08 A cache of weapons and ammunition was recovered in a joint operation by the SSB and police.

E-rickshaws manufactured by e-rickshaw manufacturers in Delhi not as per vehicle Type Approval - Who is responsible?

Parivahan Vishesh News

Riding and loader difference erased, fast two-wheeler in name of low-speed - Big questions on registration, fitness and enforcement Author: Sanjay Kumar Bathla Main Facts - At a Glance - What is Type Approval Certificate? - Official certification of a vehicle model being as per design, safety, emission/electric standards**- Permissible limit for passenger e-rickshaw:** Driver + 4 passengers**- Cargo / Loader e-rickshaw:** Only for goods carriage, not for passengers**- Permissible limit for low-speed e-two-wheeler:** Motor up to 250 watt, maximum speed 25 km/hour, only then exemption from license-registration**- Author's allegation:** More than 60% e-rickshaws/e-loaders in Delhi not as per approval, still fitness and registration being issued**- Author's demand:** Strict action on manufacturers, dealers and officers registering against rules, orders to stop such vehicles **Editorial Clarification:** Allegations made about manufacturers, dealers and department in this article are of author. There is no independent confirmation of these allegations by transport department, investigating agencies or court in this article. **1. What is Type Approval - and why is it so important?** For your information, Type Approval Certificate is a kind of approval / certification scheme. Its objective is to increase buyer's trust and ensure that product is as per national/international standards / codes and rules through document review, design and certification process. In India any vehicle model goes through this process before coming on road. **Process in brief:**1. Manufacturer makes prototype of vehicle2. Government authorized testing agency - ARAI (Pune), ICAT (Manesar), CIRT etc - checks it3. In checking brakes, balance, battery, motor, light, horn, seating, load capacity, speed etc are seen4. On being satisfied **Type Approval Certificate** is issued5. After that state transport department gives **State Approval**, only then registration of that model can happen **Meaning is clear:** Only that design which passed in approval can be sold in market. Selling different design from approval is against rules. **2. What is happening in Delhi - Author's allegation** According to author, e-rickshaws, e-loaders and two-wheeler passenger vehicles not to be registered as per rules available for sale in Delhi are not manufactured on basis of certificate obtained by government authorized testing agencies and State Approval / Type Approval Certificate issued by Delhi Transport Department. Even after that registration branches of Delhi Transport Department are registering such vehicles, due to which life of public running on roads of Delhi is becoming unsafe - such is allegation of author. **Author's question is - Who will compensate loss happening due to arrival of such vehicles on roads of Delhi? Will transport department? Trend of illegal modification in e-rickshaw:**- Putting additional seat behind and taking passengers and goods together- Making passenger e-rickshaw like loader, loader like passenger- Change in seat, roof, battery box, chassis **Rules clearly say:**- Passenger e-rickshaw is valid only for **4 passengers + 1 driver**- Cargo / Loader e-rickshaw is registered only for **goods carriage** Despite this, these rules are being broken by putting additional seat - author claims. **3. Why is additional seat dangerous? - Technical side** Putting additional load disturbs balance of vehicle. **1. Impact on braking:** With increase in weight braking distance increases, possibility of brake failure increases**2. Pressure on battery and motor:** Battery heats due to overload, risk of motor burning and fire**3. Risk of overturning in turning:** Centre of gravity of e-rickshaw is already high, with additional passenger possibility of overturning increases many times4. **Insurance and compensation:** Insurance company can reject claim in accident of vehicle different from approval, victim does not get compensation That is why any kind of design or seating change without permission of RTO is illegal as per motor vehicle rules. **4. Low-speed e-two-wheeler - Biggest confusion** It is seen not only e-rickshaw but many manufacturers are also adopting wrong path in electric two-wheelers. **As per standard:**- Low-speed e-two-wheeler is valid only up to **250 watt motor** and **25 km/hour** speed- For these vehicles neither license nor registration is needed **Reality - Author's allegation:**- In market many companies are selling by putting motor of more than 250 watt capacity in name of low-speed only- Result is fast two-wheelers without registration and without helmet are running on road, which is equal to inviting accidents **What happens due to this?**- Vehicle without number plate does not get caught, runs away after accident- Even minors are driving without helmet, without license- Manufacturer following rules becomes costly, rule breaker becomes cheap - honest manufacturer in crisis **5. Law, rules, act - What does law say? 1. Motor Vehicles Act, 1988 (Amended 2019)- Section 39 -** Vehicle will not run without registration**- Section 52 -** Alteration in vehicle - Without prior permission of RTO alteration in engine, chassis, seating, body illegal**- Section 53 -** Registration of vehicle against rules can be suspended / cancelled**- Section 56 -** Fitness certificate mandatory-**Section 177, 179, 190, 192 -** Fine on rule violation, vehicle seizure**- Section 182A -** Punishment for selling vehicle against rules by manufacturer / dealer **2. Central Motor Vehicles Rules, 1989- Rule 126 -** Type Approval - Certification mandatory for every model from authorized agency**- Rule 126A -** Checking of prototype, conformity as per CMVR**- Rule 115 -** Emission / electric vehicle standard**- Rule 122 -** Battery, electric safety standard **3. Special rules for e-rickshaw- GSR 709(E), 2014 and later amendments -** Recognition of e-rickshaw and e-cart as motor vehicle, maximum speed 25 km/hour, motor capacity up to 2000 watt, passenger 4+1**- Delhi e-rickshaw policy / orders of transport department -** No sale-registration without State Approval **4. Indian Standard / AIS Standard- AIS-039, AIS-040, AIS-048 -** Electric vehicle, battery safety, charger standard**- AIS-038 -** Battery safety, protection from thermal runaway **5. Consumer Protection Act, 2019**- Selling vehicle by giving wrong information is unfair trade practice, complaint in consumer commission, compensation **6. Bharatiya Nyaya Sanhita, 2023- Section 125, 106 -** Punishment for negligent driving, death/injury in accident **6. Fitness certificate - Being issued in air? - Big question** Most serious allegation of author is this: In Delhi vehicle inspection certificates are issued after checking 4-wheelers as 3-wheelers. More than 60% of e-rickshaws and e-loaders available on roads are not as per approval of vehicle registration issued by Government of India. But getting fitness vehicle inspection certificate every year, how after all? **What does fitness mean?**Fitness certificate means vehicle is roadworthy - brakes, light, tyre, battery, body all okay. **If fitness is being given without checking, then:**- Unsafe vehicles will come on road- Insurance and compensation will get stuck in accident- Credibility of transport department will finish **Author's question:** Why no action even after being in knowledge of Transport Commissioner and Special Transport Commissioner? **Editorial opinion:** This allegation is serious, therefore its investigation should happen by matching data of vehicle portal, type approval list and fitness record. Whether allegation is correct or not, data will tell, not statement. **7. E-rickshaw - Livelihood also, safety also** In India e-rickshaw has made its place as cheap and environment friendly transport in last one decade. Livelihood of lakhs of families also depends on it. In cities and towns it has become easiest and cheapest option for small journeys. That is why e-rickshaw industry is considered symbol of green revolution and urban mobility. But due to ignoring rules safety, trust and future of industry all three are getting deeply hurt. **Why are manufacturers following rules troubled?**- Illegal models are easily available in market at cheap rates- Customer sees cheap and buys illegal model- Honest manufacturer's vehicle seems costly, sale decreases **In greed of short-term profit of some manufacturers, those manufacturers of industry who are manufacturing vehicles following rules are coming in crisis. 8. Two big questions of author - and editorial answer Question 1: On what basis is transport department registering vehicles manufactured with illegal changes instead of taking action on them? Possible reasons:**- Name of model one on vehicle portal, vehicle different on ground - physical verification weak- Change at dealer level, change after registration - not caught- No coordination between enforcement branch and registration branch **Question 2: After all why is transport department not taking strict action to implement rules? Possible reasons:**- Shortage of manpower, lakhs of e-rickshaws in Delhi, less inspection team- Political pressure - e-rickshaw drivers big vote bank- Pressure of manufacturer-dealer lobby **But this is no excuse.** There is full right of action in law - cancellation of registration, vehicle seizure, recommendation to cancel approval of manufacturer, FIR. **9. 7 demands in public interest - From Parivahan Vishesh On basis of author's demand: 1. Type Approval Matching Campaign:** Type approval number, photo, seating capacity of every e-rickshaw model on vehicle portal be made public. Sale of model different from approval be stopped immediately.**2. Physical verification mandatory:** Before registration and fitness photo, chassis, battery, seating video record of vehicle be there, be uploaded on vehicle portal.**3. Action on dealer:** License of dealer selling vehicle against rules be suspended, fine under section 182A.**4. Action on manufacturer:** Report be sent to ARAI / ICAT / MoRTH to cancel approval of manufacturer repeatedly breaking rules.**5. Enforcement campaign:** Enforcement branch, Delhi Transport Department and traffic police jointly close such vehicles by imposing sections as per rules, but there be humane behaviour with driver, alternative of livelihood also be told.**6. Customer awareness:** Customers have to remember - Passenger e-rickshaw and loader / cargo e-rickshaw are different categories, for different works. Low-speed e-two-wheeler is safe and valid only up to 250 watt. Before buying check type approval, state approval, insurance.**7. Transparency in fitness:** CCTV at fitness centre, online fitness, audit - This system of fitness being issued in air be stopped. **10. Editorial Conclusion** It is true that e-rickshaw and electric two-wheeler have realized dream of green mobility in India. But cost of compensation of accidents and loss of life and property happening on roads due to transport department letting and making vehicles manufactured bypassing rules run on roads and manufacturers making and selling wrong vehicles cannot be at name of green mobility. **Green mobility is meaningful only when it is safe mobility also.** Delhi Transport Department should take strictest action with immediate effect on manufacturers not making vehicles as per rules, vehicle dealers selling them and officers registering them - this itself is demand of public safety. **No revenue is bigger than public safety, no excuse of pollution, no mathematics of votes. - Author: Sanjay Kumar Bathla- Editorial Department, Parivahan Vishesh Samachar Patra Daily**

On Diwali, Delhiites bought vehicles fiercely - enthusiasm or hit of pollution and jam?

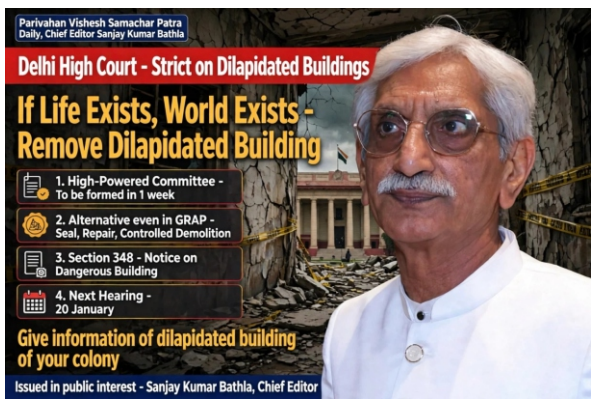

Parivahan Vishesh News

25,482 vehicles registered on Dhanteras-Diwali, two-wheelers 74% - Government's earnings increased, burden on road and air also increased Detailed analysis in light of constitutional rights, judicial orders and laws Main facts - verified figures - Fact - Details Total registrations on Dhanteras-Diwali* 25,482 vehiclesTwo-wheeler vehicles* 18,898Cars* 6,230October + till 8 November total About 1.26 lakh vehicles**October 2026 alone** 91,153 vehicles, highest monthly figure of this year**Two-wheeler share in October** 64,201 i.e. 70.4%**EV registration in October** 13,296, 50.7% more than last year On occasion of Dhanteras and Diwali, total 25,482 vehicles were registered in Delhi, including 18,898 two-wheelers and 6,230 cars. In October, 91,153 vehicles were registered, which is the highest monthly figure of this year. **Important correction:** At many places confusion has spread that from 1 January registration of two-wheelers will be only in electric. **Truth is -- From 1 January 2027:** New registration of only electric auto-rickshaws and N1 goods vehicles**- From 1 April 2028:** New registration of only electric two-wheelers, new registration of petrol-CNG two-wheelers will stop According to Delhi EV Policy 2.0, from 1 January 2027 only electric autos and from 1 April 2028 only electric two-wheelers will be registered. Existing petrol vehicles will continue to run. **1. Side of enthusiasm - Why did public buy vehicles?** On occasion of festivals, tremendous enthusiasm of vehicle purchase was seen in Delhi. Dhanteras is considered auspicious. Buying vehicle on this day is considered symbol of prosperity. **- Economic activity:** Showroom, dealer, finance company, insurance, RTO - all got work- **Revenue to government:** Crores of earnings from motor vehicle tax, road tax, registration fee**- Aspiration of middle class:** Two-wheeler is still Delhi's cheapest and fastest private ride. Metro-bus does not reach every street.**- Inclination towards EV:** In October 13,296 EVs were registered, this shows that public is slowly adopting electric also. Therefore only blaming purchase is not right. Buying vehicle is legal right of citizen. **2. Side of concern - Jam, pollution and road safety** If this situation remains, then 1 to 2 lakh more two-wheelers may come on Delhi's roads in next two months - this apprehension is not baseless. **Why?1. Fear of EV deadline:** People want to buy petrol two-wheeler before 1 April 2028, because they do not yet have full faith on EV's range, charging, battery price and resale value.**2. Road capacity limited:** Roads in Delhi did not increase, vehicles kept increasing.**3. Lack of lane driving:** Two-wheeler drivers often change lanes, climb on footpaths, go in wrong direction. Due to this both jam and accidents increase. **Truth of pollution:** When GRAP-3 was implemented, Delhi's AQI reached 382 i.e. **very poor** category. In GRAP-3, BS-III petrol and BS-IV diesel cars were banned, but two-wheelers are not included in this special ban. This does not mean that two-wheelers do not pollute. Two-wheelers are about 67% of Delhi's total registered vehicles and contribution of vehicles in winter pollution is considered about 23%. **3. Constitutional rights - What does Constitution say in favour of public? Article 19(1)(d) -** Right to move anywhere in India**Article 19(1)(g) -** Right to do any business, trade - this also includes buying, selling, driving vehicle**Article 21 -** Right to life and personal liberty **Supreme Court's interpretation - Included in Article 21 itself:**- Right to breathe in clean air- Right to clean water- Right to live in healthy environment In cases like **M.C. Mehta vs Union of India,** Supreme Court has repeatedly said - stopping pollution is constitutional duty of government, not just option. **Article 48A -** State will protect environment**Article 51A(g) -** Duty of every citizen to protect environment **Meaning:** Buying vehicle is your right, but smoke coming out of your vehicle cannot violate other's right to clean air. Balance between both rights is demand of Constitution. **4. Laws, rules, acts and gazetted notifications 1. Motor Vehicles Act, 1988 (Amended 2019)**- Section 39 - Vehicle will not run without registration- Section 56 - Fitness certificate mandatory- Section 190(2) - Violation of pollution standard punishable- Sections 177, 179, 183, 184 - Fine, license suspension on wrong driving, over speed, lane violation, dangerous driving **2. Central Motor Vehicles Rules, 1989**- Rule 115 - Emission standards, PUC certificate- BS-VI standard implemented from 1 April 2020 **3. Air (Prevention and Control of Pollution) Act, 1981**- Right to State Pollution Control Board to take action on vehicle emissions **4. Environment (Protection) Act, 1986**- Sections 3, 5 - Power to Central Government to give directions to stop pollution, GRAP was made under this **5. Commission for Air Quality Management Act, 2021 (CAQM Act)**- CAQM is supreme institution for air pollution in Delhi-NCR- Right to impose phased restrictions from GRAP-1 to GRAP-4- In GRAP-3, ban on BS-III petrol, BS-IV diesel LMV, ban on construction **6. Delhi EV Policy 2.0 (2026-2030)**- Implemented from 1 July 2026, valid till 31 March 2030- 100% road tax and registration fee waived on EV cars (up to 30 lakh)- Incentive up to Rs 30,000 in first year on EV two-wheelers- From 1 January 2027 only electric autos, from 1 April 2028 only electric two-wheelers new registration **7. Delhi Motor Vehicle Aggregator and Delivery Service Provider Scheme, 2023**- Phased ban on including new ICE vehicles in aggregator's fleet **8. Judicial orders- Supreme Court - M.C. Mehta case:** Direct shift from BS-IV to BS-VI in Delhi, ban on old vehicles, compliance of GRAP mandatory**- Delhi High Court:** Many times directions on lane driving, traffic rules compliance, road safety, but ground compliance weak**- NGT - National Green Tribunal:** Order of ban on diesel vehicles older than 10 years, petrol vehicles older than 15 years in Delhi, which is still applicable **5. Lane driving - Where is biggest lapse?**Your question is right - why is no attempt being made for lane driving in Delhi? **Law is there, compliance is not:**- Motor Vehicles Act has clear rules of lane discipline, signal, overtaking- Delhi Traffic Police has right to challan- CCTV and ANPR cameras are also installed **Still why not?1. Road design:** At many places there is no lane marking itself, cars are parked on bus lane**2. Lack of enforcement:** Challan only on paper, less checking on spot**3. Lack of public transport:** No last mile connectivity, therefore people are forced on two-wheelers**4. Political will:** If strictness done then fear of votes, if laxity given then fear of jam **Editorial opinion:** If lane driving starts then jam and accidents will definitely reduce, pollution will also decrease. This thing is known to government, transport department, traffic police, High Court and Supreme Court - all. Question is of willpower, not of law. **6. Has pollution become weapon to loot public? - Balanced analysis in public interest** This perception is being formed among public that in name of pollution, challan, GRAP restrictions, PUC, parking fee are being increased to collect money, but root cause of pollution - stubble, dust, construction, industry, garbage burning - remains as it is. **Partial truth in this perception:**- Government gets revenue from challan, but road does not improve- In GRAP, poor's old vehicle gets stopped, but big construction sites keep running- Complaints of corruption at PUC centres are common **But full truth is also this:**- Without GRAP, Delhi's air would become even worse- Vehicle pollution cannot be ignored-Solution is not only challan, giving option is - good bus, metro, cycle track, EV charging **Pollution has to be made issue of public health, not weapon of loot. 7. 7 demands in public interest - From Parivahan Vishesh 1. Lane Driving Mission:** On 20 major corridors of Delhi, first lane marking, then CCTV challan, then awareness campaign - implement in 90 days**2. EV trust restoration:** Charging at every petrol pump, battery swap, government assurance of 5 years battery warranty, only then public will buy EV**3. Clarity in deadline:** Government should clarify in gazette - 1 January 2027 for auto, 1 April 2028 for two-wheelers, do not spread confusion**4. Increase public transport:** 10,000 new electric buses, last mile e-rickshaw, only then need for two-wheelers will reduce**5. Challan money should be spent on road:** 100% of amount received from challan should be spent on road improvement, footpath, cycle track, its audit should be public**6. Transparency in PUC and fitness:** Online PUC, strict action on corruption**7. Comprehensive solution of pollution:** Not only vehicles, stubble, dust, construction, garbage burning - action on all together, compliance of GRAP should be equal for all **8. Editorial conclusion** Purchase of 25,482 vehicles on Diwali is both enthusiasm and warning. Enthusiasm because Delhi's economy is alive, public has power to buy. Warning because if road, lane, public transport and EV infrastructure do not improve, then in next two months 1-2 lakh more two-wheelers will come and Delhi will remain stuck in jam all the time. **Constitution says - Buying vehicle is right, clean air is also right.Law says - Breaking lane is crime, spreading pollution is punishable.Court says - Stopping pollution is duty of government. Now need is - government, police, court and public - all four together make lane driving a habit, make EV trustworthy and make pollution issue of health, not of recovery. Delhi should celebrate Diwali not with jam and smoke, but with discipline and clean air. - Editorial Department, Parivahan Vishesh Samachar Patra Daily- Sanjay Kumar Bathla, Chief Editor**

