Ayurveda meaning of Vidya Pujan is - worship i.e. respect of nature, medicinal vegetation and above all these natural treasures grown in lap of nature.Meaning of Dhanvantari Jayanti is to obtain favourability of nature by obtaining boundless compassion of nature on birth anniversary of Maharishi Dhanvantari.There has not been historical person named Dhanvantari.Whom today we call surgeon, in Ayurveda he has been called Dhanvantari. Not Shalya Chikitsak.According to Ayurveda, attainment of Dharma, Artha, Kama and Moksha can happen only through healthy body and long life.And fully developed Shalya Tantra in world. Today Shalya Tantra (surgery) in world is gift of Ayurveda.Best wishes for birthday of Rishi Dhanvantari, may our life not be against Ayurveda is my auspicious wish.Do yoga daily stay healthyBecome yogi up-yogiStay healthy stay happyAdopt Swadeshi save country

Tamaso Ma Jyotirgamaya: From Deep to Sun

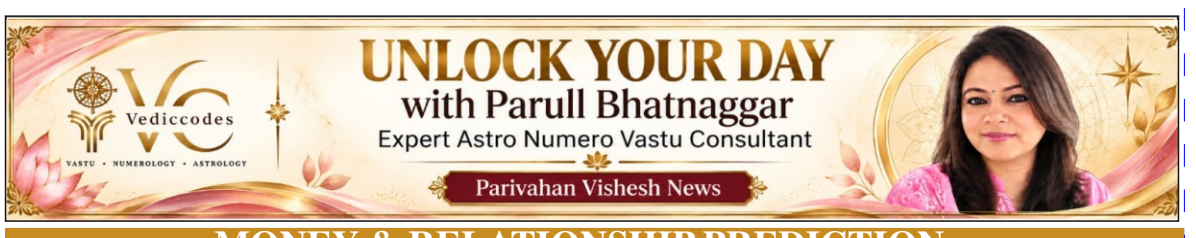

Parivahan Vishesh News

Govardhan Das Binnani 'Raja Babu'

After the month of Shravan, a series of major festivals and celebrations begins. This is followed by a fifteen-day program of ancestral worship in the month of Ashwin. Sharadiya Navratri follows the ancestral worship program. The festival of Navratri begins. This nine-day festival is celebrated with great joy and pomp. It is believed that even the most dignified man, Lord Rama, worshipped Goddess Durga for nine days during the Sharadiya Navratri in the Treta Yuga before killing Ravana, and received her blessings for victory. Ravana was killed on Vijayadashami. Had done.

Due to the above reasons, Dussehra is a very important festival in our Sanatan Dharma, that is, for the people of Hinduism. And as you all know, the festival of Dussehra is celebrated with great enthusiasm and zeal not only in North India but also by the people of Hinduism throughout the country for ten consecutive days. Since this festival lasts for ten days, it is called Dussehra. During the first nine days, Goddess Durga and Mahishasura Mardini are worshipped. On the tenth day, people celebrate by burning the effigy of the demon king Ravana, which not only signifies the victory of good over evil but also the victory of virtue over sin.Now here are three interesting facts for your attention -1] We have a very famous saying here and that is - Dashe Dussehra, Beese Diwali, Chhath!As you all know, Vijayadashami or Dussehra is celebrated on the tenth day after the first day of Sharadiya Navratri, and Diwali, the most important Hindu festival, is celebrated on the twentieth day after Vijayadashami. Similarly, Chhath, the famous festival of the Hindus, is celebrated in Bihar, Jharkhand, eastern Uttar Pradesh, and the Terai region of Nepal, exactly six days after Diwali.2] Why does Diwali fall exactly on the twenty-first day after Dussehra every year? Have you ever wondered? If you don't believe it, just check your calendar.In Ramayana, Sage Valmiki has written that it took 504 hours for Lord Shri Ram and his entire army to walk from Sri Lanka to Ayodhya.Now if we divide 504 hours by 24 hours , the answer comes out to be 21 i.e. twenty one days!!!I was also surprised.Curious, I searched Google Maps, and it shows that the walking distance from Sri Lanka to Ayodhya is 3,145 kilometers, and the travel time is 504 hours .Isn't it surprising?The festivals of Dussehra and Diwali have been celebrated by Indians since the Treta Yuga, and we have traditionally observed them . If you don't believe this time calculation, you can try a Google search, as Google Maps is considered completely reliable these days.3- Thirdly, one more interesting information to know is this - Folklore holds that the omniscient sage Valmiki had composed the Ramayana even before the birth of Lord Rama!!! His predictions and descriptions of the events to come were absolutely accurate.In the end, I would like to say that we all celebrate these festivals with many rituals and prayers. During Navratri, many devotees or religious people observe fast for the entire nine days to seek the blessings and power of Goddess Durga, while some people fast on the first and last day. On the tenth day, people celebrate Dussehra to commemorate the victory of Lord Shri Ram over the demon king Ravana. After Dussehra, preparations for the widely celebrated Diwali begin because it was on the day of Diwali that Lord Shri Ram, along with Mother Sita and brother Lakshman, returned to Ayodhya after completing fourteen years of exile. And after Diwali, Chhath Puja, a unique folk festival of sun worship, is celebrated for family happiness, prosperity and attainment of desired results. Though it is a festival mainly celebrated in Bihar, Jharkhand, Eastern Uttar Pradesh and Terai regions of Nepal, but nowadays, not only in entire India but Indians of all classes living abroad have also started celebrating this festival with great faith and with the same enthusiasm, excitement and pomp as it is celebrated in India.In view of all the above facts, we proudly say that our own Sanatan Hindu culture is very great and at the same time we consider ourselves fortunate to be born in such a great Hindu culture.

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

07 NOVEMBER 2026 | Day vibration: 1 — New beginnings, leadership, initiative, independence and focused action

Moolank 1
Money & Career: Day 1 renews your leadership energy and supports fresh professional beginnings. Take initiative on a plan, proposal or financial goal, but define the first milestone clearly before moving fast.
Relationship: You may naturally take the lead today. Initiative can strengthen a bond when it includes the other person's wishes rather than becoming one-sided.
Precaution: Avoid impatience, ego-driven decisions and spending simply to make a strong impression.
Make Your Day Better: Start one meaningful priority with confidence and a clear practical plan.

Moolank 2
Money & Career: Day 1 encourages your cooperative nature to become more decisive. A partnership or money matter may need you to state your position clearly instead of waiting for others to choose.
Relationship: Your sensitivity remains a strength, but direct expression will prevent misunderstandings. Ask for what you need without becoming demanding.
Precaution: Avoid hesitation, dependency and agreeing to a financial commitment only to please someone.
Make Your Day Better: Make one independent decision while preserving harmony through clear communication.

Moolank 3
Money & Career: Day 1 gives momentum to your creative and expressive nature. Pitch an idea, begin a presentation or put your talent forward, but connect enthusiasm with a measurable objective.
Relationship: Your confidence and charm are noticeable. Use them to initiate a positive conversation rather than making the interaction revolve only around your own plans.
Precaution: Avoid scattered starts, exaggerated promises and unnecessary spending for attention or appearance.
Make Your Day Better: Choose your strongest idea and give it a focused beginning.

Moolank 4
Money & Career: Day 1 brings fresh-start energy to your structured nature. Introduce a useful system, restart a delayed project or make a practical financial decision that creates forward movement.
Relationship: You may prefer familiar routines, while the day asks for a new approach. A small change in how you communicate can improve closeness.
Precaution: Avoid stubbornness, rejecting new methods automatically and delaying action until every detail is perfect.
Make Your Day Better: Begin one well-planned improvement and allow room for adjustment.

Moolank 5
Money & Career: Day 1 combines with your adaptable nature to create strong momentum for new contacts, business ideas and opportunities. Choose carefully so excitement becomes progress rather than another unfinished start.
Relationship: Spontaneity can refresh a bond, but communicate your plans before changing them. Independence works best when it does not create uncertainty.
Precaution: Avoid impulsive purchases, overcommitment and jumping from one opportunity to another.
Make Your Day Better: Say yes to one promising beginning and give it your full follow-through.

Moolank 6
Money & Career: Day 1 encourages you to take initiative in client, family or financial matters. A new service, improvement or money plan can work well when comfort and appearance do not overshadow profitability.
Relationship: You may want to create harmony by taking charge. Offer warmth and initiative, but allow the other person to contribute equally.
Precaution: Avoid possessiveness, overspending on comfort and taking responsibility for everyone's choices.
Make Your Day Better: Begin one practical improvement that strengthens both value and harmony.

Moolank 7
Money & Career: Day 1 asks your thoughtful nature to move from analysis into action. A researched idea, specialised skill or strategic plan is ready for a clear first step.
Relationship: You may prefer to process privately, but today benefits from initiating honest communication. Share your thought before silence creates distance.
Precaution: Avoid over-analysis, isolation and postponing a good opportunity while waiting for perfect certainty.
Make Your Day Better: Act on one well-considered insight and keep the first step simple.

Moolank 8
Money & Career: Day 1 adds initiative to your ambitious and disciplined nature. Good for setting a new financial target, eading a project or restructuring an important responsibility with long-term authority in mind.
Relationship: Strong will can become controlling if pressure rises. Lead through clarity and respect rather than expecting immediate agreement.
Precaution: Avoid power struggles, status-driven spending and forcing results before the foundation is ready.
Make Your Day Better: Set one powerful goal and define the disciplined action that begins it.

Moolank 9
Money & Career: Day 1 turns your passionate energy toward a fresh chapter. After completing old matters, direct resources toward a purposeful new goal instead of carrying yesterday's obligations into today.
Relationship: A new emotional tone is possible when you stop replaying an old conflict. Take the first step toward a healthier pattern without ignoring necessary boundaries.
Precaution: Avoid anger-led decisions, impulsive generosity and starting something new before genuinely releasing the old.
Make Your Day Better: Choose one fresh direction and enter it with courage, clarity and purpose.

'UP Ratna' Dr. Gopal Chaturvedi becomes Media In-charge of Shri Hanumad Aradhan Mandal

Parivahan Vishesh News

Varanasi :- 15th annual festival of Shri Hanumad Aradhan Mandal was concluded with pomp and devotion at Shri Panchmukhi Hanuman Temple located at Akroor the other day. On this occasion city's renowned litterateur and spiritual journalist 'UP Ratna' Dr. Gopal Chaturvedi was unanimously appointed as Media In-charge of Shri Hanumad Aradhan Mandal.