Parivahan Vishesh Samachar Patra Daily - Editorial in Public Interest / Delhi High Court / Public Safety

Whether GRAP or not, no compromise with life - High Court strict on dilapidated buildings

Parivahan Vishesh News

Order of High Court of 6 November 2026 - MCD Commissioner in consultation with Chief Minister to form High-Powered Committee in 1 week (to create alternative mechanism of sealing, repair or controlled demolition) Next hearing 20 January Special Correspondent Parivahan Vishesh Samachar Patra Daily New Delhi - The government departments whose main role is to keep Delhi safe are not ready to play role at any cost - whether High Court orders, whether Lieutenant Governor and whether Supreme Court. But Delhi High Court has again issued directions from its side to keep Delhi safe. Court said - **Court cannot remain mute spectator in face of these tragedies.** Parivahan Vishesh Samachar Patra Daily is publishing High Court directions in public interest with complete details. **There are such dilapidated buildings in your colony also? Then this news is for you. Fact at a glance - Point - Details Court_ Delhi High CourtJudge_ Justice Saurabh BanerjeeDate of order_ 6 November, 2026Case** Case of notice on dilapidated property under Section 348 of Delhi Municipal Corporation Act**Main direction** MCD Commissioner, in consultation with Chief Minister Rekha Gupta, to form High-Powered Committee**Time limit** As soon as possible, preferably within next 1 week**GRAP restriction** Demolition work cannot happen at least till 10 February**Next hearing** 20 January**Copy of order sent to** Chief Minister and MCD Commissioner **Main Points 1. Why did court take suo motu cognizance?** Dilapidated / structurally unsafe buildings pose immediate danger to life of occupants, owners, passers-by and those living in neighbouring properties. **2. What is problem of GRAP?** During pollution restrictions of GRAP - Graded Response Action Plan - demolition activities are prohibited. Therefore municipal bodies cannot take steps to remove such dangerous structures till 10 February. **3. What is court's solution?** Not to sit idle despite GRAP. Create an effective alternative mechanism - **sealing, repair or controlled demolition. 4. What reprimand did court give to MCD?** MCD cannot escape its responsibility only by doing inspection or issuing notice. **5. Which tragedies are in background?** Many people lost lives due to building collapse in Satya Niketan and recently in Chawri Bazar. Court said - Danger is clear from these very incidents. **Detailed Details Part 1 - Where did case start from?** This case is connected to that property to which MCD had given notice after finding it in dilapidated condition under Section 348 of Delhi Municipal Corporation Act - Removal of dangerous buildings. Court found that MCD did not take effective steps for long time, and now due to GRAP restrictions further action on ground also cannot be done. **Part 2 - What did court say?** "Court cannot remain mute spectator in front of tragedies like Satya Niketan." Court said that danger is not limited only to occupants. Passers-by and those living in neighbouring buildings are also in danger. **Part 3 - What will High-Powered Committee do?** Committee has to examine and create effective alternative mechanism for buildings which have been declared dilapidated / structurally unsafe / dangerous. Options include -- **Sealing -** Seal dangerous building so that no one goes inside- **Repair -** Where safety is possible by repair**- Controlled demolition -** Demolishing safely within ambit of GRAP **Part 4 - What does MCD survey say?**According to MCD's survey of 12 October, 553 repairable properties were found across Delhi, of which 298 - about 54% - are in City SP Zone - Old Delhi - while share of this zone among surveyed houses was only 2.9%. In same zone 12 properties were kept in dangerous category, and repair of only 10 was recorded. **This figure tells that problem will be solved not only by notice, but by action. Part 5 - Satya Niketan and Chawri Bazar - Do not forget** On 6 September multi-storey building collapsed in Satya Niketan, in which repair work was going on. 7 people died in it. On 5 November 7 people lost lives due to collapse of three-storey building in Gali Sheesh Mahal near Chawri Bazar metro. **What to do for public? -** If cracked, tilted, leaking, dilapidated building is seen in your colony then give written information to MCD- Avoid passing under such building, parking vehicle- Tenants / those living in PG - Ask owner for structure safety report- Don't take risk of living in dilapidated building during rain / GRAP- If neighbouring building is dangerous then also complain - Danger is not only to occupants **Editorial Comment** Parivahan Vishesh Samachar Patra Daily believes that issuing notice is not action, and doing survey is not safety. GRAP is to stop pollution, not to stop life. If demolition stops due to GRAP, then sealing and repair should not stop. **Today's pledge -** If dilapidated building is seen then don't remain silent, give information - If life exists then world exists. **Note:** This article is for information in public interest based on Delhi High Court order of 6 November 2026 and published news reports. **- Sanjay Kumar Bathla, Chief Editor, Parivahan Vishesh Samachar Patra Daily**

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, 'Parivahan Vishesh News Doordarshan,' from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Governmant of India, various State Governments, and all political organizations before anyone else.

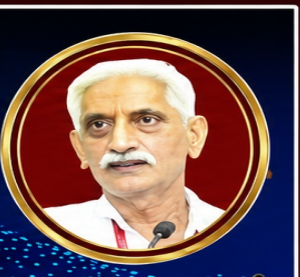

Get Ready — We're Coming Soon!

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world.

After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Tips to bring glow on face dulled by pollution

Parivahan Vishesh News

Shahnaz Hussain

In sky of most cities of country layer of poisonous air full of smoke, dust, acid filled is crossing dangerous level again and again and air of many cities has not remained worth breathing / Due to dangerous level of pollution crossing, dense blanket of smog has spread in many cities due to which difficulty is also being faced in seeing / Pollution in air may become worse to worst in coming days / However most people are aware about health damage due to air pollution but few people are aware of dangerous effect on beauty of hair, skin, face due to air pollution / Due to increasing pollution in air not only adverse effect falls on your physical health but it also eclipses your beauty

Due to increasing air pollution in cities you get besides lung diseases premature old age, pigmentation, blockage in pores of skin and many beauty problems arise / In most Indian cities microscopic chemicals layer is formed from poisonous haze blanket formed in sky due to vehicles, air condition, dust, smoke etc particles of which are 20 times thinner than our pores due to which they enter into our pores from our outer skin and finish moisture of skin due to which redness in skin, swelling, black spots, lack of flexibility in skin comes due to which skin becomes lifeless, dry, weak and dull / Chemical pollution present in air disturbs normal balance of skin and scalp due to which problems of dryness in skin, insensitivity, red rashes, pimples and itching and other types of allergy and dandruff etc in hair can emerge.

But if you live in cities then you can never get rid of pollution but good news is that you can reduce beauty damage due to pollution /With help of Ayurvedic home remedies and ancient medicinal plants effect falling on beauty of pollution can be completely stopped and your beauty can remain normally glowing. By planting ancient medicinal plants at home toxic elements in air can be removed and air can be kept clean because these plants absorb harmful gases present in atmosphere and purify atmosphere at home. Most dangerous effect of air pollution falls on skin because toxic elements of pollution directly attack skin and deposit toxic substances in skin. Actually these toxic substances are effective factors of itching in skin. Long term and short term effect of toxic substances present in air falls on beauty during festivals and functions crackers and fireworks also toxic substances enter in air due to which itching in skin increases. Chemical pollution present in air reduces oxygen in atmosphere due to which premature wrinkles in skin and old age feelings start reflecting. To get rid of dirt, filth and chemical elements deposited on skin due to pollution cleaning of skin becomes extremely important. If your skin is dry then you should use cleansing cream and gel while in oily skin cleaning milk or facewash can be used. To reduce effects of pollution on beauty use substances like sandalwood, eucalyptus, mint, neem, tulsi, aloe vera. Due to ability to fight toxic elements and strength-giving qualities of these substances help in cleaning deposit of toxic substances in skin and boils, pimples. Air pollution also gets deposited on scalp.

Make mixture by mixing one egg in one spoon vinegar and aloe vera and apply mixture lightly on scalp. After keeping this mixture on scalp for half an hour wash scalp with fresh and clean water. You alternatively can also give hot oil therapy. Heat coconut oil and apply it on head. Now dip a towel in hot water and after squeezing hot water from towel tie towel around head like turban and let it remain for five minutes and repeat this process 3-4 times. This process helps in absorbing oil on hair and scalp. Let this oil remain on head whole night and wash with fresh cold water in morning.

Water plays important role in fight against pollution / During this use maximum of fresh, clean water because water helps in taking out toxic substances of body and keeping cells nutritious substances / Damage done to skin due to pollution can be easily compensated with water /Omega 3 and Omega 6 fatty acids play important role in saving skin from ill-effect of pollution / Fatty acids make oil shield in skin due to which skin gets protection from damage due to ultra violet rays /Omega 3 fatty acids is found in abundant quantity in fish found in rivers of icy mountains, walnut, kidney bean, and spinach while Omega 6 is found in chicken, meat, edible oils, grains and edible seedsDue to pollution and dirt in air burning and redness can come in eyes. Eyes should be washed again and again with fresh water. Dip cotton wool pad in cold rose water or green tea and use it like eye pad in eyes. After applying eye pad in eyes lie in shavasana posture in rest on mattress on ground for 15 minutes. This helps in removing tiredness in eyes and shine comes in eyes.

Air pollution adversely affects health and fitness of citizens living in cities. Nowadays we are bearing extremely high pollution level due to which breathing and lung disease has become common. Due to polluted air inside house diseases like headache, burning in eyes are taking hold. Actually main goal of government and scientific organizations is to bring existing high level of pollution to normal level which we can achieve with help of some medicinal plants. In these plants aloe vera is considered most beneficial which is normally easily seen in all Indian houses. It accelerates flow of oxygen in houses and reduces effect of pollution. It absorbs carbon dioxide and carbon monoxide and releases oxygen in atmosphere.

Besides this fig, banyan, peepal tree spider plant also is considered quite helpful in cleaning air because they absorb poisonous elements present in air. Besides this Sansevieria which in common language is called snake plant also plays important role in stopping air pollution and providing fresh clean air. Snake plant is generally kept in bedroom and its care also is quite easy and normal. Besides this Areca palm, English Ivy, Boston fern and Peace Lily like plants also are easily found in India and are considered environment friendly.

Heavy cut in prices of 137 medicines - Medicine is not medium of profit, it is protection of life

Parivahan Vishesh News

Detailed analysis including Supreme Court directionsAuthor: Saurabh Varshney, Senior journalist, thinker, political thinker - Presenter Special Correspondent Parivahan Vishesh Samachar PatraMain Facts - At a glanceTotal medicines: Prices of 137 cancer medicines reducedFormulation: New prices of 1,364 formulations of 121 medicines releasedBiggest cut: Prices of 679 brand medicines reduced by more than 50%, some reduced up to 96.45%Patient savings: Estimated saving of about Rs 3,540.38 crore annuallySupreme Court hearing: On September 22 Court raised question on huge difference between retail price and MRPCourt comment: Getting medicine of Rs 2,700 for Rs 27,000 is like daylight robbery and genocideNPPA decision: On October 17 National Pharmaceutical Pricing Authority fixed trade margin 30% on 137 non-scheduled cancer medicinesExpert committee: Formed under DGHS, includes cancer experts, doctors, hospital representatives and government officers1. Cancer - Not just disease, test of whole family As soon as name of cancer is heard, question of life and death arises in front of any family. It is such disease, whose treatment not only breaks patient physically and mentally, but also breaks economic backbone of whole family.Long process of treatment, expensive tests, expense of hospitals and prices of life saving medicines are no less than a big challenge for already troubled families.In such situation heavy cut in prices of 137 cancer medicines is certainly relief news for lakhs of patients and their family members. But truth hidden behind this decision also raises serious questions on health system of country and medicine business.2. Detailed analysis - How much prices reduced and why? According to available information, prices of 137 cancer medicines have been reduced. Pharma companies have released new prices of 1,364 formulations of 121 medicines.Prices of 679 brand medicines have been reduced by more than 50 percent. Prices of some medicines have been reduced up to 96.45 percent.It is estimated that with this step patients will save about Rs 3,540.38 crore annually.This figure itself tells how big economic burden was falling on pocket of common man till now in name of cancer treatment.3 big points of analysis:A. Why was 10 times difference between MRP and real price? Companies kept factory price low, but at every level of distributor, wholesaler, retailer and hospital - heavy margin kept adding. By time it reached patient medicine became 5 to 10 times expensive.B. Trade margin itself was real gameNot making medicine cheap, but controlling margin in between was real solution. That is why NPPA capped trade margin at 30%.C. There was no control on non-scheduled medicines Earlier these 137 medicines were not in schedule of DPCO, so there was no direct price control on them. After intervention of Supreme Court they were also brought under control.3. What did Supreme Court say? - Directions and comments Role of Supreme Court is especially important in this whole matter.In hearing of September 22 top court:Raised question on huge difference of prices - Raised serious questions on huge difference between retail price and maximum retail price of cancer medicines.Made strict comment - Comment of court was that getting medicine of Rs 2,700 to patient for Rs 27,000 is like daylight robbery and genocide.Raised question on system - This anger of court was not only regarding prices of medicines, but also question on that system, in which compulsion of patients struggling with serious disease is made opportunity of business and profit.Directed government - Directed government and NPPA that prices of life saving medicines should be made rational, trade margin should be fixed and relief should be given to patients.Said to implement recommendations of expert committee - Recommendations of expert committee formed under DGHS also advanced this process. Committee included leading cancer experts of country, doctors, representatives of hospitals and government officers. Its aim was to make prices of medicines and trade margin rational.After strict comment of Supreme Court on October 17 National Pharmaceutical Pricing Authority fixed trade margin of companies 30 percent on 137 non-scheduled cancer medicines. After this decision way for reduction in prices became clear.Clear message of Court was -Unlimited profit on life saving medicine is violation of Article 21 of Constitution - Right to life.4. Biggest question - Why so much profit in life saving medicine? Here biggest question is that how so much profit became possible in business of life saving medicines? Is it appropriate to take advantage of helplessness of patient struggling with serious disease?Pharma industry has its own economic side. Companies have to spend on research, production, quality control, distribution and development of new medicines. But charging such prices in name of all these expenses, which common man cannot afford at all, cannot be said appropriate from any point of view.Medicine is not a normal consumer item. It is connected with life of a person, hope of his family and his future.5. Most hit on poor and middle class In country like India access to health services even today is affected by economic condition. Rich families can bear expense of better hospitals and expensive treatment, but middle class and poor families often have to face difficult choice between continuing treatment or saving economic condition of home.Many times people sell land, house and ancestral property. Some families drown in debt then some are forced to leave treatment incomplete due to economic inability.In such conditions control on prices of medicines is not only subject of economic policy, but question of social justice and human sensitivity.6. Public interest message - Only reducing price is not enough However, only reducing prices will not be enough. Government and concerned regulatory institutions also have to ensure that benefit of fixed prices actually reaches patients.5 demands in public interest from Parivahan Vishesh Samachar Patra Daily:Regular monitoring on medicine shops, hospitals and distributors - If any company or seller charges more than fixed price then strict action should be taken against him.Availability of medicines should remain - Their supply should not be affected in name of price control.List of 137 medicines should be updated from time to time - New medicines and techniques are continuously coming in treatment of cancer. Therefore system of price control should also develop according to time and need. Government should ensure that new and effective medicines also do not go out of reach of common patients.Facilities of cancer treatment in government hospitals should be expanded - Accessibility of tests and effective implementation of health insurance schemes is also equally necessary.Patients should remain aware - Take bill and slip обязательно, check MRP, if overcharged then complain to NPPA / Health Department.7. Editorial comment - This only is test of sensitive system Actually, identity of any civilized society is judged by how it behaves with its weakest and needy citizens.Reduction in price of medicines for patients fighting serious disease like cancer is not merely an economic relief, but a step strengthening hope of life.Strictness of Supreme Court has made important intervention in this direction. But converting this relief into permanent system is collective responsibility of government, pharma companies and regulatory institutions.Life saving medicines should not become unlimited medium of profit. Objective of health service should not be only business, but protection of human life should be.Patients fighting cancer should struggle with disease, not with prices of medicines and economic exploitation. This only is real message of this decision and test of a sensitive health system.- Saurabh Varshney, Author- Sanjay Kumar Bathla, Chief Editor

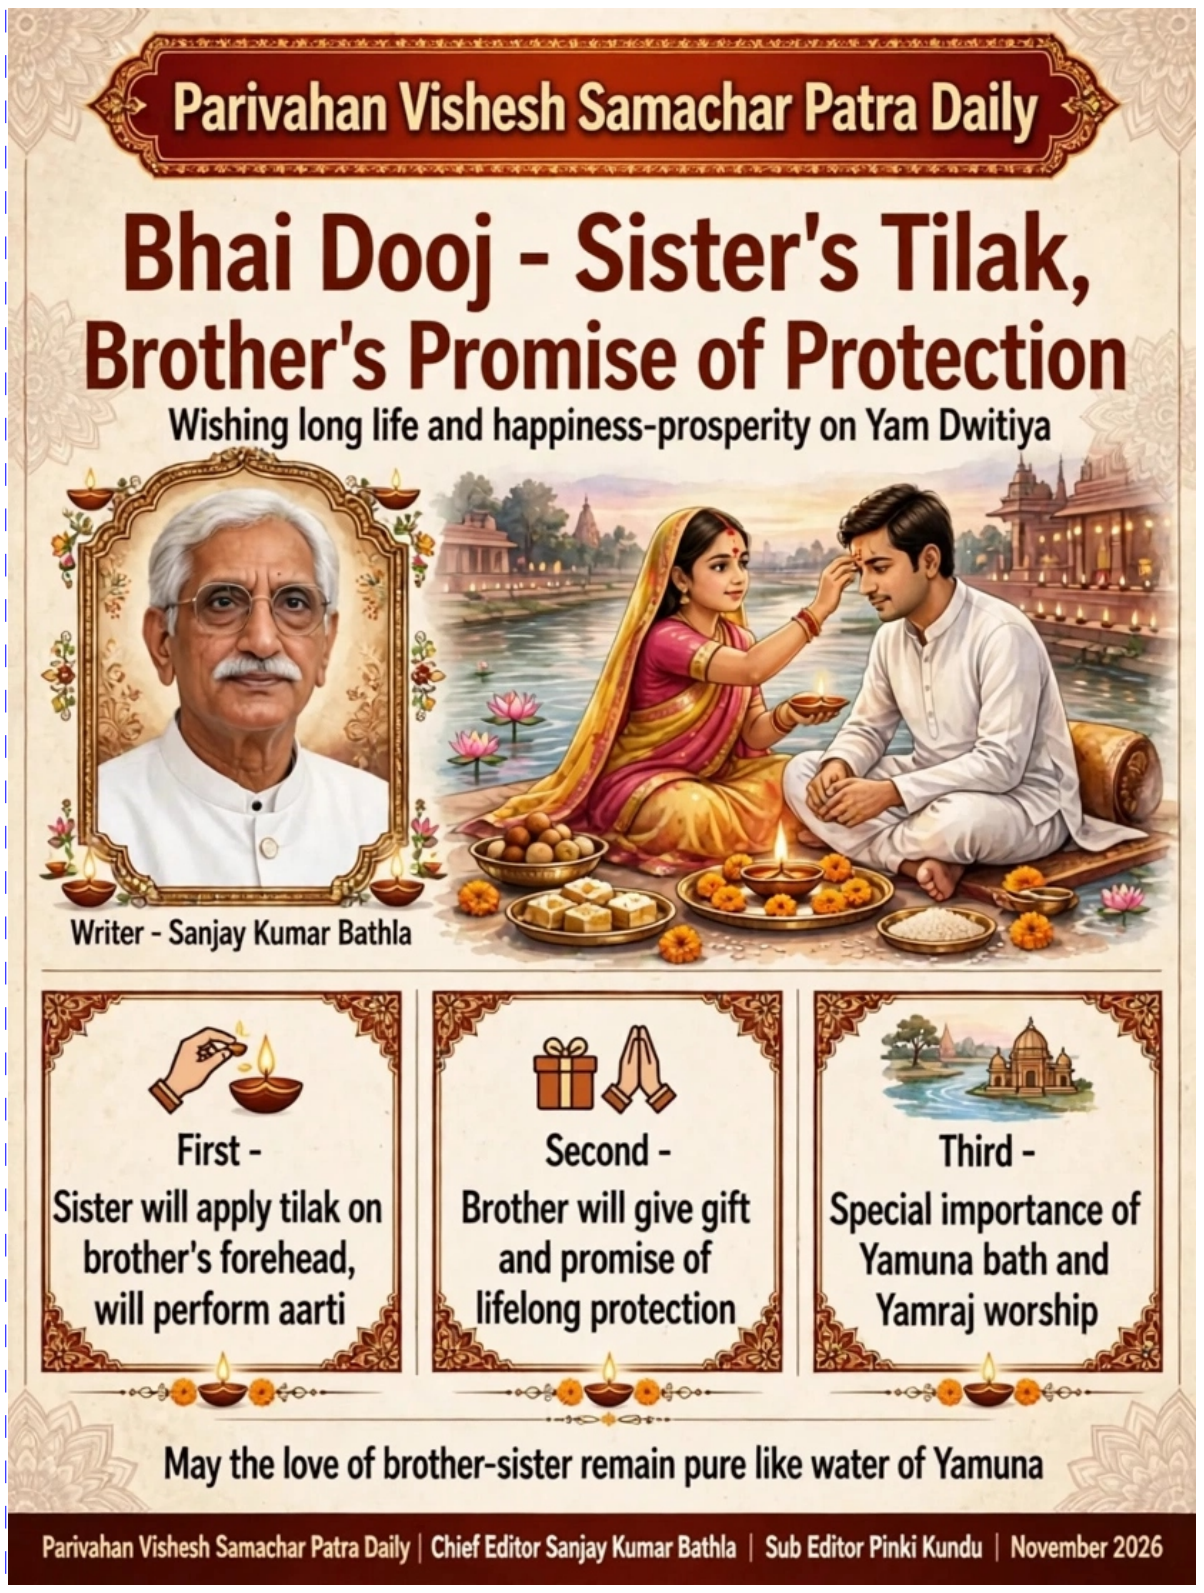

Increasing impact of pollution a growing health disaster, know how to take care of yourself and loved ones

Parivahan Vishesh News

Gorakhpur. Increasing pollution in Delhi and NCR is now not only environmental problem, but has become a serious health disaster. Due to poisonous air people are facing problems like difficulty in breathing, heart related diseases and mental stress. Seeing this serious situation health experts have advised special precautions.Dr Roop Kumar Banerjee homeopathic doctor told that micro particles like PM2.5 and PM10 present in air are mixing in blood through lungs and increasing risk of blood pressure and heart attack. Along with this problems like asthma, bronchitis, burning in eyes and sore throat have become common. According to experts, due to effect of poisonous gases fatigue, irritability and memory can also be affected. This situation is especially dangerous for children, elderly and pregnant women.He told that adopt following measures for protection like avoid going for walk outside in morning and late evening when pollution level is highest. If going outside is compulsory, then use only N95 or N99 mask. Plant plants like money plant, snake plant and aloe vera inside house which help in purifying air. If possible use air purifier. Drink lukewarm water whole day. Regularly consume tulsi, ginger, honey and milk with turmeric (diabetic patient must take doctor advice). Regularly take steam and gargle with hot water. Practice anulom-vilom, kapalbhati and bhramari pranayam to increase capacity of lungs. Dr Roop Kumar Banerjee told that to reduce pollution give priority to public transport or carpooling instead of private vehicles. Do not burn garbage at all around you, because this is biggest reason of smog. Contribute in environment protection by planting more and more plants.

Bhai Dooj Today: Sisters will apply tilak on brother's forehead, will pray for long life and protection

Parivahan Vishesh News

Auspicious muhurat for tilak on Yam Dwitiya from 1:10 pm to 3:20 pm, special importance of Yamuna bath and Yamraj worship

Festival symbol of holy love and affection of brother-sister

Report Vinay Kumar Mishra Gorakhpur.

Main facts - At a glance
- Festival: Bhai Dooj / Yam Dwitiya / Bhratri Dwitiya
- Date: Wednesday, 11 November 2026
- Tithi: Dwitiya of Shukla Paksha of Kartik month
- Dwitiya Tithi starts: From 10 November 2026, 2:00 pm onwards
- Dwitiya Tithi ends: Till 11 November 2026, 3:53 pm
- Auspicious muhurat for tilak: From 1:10 pm to 3:20 pm**- Main ritual:** Tilak, aarti, delicious food, gift by brother to sister and promise of lifelong protection**- Special importance:** Yamuna bath and Yamraj worship

1. What is Bhai Dooj - Why is it celebrated? The festival of Bhai Dooj, symbol of holy love and affection of brother-sister, will be celebrated today Wednesday, 11 November 2026. On Dwitiya Tithi of Shukla Paksha of Kartik month, sisters will apply tilak on forehead of their brothers and pray for their long life, happiness-prosperity and protection from untimely death. On this day sisters apply tilak on forehead of their brothers, perform aarti and make delicious food for them. After tilak and food, brothers give gift (present) to their sisters and promise to protect them throughout life. This festival is not just ritual, it is day to strengthen brother-sister relationship again. Distance of whole year, busy work, distances after marriage - Bhai Dooj wraps all those in one plate, one tilak and one promise.

2. Auspicious muhurat - When to apply tilak?

Dwitiya Tithi:- Starts: 10 November 2026, from 2:00 pm- Ends: 11 November 2026, till 3:53 pm

Auspicious muhurat for tilak:- From 1:10 pm to 3:20 pm

Editorial advice: Try to do tilak in muhurat only. If brother is far away, tradition of tilak can be done on video call also, feeling is biggest muhurat.

3. Worship method - How should sisters do tilak?

1. Bath and preparation: Take bath in morning, wear clean clothes, decorate puja plate
2. What should be in plate: Roli, akshat, flower, sweet, lamp, coconut, betel nut, kalawa
3. Make brother sit: Make brother sit facing east or north direction
4. Apply tilak: Apply tilak of roli, sandal and akshat on brother's forehead
5. Perform aarti: Perform brother's aarti with lamp, tie kalawa
6. Make him eat food: Make brother eat delicious food made by your own hands, specially sweet
7. Gift and promise: Brother gives gift to sister and promises lifelong protection

Yamuna bath and Yamraj worship: On this day special importance is also told of bathing in Yamuna river and worshipping Yamraj. It is believed that bathing in Yamuna on this day ends fear of Yam. Those who cannot go to Yamuna, they can mix Gangajal in bathing water at home itself and meditate on Yamraj and Yamuna.

4. Mythological story - Story of Yamraj and Yamuna According to mythological belief, children of Sun God Yamraj and Yamuna both were brother-sister. Yamuna loved her brother Yamraj very much and repeatedly invited him to her house for food, but Yamraj could not go due to his busy works. Seeing Yamraj suddenly at Yamuna's door on day of Kartik Shukla Dwitiya, she became extremely happy. She gave grand welcome to brother, applied tilak and made him eat delicious food. Seeing this love of sister, Yamraj asked to ask for boon. Then Yamuna asked for boon that you come to my house every year on this day and sister who respects her brother and applies tilak on this day, she should not have fear of Yam. Yamraj said 'Tathastu' and since then tradition of celebrating festival of Bhai Dooj (Yam Dwitiya) started. **That is why this festival is also called Yam Dwitiya.**

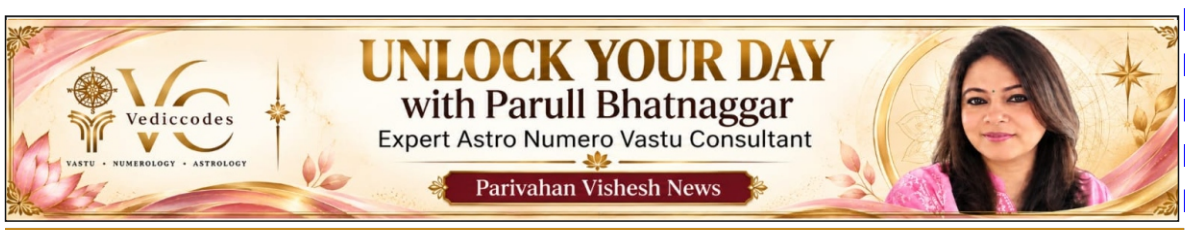

5. Second story - Shri Krishna and Subhadra According to another mythological story, Lord Shri Krishna after killing Narakasur demon went to meet his sister Subhadra on day of Kartik Shukla Dwitiya. Subhadra welcomed brother Shri Krishna with aarti, tilak and sweets, since then this festival started being celebrated as festival of brother-sister love. Message of both stories is same - **Sister's love, brother's promise of protection.**

6. Social message of Bhai Dooj - In public interest Bhai Dooj is not only festival of tilak, it is also message for society:
1. Safety of sister: Brother's promise is not only of one day, promise of respect and safety of sister throughout life
2. Respect of daughters: In house where sister is respected, Goddess Lakshmi resides there
3. Giving time to relations: In world of mobile, Bhai Dooj reminds us that relations become strong not by screen, but by sitting together and eating food
4. Brother-sister living far: Brother-sister who are far away, they can also maintain relation today with one call, one message

Editorial opinion: Along with tilak, brother should also take pledge that he will stand not only for his sister, but for respect and safety of every sister-daughter of society. Only then Bhai Dooj will be meaningful.