His appointment was announced by Mandal's guide Dr. Manoj Mohan Shastri, founder Ashok Vyas and treasurer Vipin Bapu. On this occasion they said that with Dr. Gopal Chaturvedi becoming Media In-charge, religious, spiritual and social activities of Mandal will get wide publicity across country.It is known that Dr. Gopal Chaturvedi is accomplished writer of Hindi and English language. He has been associated with many prestigious newspapers-magazines of country. His articles have been translated in various languages of country along with foreign languages. He is pride of not only Vrindavan, but entire country. He has also been journalist recognized by Uttar Pradesh government in Lucknow, capital of Uttar Pradesh.

For his special achievements in literary, journalism and spiritual field, he has also been decorated with honorary title of 'UP Ratna' by former Deputy Chief Minister of Uttar Pradesh Dr. Dinesh Sharma.

Ban on dust-raising demolition and open-air construction activities till November 20: DC

Parivahan Vishesh News

DC Varsha Khanwal directed all departments to strictly enforce rules under Grape-2.

Strict monitoring will also be done on industrial units, road dust, vehicle smoke and open burning of garbage

Jhajjar, 06 November

To combat air pollution in the NCR, the Commission for Air Quality Management (CAQM) has issued directives to implement additional precautionary measures until November 20, 2026. Under this plan, demolition activities and open-air construction that generate dust will be prohibited during this period. Except for those exempted, other prohibited activities will be strictly prohibited. Deputy Commissioner Varsha Khanwal has directed all concerned departments and agencies to ensure effective compliance with these directives.DC Varsha Khanwal stated that air pollution control measures are also in place in the NCR under the second phase (GRAP-2) of the Graded Response Action Plan (GRAP). All departments should implement these measures with utmost seriousness in their respective jurisdictions. She clarified that negligence at any level regarding pollution control will not be tolerated.*Special monitoring will be done on construction and demolition activities*The DC directed the concerned departments to maintain special vigilance on prohibited construction and demolition activities until November 20th. All officers should conduct regular inspections in their areas and take action against those who disobey the orders, as per the rules. He urged all departments to ensure the implementation of these instructions on the ground by deploying adequate staff and machinery.*Strict action against industrial units and other sources of pollution*The Deputy Commissioner directed the Regional Officer of the Haryana State Pollution Control Board, Bahadurgarh, to conduct intensive inspections of industrial units and other polluting activities. He said that special monitoring should be done on industrial emissions, vehicular pollution, road dust, and activities such as open burning of garbage and biomass. Action should be taken against units and individuals violating regulations, as per the rules.Emphasis on anti-smog guns and water sprinkling to control road dustDC Varsha Khanwal said that to control dust on the roads, the concerned departments should effectively deploy anti-smog guns and water sprinklers. Necessary measures should be taken to prevent dust from spreading into the air at construction sites. Strict monitoring should be maintained on those who burn garbage

and crop residue in the open. She directed officials to issue challans to those who violate the rules and, if necessary, file FIRs against those burning garbage.*District residents should also play an active role in pollution control*The DC appealed to district residents for cooperation in the air pollution control campaign, saying that citizens should keep their vehicles' PUC certificates updated, turn off the engine at red lights, and ensure proper vehicle maintenance. Avoid littering or burning garbage in the open. Plant as many trees as possible and adopt environmentally friendly activities. He said that for clean air and a healthy environment, the participation of every citizen, along with the administration, is essential.

Child artists showcased their talent on the stage of Bal Mahotsav, showcasing their skills from Rangoli to Ragini

Parivahan Vishesh News

Four-day district level Children's Festival concludes with enthusiasm and excitement

On the last day, colourful cultural performances captivated the audience

District Child Welfare Officer Surekha Hooda encouraged the little artists

Jhajjar, 06 November.

For four days, a wonderful confluence of children's imagination, art and talent was seen at the local Bal Bhavan. Some decorated attractive rangoli with colours, while others showcased their talent through ragini, group dance and drama presentations.

The occasion was the four-day district level Bal Mahotsav-2026, organised under the guidance of DC Varsha Khanwal, which concluded on Friday in an enthusiastic atmosphere. On the last day of the festival, District Child Welfare Officer Surekha Hooda observed various competitions and encouraged the children and motivated them to move ahead in life.

Recognizing and nurturing talent is more important than winning competitions.District Child Welfare Officer Surekha Hooda said that every child has a special talent. Events like the Children's Festival give children the opportunity to recognize their hidden talents and showcase them on stage. She said that winning a competition is certainly a joy, but participating with enthusiasm, dedication, and hard work is also a significant achievement in itself. Children should actively participate in every activity without worrying about winning or losing. Such platforms give children a new direction in their confidence, creativity, and personality development.

Talented students will be honored on November 14th at the Children's Day celebrations.

The District Child Welfare Officer said that the students who perform well in various competitions will be honoured in the district level Children's Day celebration to be held on November 14.

The last day of the festival is decorated with rangoli, mehndi, ragini and dance

Program Officer Akshama Sharma said that children from various schools in the district participated enthusiastically in the Children's Festival. On Friday, the closing day, various competitions were held, including rangoli, sketching on the spot, mehndi, ragini, one-act play, group dance, fancy dress, clay modeling, speech, urn decoration, and fun games. Children showcased their artistic talent, imagination, and stage skills. Winners of the scheduled competitions will have the opportunity to showcase their talent directly at the state-level competitions.

The program was jointly moderated by spokesperson Sanjay Sharma and spokesperson Krishna Vashishtha. The jury included Education Department spokespersons Babita Rani and Nisha Rani, along with Child Welfare Council officials and staff members.

Pensioners should submit digital life certificate through face authentication: Sanjay Phogat

Parivahan Vishesh News

District Treasurer Sanjay Phogat appealed to pensioners across the district

Jhajjar, 06 November

Pensioners across the district who receive their pension from the District Treasury Office can submit their digital life certificates using face authentication via their smartphones. District Treasury Officer Sanjay Phogat has made this appeal to pensioners.He stated that the government is running a special campaign in this regard for the convenience of pensioners. Its objective is to make the process of submitting life certificates simple, convenient, and hassle-free.The DTO said that all the assistant treasury officers and employees doing pension related work of the district have been instructed to make the pensioners aware about the face authentication facility and provide them all possible assistance in preparing and submitting the digital life certificate.He said that the availability of face authentication via smartphones will greatly facilitate pensioners in submitting life certificates, saving them from unnecessary hassles.*Pensioners appealed to participate in the campaign*DTO Sanjay Phogat appealed to all pensioners to take advantage of this campaign by using their smartphones to use face authentication and submit digital life certificates. He also directed the concerned officers and employees to disseminate information about this facility to as many pensioners as possible, so that the campaign's benefits can reach those who are eligible.

Duty Magistrate appointed to enforce green crackers rules: District Magistrate

Parivahan Vishesh News

Green crackers can be used only during the prescribed time on November 7 and 8

A complete ban on all types of firecrackers will be implemented again from Monday, November 9, 2026

Legal action will be taken against those who violate the rules

District Magistrate Varsha Khanwal issued orders
Jhajjar, 06 November.

District Magistrate Varsha Khanwal has issued comprehensive guidelines regarding the use of green crackers to control air and noise pollution during Diwali festival and in compliance with the orders of the Supreme Court. According to the orders issued under Section 163 of the Indian Civil Security Code, 2023, only the use of certified green crackers will be allowed in Jhajjar district as per the prescribed conditions. Green crackers can be burst only on 7th and 8th November from 6 am to 7 pm and from 8 pm to 10 pm. At the same time, from 9th November, a complete ban will again be implemented on the manufacture, storage, sale and use of all types of crackers within the limits of Jhajjar district.District Magistrate Varsha Khanwal has appointed duty magistrates in all four subdivisions of the district: Jhajjar, Beri, Badli, and Bahadurgarh, to ensure effective enforcement of orders during Diwali. The respective SDMs will be the overall in-charge of their respective subdivisions and, in coordination with the Assistant Commissioner of Police (ACP), will ensure compliance with instructions regarding law and order and green firecrackers.*Officers will take charge in Jhajjar, Beri, Badli and Bahadurgarh*According to orders issued by the District Magistrate, Executive Engineer Yudhveer Singh, Naib Tehsildar Anshul, and Block Development and Panchayat Officer Rahul Mehra have been appointed as duty magistrates in the Jhajjar subdivision. Naib Tehsildars Manoj and Navdeep have been assigned the responsibility in the Beri subdivision. Block Development and Panchayat Officer Dharampal and Naib Tehsildar Arvind will be posted as duty magistrates in the Badli subdivision.Similarly, in the Bahadurgarh subdivision, Naib Tehsildar Praveen, Executive Engineer Aman Mor, Senior Manager of HSIIDC Robin Batla, Assistant Labor Commissioner Rajendra Hooda, and Sub-Divisional Engineer of the Public Works Department Rajesh Tomar have been appointed as duty magistrates. All officers will coordinate with the police in their assigned areas to monitor and inspect.*Joint team will inspect, firecrackers will be identified through QR code*District Magistrate Varsha Khanwal stated that joint patrol and inspection teams of police and duty magistrates have been formed at the police station level to enforce the orders. The respective SDMs will be the nodal authority for overall supervision of these teams, while the Additional Deputy Commissioners will monitor at the district level. The joint teams will conduct regular inspections at designated sales centers, shops, storage sites, and other relevant locations. QR codes will be verified to identify certified green firecrackers, and samples will be taken and sent to the Petroleum and Explosives Safety Organization (PESO) if necessary. Any banned firecrackers found will be immediately confiscated.*Bursting of firecrackers is prohibited within a radius of 300 metres in silent zones*Under the orders issued, a 300-meter radius around hospitals, nursing homes, primary and district health centers, old-age homes, educational institutions, and notified silent zones across the district has been declared a no-cracker zone. No firecrackers of any kind will be permitted in these areas. The use of firecrackers will also be prohibited except during the designated dates and times.*Strict legal action will be taken for violation*District Magistrate Varsha Khanwal clarified that, in accordance with the Supreme Court's directives, a complete ban on the manufacture, storage, sale, and use of all types of firecrackers will be in effect in the district beginning November 9, 2026. Those who disobey the orders will be prosecuted under Section 223 of the Indian Penal Code, 2023, and other relevant legal provisions. Actions such as confiscation of banned firecrackers, forfeiture of security deposits, and cancellation of licenses may also be taken.He directed officials to launch awareness campaigns regarding the harmful effects of firecrackers and how to identify certified green firecrackers. He also appealed to the public to prioritize environmental and health protection, follow the guidelines issued by the administration, and celebrate Diwali in a peaceful and safe manner.

Administration cracks down on illegal firecracker storage; joint team raids three warehouses

Parivahan Vishesh News

A team of officials led by SDM Jhajjar Ravi Meena conducted inspections at three locations and sent firecracker samples to FSL.

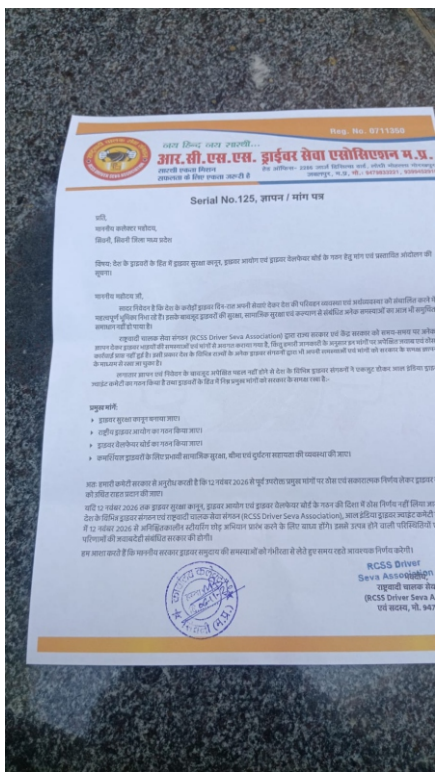

Strict action will be taken against banned firecrackers and violation of rules

Jhajjar, November 6.

To curb the illegal storage and sale of firecrackers in the district, the district administration adopted a strict stance and conducted a joint raid at three places on Friday. On the instructions of DC Varsha Khanwal, a team formed under the leadership of SDM Jhajjar Ravi Meena inspected three places and checked the storage of firecrackers, licenses related to sale, safety standards and documents related to green firecrackers. During the inspection, the police collected samples of firecrackers and sent them to the Forensic Science Laboratory (FSL) for scientific examination. On the basis of the investigation report, if any violation of rules is found, strict action will be taken against the concerned as per the rules.SDM Ravi Meena clarified that disregarding the Supreme Court's directives and administrative orders will not be tolerated under any circumstances. Everyone involved in the fireworks business must comply with the established rules, license conditions, and safety standards.*Sale of only approved green crackers allowed*The SDM stated that only green firecrackers approved by the National Environmental Engineering Research Institute (NEERI) are permitted for use in the district. Each package must bear a green cracker identification and product-specific QR code. The sale and use of barium-containing firecrackers, conventional banned firecrackers, and firecracker strings are prohibited. Vendors must ensure the authenticity of the firecrackers. Action will be taken against anyone found storing or selling firecrackers in violation of regulations.*Firecrackers can be burst only during the stipulated time on November 7 and 8*The SDM stated that, as per orders issued by the administration, green firecrackers will only be permitted on November 7th and 8th, from 6 a.m. to 7 p.m. and from 8 p.m. to 10 p.m. A complete ban on the manufacture, storage, sale, and use of all types of firecrackers will be reimposed in the district starting November 9th. Furthermore, firecrackers will not be permitted within 300 meters of hospitals, educational institutions, nursing homes, and notified areas.Action ranging from seizure to cancellation of license against violatorsSDM Ravi Meena appealed to the publicHe appealed that they should burst only NEERI approved green crackers and must check the QR code given on the packet. Do not violate the rules regarding the prescribed time and place. He clarified that if illegal storage, sale without permission or purchase and sale of banned crackers is found, no leniency will be shown in confiscating the crackers, cancelling the license, seizing the security amount and taking legal action. He said that under the guidance of DC Varsha Khanwal, the administration's inspection and monitoring campaign will continue continuously in Jhajjar to ensure compliance with the rules.Jhajjar Tehsildar Shekhar Narwal, BDPO Machhrauli Dharampal, concerned police station in-charge and Pollution Control Board officials were present during the inspection.

Nationalist Driver Service Organization submitted memorandum: Call for 'Steering Chhodo Abhiyan' from 12 November

Parivahan Vishesh News

Seoni/Chhapara/Lakhnadon:

Nationalist Driver Service Organization (R.C.S.S. Driver Service Association) has announced to run 'Steering Chhodo Abhiyan' from upcoming 12 November 2026 regarding demands and problems of drivers. In this regard, representatives of organization have submitted memorandum to administrative officers at Seoni Collectorate office, Chhapara police station and Lakhnadon police station.

Founder/Editor Sant Kumar Banjara and other office bearers (Manish Kushwaha, Dinesh Rajak and Satish Patel) told that by submitting memorandum, administration has been informed about upcoming peaceful movement.

Appeal for peaceful cooperation to all driver brothers

From side of Nationalist Driver Service Organization, humble appeal has been made to all driver brothers that:- After 12 November 2026, no driver should drive vehicle and support 'Steering Chhodo Abhiyan' in peaceful manner.
- Driver brothers if they want can stay at their respective homes or reach peaceful place organized near Lakhnadon (Bamhori Outer Bridge) and cooperate with organization.
- Organization has clarified that this movement will be completely peaceful and based on persuasion, no force will be used with anyone.

Jai Hind - Jai Sarathi
Applicant:

Sant Kumar Banjara and all office bearers Nationalist Driver Service Organization (R.C.S.S. Driver Service Association, M.P.)

Preparation to reopen liquor manufacturing units closed for eight years, lottery on 12 November

Parivahan Vishesh News

Amid campaign of Drug-Free India, political opposition intensifies over government decision, serious questions raised over alleged monopoly of liquor business and administrative silence

Report Dr. Rajkumar Yadav Parivahan Vishesh Newspaper Rourkela

While awareness and public participation regarding Drug-Free India campaign is being talked about across country, on other hand administrative preparation to restart three country liquor manufacturing units closed for eight years in Rourkela excise district has created a new controversy. Notification has been issued to organize lottery in Council Hall of Rourkela Municipal Corporation on upcoming 12 November for allotment of these units. Under this, along with liquor manufacturing, rights of retail sale will also be allotted.Opposition to this proposal of government is now going beyond political boundaries and becoming subject of public discussion. Ruling BJP's Raghunathpali MLA has raised objection to activities promoting intoxication and demanded withdrawal of decision. BJD's Rourkela MLA has warned of agitation, while CPM MLA has also opposed proposal.But there is another and more serious aspect of this whole episode. Continuous questions are being raised over influence and alleged monopoly of some selected people over liquor manufacturing and distribution business in district. Demand for impartial investigation of licensing, ownership, operation and other related documents of liquor manufacturing centres operated from Birmitrapur to Koida area is being discussed from district level to block, panchayat and villages. Despite this, not showing concrete action at administrative level is giving rise to many doubts.At last what is reason that activeness of concerned department is not seen on these questions related to public interest? Is there any such sweet nexus between operation of liquor business and administrative system, whose layers have not yet become public? Answer to these questions can come only through investigation and transparency.Situation is becoming such that apprehensions are being expressed of establishment of jungle raj-like system regarding influence of some liquor traders at local level. If there is truth in allegations then this is not only matter of accountability of excise department, but also question connected with law-and-order and credibility of governance.Now question is direct - Will government show courage to get impartial investigation of documents of old units, licenses of present traders and entire excise system done before opening new liquor units or will questions of public again remain buried in files?

Puja-archana duly organized at office of Rourkela Goods Transporters Association on Dhanteras

Parivahan Vishesh News

Wish for prosperity of transport business, strengthening of organization and interests of traders; Discussion also held on Free Trade Policy of 'Work for all, equal price for all'

Report Dr. Rajkumar Yadav Parivahan Vishesh Newspaper Rourkela

On auspicious occasion of Dhanteras, duly puja-archana was organized at office of Rourkela Goods Transporters Association. On this occasion program was concluded in religious and organizational atmosphere with wish for progress of transport business, strength of organization and prosperity of business world of Rourkela.In puja-archana, former President of Rourkela Chamber of Commerce and Industries Shubh Patnaik, Golu Gandhi Ji associated with sponge industry (sponge iron factory), senior member and former Vice President of Chamber of Commerce and member of advisory committee of Rourkela Road Transporters Association Gurmeet Singh, former President, Chairman and member of advisory committee of Association Ram Meher Sharma including many distinguished persons were present.Apart from that Nandkishore Singh, Munna Rai, Ramagya Prasad, Chandan Behera, Sanjit Sinha, Prashant Pani, Bikas Singh, Govind Agarwal, Shivkumar Yadav, Gourishankar Yadav, Ramashankar Prasad, Vikas Singh, Munendra Singh, Rajesh Jethalia including other members associated with Rourkela Goods Transporters Association also participated. After duly puja all took prasad and wished for bright future of organization.Emphasis on equal opportunity and transparency in transport business During program, future action plan of organization and fair competition in transport business was also discussed. Especially emphasis was given on taking forward Association's Free Trade Policy - concept of 'Work for all, equal price for all'. Its objective is to provide equal opportunities to all businessmen associated with transport sector and to maintain transparency and balance in business.It is notable that Rourkela and Sundargarh district is important centre of steel, mining, sponge iron and industrial production. In such industrial scenario, goods transportation is not only business activity, but major basis of local economy, employment, supply chain of industries and business dynamism.Members present in program expressed confidence that unity of organization, transparent working system and policy of equal business opportunities will give direct benefit to transport businessmen of Rourkela and will also strengthen regional economy.

Bloody conflict in ash transportation business, Sunil Neti dies due to bullet injury

Parivahan Vishesh News

Fight for dominance over fly ash transportation of NTPC Darlipali takes violent form, bullets fired after clash between two organizations; tension in area and heavy police force deployed

Report Dr. Rajkumar Yadav Parivahan Vishesh Newspaper Sundargarh

In Sundargarh district, known for industrial development and employment opportunities, now ash (fly ash) transportation business is also seen becoming centre of violent conflict. Long-running dispute between two organizations regarding ash transportation from ash dyke of NTPC Darlipali turned into bloody incident on Thursday evening. 30-year-old Sunil Neti lost his life in firing. This incident has created sensation and atmosphere of fear in whole area.Fight for dominance in ash transportation business According to preliminary information, incident happened near fly ash dyke of NTPC's Darlipali Super Thermal Power Project in

Barobaga village of Bhasma police station area. Deceased has been identified as Sunil Neti. It is being told that dispute was going on between United Fly Ash Transport Owners Association (UFTOA) and RISE organization associated with local youth regarding share in ash transportation business and organizational dominance.