7. Precaution in public interest
- Balance in sweets: Diabetes and BP patients take sweets in limited quantity
- Caution in travel: While going for Yamuna bath or to sister's house avoid crowd, jam and pollution, use mask
- Road safety: On Bhai Dooj don't ride triple on two-wheeler, must wear helmet
- Wisdom in gift: Rather than showy expensive gift, give time and respect to sister
8. Editorial conclusion Bhai Dooj teaches us that relations are made not by blood, but by love and promise. Sister's tilak on brother's forehead is not just roli, it is armor of protection of his life. Brother's gift in sister's hand is not just gift, it is promise to stand with her throughout life.

Heartfelt wishes of Bhai Dooj to all brothers-sisters from Parivahan Vishesh Samachar Patra Daily. May your brother-sister love remain pure like water of Yamuna and eternal like boon of Yamraj. - Editorial Department, Parivahan Vishesh Samachar Patra Daily- Sanjay Kumar Bathla, Chief Editor

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

11 NOVEMBER 2026 | Day vibration: 5 — Change, communication, adaptability, movement and opportunity

Moolank 1
Money & Career: Day 5 energises your leadership through fresh conversations and changing opportunities. Test one promising lead before committing funds.
Relationship: A spontaneous plan can bring warmth, provided you invite the other person's opinion rather than deciding alone.
Precaution: Avoid rushed investments, impatience and making promises during excitement.
Make Your Day Better: Have one useful conversation and follow it with a clear next step.

Moolank 2
Money & Career: Day 5 invites you to speak up about shared money instead of quietly adapting. Compare options and verify terms before agreeing.
Relationship: A change in plans need not mean rejection. Ask questions kindly and communicate what would help you feel secure.
Precaution: Avoid emotional purchases and reading too much into brief messages.
Make Your Day Better: Express one need directly and keep your budget boundary intact.

Moolank 3
Money & Career: Day 5 favours your natural gift for communication. A pitch, presentation or creative collaboration may gain attention if the offer is specific.
Relationship: Humour and lively conversation can refresh a bond. Make time to listen as enthusiastically as you speak.
Precaution: Avoid scattered commitments, gossip and spending for appearances.
Make Your Day Better: Send one focused proposal and finish its follow-up.

Moolank 4
Money & Career: Day 5 may interrupt your preferred routine with a new request or practical opportunity. Review its costs before adjusting your schedule.
Relationship: Flexibility will matter more than proving that your original plan was right. Explain changes without criticism.
Precaution: Avoid stubborn refusals and expensive last-minute fixes.
Make Your Day Better: Adapt one routine while protecting the day's essential responsibilities.

Moolank 5
Money & Career: Your Moolank 5 resonates with Day 5, highlighting mobility, trade, networking and quick ideas. Prioritise verified opportunities over sheer volume.
Relationship: You may crave novelty and independence. Share plans openly so a loved one feels included rather than left guessing.
Precaution: Avoid speculative spending, overbooking and abandoning tasks midway.
Make Your Day Better: Choose one strong opportunity and complete a concrete follow-up.

Moolank 6
Money & Career: Day 5 introduces movement into your focus on comfort and security. A client conversation or service improvement could help if expenses remain measured.
Relationship: A simple change of scenery or shared activity can revive closeness without costly gestures.
Precaution: Avoid luxury impulse buys and agreeing to every request to keep peace.
Make Your Day Better: Plan one affordable shared experience and review one recurring expense.

Moolank 7
Money & Career: Day 5 brings new information that can challenge an earlier assumption. Research an option, then set a practical deadline for deciding.
Relationship: You may alternate between curiosity and withdrawal. Explain when you need quiet instead of disappearing from conversation.
Precaution: Avoid suspicion, endless comparisons and hasty conclusions from incomplete facts.
Make Your Day Better: Verify one key detail and communicate your decision calmly.

Moolank 8
Money & Career: Day 5 can accelerate negotiations and commercial discussions. Keep contracts, repayment dates and margins visible before making a move.
Relationship: A controlling tone may meet resistance. Give the other person room to suggest a different approach.
Precaution: Avoid risky shortcuts, power contests and spending to project success.
Make Your Day Better: Negotiate with flexibility while keeping one firm financial limit.

Moolank 9
Money & Career: Day 5 encourages a fresh direction for your purposeful energy. Reconnect with someone useful or redirect effort toward a project with tangible impact.
Relationship: A candid, light-hearted exchange can ease tension, but do not skip an apology or unfinished conversation.
Precaution: Avoid impulsive giving, abrupt exits and using busyness to escape feelings.
Make Your Day Better: Close one loose end before embracing a new possibility.

When individual himself will become healthy, peaceful, disciplined and sensitive, only then positive change will be possible in family, society and nation.Editorial comment Parivahan Vishesh Samachar Patra Daily believes that in today's rush biggest need is not of outside, but of awakening inside.When yoga, mantra and music go together, then they do not become only program - they become medium to calm mind and connect society.This Yatra from Palghar to Kashi is going with this message - First save yourself, awaken yourself, only then society will awaken.Today's resolution -Healthy Individual • Prosperous Family • Peaceful Society • Prosperous Nation • Peaceful World.- Sanjay Kumar Bathla, Chief Editor, Parivahan Vishesh Samachar Patra DailyNote: This article is published in public interest based on information provided by organizer institution. For confirmation of local programs of Yatra contact concerned organizers.

District administration takes active steps towards drug prevention: DC

Parivahan Vishesh News

Emphasis is being laid on effective implementation of the NDPS ActDC Varsha Khanwal held a review meeting with the concerned officials.

Also reviewed the identified crimes, stressed on effective control of crimes and working in coordination with each other.

Jhajjar, November 10

The district administration is continuously making efforts to effectively curb drug abuse and drug trafficking in Jhajjar district. In this connection, DC Varsha Khanwal held a meeting with officials of the concerned departments and reviewed the effective implementation of the NDPS (Narcotic Drugs and Psychotropic Substances) Act and anti-drug activities. The DC gave necessary guidelines in the review meeting of the Narco Coordination Committee in the Mini Secretariat auditorium on Tuesday.In the meeting, the DC gave clear instructions to the officials that strict action should be taken as per rules against the people involved in drug trade and all the departments should work in coordination with each other to prevent drug abuse.DC Varsha Khanwal said that drug addiction affects not just individuals, but entire families and society. Keeping youth away from drugs and engaging them in positive activities is a priority for the administration. Legal action alone is not enough, but the participation of every segment of society is also crucial.The campaign for a drug-free society will be strengthened only through public awarenessDC Varsha Khanwal said that raising public awareness about the ill effects of drug abuse is the need of the hour. Awareness programs should be organized in educational institutions, villages, and urban areas. Students and youth should be informed about the physical, mental, and social harm caused by drug abuse. She said that parents, teachers, social organizations, and public representatives should also play an active role in this campaign. She instructed the concerned officials that drug prevention programs should not be limited to mere formalities, but rather that they should be used to create awareness and create a social environment against drug abuse.Special emphasis on effective implementation of NDPS ActWhile reviewing the action being taken under the NDPS Act in the meeting, the DC said that effective implementation of the law should be ensured to curb drug trafficking. Officials of the concerned departments should take prompt action in drug-related cases and proceed with the investigation and legal process in accordance with the established rules.He said that in addition to effective action against those involved in the illegal drug trade, concerted efforts should also be made to reduce the demand for drugs. To this end, better coordination between the police, administration, and other relevant departments is essential.Review of identified crimes alsoDuring the meeting, DC Varsha Khanwal also reviewed cases related to identified crimes. She inquired from officials about the progress of cases, action taken, and pending cases and directed that identified crimes be taken seriously. Effective action should be taken in each case according to the prescribed legal process, and unnecessary delays should be avoided. She said that to effectively curb crime, police and administrative officials must work with responsibility and seriousness. Regularly reviewing cases and monitoring their progress should ensure concrete results in crime control.Collective efforts will create a safe and drug-free societyThe DC stated that in the fight against drug abuse and crime, the participation of the public, along with the administration, is crucial. If every individual in society understands their responsibility and spreads awareness, social evils like drug abuse can be effectively curbed. He directed officials to maintain continuity in their work related to drug prevention, public awareness, and review of identified crimes. The district administration's objective is to provide a secure future for youth, strengthen law and order, and create a healthy, safe, and drug-free social environment in the district.This is presentOn this occasion, SDM Badli Vishal Kumar, SDM Beri Renuka Nandal, ACP Anirudh Chauhan, District Advocate Anuj Dahiya along with officials of Education, Panchayat, Health and Women and Child Development Department were present.

Those left out from the draft voter list will get another opportunity to get their names added: DC

Parivahan Vishesh News

Voters marked in ASDD category can get their names included in the final voter list by submitting the enumeration form and the prescribed declaration.

BLOs will conduct door-to-door contact, the list of missed voters will be displayed again on the notice boards of polling stations and on the Election Commission's website

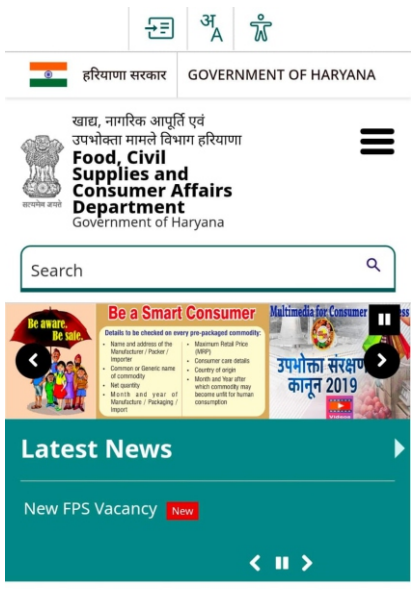

DC and District Election Officer Varsha Khanwal gave guidelines in the meeting

Jhajjar, November 10

There is good news for voters who were left out of inclusion in the draft voter list during the ongoing Special Intensive Revision Campaign 2026 under the Election Commission of India. The Election Commission of India has provided such voters another opportunity to get their names included in the final voter list. DC and District Election Officer Varsha Khanwal held a meeting of the concerned officials in the Mini Secretariat auditorium and informed that voters who were issued enumeration forms but whose forms were not received back due to being marked as absent, transferred, dead and duplicate (ASDD) and whose names could not be included in the draft voter list, will now be able to submit their forms again as per the prescribed procedure. Earlier, through video conferencing, Chief Electoral Officer Shri A. Srinivas gave necessary information in view of SIR.*Voters' list will be displayed again, BLOs will contact*The Deputy Commissioner stated that, as directed by the Commission, booth-wise lists of all such voters will be re-displayed on the notice boards of the respective polling stations, Panchayat buildings, urban local body offices, and Block Development and Panchayat Officer offices. These lists have also been uploaded in PDF format on the Chief Electoral Officer's website. These lists will also display the possible reasons for voters' names not being included in the draft list. He stated that the concerned BLOs, with the assistance of booth-level agents (BLAs) from political parties, will reach out to such voters. For this purpose, they have been instructed to conduct door-to-door contact, gather information from neighbors and family members, and contact them through available mobile numbers. BLOs will also guide voters on the process of filling out and submitting the forms.*Enumeration form can be downloaded using old EPIC number: DC*DC Varsha Khanwal stated that partially completed enumeration forms for all such ASDD voters will be re-generated on the ECINET ERO dashboard. Forms will be made available through BLOs, either physically or electronically, via WhatsApp, email, and SMS. Voters can also download and fill out their forms using their old EPIC number on the Election Commission website or the ECINET app. She clarified that voters who have not changed their residence will submit the completed and signed enumeration form along with a declaration explaining why they were unable to submit the form previously. This form can be submitted to the concerned ERO, AERO, or BLO in person or through an adult family member. Additionally, the facility to submit the form online using e-signature will also be available on ECINET.Those relocating within the state need not fill Form 8.The DC stated that voters who have changed their residence within the state will not be required to fill out Form 8. Such voters can submit the enumeration form, along with the prescribed declaration and proof of the new address, detailing the new address and assembly constituency, to the ERO/AERO of the respective assembly constituency. They can also seek assistance from the BLO at the polling station where they reside. To contact the BLO, a "Book a Call with BLO" facility is available on the Election Commission website and the ECInet app. For homeless individuals who do not have any address documents, the BLO's field verification report will be considered sufficient as proof of residence.Those who have already submitted Form-6 need not apply again.The DC stated that voters who have already submitted Form 6 for fresh enrolment during the SIR will not be required to submit the enumeration form and declaration form again. Their applications will be processed as per the prescribed procedure as per the Commission's clarification dated November 3, 2026. He stated that all received forms will be scrutinized and subjected to necessary verification by the concerned ERO under Rule 21(1) of the Registration of Voters Rules, 1960. Voters found eligible will be set aside and included in the final electoral roll as per the prescribed procedure. In such cases, the voter will be reassigned the same EPIC number allotted before the SIR.*Inclusion of names of eligible voters in the final voter list is the priority of the administration*District Election Officer Varsha Khanwal directed the concerned officials to ensure widespread publicity of these Commission instructions. Information about this facility should be disseminated, especially to homeless individuals and voters living in such areas. She stated that the district administration is striving to ensure that no voter who meets the prescribed eligibility criteria is deprived of the opportunity to have their name included in the final voter list. Furthermore, utmost vigilance will be exercised to prevent the possibility of duplicate registrations.

Now you can apply online for ration depot license till November 25, women will get 33 percent reservation

Parivahan Vishesh News

- Opening of new ration depots will provide convenience to eligible families, increase self-employment opportunities for youth and women: DC

DFSC Aditya Kaushik appeals to eligible applicants to study the guidelines and eligibility conditions before applying

Jhajjar, November 10

The Haryana government has taken significant initiatives to further strengthen the public distribution system in the state, ensure easy availability of ration to eligible families, and increase self-employment opportunities for youth. Under this initiative, online applications have been invited for the issuance of licenses for 2,651 vacant fair price shops (ration depots) in the state. This process includes a 33 percent reservation for women. Interested and eligible applicants can now apply online until November 25, 2026.DC Varsha Khanwal said that this initiative aims to address the problems faced by eligible families who have to travel to distant ration depots to obtain rations. The allocation of new ration depots will provide convenience to needy families. Additionally, eligible youth and women will gain self-employment opportunities, and public distribution system services will become more effective at the grassroots level.DFSC Aditya Kaushik informed that application for license of fair price shops can be made through Haryana Antyodaya Saral Portal https://saralharyana.gov.in . Before applying, interested applicants should thoroughly study the prescribed guidelines, application process and eligibility conditions so that they do not face any problem while applying. He informed that district wise and village wise details of vacant ration depots, detailed application guidelines and eligibility conditions are available on the official website of Food, Civil Supplies and Consumer Affairs Department, Haryana https://haryanafood.gov.in . Applicants can get information about vacancies available in their area through these websites.DFSC appeals to all interested and eligible applicants, especially youth and women, to avail this opportunity and apply online by the last date i.e. 25th November, 2026 and ensure their participation in strengthening the Public Distribution System in the state.

In the memory of Sant Shiromani Pandit Janaki Prasad Sharma, the three-day continuous recitation of the words of Sant Garibdas Maharaj was inaugurated.

Parivahan Vishesh News

Cabinet Minister Dr. Arvind Sharma attended the event with his entire family, and a large number of saints and devotees arrived.

Wife Dr. Rita Sharma and family members took blessings from saints and great men.On November 12th, at the conclusion of the Akhand Path, a huge feast will be held, and devotees will receive the Prasad.

Grandfather's ideals and values are our family's invaluable heritage, they inspire us to serve the people: Dr. Arvind Sharma

Jhajjar, November 10.