On Thursday evening around 6:30 pm, altercation between both sides turned into conflict. During this allegedly bullet was fired, which hit Sunil in chest and head. In serious condition he was taken to Sundargarh Medical College and Hospital, where he died.

Business competition or game of organized dominance? This incident has also raised questions on monitoring system of transportation business of industrial by-products. Transparency is necessary regarding role of local transporters, vehicle owners and organizations in transportation of industrial material like ash. If alleged extortion per vehicle or attempt to establish monopoly over business was being done by any organization, then it should be investigated.

According to Superintendent of Police of Sundargarh Amritpal Kaur, in preliminary investigation conflict between two groups has come to light. Police has increased surveillance on border exit routes and search for accused has been started. CCTV footage around incident site is also under investigation. Sundargarh MLA Jogesh Singh has also demanded immediate arrest of accused.

Biggest question is how dispute in commercial matter like transportation of industrial ash reached to firing and murder? If effective action had been taken on signs of dispute in time, perhaps life of a youth could have been saved. Now before police there is not only challenge of catching killers, but also responsibility to reach root of this whole business dispute.

Housing Board schemes buried in announcements, sand mafia occupies land!

Parivahan Vishesh News

Not even a brick laid for housing projects, dozens of sand-laden vehicles running whole day on government land

Questions raised over alleged inaction of police administration and revenue department, apprehension of daily revenue loss of lakhs to government exchequer

Report Dr. Rajkumar Yadav Parivahan Vishesh Newspaper Rourkela

Future of residential schemes declared by Odisha Housing Board in Rourkela is now under question. Despite long time passing after announcements, not even a brick of development work could be laid on ground. Residential projects are entangled in papers and government files, while on other hand alleged open commercial misuse of Housing Board land is happening.

Most serious matter is alleged illegal and huge sand business going on on Board land in front of Housing Board office. It is alleged that dozens of sand-laden vehicles move whole day on Board land and in front of its office. It is discussed that this business is being operated by an employee associated with Housing Board instead of any outsider. It is also alleged that keeping in mind pockets of some officers-employees, this activity is continuing uninterrupted due to their alleged collusion or protection.

Surprising thing is that despite such big activity, role of local police administration and revenue department has not come forward as effective action. Question is that under whose permission such business is running on government land? Why checking of valid documents related to transportation, storage and sale of sand has not been done till now?

If this business is being operated without valid mining and transportation permission, then there is apprehension of heavy loss to state government in royalty and other revenue heads. At local level, apprehension of daily revenue loss of lakhs of rupees is also being expressed, whose impartial investigation is necessary.

See irony, where land should be used in public interest for housing schemes, questions are being raised on monitoring and protection of government property itself.

Now need is not only of paper announcements, but of high-level investigation, demarcation of land, immediate ban on illegal business and fixing accountability of concerned officers-employees. District administration, mining department and higher officers of Housing Board should tell that under whose protection all this is running on government land?

Jamshedpur BJP leader Nirbhay Singh is no more, died of heart attack.

Parivahan Vishesh News

Kartik Kumar Parichha, State Head -Jharkhand

Jamshedpur, November 6: Nirbhay Singh, grandson of Jamshedpur's Hindu leader Thakur Pyara Singh and son of Thakur Dhurandhar Singh, died untimely today at Tata Main Hospital. He was the brother of BJP state spokesperson Abhay Singh. Abhay Singh rose from a simple worker to become a state level leader of BJP. His twin brother Nirbhay Singh played a big role behind the scenes in his success. He used to work for his elder brother Abhay Singh on the ground and prepare political ground for him. Nirbhay Singh was the twin brother of Abhay Singh. The cause of his death is said to be a sudden heart attack.

BJP leader Abhay Singh and his entire family are inconsolable after this sudden tragedy. People are expressing their condolences to the family through social media and local news reports.The mortal remains of Nirbhay Singh are currently being kept at his Jamshedpur residence (Kashidih area) for the last rites of family members and supporters, where a huge crowd of people has been gathering since morning.His last journey will leave from his ancestral home and go to Bhuiyandih Ghat in Jamshedpur, where his last rites will be performed with full rituals.

After this sudden tragic accident, there is a wave of mourning in the political and social world of Jamshedpur and entire Jharkhand.

Condolences from senior BJP leaders

The top leadership of the Jharkhand BJP, including former chief ministers and local MLAs, spoke to Abhay Singh over the phone to offer condolences. The leaders said, "Nirbhay Singh was a very friendly and social person. His untimely passing is a personal loss for the Singh family as well as the organization."Due to the Singh family's deep influence in Jamshedpur, leaders from the BJP, as well as opposition parties (JMM, Congress), and prominent figures from various social and religious organizations, are visiting Abhay Singh's residence to offer condolences. Supporters are expressing their condolences on social media, chanting "Om Shanti" and praying for the family to endure this difficult time.Funeral Procession and Cremation: According to family members, a final funeral procession will be held. This procession will travel through the main streets of Sakchi and reach Subarnarekha Ghat (Bhuiyandih), where his last rites (cremation) will be performed according to Hindu rituals.BJP organisation leaders: BJP Jamshedpur Metropolitan President, several former district presidents and organisational officials (like local BJP workers from Sakchi and Mango areas) have been present since morning.Due to the deep political and social influence of the Singh family, leaders close to former Jharkhand Chief Minister Babulal Marandi, supporters of former Chief Minister Champai Soren and local MLAs and former ministers from Singhbhum and Jamshedpur areas have also expressed condolences and are reaching his Sakchi office and residence.Social and religious organisations: Since Abhay Singh has been deeply associated with the Ram Navami and Central Durga Puja committees in Jamshedpur, directors of the city's Akhara committees, representatives of religious organisations and social workers are also reaching Kashidih in large numbers to pay tribute to Nirbhay Singh.Azad Mazdoor family prays that Almighty God grants peace to the departed soul of Nirbhay Singh.

Former Chief Minister Arjun Munda's cavalcade vehicle met with an accident.

Parivahan Vishesh News

Incident in his home district Saraikela NH 33 (Chauka), no casualties

Kartik Kumar Parichha, State Head -Jharkhand

Saraikela: The car accident involving Chief Minister Arjun Munda has shocked everyone. The serious road accident occurred late Friday evening near Chaulibasa on NH-33, under the Chauka police station area of Saraikela-Kharsawan district. Former Chief Minister and senior BJP leader Arjun Munda was returning to his destination from Ranchi when the jammer vehicle in his security convoy lost its balance.Upon receiving information about the incident, the local administration and the Chauka police station were shaken. Police arrived at the scene immediately. It is a matter of relief that no casualties were reported in the accident. All security personnel aboard the vehicle are reported to be completely safe, although the vehicle was completely damaged in the accident. Immediately after the incident, chaos descended on the scene. Considering the seriousness of the situation, the police immediately began rescue operations and removed the damaged jammer vehicle from the road.According to the Superintendent of Police, the exact cause of the accident is currently unclear. Whether it was a technical fault, a tire burst, or some other driver error, the police are closely investigating all these factors.The frequent accidents on NH-33 in the Seraikela-Kharsawan region have become a cause for concern. This time, the former Chief Minister's convoy has made the situation even more sensitive. The presence of a jammer vehicle in Arjun Munda's security circle is mandatory protocol, and the accident involving this vehicle could lead to a review of security arrangements.The absence of any casualties in this accident is being considered a divine miracle. Arjun Munda's supporters heaved a sigh of relief upon receiving the news that he was safe. Police have initiated further legal proceedings and may also conduct a forensic examination of the vehicle to prevent such incidents in the future.Police officials present at the scene of the incident stated that all security personnel in the vehicle sustained minor injuries. Everyone is safe, averting a major tragedy. Currently, the Chauka police are in the process of registering an FIR in the

The Classroom of 2047: Reimagining the Future of Education

Dr Vijay Garg

Retired Principal Educational columnist Eminent Educationist street kour Chand MHR Malout Punjab

Parivahan Vishesh News

Dr. Vijay Garg

What will a classroom look like in 2047? Will students still sit in rows, listen to teachers, read textbooks and write examinations on paper? Or will education become an entirely different experience, shaped by artificial intelligence, virtual reality, robotics and personalised learning? As India approaches the centenary of its Independence, the classroom of 2047 offers an opportunity to imagine a new educational revolution. The classroom of the future will not simply be a room equipped with computers and digital screens. It will be an intelligent, interactive and inclusive learning environment where technology supports human creativity, curiosity and critical thinking.

From Teaching to Learning
The traditional classroom has largely depended on teachers delivering information and students receiving it. By 2047, this approach may undergo a fundamental transformation. Students will increasingly learn through exploration, experimentation, discussion and problem-solving. Artificial intelligence will help teachers understand individual learning needs. Every student will have access to personalised learning pathways based on their abilities, interests, pace and progress. Those who struggle with mathematics will receive additional explanations, while advanced learners will explore more challenging concepts. However, personalised learning should not mean isolating students behind individual screens. Collaboration, classroom discussions and collective activities will remain essential.

Artificial Intelligence as a Learning Partner
AI will become an important learning companion. Intelligent tutors will explain difficult concepts, generate practice exercises, provide instant feedback and help students revise lessons. Language barriers will gradually decrease through real-time translation and voice-based learning tools. Students may interact with virtual laboratories, conduct simulated scientific experiments and explore historical events through immersive digital environments. A student studying astronomy may virtually travel through the solar system, while another studying biology may explore the human body in three dimensions. Nevertheless, AI must remain a tool rather than a substitute for independent thinking. Students should learn to question information, verify facts and distinguish reliable knowledge from misinformation.

The Teacher: More Important Than Ever
Technology may transform teaching methods, but it cannot replace the human qualities of a good teacher. Empathy, encouragement, moral guidance, emotional understanding and personal relationships cannot be fully automated. The teacher of 2047 will increasingly act as a mentor, facilitator, counsellor and learning designer. Instead of spending most of the classroom time delivering information, teachers will help students develop curiosity, creativity, communication skills and sound judgment. The future will require teachers who are technologically competent as well as emotionally intelligent.

Learning Beyond Classroom Walls
By 2047, education will extend far beyond school buildings. Students will connect with experts, researchers and classrooms across the world. Virtual field trips will allow them to explore oceans, forests, museums and scientific institutions without travelling physically. Schools will increasingly collaborate with universities, industries and research centres. Students may work on real-world projects involving renewable energy, climate change, water conservation, agriculture, public health and sustainable development. Such experiences will connect theoretical knowledge with practical life.