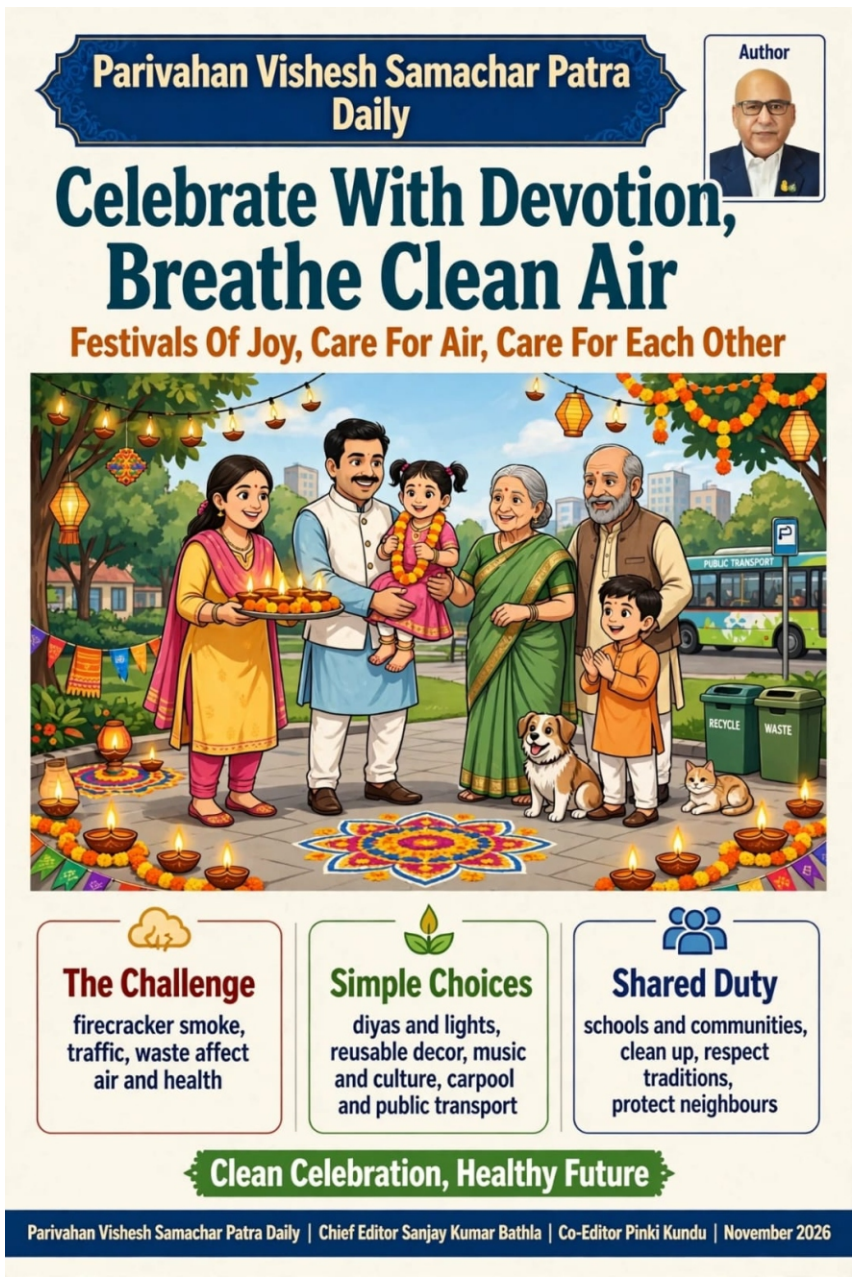

As part of the annual religious program held in memory of the revered Sant Shiromani Pandit Janaki Prasad Sharma, the grandfather of Haryana's Cooperation, Prisons, Tourism and Heritage Minister, Dr. Arvind Sharma, a three-day continuous recitation of the sacred words of Sant Garibdas Maharaj commenced with reverence and devotion on Tuesday. Cabinet Minister Dr. Arvind Sharma, along with his wife, Dr. Rita Sharma, and his entire family, participated in the religious ritual and received the blessings of the saints. A large number of saints and devotees attended the program. The recitation of Sant Garibdas Maharaj's nectar-like words filled the entire atmosphere with devotion. The three-day religious event will conclude on November 12. A grand feast will be organized to mark the occasion.Cabinet Minister Dr. Arvind Sharma said that his revered grandfather, Sant Shiromani Pandit Janaki Prasad Sharma, dedicated his entire life to spiritual contemplation, social service, and human values. He always inspired society to follow the path of truth, simplicity, virtue, and philanthropy. In his memory, the family annually organizes an uninterrupted recitation of the sacred words of Sant Garibdas Maharaj. This religious tradition not only connects the family to the ideals of their ancestors but also provides an opportunity to introduce the new generation to Indian culture, spiritual values, and traditions.Dr. Arvind Sharma said that the words of Sant Garibdas Maharaj are a precious spiritual heritage that guides human life. His teachings embody the message of humanity, equality, mutual love, brotherhood, and social welfare. Saints and great men have always inspired us to rise above caste and class discrimination and serve humanity. The teachings of saints are even more relevant today, as the pursuit of spiritual values is essential to fostering love, harmony, and mutual trust in society.The Cabinet Minister stated that the values and ideals instilled by his grandfather are an invaluable legacy for the entire family. Each member of the family is striving to contribute to social service and human welfare, following his lead. He stated that public service is true service to God. Helping the needy, extending support to the last person in society, and sharing in the joys and sorrows of others is truly following the teachings of saints and great men.Dr. Arvind Sharma said that the words of Sant Garibdas Maharaj are not only a source of spiritual knowledge but also teach the art of living. The saint's teachings inspire people to stay away from ego, discrimination, and evil practices and follow the path of truth and virtue. He said that this religious tradition, which has been followed by the family for years, will continue with the same devotion and dedication.On this occasion, a large number of saints and sages, who had arrived, highlighted the spiritual significance of the words of Sant Garibdas Maharaj and inspired the devotees to follow the path of truth, devotion, virtue and charity. Cabinet Minister Dr. Arvind Sharma, his wife Dr. Rita Sharma and other family members honored the saints and received their blessings.Dr. Arvind Sharma said that such religious events infuse positive energy into society and provide an opportunity to advance our rich spiritual and cultural traditions. He called on everyone to strengthen the spirit of love, harmony, brotherhood, and service to humanity in society.Akhand Path will conclude on November 12, a huge feast will be organised.Cabinet Minister Dr. Arvind Sharma said that the three-day Akhand Path organized in the memory of Sant Shiromani Pandit Janaki Prasad Sharma will conclude on Thursday, November 12. On this occasion, religious programs and a huge feast will be organized in the presence of saints and great men. He appealed to the residents of the area and devotees to come in large numbers to listen to the holy words of Sant Garibdas Maharaj, receive the blessings of the saints and great men and accept the Prasad in the feast. He said that this event is a special occasion for the entire family to express reverence, values and gratitude towards the ancestors.

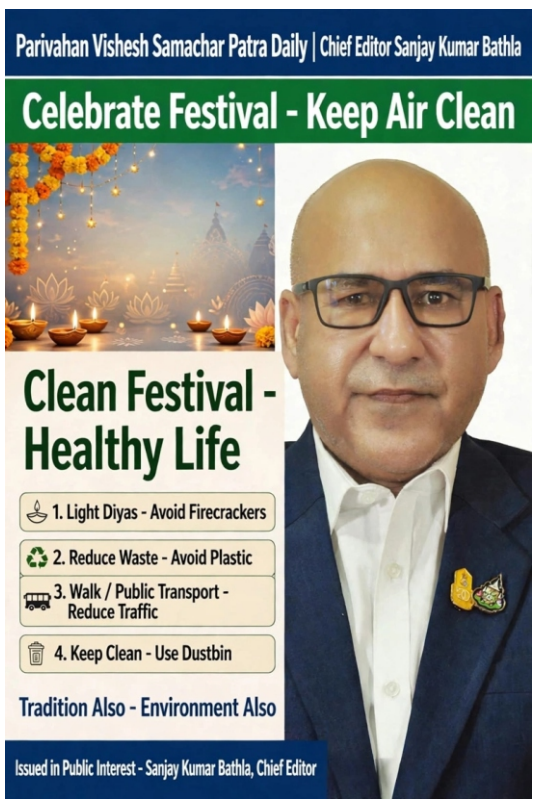

Parivahan Vishesh Samachar Patra Dail - FESTIVAL SPECIAL - EDITORIAL Celebrate With Devotion, Breathe Clean Air

Parivahan Vishesh News

*Parivahan Vishesh Samachar Patra Daily - FESTIVAL SPECIAL - EDITORIAL**Celebrate With Devotion, Breathe Clean Air**Festivals Of Joy, Care For Air, Care For Each Other - Protecting The Environment Does Not Mean Giving Up Traditions, It Means Celebrating Them Thoughtfully**Written By - Parvinder Singh - Presentation : Editorial Department, Parivahan Vishesh Samachar Patra Daily**Key Facts - At A Glance*- *Theme:* Indian Festivals and Air Pollution Awareness- *Major Festivals:* Diwali, Dussehra, Ganesh Chaturthi, Durga Puja- *What Festivals Give Us:* Prayer, food, music, lights, shared traditions, togetherness- *Main Sources Of Pollution During Festivals:* Firecrackers, extra traffic and congestion, decorations, food packaging, discarded materials, temporary installations- *Who Is Affected Most:* Children, older people, pets, and those who are unwell- *Core Message:* A Clean Celebration Is A Shared Responsibility, Not An Individual Burden- *Solution:* Diyas, lights, reusable decor, culture, public transport, clean-up, respect for traditions*1. Festivals Are The Soul Of India* India's festivals bring people together through prayer, food, music, lights, and shared traditions.From Diwali and Dussehra to Ganesh Chaturthi and Durga Puja, celebrations reflect the country's rich cultural diversity.Festivals are celebrations of life, gratitude, and togetherness.In every street, every home, every temple, there is light. There is music. There is food. There is love.*But along with this joy, one question also arises - can we celebrate in a way that our air remains clean and our neighbours remain healthy?*The answer is yes. Protecting the environment does not mean giving up our traditions; it means celebrating them thoughtfully.*2. Where Does Pollution Come From During Festivals?* Yet some festival activities can add to air pollution, especially when large crowds, traffic, fireworks, and temporary installations coincide.*A. Firecrackers - The Most Visible Source*Firecrackers are a visible source of concern during festivals such as Diwali.Their smoke and fine particles can worsen air quality, while the noise may disturb children, older people, pets, and those who are unwell.The smoke does not disappear in a few minutes. It stays in the air for hours, and people with asthma, heart problems and breathing difficulties suffer the most.*B. Traffic And Crowds*In some places, festival crowds and extra vehicles also contribute to congestion and emissions.When thousands of people come out at the same time in cars and two-wheelers, roads get jammed, and smoke increases.*C. Waste And Decorations*Decorations, food packaging, and discarded materials can create additional waste.Plastic plates, plastic cups, thermocol, polythene, and single-use decoration items after the festival become garbage on roads and in drains.The effects vary by location and weather, but awareness can help communities reduce avoidable pollution.*The problem is not the festival. The problem is the way we sometimes celebrate it.**3. Small Choices, Big Difference - How To Celebrate Cleanly*People can make simple choices that preserve the joy of celebration.*A. Choose Light, Not Smoke*Families can choose lamps, candles, or energy-efficient lights instead of fireworks, and decorate with reusable or natural materials.Diyas, colourful lights, rangoli, flowers, and torans give more beauty than smoke ever can.A home decorated with diyas looks more beautiful than a street filled with smoke.*B. Celebrate With Culture, Not Noise*Communities can organise cultural programmes, music, and shared celebrations that do not depend on firecrackers.Bhajans, folk dances, drama, food festivals, and community feasts - these are our real traditions.Our ancestors celebrated with devotion and culture, not with pollution.*C. Keep The Place Clean*During religious processions and public gatherings, organisers can provide waste bins, avoid single-use plastics, and arrange responsible clean-up.After visarjan, after procession, after bhandara - if we clean our own place, the city remains clean.*D. Reduce Traffic*Choosing public transport, carpooling, or walking where practical can also ease traffic.If ten families go in one bus instead of ten cars, pollution reduces, and togetherness increases.*4. Role Of Schools, Communities And Local Leaders* Schools, local groups, and community leaders have an important role.They can explain how smoke and waste affect people and the environment, while encouraging children to take part in creative, low-pollution celebrations.Children can make:- Paper lanterns- Clay diyas- Rangoli with natural colours- Greeting cards from waste paper- Posters on clean airMessages work best when they are respectful: traditions matter, and many can be observed in ways that are safer for our neighbours and surroundings.*We should not say - do not celebrate.**We should say - celebrate in a way that no one suffers.*Local authorities can support these efforts by sharing clear guidance, improving waste collection, and enforcing applicable rules fairly.When administration, community and citizens work together, festivals become cleaner and safer.*5. A Clean Celebration Is A Shared Responsibility*A clean celebration is a shared responsibility, not an individual burden.Families, businesses, event organisers, and public institutions can work together to reduce pollution while keeping festivals welcoming and meaningful.- *Family* can decide - this year we will celebrate without firecrackers- *Shopkeeper* can decide - I will not sell single-use plastic- *Organiser* can decide - I will arrange bins and clean-up- *School* can decide - I will teach children about clean air- *Administration* can decide - I will provide proper guidance and facilitiesSmall actions, repeated across many households and communities, can make a difference.One diya instead of one bomb does not look like a big change.But when one crore homes do it, the whole sky becomes clean.*6. Editorial View - Caring For Air Is Also Caring For Each Other* Parivahan Vishesh Samachar Patra Daily believes that Indian festivals are celebrations of life, gratitude, and togetherness.Caring for the air we breathe is also an act of care for one another.When we burst crackers, the smoke goes into our neighbour's home first.When we throw garbage on the road, our own children walk on it.*True devotion is not in noise. True devotion is in care.*Let us take a pledge this festival season:- We will celebrate with diyas, lights and love- We will protect children, elders, pets and patients- We will keep our street, our temple, our pandal clean- We will use public transport and reduce traffic- We will pass on traditions with pride, and also with responsibilityBy blending cultural pride with environmental awareness, we can pass our traditions on to future generations - and leave them a healthier place in which to celebrate.*Festivals will remain. Traditions will remain.**Let us ensure that clean air also remains.**- Sanjay Kumar Bathla, Chief Editor*

Parivahan Vishesh Samachar Patra Daily - Environment Awareness in Public InterestCelebrate festivals with happiness too - and - keep air clean too

Parivahan Vishesh News

Tradition also, environment also - Happiness of Diwali, Dussehra, Ganesh Chaturthi and Durga Puja can be celebrated without smoke and garbage tooArticle Dr Parvinder Singh Presenter Chief Editor: Sanjay Kumar BathlaNew Delhi - Festivals of India bring people together through prayer, food, music, lights and shared traditions. These celebrations reflect rich cultural diversity of country.But when heavy crowd, traffic, fireworks and temporary decorations happen together, air pollution increases.Clear opinion of Parivahan Vishesh Samachar Patra Daily is - Protecting environment does not mean leaving your traditions, but celebrating them with understanding and caution.Facts at a glanceFestivals: Diwali, Dussehra, Ganesh Chaturthi, Durga Puja and other Indian festivalsMain problem: Smoke of fireworks, fine particles, noise, traffic jam, single-use plastic and extra garbageMost affected: Children, elderly, sick people, petsSolution: Diyas, low electricity lights, reusable decoration, public transport, cleaning systemMain points1. What is harm from fireworks? Smoke and fine particles spoil air quality. Noise causes trouble to children, elderly, pets and sick people.2. Effect of traffic and crowd Extra vehicles in festivals increase traffic jam and emission.3. Garbage also is a pollution Decoration material, food-drink packaging and thrown garbage creates extra waste.4. Small change, big effect Change of one house seems small, but change of lakhs of houses becomes big clean air.Detailed descriptionPart 1 - Festivals are our identity Festivals are not only holiday. They are celebration of life, gratitude and mutual connection. Taking care of air we breathe in is actually like taking care of each other.Part 2 - Where is problem?Problem is not in tradition, in method.Instead of fireworks, diyas, candles or low electricity consumption lights can also give same light and happiness.For decoration things can be used which can be reused or which are natural.Part 3 - What can we do?Instead of fireworks diyas, candle, LED lightsCultural programs, music and collective celebrations - without fireworksDustbin in processions and functions, avoidance of single-use plastic, cleaning after programPublic transport, carpooling, walking where possibleIncluding children in creative, low pollution celebrationsPart 4 - What is whose role?Family: Start from homeSchool and community leaders: Explain respectfully, how smoke and garbage cause harmOrganizers: Arrangement of garbage management and cleaningLocal administration: Clear guidelines, improvement in garbage collection, impartial compliance of rulesEditorial comment Celebrating clean festival is not burden on one person, collective responsibility of all.By combining pride on traditions and awareness towards environment we can pass our heritage to coming generations - and leave for them such healthy world where they can celebrate happiness.Today's resolution - Tradition also - Environment also.Clean festival - Healthy life.- Sanjay Kumar Bathla, Chief Editor, Parivahan Vishesh Samachar Patra Daily