Skills for the Future
The world of 2047 will demand more than academic qualifications. Critical thinking, creativity, communication, collaboration, digital literacy, scientific temper and ethical decision-making will become essential. Education must also prepare students for professions that may not yet exist. Robotics, biotechnology, space science, quantum computing, artificial intelligence and environmental engineering may create entirely new career opportunities. Equally important will be vocational education, financial literacy, entrepreneurship and practical life skills.

An Inclusive and Human-Centred Classroom
The classroom of 2047 must ensure that quality education is not limited to wealthy students or urban institutions. Technology should reduce educational inequalities rather than deepen them. Affordable digital infrastructure, accessible learning resources, multilingual content and assistive technologies can support students from rural areas and disadvantaged communities. Education must also protect children's privacy, mental well-being and freedom to think independently. Excessive screen exposure, digital addiction and dependence on automated answers should be addressed through balanced educational policies.

Conclusion
The classroom of 2047 will be defined not by the number of computers, robots or digital screens it contains, but by the quality of learning and human development it produces. Technology may provide unlimited information, but wisdom will still require teachers, values, experience and thoughtful reflection. Artificial intelligence may answer questions, but education must teach students which questions are worth asking. As India moves towards 2047, the real challenge is not merely to build smart classrooms but to develop smart, sensitive, creative and responsible citizens. The classroom of the future must combine the intelligence of machines with the wisdom of human beings. Ultimately, the greatest achievement of education will not be creating students who can compete with machines, but nurturing human beings who can use machines wisely to build a better world.

Dr Vijay Garg Retired Principal Eminent Scientist street kour Chand MHR Malout Punjab -152107

Away from Drugs, Closer to Dreams: The Power of a Drug-Free Life

Parivahan Vishesh News

Dr. Vijay Garg

Retired Principal | Educational Columnist | Eminent ScientistThe real strength of any nation lies not merely in its weapons, infrastructure or economic resources, but in the health, thinking, hard work, character and dreams of its young people. Young people possess the power to take society to new heights of progress. Their energy can generate innovative ideas, contribute to scientific discoveries, strengthen the national economy and bring positive changes to society. However, when this precious potential falls under the influence of drugs, the future of individuals, their families and society can be placed at risk.Substance abuse can affect physical health, mental balance, self-confidence, relationships and a person's sense of purpose. What may begin as a seemingly minor experiment can gradually develop into a serious problem. In contrast, a drug-free life enables individuals to recognise their abilities, overcome challenges and transform their dreams into reality. Staying away from drugs is therefore not merely about avoiding a harmful habit; it is about protecting one's future.The Beginning of Addiction: From a Small Mistake to a Major ProblemAddiction rarely develops overnight. Sometimes, it begins with curiosity, peer pressure, stress, disappointment or an attempt to find temporary relief from personal difficulties. Some young people experiment with drugs after observing their friends. Others associate substance use with modern lifestyles, bravery or social acceptance. Some turn towards drugs because of mental stress, family conflicts, unemployment or failure.Initially, a person may believe that substance use is entirely under their control and that they can stop whenever they wish. However, certain addictive substances affect the brain's functioning, and repeated use can lead to dependence. Eventually, substance use may cease to be a simple choice and become a serious challenge affecting health and everyday life.It is important to recognise that everyone's experience is different. Addiction can arise from a combination of biological, psychological, family-related and social factors. Therefore, substance dependence should not be dismissed as merely a consequence of weak willpower or poor character. Awareness, appropriate guidance, social support and professional medical treatment are essential for prevention and recovery.How Do Drugs Weaken Human Potential?The human brain is responsible for learning, memory, decision-making, emotional regulation and future planning. Substance use can interfere with several of these functions. The effects depend on the substance, the amount consumed, the duration of use and the individual's health.Among students, substance use may contribute to reduced concentration, declining interest in studies, disturbed sleep and poor academic performance. Working individuals may experience difficulties with productivity and decision-making. Certain substances also increase the risk of accidents, serious physical illnesses and mental health problems.Addiction can change how individuals use their time and resources. Money that could have been spent on books, education, skill development or family needs may instead be spent on substances. Time that could have been devoted to sports, creative activities and career preparation may be consumed by obtaining substances or recovering from their effects.Thus, substance use can gradually weaken a person's potential in several ways. One of its greatest losses is that individuals may be unable to develop and use their abilities to the fullest.Youth and the Value of DreamsYouth is the stage of life when individuals lay the foundation for their future. Education, skills, healthy habits, relationships and self-confidence shape their personalities during this period. One student may dream of becoming a doctor, another a scientist, teacher, engineer, sportsperson, farmer or entrepreneur. Every dream requires dedication, discipline and continuous learning.Substance use can make the journey towards these goals more difficult. Young people must understand that genuine freedom does not mean accepting every offer or following every trend. It means making decisions that protect their long-term interests.If a friend pressures someone to experiment with drugs, risking one's health and future merely to gain approval is not wise. Saying no firmly, avoiding harmful company and remaining focused on personal goals are signs of confidence and maturity.Young people should understand that their identity is not determined by substance use, outward appearances or imitation of others. It is built through knowledge, character, hard work and contributions to society.Stress Is Not Solved by DrugsIn today's competitive world, young people face growing pressure related to education, careers, employment, financial security and social expectations. Many students fear examination failure. Some young people become discouraged by unemployment, while others struggle with family difficulties or relationship problems.In such circumstances, drugs may create an illusion of temporary relief, but they do not resolve the underlying problems. Instead, substance use can worsen physical and mental health and make existing difficulties harder to manage.Healthy approaches to stress management should be encouraged. Regular exercise, adequate sleep, balanced nutrition, meditation, yoga, reading, music and spending time in nature can be helpful. Sharing concerns with a trusted friend, parent, teacher or counsellor may also provide emotional relief.If stress persists or begins to interfere with everyday life, professional mental health support should be sought. Asking for help is not a sign of weakness; it is an expression of responsibility towards one's health and future.Family: The First Step Towards a Drug-Free LifeThe family plays a crucial role in shaping a child's personality and habits. Parents' behaviour, the home environment, communication patterns and emotional support can influence the decisions young people make.Instead of merely issuing instructions, parents should communicate openly with their children. When parents listen carefully to their concerns, children are more likely to feel safe discussing their difficulties. An atmosphere of love, trust and mutual respect can provide young people with valuable support during challenging times.Parents should also set an example by following a healthy lifestyle. When adults avoid harmful substances, manage stress constructively and spend quality time with their families, children have an opportunity to learn positive habits.If a family member struggles with addiction, humiliation, threats and social isolation can make the situation more complicated. Compassion, professional guidance and support for treatment are more constructive responses.The Role of Teachers: Life Education Beyond TextbooksSchools and colleges are important centres for developing the personalities of young people. Teachers are not merely providers of subject knowledge; they are also guides who can influence students' lives through advice, encouragement and timely support.Educational institutions should provide scientific, fact-based information about the harmful effects of substance use. Students should understand how drugs can affect the brain, body, learning abilities and social relationships. Instead of relying only on frightening slogans, schools should teach practical ways of handling real-life situations.Sports, science fairs, literary competitions, theatre, music, environmental activities and community service should be encouraged. Such opportunities help students discover their talents, develop confidence and build positive friendships.Teachers should remain sensitive to sudden behavioural changes, declining academic performance or persistent social withdrawal. These signs can have many causes and are not, by themselves, proof of substance use. Rather than accusing a student, teachers should try to understand the situation and seek professional assistance when necessary.Peer Influence and the Importance of Good CompanyDuring adolescence and youth, friends can have a significant influence on behaviour. They can inspire individuals to achieve their goals or encourage them towards harmful choices. Therefore, young people should choose their company thoughtfully.Good friends encourage one another to study, participate in sports, maintain healthy habits and pursue meaningful goals. They respect personal boundaries and do not force others to engage in activities that may threaten their health or safety.Refusing drugs does not require a lengthy explanation. A young person can simply say, “I don't use drugs,” or “I don't want to compromise my health and future.” If the pressure continues, walking away and choosing supportive friendships is a sensible decision.Taking responsibility for one's choices is a mark of genuine self-confidence. Endangering one's health to gain another person's approval is never a wise decision.A Drug-Free Life and Physical HealthA healthy body enables people to participate actively in education, work and social life. Depending on the substance, drug use can affect the heart, liver, lungs, brain and other organs. Some substances may also disturb sleep, appetite, hormonal balance and immune function.Adopting a drug-free lifestyle gives individuals an opportunity to develop healthier habits, increase physical activity and establish a more balanced daily routine. Although avoiding drugs alone cannot guarantee complete health, it is an important step towards a healthier life.Balanced nutrition, regular exercise, adequate sleep, a clean environment and timely health check-ups are also essential. When physical health is supported and the mind remains balanced, individuals are better equipped to face life's challenges.Punjab and the Challenge of Substance AbusePunjab is known for its traditions of hard work, courage, agriculture, sports, culture and sacrifice. Punjabi youth have considerable potential to excel in education, business, science, sports and professional careers. However, substance abuse remains a serious concern for many families and communities.Addressing this challenge requires more than awareness campaigns. Young people also need quality education, employment opportunities, vocational training, sports facilities and accessible mental health services. When they have clear goals and realistic opportunities to achieve them, they can become more engaged in constructive activities.Sports grounds, libraries, youth clubs, skill-development centres and career guidance facilities in villages can open new avenues for young people. Schools, village councils, religious institutions, social organisations and health departments should work together in a coordinated manner.Effective action against the illegal sale of narcotic substances must go hand in hand with accessible treatment, rehabilitation, employment support and social reintegration.Isolating people struggling with addiction does not solve the problem. Helping them return to the mainstream of society is a genuine expression of social responsibility.The Importance of Social Support in Addiction RecoveryPeople struggling with addiction sometimes hesitate to seek help because they fear being judged by their families, friends or communities. This fear can delay treatment. Society must therefore adopt a compassionate, informed and scientific approach to substance dependence.De-addiction centres, qualified doctors, psychologists, counsellors and support groups can help affected individuals receive treatment and rebuild their lives. Treatment plans should be tailored to the person's circumstances and the substance involved.Stopping certain substances abruptly can be dangerous. In particular, people dependent on alcohol or certain medications may experience serious withdrawal complications if they stop suddenly without medical supervision. Professional advice is therefore essential for safe and effective treatment.Recovery can involve difficulties, and some individuals may return to substance use after attempting to quit. This should not automatically be viewed as final failure. Instead, it may indicate the need to strengthen treatment and support. With patience, appropriate care and continued assistance, improvement and recovery are possible.The Need for Awareness in the Digital AgeIn today's digital age, social media, video platforms and online communities have a considerable influence on young people's thinking. These channels can be used to spread awareness about the harms of substance use, share information about support services and encourage healthier lifestyles.Schools and colleges can use digital educational materials, short films, scientific discussions and expert interactions to provide reliable information. Young people should also learn that not everything published online is accurate. They need critical-thinking skills to recognise content that portrays drugs as attractive, harmless or socially desirable.Digital platforms can also help people discover addiction treatment services, counselling options and professional health support. Technology can therefore become part of the solution rather than contributing to the problem.A Practical Action Plan for a Drug-Free LifeA drug-free society cannot be built through speeches alone. It requires small, consistent and practical actions in everyday life.For young people:- Set clear life goals and work towards them every day.- Firmly refuse offers of drugs.- Make regular time for sports, exercise, studies and creative activities.- Discuss stress, anxiety or discouragement with a trusted person or qualified professional.- If addiction develops, seek medical assistance rather than hiding the problem.For parents:- Maintain open and trusting communication with children.- Listen to their problems without immediately blaming them.- Set an example through healthy habits and a drug-free lifestyle.- Provide support for counselling and treatment when needed.For teachers and educational institutions:- Promote scientific awareness of the harmful effects of drugs.- Expand opportunities for sports, arts, literature and skill development.- Teach life skills, stress management and responsible decision-making.- Connect students who need help with appropriate support services.For society and the administration:- Make addiction treatment and rehabilitation services accessible.- Take effective action against the illegal sale of narcotic substances.- Create opportunities for employment, sports and skill development.- Replace stigma with compassion and constructive support for people experiencing addiction.The True Meaning of SuccessModern society often measures success through marks, salaries, positions, wealth and public recognition. However, genuine success has a much broader meaning. A healthy body, a peaceful mind, strong character, loving relationships and a desire to contribute to society are equally important measures of a fulfilling life.A drug-free lifestyle enables people to use their time and energy more constructively. They can learn new things, improve their skills, spend quality time with their families and contribute to social progress.A student's decision to avoid drugs can help protect educational opportunities. For a sportsperson, a healthy lifestyle can support physical performance and discipline. For an employee, avoiding substance misuse can help maintain productivity and fulfil family responsibilities. Thus, the benefits of a drug-free life extend beyond the individual to family members and the wider community.Conclusion: Let Us Give Wings to DreamsThe need for a drug-free life has never been more important. We must build a society where young people's energy is channelled into education, science, sports, research, employment and community service rather than being lost to substance abuse. We need a society where children have opportunities to pursue their dreams, parents can feel hopeful about their children's futures, and people struggling with addiction can access treatment and the possibility of a fresh start.Such a transformation cannot be achieved by any single individual or institution. Families, teachers, health professionals, social organisations, governments and young people must work together. Awareness in every home, life-skills education in every school and a supportive environment for recovery in every village and city are essential.We must remember that helping a person struggling with addiction, rather than blaming them, is an act of humanity. With treatment, encouragement and support, individuals can regain confidence and rebuild their lives. A drug-free society is not simply one that avoids drugs; it is one that creates conditions in which young people have access to healthy lifestyles, proper guidance and opportunities to fulfil their aspirations.Let us resolve to play a responsible role in protecting ourselves, our families and our communities from substance abuse. Let us guide young people from despair towards hope, from harmful influences towards positive choices, and from the darkness of addiction towards the light of knowledge.Staying away from drugs means protecting life's possibilities, while choosing a drug-free life means giving wings to our dreams.Dr. Vijay GargRetired Principal | Educational Columnist | Eminent ScientistStreet Kaur Chand, MHR Malout, Punjab – 152107