Rs 10 lakh jewellery theft case in Rourkela: Chhend police raids jewellery shop, owner detained

Parivahan Vishesh News

Stir among bullion traders due to police action at Kanak Alankar shop; investigation into sale of stolen gold and mortgaging it in finance companies
Report Dr Rajkumar Yadav Parivahan Vishesh Samachar Patra Rourkela

In case of theft of gold jewellery worth about Rs 10 lakh in Chhend area of Rourkela, Chhend police station police on Sunday took big action and raided jewellery establishment 'Kanak Alankar' located near Old Taxi Stand. Police has taken operator of shop into custody for questioning. After action shop was closed.According to information received, last month gold jewellery worth about Rs 10 lakh was stolen from house of Deepak Manik, resident of Chhend Colony. After incident Chhend police had registered case and started investigation. During investigation police got clues regarding involvement of a previously known criminal. On its basis he was questioned. Later police also took another person into custody for questioning.According to sources connected to investigation, information came to light that some of stolen jewellery was sold in various gold-silver shops of city. On basis of same clue police started search in different jewellery establishments, in sequence of which raid was also done in Kanak Alankar.In investigation this aspect also came to light that some stolen gold jewellery allegedly was mortgaged with various finance companies and lakhs of rupees obtained. Police is now investigating recovery of stolen jewellery, links of their purchase-sale and possible role of other people in this whole network.Surveillance necessary on purchase-sale of stolen gold - This incident has again underlined need of verification in process of purchase, sale and mortgaging of jewellery in city's bullion market. To stop purchase-sale of stolen jewellery, shopkeepers and financial institutions should do proper checking of seller's identity, purchase documents and ownership-related proofs.At present police investigation is continuing. However, involvement of persons taken into custody or concerned establishment is still subject of investigation. Final conclusion will come only after police investigation and legal process.

Massive fire in utensil shop near Vedvyas Chowk, news of explosion in two gas cylinders; serious questions raised on illegal gas business

Parivahan Vishesh News

Three fire engines took charge, demand for action on unsafe gas refilling business in areas adjacent to police station limits

Report Dr Rajkumar Yadav Parivahan Vishesh Samachar Patra Rourkela

Near Vedvyas Chowk of Rourkela on Sunday sudden massive fire broke out in a utensil shop causing panic in area. Fire was so terrible that in no time goods kept in shop burnt to ashes. According to preliminary information, there is also news of explosion in two LPG gas cylinders kept inside shop. Panic spread among nearby people due to sound of explosion.Incident is of Brahmani Tarang police station area. As soon as information received, three fire brigade vehicles of fire department reached spot and started operation on war footing to control fire. Actual reasons of fire breaking out have not been officially disclosed yet. However, at preliminary level possibility of fire due to firecrackers is also being expressed. Detailed information regarding damage and possible loss of life is awaited.But this incident has once again raised serious questions regarding unsafe business of gas and alleged illegal refilling activities in industrial city Rourkela. At local level business of refilling of gas is allegedly spreading fast at various places. Worrisome situation is that in Vedvyas area complaints are coming of allegedly unsafe gas refilling and business being run at places adjacent to boundary wall of Brahmani Tarang police station.If such activities are being run very near to police station, then this is also serious challenge for police and administrative monitoring system. Unauthorized refilling and storage of gas cylinders can become cause of big fire accident or explosion at any time. Innocent citizens living nearby may have to bear its consequences.Now question is whether administration is waiting for a big tragedy? Police, fire department, district administration and concerned supply department should run joint investigation campaign and take immediate strict action on illegal gas business, unauthorized refilling centers and unsafe storage. Any kind of negligence should not be acceptable in matter of public safety.

Diwali celebrated with joy in Rourkela amid traditional rituals, worship and fireworks

Parivahan Vishesh News

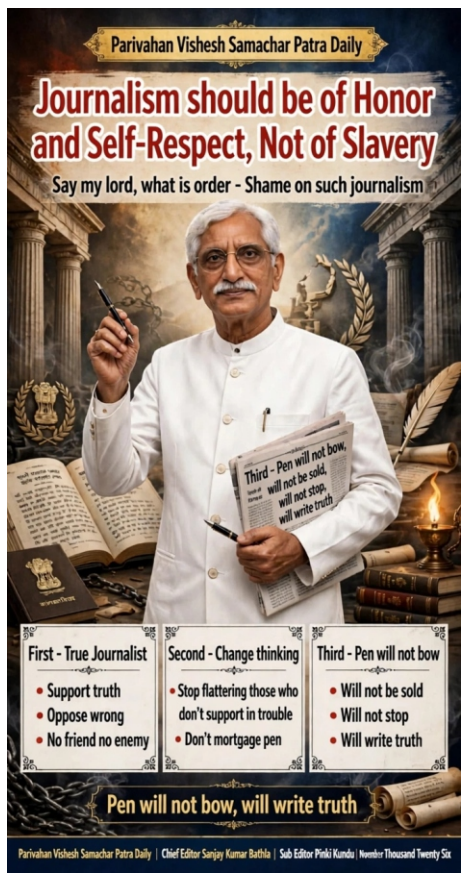

Homes and courtyards illuminated with colorful rangolis, attractive toran gates and lights of lamps; people shared festival happiness with exchange of sweets and gifts

Report Dr Rajkumar Yadav Parivahan Vishesh Samachar Patra Rourkela

The holy festival of Diwali, symbol of light, joy and prosperity, was celebrated with joy in Rourkela amid traditional devotion, religious faith and enthusiastic atmosphere. On this occasion festive charm was worth seeing in entire area. From houses to establishments, attractive decoration, glitter of lamps and colorful lights drenched atmosphere in festive colors.On occasion of Diwali people performed worship as per rituals while following their traditions and family customs. Attractive torans were decorated at main doors of houses, while in courtyard beautiful rangolis were made and lamps were lit as symbol of auspiciousness and good wishes. From children to elders, all participated enthusiastically in preparations of this festival as per their capacity and devotion.Special charm of festival was enhanced further when family members dressed up in new clothes, attractive garments and traditional ornaments and joined worship. In houses worship of Lakshmi-Ganesh was done and wishes were made for happiness-prosperity, peace and well-being of family. After worship, special enthusiasm was seen among children and youth regarding fireworks. Sound of crackers and light of lamps made joy of festival even more lively.Diwali is not only festival of lighting lamps and fireworks, but also opportunity to strengthen social affection, family unity and mutual harmony. In line with same feeling, people reached houses of their relatives, friends and close ones and presented sweets and gifts and gave Diwali wishes to each other.Amid sweetness of sweets, affection of loved ones and fragrance of traditions, festival of Diwali concluded in joyful atmosphere in Rourkela. Festival once again gave message that real prosperity of Indian culture lies in its traditions, family values and social harmony.

Journalism should be of respect and self-respect, not of slavery

Parivahan Vishesh News

Shame on such journalism... Speak my master, what is order?

True journalist is neither someone's PA, nor spokesperson, nor scribble clerk - he shows mirror

- Presentation: Editorial Department, Parivahan Vishesh Samachar Patra Daily

Main Facts - At a glance

- Subject: Condition, direction and self-respect of journalism in independent India
- Basic question: Will journalism be of respect or of slavery?
- Truth: Governments came-went, leaders-officers changed, rules changed, but condition of journalist did not improve
- Position of journalist: No salary, no pension, no facility, no security, no respect - Risk at every step**- Tortures:** Rudeness, beating, attacks, murder, false cases, attempt to break pen**- Resolve:** Now change thinking, raise voice of rights, don't mortgage pen

1. Not awkward subject, need to think Subject is not awkward or untrue, just need to think-understand it with positivity instead of negativity. Because if we talk about condition and direction of journalism in independent India, situation is not good. Even after so many years of independence, no solid and positive effort was made to improve distressed journalism. Governments came and went, leaders changed, officers changed, rules-laws changed, but condition of journalist and journalism kept becoming distressed instead of improving. **Are these conditions hidden from anyone? No, just lack of people who understand.**

2. Journalist is now awakening But even in small number, journalist after long time is now awakening, just to create atmosphere of independent, safe and respectable journalism of present along with future. As a result except few, almost every journalist is worried and trying also, and should be. Because in democratic India only press is there, which selfish people used from time to time, no one ever tried to make journalism better. This is reason that except few people, large number of journalists and their families had to face all kinds of problems and risks.

3. Reality of journalist - Only risk No salary, no pension, no facility, no security and no respect.Only risk and humiliation at every step. Otherwise most journalists had to face tortures like rudeness, inhumanity, beating, attacks, murder and false cases at every step. For this there will hardly be any lucky journalist who remained untouched from these tortures. Whoever tried to do impartial journalism of public concern, attempt was made to break or mortgage his pen, journalists were harassed.

Question is only that during all these kinds of tortures and harassment, who remained with victim journalist and his family to help?

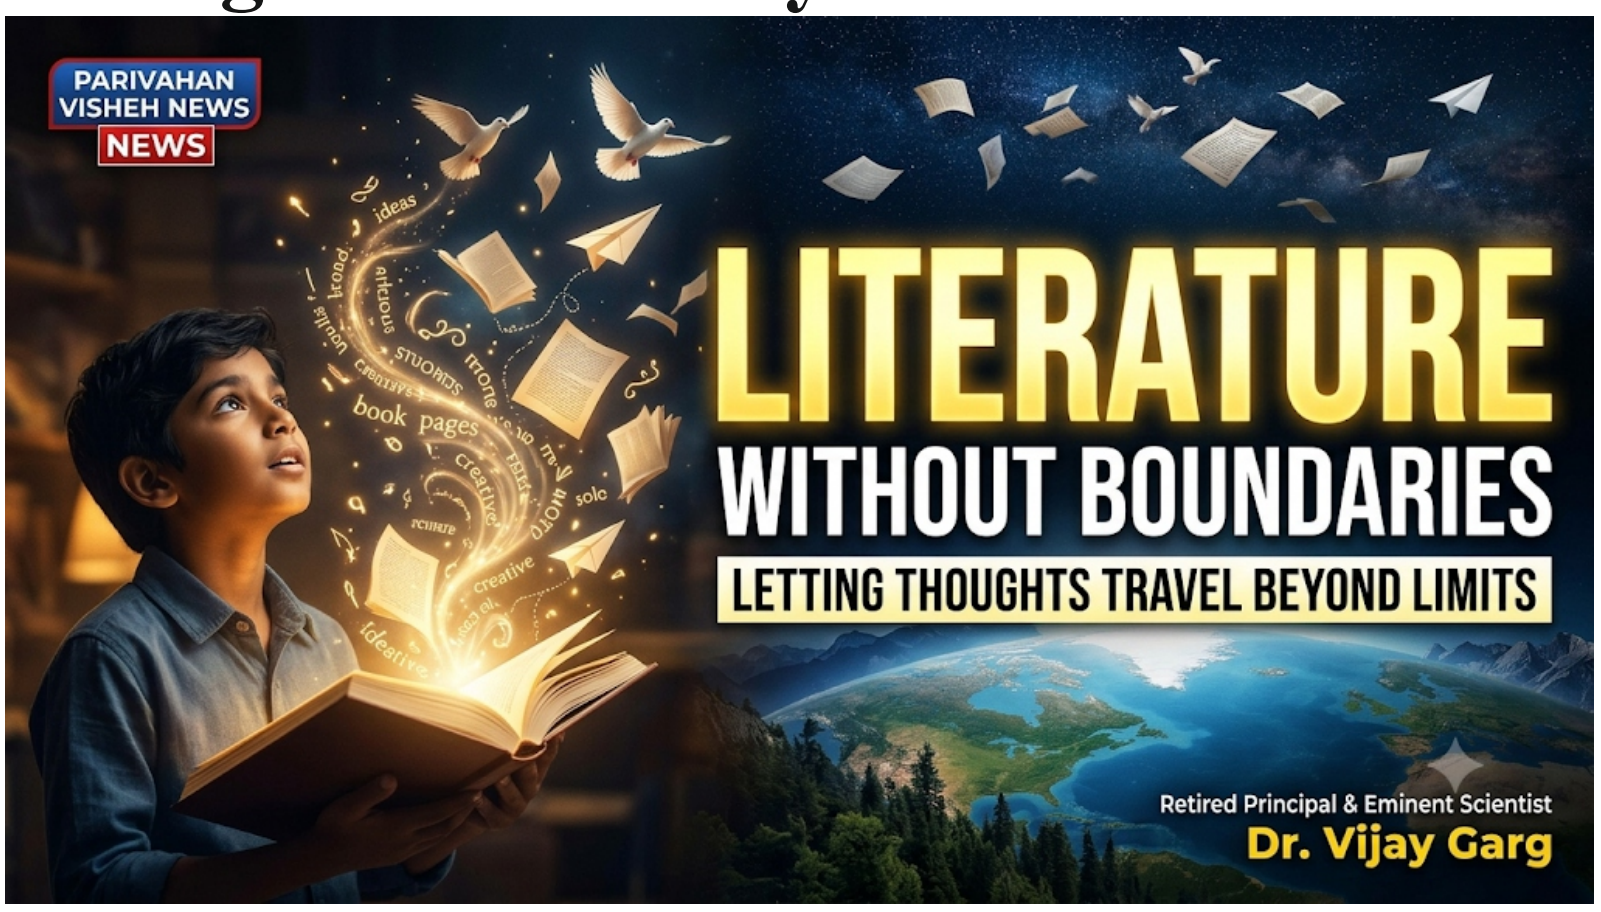

4. Change thinking - Whose side to take? Every journalist has to understand this and change thinking that who supported him in time of trouble. Is it appropriate to support that leader, officer, public representative who did not support in time of trouble? Have to stop running to appear at one information of every selfish person with him. Have to change thinking and stop rubbing pen in flattery of one who did not support in your sorrow. Who could not protect your respect, don't mortgage your pen for him. **Journalism should be of respect and self-respect, not of slavery or bonded labourers.**
5. Shame on such journalism Shame on such journalists who bowing down before his master says... **Speak my master, what is order?** This is not journalism, it is slavery, it is stigma on pen. True journalist is neither PA of any party, leader, officer, nor spokesperson, nor scribble clerk. He writes truth for change with thinking of showing mirror. A true journalist supports truth and opposes wrong, he has no concern with ruling or opposition, no friendship with anyone, no enmity with anyone. Better society and happy-beautiful India be formed, this should be thinking and effort of every journalist.

6. Editorial comment - There is still time Clear opinion of Parivahan Vishesh Samachar Patra Daily is - Journalist is not servant, journalist is sentinel of democracy. If journalist got scared, got sold, bowed down, then democracy will become blind. Therefore there is still time, change thinking and raise voice of rights. Because journalism now has to be done of respect and self-respect. **Pen will not bow, will not be sold, will not stop.**

Will write truth, will show truth, will fight for truth.

- Sanjay Kumar Bathla, Chief Editor

Literature Without Boundaries: Letting Thoughts Travel Beyond Limits

Parivahan Vishesh News

Dr. Vijay Garg

Literature is an ocean of thoughts, imagination, emotions and experiences. It is a universal language that connects human beings beyond geographical, cultural, religious and linguistic divisions. Unlike political boundaries that separate nations and societies, literature brings people closer by sharing ideas, stories, values and emotions. Its true strength lies in its ability to travel freely across time and space.Literature without boundaries represents freedom of thought and expression. A writer should not be restricted by narrow ideologies, social divisions or traditional expectations. The purpose of literature is not simply to entertain but also to question, educate, inspire and transform society. Through poetry, stories, novels, essays and critical writings, authors explore human relationships, social inequalities, scientific developments and philosophical questions.History provides numerous examples of literature influencing social transformation. Great writers have challenged injustice, exposed exploitation and encouraged people to think independently. Their words have crossed national borders and inspired generations. A literary work created in one corner of the world can influence readers in another because human emotions and fundamental experiences are universal.Language should never become a barrier to literary creativity. Punjabi, Hindi, English and other languages carry their own cultural richness and intellectual traditions. Translation enables ideas to move between languages, allowing readers to experience different cultures and perspectives. A good literary creation belongs not only to its author or language but also to humanity.The digital revolution has further expanded the horizons of literature. Online magazines, electronic books, digital libraries and social media have made publishing more accessible. Writers from villages and small towns can now reach international audiences. Young authors can share their creativity without depending entirely on traditional publishing institutions.Nevertheless, literature without boundaries does not mean literature without responsibility. Freedom of expression should be accompanied by honesty, sensitivity and respect for human dignity. Literature should challenge harmful traditions, not promote hatred; encourage disagreement, not intolerance; and strengthen humanity rather than divide society.Modern literature must also embrace science, technology, environmental awareness, education and changing human relationships. Writers should explore emerging realities, question outdated assumptions and encourage readers to develop independent thinking.Ultimately, literature is not confined to books, libraries or classrooms. It exists wherever human beings express their experiences, dreams, struggles and aspirations. Its boundaries expand whenever a new idea touches a human heart.

Literature has no geographical boundaries, no limitations of language and no expiry date. Its true identity is freedom, its strength is imagination, and its ultimate purpose is to unite humanity through knowledge, sensitivity and wisdom.A thought may begin with one writer, but through literature, it can become the voice of the world.**

Relation, relation is not a joke - Truth hidden behind status smile

Parivahan Vishesh News

People put photos of relations on status with great fondness - But behind the photo actually another photo is seen - Anamika Gupta's poem is mirror of today's relations

- Presentation: Editorial Department, Parivahan Vishesh Samachar Patra Daily

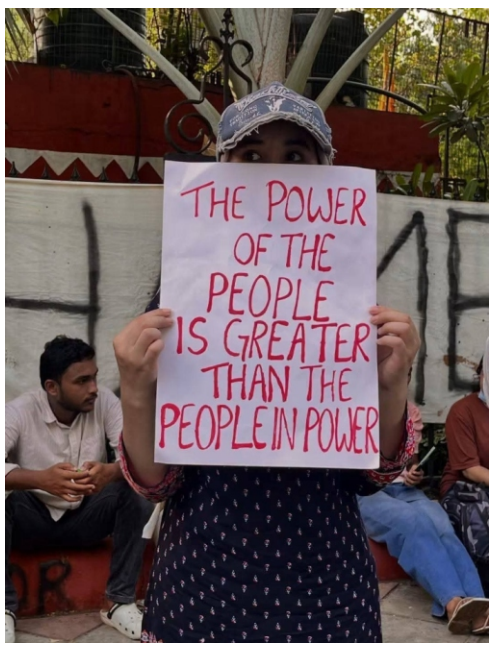

Main Facts - At a glance -
Composition: Poem - Relation, relation is not a joke- _Creator:_ Anamika Gupta- _Subject:_ Show off in today's relations, fake smile, leaving in trouble and lack of loyalty- _Main line:_ Relation has become dependent for fulfilling relation- _Message:_ Relation is seen in photo, relation is not fulfilled in life - Relation needs togetherness, not status _Original poem -_ _Relation, relation is not a joke....._ _With great fondness they put__Photos of relations, people on status__But behind the photo actually__Another photo is seen_ _Relation, relation has not become a joke__Because__Relation has become dependent to fulfill relation__Where is smile hidden behind smile__Showing fake smile has become ritual__Horns run away from donkey's head__Running away in trouble__Nowadays has become nature of relations_ _Don't wish for loyalty nowadays__Maybe society has become filled with disloyal nowadays_ _- Anamika Gupta_ _1. What is the poem saying? - First understand direct meaning_ This poem is not long, but hurts deep. Poetess says - People with great fondness put photos of relations on status. They show - See, how happy we are, how good our family is, how true our friends are. But behind the photo another photo is seen. What is that second photo? That is truth. - In photo there are smiling faces, in reality there are distances in heart- In photo there are people hugging, in reality conversation is closed- In photo there are people standing together, in reality people who leave in trouble _Poem says - Relation is no longer relation, it has become a joke.__Because relation has become dependent to fulfill relation._ Dependent means - To crave for something, to need something. Relation today itself is craving for its own fulfillment. _2. Status relation - Second photo behind photo_ _A. Why do people put photo on status?_ Nowadays easiest way to show relation has become status. - Photo on birthday- Photo on marriage anniversary- Photo on festival- Photo while going for outing As soon as photo is put people write - My best friend, my life, my family, my world. But poetess says - _Behind photo another photo is seen._ Which is that second photo? - That photo in which there is no talk for months- That photo in which phone was not picked when help was asked- That photo in which left alone in trouble- That photo in which badmouthed behind back _Photo of status smiles, photo of real life cries._ _B. Why has show off increased?_ Because today fulfilling relation seems difficult, showing seems easy. - To fulfill need time, to show need only one photo- To fulfill need sacrifice, to show need only one caption- To fulfill have to forgive, to show have to only smile _Therefore people fulfill less, show more._ _3. Fake smile - Where is smile hidden behind smile_ Most touching line of poem is - _Where is smile hidden behind smile__Showing fake smile has become ritual_ Understand its meaning - Nowadays people smile, but smile is not true. - Smile in front, burn behind- Praise in front, slander behind- Hug in front, run away behind Why has to show fake smile? Because - - Have to show society that we are happy- Have to show relatives that we have no quarrel- Have to show world that our family is best _Fake smile has become ritual._ Ritual means - Which is done again and again, becomes habit. Now people fake smile without thinking. Have to smile while getting photo clicked, so they smile.Have to look happy while putting status, so they look happy. _But where did smile of heart go?__That smile which came without reason, which came seeing loved ones, which was true - that smile is now hidden._ _4. Running away in trouble - Like horns from donkey's head_ A desi proverb has been used in poem - _Horns run away from donkey's head__Running away in trouble__Nowadays has become nature of relations_ Donkey does not have horns on head. This proverb is said when something suddenly disappears. Poetess says - Like horns disappear from donkey's head, similarly as soon as trouble comes relatives disappear. This has become nature of today's relations - has become habit. _A. All together in happiness, no one in sorrow_ - All come in marriage, no one comes in hospital- All together in party, no one together in debt- All congratulate on success, all go away on failure- Hundred people to get photo clicked in happiness, not even one to give shoulder in sorrow _B. When is relation tested?_ Relation is not tested in happiness, it is tested in sorrow. - When there is no money, then who is together?- When there is illness, then who comes to ask?- When there is defamation, then who stands?- When there is loneliness, then who calls? _One who runs away in trouble is not relative, is spectator.__One who stands together in trouble, only he is true relation._ Poem hits on this only - Running away in trouble has become common nowadays. _5. Wish for loyalty - Society filled with disloyal_ Last part of poem is most painful - _Don't wish for loyalty nowadays__Maybe society has become filled with disloyal nowadays_ Loyalty means - Dedication, honesty, fulfilling promise. Wish means - Desire, want. Poetess says - Nowadays it is useless to even wish for loyalty. Why? Because society has become filled with disloyal. - Those who promise, don't fulfill- Those who swear, break- Those who promise to stay together, leave and go away- Those who talk of friendship, change as soon as self-interest ends _Disloyalty is no longer exception, has become common thing._ That is why people say - Don't trust anyone, all are selfish. But is really everyone disloyal? No. In society even today there are loyal people. - Even today parents are loyal for their children- Even today some friends stand together in trouble- Even today some brother-sister give life for each other- Even today some husband-wife fulfill togetherness in happiness-sorrow _Poem is not making us disappointed, is awakening us. - It is saying - Search loyalty, save loyalty, keep loyalty alive._ _6. Why is poem necessary in today's society?_ This poem is necessary today because - _A. Mobile made relations small:_ Earlier people used to go to meet, now they become happy seeing status only. No time to meet, but time to see status. _B. Self-interest made relations heavy:_ Relation is good till there is self-interest. Self-interest ends, relation ends. _C. Show off made relations hollow:_ More important than how relation is, has become how relation looks. _D. Patience let relations break:_ Earlier people used to fulfill relation even in quarrel, now they break relation on small matter. _Poem stops us and asks - Is this relation? - Has relation remained limited only to photo?_ _7. How is true relation? - Learning from poem_ Poem not only complains, it also makes us identify true relation. _True relation -_ - _Seen not in status, seen in togetherness:_ Who picks phone in trouble, he only is true- _Seen not in smile, seen in tears:_ Who cries in your sorrow, he only is true- _Seen not in photo, seen in decision:_ Who leaves his own benefit for you, he only is true- _Seen not in words, seen in behavior:_ Who does not say, shows by doing, he only is true _Remember three things to fulfill relation -_ _First - Give time:_ Relation needs time. Meet once in week, call once, ask condition once. _Second - Forgive:_ Mistake happens in relation. Learn to forgive. Breaking relation on every mistake is not relation, is ego. _Third - Stand in trouble:_ All are together in happiness. Stand together in sorrow. This only is real test of relation. _8. Editorial comment - Need togetherness, not photo_ Parivahan Vishesh Samachar Patra Daily believes that this poem of Anamika Gupta is story of every house today. We all have seen this - - People smiling in photo, in reality don't talk to each other- Those writing brother-brother on status, in reality fight for land- Those claiming friendship on status, in reality don't pick phone in trouble _Poem shows us mirror._ It says - _Relation is not joke.__Relation is thing to fulfill, not to show._ _Take pledge today -_ - We will fulfill relation not for status, but for heart- We will smile not fake smile, but true smile- We will not run in trouble, will stand together- We will not wish for loyalty, will show loyalty by doing _Because photo gets erased, status gets removed.__But fulfilled relation always remains alive._ _In house where relation is fulfilled, there status is not needed.__There relation itself smiles._ _- Sanjay Kumar Bathla, Chief Editor_

If democracy survives, only then will people survive!

Parivahan Vishesh News

(Article: Sanjay Parate)

In Khategaon of Madhya Pradesh a police inspector has been murdered. Killers are people connected to illegal business of liquor. It is said that connection of this liquor mafia is connected to Gujarat. There also there is BJP government only. It means mafia gang are flourishing brazenly in BJP ruled states. Do crime here, then run away there. Do there, then run here. Both places father's only raj is there. Full protection will be got, condition is that a share of loot should reach masters. After oppression cycle on public now BJP raj is failing to give security to officers of administration also. Same condition of whole country is this. For criminals neither fear of law remained nor rein of system. When criminalization of politics happens, then this only happens. What is happening in BJP ruled states, that is peak of this disorder.Mafia is not one, many are. There is liquor mafia, sand mafia, mining mafia, animal mafia, land mafia, grain mafia, transport mafia, water mafia, kidney mafia, medicine mafia, forest mafia, education mafia, recruitment mafia, election mafia, property mafia, and how many mafias are there not known. Every department and every ministry of BJP-Sangh raj is mafia. Now our country is mafia प्रधान country. Ancient Hindustan is called 'golden bird'. Now how much truth is in this, not known. But credit definitely goes to our Modiji that in his raj developing India today is definitely known in country and abroad by name of 'mafia's bird'. Where put hand, there only mafia. All have their misdeeds and businesses. In this business only profit is profit, no question of loss at all.Modi government is government running in loss. To recover from it it has made disinvestment ministry. Its work is to search and sell government and public properties at throwaway prices, so that anyhow budget deficit can be compensated. This is laborious work. Opposition of public also is tremendous. When see then, public comes on roads. Mess of law and order gets created. Biggest work of government is to maintain law and order, otherwise who will ask about any bird named government!So, to maintain law and order government has to somewhere abuse people and that also pure mother-sister abuses, somewhere scare-threaten, somewhere lathi charge and somewhere tear gas shells, then somewhere real bullets also have to be fired, somewhere sexual violence also has to be done. And if place like Delhi, in opposition Gen Z and signal of Tadipaar, then all this has to be done together at once. Let Supreme Court keep shouting, as much it has to shout, whatever has to be done, let do, but in end supreme will be only Modi-Shah-Bhagwat's government only. In end Supreme Court will do same, what it is doing in case of Election Commission. It will express agreement with arguments of public and give decision in favor of Commission. Making everyone happy one by one only is proof of impartiality.From this it is known that government is working. Everyone's work is divided. Mafia sell liquor, sell sand, sell grain, sell water, sell land, sell jobs, dig whole earth and sell minerals and tribals. Government's work is to sell country. Work of selling country can be done only by government, after all any random person cannot do this work. Work which ordinary public cannot do, that work government only will have to do.But before selling country government has to be sold. Before selling government conscience has to be sold. Before selling conscience self has to be sold and to sell self one has to sit in lap of Epstein. Whole Modi government is sitting in lap of Epstein spread in his files. Delay is only of Trump lifting sheet.Trump also is not any fool that just like that lift sheet. He is representative of imperialism. He has to buy country, buy almost for free. He only threatens to lift sheet and sometimes lifts this thing, then that thing for free. He threatens and fearing that underwear will slip our government refuses to buy oil of Russia, is sitting ready for trade agreement like decorated bride. One man of Trump bypassing government directly lands in Mumbai and our foreign minister reaches there to prostrate. Now any minister santri of America is bigger than our Prime Minister. American minister is directly talking business of oil refining with Ambani and our petroleum minister is busy tying string of his underwear. Preparation is being done to send this same minister again to Rajya Sabha from Madhya Pradesh. Perhaps he will now teach whole government to tie string. In this Sanghi era of national homosexuality tying string is biggest art. Whom this art comes, as if he tied whole government. Now this government should celebrate 'Tie String Day' also after Yoga Day.Now this government should make mafia ministry also. Public opposes selling country. Money-animals oppose tax on rich. But no mafia will oppose levying mafia-tax. Openly loot property of country and pay little tax. Loot will also get status of law and life of officers, employees like Narendra Kumar Singh, Dharmendra Chauhan, Narendra Sharma, Subedar Singh Kushwah, Prasann Singh Baghel, Mahendra Bagdi, Harikesh Gurjar, Dilip Puri - like (these are names of Madhya Pradesh only.) will also be saved. No hassle of catching mafia, no exercise of getting them punished. Whatever loot will happen, will be legal, one number's pure loot-goods. Treasury of government will increase, prosperity of leaders will be and developing India will move one step further. Government may keep marching on spot, but steps of country should definitely move forward.This only is biggest problem. Country wants to move forward and opposition is holding its collar and pulling back. Pulling country back is anarchy. Such anarchy creates danger to democracy. Biggest problem in front of Sanghi gang is this only that whether to save democracy in country or advance it! For now it has decided to save democracy. To save democracy it can postpone work of advancing country till 2047. Now it also is measuring roads on foot to save democracy against anarchy of opposition. Home Minister Amit Shah himself is leading these foot travelers, that also carrying tricolor on shoulder. Same tricolor which Sanghi gang always called inauspicious, same tricolor Home Minister is forced to carry. Heart is saffron, but in hand is tricolor. How many antics will Pappu make do to save democracy, not known! In last 12 years not even a particle of dust of road had stuck on foot of same Home Minister, but oh these days!, same Home Minister is roaming on foot on roads. Why, to save democracy only na!!To save democracy it is necessary to save Modi-Shah-Bhagwat. To save this trio it is necessary to save Gyanesh Kumar. This only is Gyanesh Kumar, on whose shoulders Sangh-BJP has placed democracy, otherwise where was this strength in anyone's shoulders. This Gyanu only is, who by taking out thirteen and half crore infiltrators has given life donation to democracy. Otherwise these infiltrators and anti-nationals had only taken life of democracy. So the Gyanu who gave life donation to democracy, holy work of saving his life also Sanghi gang will have to do. Whether for that lathi has to be charged on Gen Z or law of lifelong immunity has to be made for his misdeeds. Gyanesh Kumar will not resign, then will not only, and nor will any debate happen in Parliament on this matter.In BJP raj resignations do not happen. Not happening of resignations only is guarantee of protection of democracy. One resignation happened from this government, opposition's courage has increased so much that now they are sitting ready to take resignation of whole government, raising slogan of regime change. This is sign of democracy becoming weak. Asking resignation of government is asking resignation of democracy. In name of democracy India group is misleading whole country. This only is anarchy.BJP equals country equals democracy -- this only is basic mantra of Sangh-BJP. But India group is not ready to accept it. In this country Pappus' democracy is separate and Tadipaars' democracy is separate. Pappus' democracy wants system for people of this country, therefore it wants regime change through constitutional way, through demonstration of people in Ramleela Maidan of Delhi. Sangh-BJP's democracy wants people for its system, therefore it excludes 13-14 crore people from their voting rights and for such misdeed comes on road and does drama of fighting against anarchy. Such a drama, which has no relation with people and whose only aim is to save its fascist system from people-wrath. Its tongue is reverse, therefore it calls fascism democracy. Therefore it targets flag kept on shoulder of people and does sexual violence with girls-women and calls it protection of democracy. Actually, Sanghi gang wants mafia raj in country, in which there is full exemption to loot in name of Ram. For last 12 years it is doing politics of people-destruction in name of democracy and it tells this anarchy only as good governance and Ram Rajya.But if democracy survives, only then people will survive. Democracy of India breathes in Constitution of Baba Saheb. Therefore, all Pappus of India group are fighting fight not only to save democracy, but also to save people. Against fascist anarchy inside Parliament and outside also on roads, they are fighting this fight. Fifty-six inch silence has spread in Sanghi gang. All are busy tying their string. They want to tie Jan-sagar of Ramleela with that string's thread, which is entangled in files of Epstein. Under leadership of Pappus people of this country is fighting fight to save its democracy, because it knows that if democracy survives, only then its existence will survive.(Author is Vice President of Chhattisgarh Kisan Sabha associated with All India Kisan Sabha. CISF seizes 13,845 tonnes of illegal coal in Jharkhand