7 dead in accident Prime Minister expressed condolence

Parivahan Vishesh News

Dr. Deepak Kumar Ghosh

Khunti. On Thursday night around 10 pm in Karra block of the district, near Karra Phatak on the road going towards Torpa, near Jone (Ludru) turn, an uncontrolled long trailer hit several people including children of a house situated on the roadside. In this painful accident about 8 people have come under its grip and news of death of about 7 people is coming. Condition of the eighth is also critical. This accident is not just an accident, but a heart-wrenching tragedy that has destroyed happiness of families. In houses where till some time ago laughter-happiness and chirping of children were echoing, today mourning has spread. Local people are deeply hurt by this incident. The Prime Minister has also expressed his condolence on X.

With resolve of Atmanirbhar Bharat, 'Special Jan Jagran Abhiyan' organized in Varanasi, artisans of Prajapati community honoured

Parivahan Vishesh News

(Santosh Kumar Singh)

Varanasi :- Taking a strong step towards Atmanirbhar Bharat, 'Special Jan Jagran Abhiyan' was organized on Friday in Gram Panchayat Lathiya, Amra, Khaira and Akhileshpur of Varanasi. Under the campaign, meetings were held with respected artisans of Prajapati community, carriers of traditional skill. On this occasion, by purchasing their excellent indigenous products, they were honoured. In the program, mainly BJP OBC Morcha State General Secretary Jyoti Soni was present. She said that to bring Prime Minister Narendra Modi's Vocal for Local and 'PM Vishwakarma Yojana' vision on the ground and for economic empowerment of local artisans, BJP OBC Morcha is continuously committed. Only by adopting Swadeshi our artisans will become empowered and India will become Atmanirbhar.

On this occasion, OBC Morcha Varanasi District President Govind Das Gupta, District General Secretary Bhanu Shankar Patel, District General Secretary Kamlesh Pal, District Vice President Dhananjay Bhardwaj, Rakesh Jaiswal, Saroj Gupta, District Minister Rajesh Rajbhar, Shivdhani Patel, Suresh Patel, Akash Prajapati including other office bearers and workers were present.

SSB organized free medical camp in Senuwariya village, health check-up of 300 villagers done

Parivahan Vishesh News

Medicines distributed to men, women and children after check-up, villagers made aware about prevention from waterborne diseases

Gaya Ji. In vibrant village Senuwariya under Sikta block area of West Champaran district, free medical camp was organized on Thursday, 5 November 2026 by 'H' Company of 47th Battalion Sashastra Seema Bal (SSB). In camp, Commandant (Medical) Dr. Nishikant did health check-up and treatment of total 300 villagers. Among them 77 men, 86 women and 137 children were included. After check-up and treatment, free medicines were distributed among all needy.During medical camp, diabetes and blood pressure check-up of villagers was done. Apart from that, skin disease, cold, cough, fever, eye problem, knee and back pain including various health related problems were checked and proper medical advice was given. Along with that detailed information about causes, symptoms and prevention measures of diseases like malaria, typhoid and dengue was given to villagers. People were advised to avoid drinking contaminated water and to use clean drinking water.On this occasion Dr. Nishikant, Commandant (Medical) said that looking at rain happening due to cyclone in area in recent days, this camp has been organized with aim to provide better health facilities to villagers. He said that SSB is continuously playing active role in public service works to provide health facilities from time to time to villagers of India-Nepal border area.In program Assistant Commandant Shri Ankit Kumar, Assistant Sub-Inspector Ramesh Chandra Singh, Head Constable Sudhir Kumar, A/Sa Pappu Kumar, A/Sa Alok Kumar Srivastava, A/Sa Himanshu Rathi and A/Sa Ramvinay Paswan were present. Apart from that Mukhiya of Senuwariya village Tabrez Alam, Headmaster of Upgraded Middle School Senuwariya Harsh Kumar Singh, Nawal Kishore Kushwaha, Mrityunjay Pandey and Neetu Kumari including other villagers were also present.Villagers appreciating this welfare initiative of SSB demanded to organize such free medical camps regularly in future also. There was atmosphere of happiness among villagers due to successful organization of camp.

Green Field E-School decorated with colours of rangolis, students showed creative talent

Parivahan Vishesh News

Gave message of importance of Diwali, environmental protection and safe festival celebration, atmosphere of celebration became cheerful with songs-music

Gaya Ji. On auspicious occasion of Diwali, Rangoli competition was organized with enthusiasm and excitement in Green Field E-School at Hanuman Nagar located on Gaya Fatehpur Road. In competition students made attractive and colourful rangolis and gave excellent display of their creativity and artistic talent.

On this occasion, Director of school Amay Kumar Maurya while addressing students threw light on importance of Diwali. He inspired children to spread light of happiness in society through knowledge, positivity and good values.

Meanwhile, Sudhanshu Sir and Raju Sir gave information about historical, religious and cultural importance of Diwali. Sahil Sir while making aware about air and noise pollution caused by crackers and ill effects on humans and animals-birds, appealed to celebrate environment-friendly Diwali.

In program music teacher Preeti Mam made atmosphere of festival even more joyful by presenting melodious songs. At end, ten days holiday was announced in school on occasion of Diwali and Chhath Puja. Along with that greetings of festivals were given to all students.

Through this event, school gave message of developing values of creativity, cultural awareness, environmental protection and social responsibility along with education.

National Seminar on 'Future India – A Synergy of Ideas' Emphasizes Protection of Democracy, Secularism and Social Justice

Parivahan Vishesh News

New Delhi: A national political seminar, titled "Future India – A Synergy of Ideas," was held at Surjeet Bhawan in New Delhi under the auspices of the Indian National League. Important issues related to the current political situation in the country, democracy, secularism, constitutional values, minority rights, and social justice were discussed in detail. The seminar was inaugurated by M.A. Baby, General Secretary of the Communist Party of India (Marxist).Former Union Minister Mani Shankar Aiyar, in his address, stated that efforts to make India a Hindu nation have been ongoing for nearly a hundred years, but India can never become a Hindu nation because people belonging to almost all the world's major religions live in this country. He stated that India's religious and cultural diversity is its core identity. Sadly, while minority communities understand this truth, a large segment of the majority community remains unable to fully grasp it. Referring to the youth's awareness, he said that the country's youth have accomplished what was once considered impossible. According to him, the growing political and social awareness among youth signals a significant change.Professor Mohammad Suleman, National President of the Indian National League, said that democracy cannot truly exist where minorities do not feel safe. The current climate in the country is deeply concerning, but it is heartening to see opposition political parties, youth, human rights organizations, and senior citizens coming together to oppose communal forces. He said that in the current circumstances, the people of the country need to unite against the communal politics of the Sangh Parivar.Former Union Minister C.M. Ibrahim said that Indian Muslims are ready to make any sacrifice for the country's defense and security. The contribution of Muslims to the freedom struggle is unforgettable, yet those who question their patriotism today were nowhere to be seen in the freedom struggle itself.In his address, Dr. Zafarul Islam Khan, former chairman of the Delhi Minorities Commission, stated that new issues are being raised against Muslims under the BJP government. He alleged that, under the orders of the Home Ministry, a process is being initiated to collect details of the population and new settlers in various areas under the guise of demographic mapping, with the aim of targeting Muslims.Referring to the Gen-Z movement, Dr. Zafarul Islam Khan said that we need to learn from the younger generation. Youth, once underestimated, have used their collective strength to force a government that had previously intimidated others to surrender. He said that maintaining the momentum and unity of this movement is our shared responsibility.Sardar Diya Singh, President of All India Peace Mission, appealed to all sections of the society to work unitedly in view of the current situation in the country.The seminar was attended by prominent personalities from various political parties, social organisations and mass movements, including Dr Sandeep Pandey, Advocate MGK Nizamuddin, Advocate Balraj Malik.On this occasion, National General Secretary of Indian National League Muzammil Hussain gave the welcome address, while President of Indian National League Delhi State Committee Rafi Ahmed Khan gave the vote of thanks.Following the national seminar, an organizational meeting of the Indian National League was held, where issues related to party expansion, promoting a nationwide membership drive, and strengthening the organization, especially in the states of North India, were discussed. The software for the party's digital membership platform was also formally launched on this occasion.Through this programme, an effort was made to promote dialogue and coordination of ideas on important issues related to democracy, constitutional values, minority rights, social justice and the future of the country by bringing together personalities from different political and social ideologies on one platform.

Today's Cybersecurity Thought

CERT-In Mandates Reporting of AI-Related Cybersecurity Incidents Within Six Hours

Pinki Kundu

Parivahan Vishesh News

In a significant step towards strengthening India's cybersecurity framework in the era of Artificial Intelligence (AI), the Indian Computer Emergency Response Team (CERT-In) issued the AI Security Auditing Guidelines on 4 November 2026. Under these guidelines, any AI-related cybersecurity incident that meets CERT-In's reporting criteria must be reported within six hours of detection. The requirement applies to both government and private sector organizations that develop, procure, deploy, use, or operate AI systems in India.

The guidelines establish a comprehensive risk-based security auditing framework covering AI governance, cybersecurity controls, data management, human oversight, incident response, continuous monitoring, and third-party assurance.

Background
The use of AI is rapidly expanding across critical sectors such as banking, healthcare, governance, telecommunications, education, critical infrastructure, and law enforcement. The increasing deployment of autonomous AI agents and Large Language Models (LLMs) has also widened the cyber threat landscape, introducing risks such as unauthorized access, data breaches, model manipulation, AI hallucinations, biased outcomes, and automated decision-making without adequate human oversight.

Recognizing these emerging threats, CERT-In has introduced this national framework to secure AI systems and ensure accountability throughout the AI lifecycle.Key Provision

1. Mandatory Reporting of AI Security Incidents

The most significant requirement introduced by the guidelines is:"AI incidents meeting CERT-In reportable criteria shall be reported within 6 hours."This provision extends CERT-In's existing cyber incident reporting framework to AI-enabled systems. Organizations are required to immediately notify CERT-In upon detection of any reportable AI-related cybersecurity incident.

2. Relevance for Law Enforcement and Cybercrime Investigation

The guidelines are expected to provide several benefits for law enforcement agencies, including:
- Faster reporting of AI-enabled cyber incidents.
- Improved availability of digital evidence.
- Better attribution and offender identification through enhanced logging requirements.
- Greater accountability of AI developers and operators.
- Stronger coordination between organizations and CERT-In during cyber incident response and investigation.

3. Log Retention and Forensic Readiness

Organizations must ensure:
- Retention of security logs for a minimum of 180 days.
- Time synchronization across all AI components.
- Preservation of audit trails and forensic records.

These measures are designed to strengthen cyber incident investigations, root-cause analysis, and digital evidence preservation.

4. Compliance Requirements for Organizations

Organizations deploying AI systems will need to:
- Establish AI governance mechanisms.
- Classify AI systems based on risk.
- Conduct periodic independent security audits.
- Develop AI-specific incident response plans.
- Strengthen logging and monitoring capabilities.
- Implement rapid incident reporting mechanisms.
- Manage third-party AI risks.
- Ensure continuous security testing and validation.

CERT-In's AI Security Auditing Guidelines represent India's most comprehensive cybersecurity framework for AI systems to date. By mandating six-hour incident reporting, introducing risk-based classification, requiring independent audits, enforcing 180-day log retention, and emphasizing governance and accountability, the framework seeks to ensure that AI innovation progresses alongside robust cybersecurity safeguards. These measures are also expected to strengthen the investigation of AI-enabled frauds, deepfake crimes, autonomous malware, AI-driven social engineering attacks, data breaches, and cyber incidents affecting critical infrastructure.

Indira Devi Charitable Trust celebrated Diwali festival with staff and children

Parivahan Vishesh News

Agrawal Vaishya Samaj Haryana State President Ashok Buwaniwala also sent greeting message

Haryana Hisar // Rajesh Saluja

Agrawal Vaishya Samaj Haryana State President Shri Ashok Ji Buwaniwala while sending his greeting message on occasion of Diwali festival of Indira Devi Charitable Trust wished for happiness, prosperity and bright future of all staff members and children.On auspicious occasion of Diwali, Diwali festival was celebrated with joy and enthusiasm in Trust premises by Indira Devi Charitable Trust located at Rishi Nagar. On this occasion staff members and children of Trust together shared happiness of festival.During program gifts were distributed to all staff members and children by Trust and Diwali greetings were given by distributing sweets.On this occasion Trust President and Agrawal Vaishya Samaj Haryana Hisar District Vice President Rajat Gupta, Agrawal Vaishya Samaj Haryana Hisar District President Bhanu Singhal, entire staff of Trust and children were present.Rajat Gupta while giving Diwali greetings to all said that festivals are not only opportunity to celebrate happiness, but also to strengthen spirit of mutual love, harmony and cooperation.While Bhanu Singhal said that sharing happiness of festival with children and staff members of society is a commendable initiative. Such events promote spirit of mutual belongingness and social responsibility.Program concluded with giving Diwali greetings to all and sharing happiness.

Renowned TV and Bollywood actress Nia Sharma dazzled at the Fresher's Party - Celebrity Night 2026 at World College of Technology and Management, Gurugram.

Parivahan Vishesh News

Gurugram: Renowned TV and Bollywood actress Nia Sharma captivated the audience with her stellar performance and explosive energy at the Fresher's Party - Celebrity Night 2026 at World College of Technology and Management, a college renowned for its excellent education and excellent placements.World College Registrar Yudhvir Singh Lamba informed that as soon as actress Nia Sharma stepped on stage at Fresher's Party - Celebrity Night 2026, the entire campus erupted in applause and whistles. Nia Sharma's energetic songs were a rousing experience, enthralling everyone, making the event a memorable celebration.Mr. Kunwar Nishant Singh, Managing Trustee of World College of Technology and Management, extended his best wishes and blessings for future success to all the students of the new batch of MCA, MBA, M.Tech, B.Tech, BBA, BCA and Diploma and motivated the students to study with full dedication, passion, devotion and honesty.It should be noted that World College of Technology and Management is affiliated with Maharshi Dayanand University, Rohtak and is approved by the All India Council for Technical Education, Government of India.World College is successfully offering new employment-oriented courses in B.Tech. courses in Robotics and Artificial Intelligence, Mechanical and Automation Engineering, Computer Science and Engineering, Computer Science and Design, Artificial Intelligence and Data Science, Artificial Intelligence and Machine Learning, Civil Engineering and Mechanical Engineering, and M.Tech. courses in Civil, Computer Aided Structural Engineering, Computer Science and Engineering, Artificial Intelligence and Data Science, Civil Engineering, and Mechanical Engineering, as per the market and industry demand.

Reconsideration of new UGC rules: Balance between social justice and equality is necessary

Parivahan Vishesh News

Saurabh Varshney

New regulations formulated by the University Grants Commission (UGC) to prevent caste discrimination in higher education institutions have now become the subject of a major controversy. The very provisions, intended to provide a safe, respectful, and discrimination-free environment for every student in universities and colleges, are now being questioned. The matter has reached the Supreme Court, and the central government has now informed the court that it is reconsidering these regulations. The government has also expressed the possibility of forming a committee. This development highlights the importance of sensitivity and widespread acceptance in policies aimed at social justice. Solicitor General Tushar Mehta explained before a bench headed by Chief Justice Surya Kant that the government is reviewing the rules to address students' concerns and avoid creating feelings of dissatisfaction or insecurity among any section. The Chief Justice's comment on this matter is significant: that the policy should be such that all young people feel satisfied. The court adjourned the hearing for four weeks. This comment is not limited to the UGC rules alone, but also sends a broader message for the entire education system in the country. In fact, at the root of this controversy is the harsh reality of caste discrimination in higher education institutions, which has long been ignored. The tragic deaths of students like Rohith Vemula and Payal Tadvi forced the nation to question whether our universities truly provide an environment of equal opportunity and respect for all students. In 2019, petitions filed by the mothers of Rohith Vemula and Payal Tadvi sought effective safeguards against caste discrimination in higher education institutions. The primary objective of these petitions was to ensure that no student faces humiliation, harassment, or isolation because of their caste, social background, or identity. Against this backdrop, the UGC, after deliberations, notified new regulations in January 2026. However, controversy arose over certain provisions of these regulations, particularly the definition of caste discrimination. The new framework focused specifically on discrimination against students from Scheduled Castes, Scheduled Tribes, and Other Backward Classes. On the other hand, some students and petitioners from the general category expressed concern that the system did not adequately address discrimination against them. They argued that if the very system designed to prevent discrimination excludes other classes from protection, the objective of equality would remain unfulfilled. On January 29, 2026, the Supreme Court imposed an interim stay on these rules, directing that the 2012 rules remain in effect for the time being. The court was concerned that the language and scope of the new provisions might create a situation that would increase division and discontent in society. It must be noted that the court's interim stay cannot be considered a final decision. Its purpose is to thoroughly examine all aspects of the case and prevent any potential injustice. The key question here is whether protections against caste-based discrimination should be limited to a single social class. Certainly, historically disadvantaged and vulnerable sections of Indian society have long faced discrimination and social inequality. The need for special safeguards for them in educational institutions cannot be denied. The Constitution also emphasizes equality, as well as social justice and the protection of vulnerable sections. However, this cannot mean that another student's complaint should be given less importance solely on the basis of their caste or social identity. The true meaning of equality is that every student has equal access to justice. If a student from a Scheduled Caste, Scheduled Tribe, or Backward Class is subjected to caste-based humiliation, they should receive immediate protection. Similarly, if a student from the general category faces harassment, humiliation, or unfair treatment based on caste, their complaint should be taken seriously. Any incident of discrimination is wrong, regardless of the class of student who is the victim. The criterion for justice should not be the caste of the victim, but the treatment meted out to them. It must also be understood that universities are not merely degree-granting institutions. They shape the nation's future, ideas, and social consciousness. If walls of distrust based on caste, class, and identity begin to rise within these very temples of learning, it will impact future generations. It is the university administration's responsibility to foster an environment of mutual respect, dialogue, and cooperation among students. Grievance redressal committees should be impartial, the investigation process transparent, and no complainant should fear harassment or retaliation. The challenge now facing the central government is not just to amend the rules, but to create a balanced framework that all sections of society can trust. The proposed committee should include academics, social justice experts, legal experts, and representatives from various social sectors. The language of the rules should be clear, so that there is no room for confusion regarding the definition of discrimination. Furthermore, a system for impartial investigation should be established to eliminate the possibility of false complaints, while ensuring that the voices of genuine victims are not silenced. The aim of the UGC's new regulations should not be to pit one class against another, but to free educational institutions from discrimination. Social justice and the concerns of the general public are not mutually exclusive. It is the responsibility of a democratic system to strike a balance between the two. The government must find a way to effectively protect the underprivileged and ensure that students from other classes do not experience injustice. The Supreme Court's comments are an important signal in this direction. Educational institutions should be such that students are recognized not by their caste, but by their talent, hard work, and ability. This is the true meaning of equality and the foundation of a healthy, inclusive, and strong India. The author is a senior journalist, thinker and political thinker.

Whose roads do the city roads belong to – the events or the common man ?

[One siren , thousands of deaf ears and a helpless system]

[Life dying in traffic jam — Every city's shared tragedy]

Parivahan Vishesh News

Prof. RK Jain "Arijit"

A father kept begging for way on the road with folded hands while his son kept counting his last breaths in the ambulance. What could be more insensitive than this! In Kanpur, the ambulance carrying 22 -year-old constable Pranshu Sachan got stuck in the traffic jam of a political rally. The father kept pleading with the police and passersby , but the way remained open. After being stuck in the traffic jam at Tatmil intersection for about one and a half hours, the ambulance reached the hospital in about three hours , by then Pranshu had died. A young life was lost because political displays of power on the streets took precedence over ambulance access. This isn't just a tragedy for one family , but a slap at the very fabric of every city , where roads are increasingly becoming a source of encroachment , congestion, and protests rather than traffic .The first hour after a road accident, the " golden hour, " is crucial for saving lives. But in our cities, this precious time is spent in traffic jams instead of reaching the hospital. The Ministry of Road Transport and Highways According to the Road Accidents in India 2024 report , in the year 2024 , there were 487,707 road accidents in the country and 177,175 people died. This means that approximately 485 people die in road accidents every day. Union Road Transport Minister Nitin Gadkari has also cited in Parliament the lack of timely medical care as a major reason for these deaths. The question is, when every minute can save a life , why do our roads block the path of ambulances for hours ?With Diwali approaching, chaos erupts on city streets. Shop goods spill onto the sidewalks, onto the road. Handcarts , stalls, and makeshift shops crowd the streets. Customers park their vehicles on the roadside to shop. As a result , half the road is given over to businesses, while the rest is given over to haphazard parking. Pedestrians have to wade through the crowded streets. This is the situation in cities large and small, including Kanpur , Delhi , Lucknow , Mumbai , Hyderabad , Amritsar, and Indore. In the rush to decorate markets and increase business, no one considers the need to keep the road open for ambulances. The administration often only performs the formality of removing encroachments after the festivals , when it's crucial to keep the roads clear beforehand.Religious processions , wedding processions, and political rallies exacerbate this chaos. These often block roads for hours. Arrangements are made for crowd gathering , stage installations, and parking , but no effort is made to ensure ambulances pass through. Recently, the President of the Chamber of Trade and Industry claimed that a rally in Delhi resulted in the closure of approximately 250,000 shops in 20-25 major markets , impacting business worth 10,000-11,000 crore. This is not an independently verified figure , but rather a trade estimate by traders. Nevertheless, it clearly illustrates the impact of events on public life and business. When markets can come to a standstill , the lives of patients can also be at risk.The severity of the problem is evident from a campaign in Delhi. In June 2026 , the Delhi Traffic Police and Municipal Corporation issued 55,532 challans for encroachment and illegal parking and seized 3,123 vehicles. They removed 1,264 street vendors and 1,015 other encroachments from 144 locations . CAG in Karnataka According to an earlier 2022 report , in nearly 90,000 accident cases, ambulances were delayed or deployed far away, preventing victims from receiving timely medical assistance. In nearly 6,000 cases, ambulance dispatch took more than 30 minutes. These figures highlight a shared failure of administrative oversight , emergency services, and civic discipline.Ironically, the National Highways Authority of India implemented new standards in August 2026 to determine the responsibility of ambulances on highways. According to these , ambulances within a 10-kilometer radius must reach the scene of an accident within 10 minutes and transport the injured to the nearest hospital within one hour. Delays are punishable by fines of up to 10,000 rupees . Section 194E of the Motor Vehicles Act Under the law, even failing to give way to an ambulance can result in a fine of 10,000 rupees. The question is, if time limits can be set on highways , why not in cities ? Services like 108 are only effective if ambulances have the right of way. If a patient dies before reaching the hospital , even modern equipment and trained staff are useless.Now, instead of hollow assurances, strict action is necessary. To prevent encroachment on Diwali and other festivals, a traffic plan should be made in advance. Illegal parking should be immediately fined and vehicles should be confiscated. Alternative routes , fixed timings and separate parking should be mandatory for religious processions and political rallies. Before giving permission, the administration should ensure that the emergency corridor will remain open at all costs. There should be green corridors , smart signals and GPS monitoring for ambulances at major intersections. Every serious incident of ambulances getting stuck in traffic jams should be investigated and officials and organizers should be held accountable for negligence. Citizens should also understand that giving way on hearing the siren is not a favour , it is a legal and human responsibility.The most painful aspect of the Kanpur incident is that a father pleaded with folded hands to save his son , but the entire city refused to give way. After Pranshu's death, rallies will end , markets will reopen, and processions will be held , but no compensation or government assurance will fill the void in that father's life. The purpose of democracy , religion , business, and celebration is to improve life , not to imperil it. In a city where ambulances have to beg for way and lives are lost in traffic jams , claims of development are bound to be questioned. Roads aren't meant to showcase a party's power , boost business, or attract crowds for events ; they're meant to save lives first and foremost. The day this becomes a priority for citizens and the administration , cities will truly become livable.

Tamil Nadu Yuva Sangam Phase-7 delegation met Hon'ble Vice President of India at Vice President House.

Parivahan Vishesh News

Report Prof. Manoj Kain, Presenter Special Correspondent Parivahan Vishesh Newspaper New Delhi

Delegation of 53 students and five faculty coordinators from various regions of Tamil Nadu got special opportunity to meet Hon'ble Vice President of India Shri C.P. Radhakrishnan at Vice President House, New Delhi. This meeting was held under Yuva Sangam Phase-VII program organized under Ek Bharat Shreshtha Bharat (EBSB) initiative started by Ministry of Education, Government of India. This delegation was led by Nodal Officer of Yuva Sangam Phase-7 of Delhi University Prof. K.P. Singh. On this occasion members of core team of Yuva Sangam Phase-7 of Delhi University and officers of Ministry of Education and All India Council for Technical Education (AICTE) were also present.Welcoming distinguished guests and delegation, Vice Chancellor of Delhi University Prof. Yogesh Singh described Yuva Sangam as a transformative national initiative, which is playing important role in promoting national unity, cultural exchange and mutual understanding among youth of various states. Throwing light on importance of five major dimensions of this initiative - 5P i.e. Paryatan, Parampara, Pragati, Paraspar Sampark and Prodyogiki - he said that these dimensions are helpful in understanding rich cultural diversity of India and strengthening spirit of Ek Bharat Shreshtha Bharat.Addressing Yuva Sangam team, Hon'ble Vice President of India inspired them to remain alert towards misleading information and propaganda, to imbibe values of patriotism and national unity and to make meaningful contribution in building Viksit Bharat by year 2047. He called upon youth to respect nation, feel pride towards glorious civilizational heritage of India and perform their duties as responsible citizens. Under a very affectionate and memorable initiative, Hon'ble Vice President gifted each student a book translated in Tamil language based on life of Iron Man Sardar Vallabhbhai Patel and a chocolate. Students were extremely overwhelmed by this affectionate and cordial behaviour of Hon'ble Vice President and this dialogue became unforgettable for them. Giving message of building a healthy, aware and drug-free society, Hon'ble Vice President also participated with delegation in 'Say No to Drugs' pledge and inspired youth to play active role in building drug-free India. This program was coordinated and conducted by member of Yuva Sangam Phase-7 core team of Delhi University Prof. Charu Kalra.On this occasion dignified presence of many eminent educationists and administrative officers was also there. Among them Prof. Balaram Pani, Dean, Delhi University; Prof. Shyama Rath, Member Secretary, All India Council for Technical Education; Shri Shreyansh Mohan, Deputy Secretary, Ministry of Education, Government of India; and Shri Naresh Kumar Grover, Director, AICTE were mainly included. Apart from that Principals and senior educationists of various colleges of Delhi University also participated with delegation. Among them Prof. Hemchand Jain - Principal - Deen Dayal Upadhyaya College; Prof. Gurmohinder Singh - Principal - Sri Guru Tegh Bahadur Khalsa College; Prof. Harindri Choudhary - Principal - PGDAV Evening College; Prof. Bhawna Pandey - Principal - Dyal Singh College; Prof. Hansraj Suman - Joint Director - Gandhi Bhawan; Prof. Manoj Kumar Kain - PGDAV College; Dr. Manish Kumar - Swami Shraddhanand College; Dr. Manish Kumar - Department of Library Science and Dr. Jainendra Narayan Singh - Dyal Singh College were included. Apart from these many other eminent professors and faculty members of Delhi University also enhanced dignity of program with their presence.