Parivahan Vishesh News

Kartik Kumar Parichha, State Head - Jharkhand

Ranchi: The Central Industrial Security Force (CISF) seized a total of 13,845 tons of coal in the CCL Kargali area, taking action against illegal coal trade and transportation. This included a pickup truck loaded with approximately six tons of coal. Upon seeing the officers, the driver abandoned the vehicle and fled. Furthermore, raids were conducted at the Tarmi coal dump and the Amlo Number 5 Pipal Dhora settlement, and 7,845 tons of illegally stored coal was recovered from various locations. Based on information received, an ambush team was formed under the leadership of the operations in-charge, under the direction of CISF Unit Commandant Raj Pratap Singh of CCL Kargali. The team was deployed between the Amlo checkpost and Deendayal Chowk.Meanwhile, the soldiers spotted a pickup truck approaching. Upon seeing the CISF, the driver fled, abandoning vehicle number JH 03K 6043 on the main road. When the soldiers searched the vehicle, they found approximately six tons of coal loaded inside. Efforts were made to identify the owner, but he could not be located. The pickup truck and coal were subsequently seized.A CISF team raided the Tarmi coal dump area and recovered 1,455 tons of illegally stored coal from various locations. Meanwhile, 6,390 tons of coal was seized at various locations in the Amlo Number 5 Peepal Dhora settlement.In this way, including the approximately six tonnes of coal recovered from the pickup vehicle and the 7.845 tonnes recovered during the raids at both the places, the total seizure is 13.845 tonnes.According to CISF, the seized coal has been handed over to CCL management for necessary legal action. The process of action in the case is underway under the provisions of the Mineral and Mineral Development and Regulation (MMDR) Act. This CISF action is being considered an important step towards curbing illegal coal transportation and storage in the region.

Supreme Court Takes a Firm Stand Against Cyber Criminals, Rejects Bail Plea

Parivahan Vishesh News

On November 6, the Supreme Court sent a strong message against cybercrime, observing that cyber criminals deserve nothing less than imprisonment and have no place in a civilized society.While rejecting the bail application of an accused involved in a cyber fraud case, a three-judge Bench headed by Chief Justice of India Justice Surya Kant orally remarked,"Cyber criminals have no space in society." The Bench also declined the accused's request to surrender after Deepavali. During the hearing, the Court made it abundantly clear that cyber offences would not be treated lightly under any circumstances. Joymalya Bagchi, a member of the Bench, warned the accused's counsel that if the accused failed to surrender voluntarily, the police would take appropriate action in accordance with the law to secure his custody.Reflecting the judiciary's uncompromising stance against cybercrime, the Supreme Court refused to entertain the bail plea of a cyber fraud accused and made significant observations on the grave threat posed by cyber criminals. The Bench, led by Justice Surya Kant, categorically stated that cyber criminals have no place in society and should remain behind bars. While dismissing the bail plea, the Court also rejected the accused's request to surrender after Deepavali.The Court refused to show any leniency towards cyber offenders. During the proceedings, the Chief Justice observed that the Court had no sympathy for cyber criminals and emphasized that such offenders pose a serious threat to society. The Bench further remarked that while even persons convicted of heinous crimes such as murder may, in certain circumstances, be rehabilitated, cyber criminals do not merit similar leniency because of the extensive harm caused by their activities. Joymalya Bagchi also cautioned that if the accused failed to surrender, law enforcement agencies would take the necessary steps to apprehend him. These observations come at a time when the Supreme Court is actively strengthening the national response to cybercrime, particularly so-called "digital arrest" scams. The same Bench had recently directed authorities to establish robust Standard Operating Procedures (SOPs) and institutional mechanisms to prevent cyber fraud and ensure timely refunds to victims. The Court had also directed law enforcement agencies to initiate criminal proceedings against cyber fraudsters through the Zero FIR mechanism. During earlier proceedings, the Court considered a status report submitted by the Indian Cyber Crime Coordination Centre (I4C). According to the report, complaints relating to digital arrest scams registered on the National Cyber Crime Reporting Portal declined from 123,672 in 2024 to 58,249 in 2025. Up to June 30, 2026, a total of 16,377 such complaints had been reported. The report further informed the Court that the e-Zero FIR mechanism had become operational in 19 States, while 14 States had notified their State Cyber Crime Coordination Centres. Progress was also reported on telecommunications-related regulatory measures aimed at strengthening cybercrime prevention and user verification frameworks. Key Facts The Court reaffirmed its co mmitment to combating cyberc rime and digital arrest frauds thr ough stringent legal and institutio nal measures. The Bench observed that cyber criminals have no place in society and should remain behind bars. The accused's request to surren der after Deepavali was also rejected. The Supreme Court rej ected the bail plea of an accuse d involved in a cyber fraud case. Statistics presented by I4C showed a decline in digital arrest complaints and progress in implementing e Zero FIR and State Cyber Crime Coordination Centres. By refusing to grant relief to a cyber fraud accused, the Supreme Court has reinforced the message that cybercrime is being treated with utmost seriousness in India. The ruling serves as a stern warning to cyber criminals that they should expect rigorous judicial scrutiny and little tolerance for offences that undermine public trust, financial security, and the nation's digital ecosystem. It also underscores the expectation that law enforcement agencies adopt a proactive, coordinated, and technology-driven approach to combating cyber-enabled crime.

A cache of weapons and ammunition was recovered in a joint operation by the SSB and police.

Parivahan Vishesh News

The weapons were hidden in the hilly forest near Morve Dam. 48 live cartridges and 12 EFCs were also recovered.

Gayaji: A joint team of the 29th Battalion Sashastra Seema Bal (SSB), Gayaji, and local police conducted an intensive search operation in the Bannubagicha police station area of Lakhisarai district and recovered a cache of weapons and ammunition. The operation was conducted under the guidance of Commandant Kunal of the 29th Battalion Sashastra Seema Bal, Gaya, and the leadership of Deputy Commandant Abnish Yadav.The 'F' Battalion, Bannubagicha, and the Bannubagicha police station of Lakhisarai district jointly conducted an intensive search operation in the New Barmasiya, New Bankura, Panchbhur, Simratari, Morve Dam, and Shringi Rishi hill areas. During this operation, suspicious locations were thoroughly searched and searched. During the search, weapons, magazines and cartridges of various bores hidden in the forest area of Dehni Tola Tikhav hill, about 400 meters south-east of Morve Dam, were recovered.

The recovered material includes:
- SBBL (12 bore) rifle – 01
- 9 mm SMG carbine – 01
- 9 mm SMG carbine magazine – 01
- 9 mm SMG carbine sling – 01
- 9 mm live cartridges – 11
- 5.56 mm live cartridges – 03
- 7.62 mm live cartridges – 13
- 7.62 mm MG live cartridges – 12
- .303 live cartridges – 09
- 7.62 mm EFC – 10
- 12 bore EFC – 02

- Binoculars – 01
- Round charger – 02
- Mobile wired earphone – 01A

total of three weapons, four magazines, 48 live cartridges of various bores, 12 EFCs, and other material were recovered during the joint operation. All the recovered weapons, ammunition and other materials were duly handed over to the police of Bannubagicha Police Station, District Lakhisarai for further legal action.

This joint operation by the SSB and the police is being considered an important step towards strengthening the security arrangements in the area and curbing suspicious activities.

High Court strict in the case of rape of an intermediate student, Legal Services Authority issued instructions

Parivahan Vishesh News

Kartik Kumar Parichha, State Head -Jharkhand

Ranchi: The Jharkhand High Court has taken a tough stand on the incident of gang rape of an 18-year-old intermediate student in Ratu police station area of the capital Ranchi.

Given the seriousness of this case, Justice Sujit Narayan Prasad, a judge of the Jharkhand High Court and executive chairman of the Jharkhand State Legal Services Authority (JSLSA), directed the District Legal Services Authority, Ranchi, to immediately provide all possible assistance to the victim and her family. Following the judiciary's initiative, DSLSA has expedited action to provide legal aid, protection, and compensation to the victim.Following the High Court's directive, Ranchi Civil Court Justice Commissioner and DALSA Chairman Anil Kumar Mishra directed the police to take necessary steps to provide assistance to the victim. To this end, DALSA Secretary Rakesh Roshan has formed a special team of two paralegal volunteers, Poonam Devi and Pushpalata Devi. This team will remain in contact with the victim and her family and provide assistance based on their needs.The DALSA Secretary personally met with the victim and her family and assured them that they would not be left alone in their fight for justice. The authority would provide free legal aid and necessary security support. The application process for the victim's compensation has been completed as per the law. Further action has also been initiated in this direction.To provide legal support to the victim in this case, DALSA has appointed advocate Mamta Srivastava as a pro-bono lawyer. She will represent the victim free of charge. Additionally, a PLV has been assigned as a support person in the Ratu police station area. This is intended to provide ongoing support to the victim and her family in times of need. Furthermore, DALSA is also monitoring the police investigation. Secretary Rakesh Roshan spoke with the Ratu police station in-charge to inquire about the current status of the investigation. He has urged the police to maintain fairness and take prompt action in the matter.This incident occurred on November 7th in the Ratu police station area. An 18-year-old intermediate student was returning home from evening tuition. Taking advantage of the darkness, some unknown youths surrounded her and gang-raped her. When the victim resisted, the accused also assaulted her. The incident has sparked local outrage. Following the intervention of the Jharkhand High Court and the Jhalsa, the Dalsa has launched a series of measures to ensure justice for the victim.

Parivahan Vishesh Samachar Patra Daily - Social Counselor Pinki Kundu - Special Public Interest Report

When world's most powerful AI boss himself got trapped in honeytrap, then what is status of common man?

Parivahan Vishesh News

Case of Nvidia's CEO Jensen Huang - allegation, investigation and big lesson for common people

Cyber security public interest article - Pinki Kundu, Social Counselor - Presentation : Editorial department, Parivahan Vishesh Samachar Patra Daily

Jensen Huang admitted affair - Truth On 8 November 2026 in internal memo he admitted infidelity to wife, said - I was unfaithful to my wife, there is no excuseWoman is Alice Huang, executive of Megaspeed - Truth Alice Huang alias Huang Le, was Senior Executive of Singapore company Megaspeed InternationalAllegation of American intelligence agency - China's spy - allegation is true, not proved According to New York Times / Financial Times US Intelligence believes that she was recruited by China's Ministry of State Security. China called it completely baseless4.8 billion dollars chips - Truth, but old figure Megaspeed bought more than 4.8 billion dollars chips since June 2024. New report claims 7.5 billion dollars and 2,40,000 chips delivered to ChinaNvidia board started investigation - Truth Board started independent investigation, said - till now no reason of national security or leakage of company's secret foundNvidia is bigger than India's economy - exaggeration Nvidia's market cap is about 4-5 trillion dollars, India's GDP is also about 4 trillion dollars. Means both are almost equal, not much bigger than each other.FBI is investigating - Truth American President Donald Trump said - FBI is looking into matterMeaning: Allegation of honeytrap is based on media and intelligence reports. Espionage has not been proved yet in court.1. What is story? Owner of Nvidia Jensen Huang, who gives world most advanced AI and supercomputer chips, whose company's empire is almost equal to India's total economy, he himself became victim of honeytrap!Think, the person on whose mind and technology's signal whole world's future tech is dancing, when his own system hanged in front of a beautiful spy, then what is status here of those common people who get trapped accepting video call offer from unknown girl's profile on WhatsApp and Facebook.In American investigation it was revealed that 63-year-old Jensen Huang got trapped in romantic relationship with Singapore company Megaspeed's Executive Alice Huang.American Intelligence believes that Alice was specially planted to trap Huang, to extract internal information and to breach American AI chip restrictions.America put laws and locks all over world so that China does not get advanced chips, and China directly threw dice of honeytrap on owner of company itself.2. Game of chips - From 4.8 billion to 7.5 billion Result was that Alice's company bought about 4.8 billion dollars Nvidia chips in last two years.New report says that using this relationship game of delivering about 7.5 billion dollars chips, i.e. about 2,40,000 H100, H200 and A100 chips to China was done.When whole matter was exposed and American Parliament sought answer, then world's most powerful CEO sir had to write letter to employees of his company and admit that he cheated his wife and he has no excuse for this mistake.Now think, when this is condition of billionaires living among such high-profile security and advisors of Silicon Valley, then what blame can be given to those who consider video call offer of some 'Angel Priya' on Facebook and WhatsApp at 11 pm at night as their fortune and pick it!3. Technology changed, software of honeytrap same old Technology may reach from 5G to 10G and however big AI may come in world, but ancient software of 'honeytrap' is still working with hundred percent success without any update!Because honeytrap attacks not on technology, but on human weakness -lonelinesshunger for praiseexcitement of secret relationshipgreed and fearJensen Huang had money, had power, had security. Still system failed in front of heart.So village youth, student, job holder, trader and retired officer - no one is untouched from it.4. Public interest article - Cyber security advice from side of Pinki Kundu, Social CounselorDear readers,I Pinki Kundu, Social Counselor, want to tell you all with folded hands -Honeytrap is not only story of films, it has reached your home.Today every day hundreds of people in India are becoming victim of sextortion, video call blackmail, fake love-profile and honeytrap.Remember these 10 rules like your life -1. Unknown profile = Danger: Do not accept friend request of unknown girl / boy on Facebook, Instagram, WhatsApp. Beautiful photos are often stolen.2. Avoid video call: Never pick unknown video call coming at night. Once face gets recorded, then blackmail starts.3. Never send private photo / video: Once sent, then it never remained yours. Even after deleting it does not get erased from server.4. Understand as soon as money demanded - This is trap: First love, then video, then threat - Send money otherwise will make video viral. This is formula of sextortion.5. Do not fear, block and report: Blackmailer does not stop by giving money, demands more. Immediately block, keep screenshot of chat, tell police.6. Do not hide from family: Due to shame people remain silent and keep getting looted. Telling family, friend or counselor only is protection.7. Never share OTP, bank detail, office secret: However sweet talks she does. Office password is not given in love.8. Beware of AI deepfake: Today fake obscene video of anyone can be made with AI. Therefore do not send your clean photo also indiscriminately to anyone.9. Explain to children and elderly: Children on gaming and social media, elderly in loneliness are most victimized.10. Where to complain:Immediately call 1930 orComplain on cybercrime.gov.in. Also file report in nearest cyber police station.5. Editorial comment - Handle both pen and keyboard Clear opinion of Parivahan Vishesh Samachar Patra Daily is - Incident of Jensen Huang teaches us that big post, big money, big technology - nothing can save person from honeytrap, only wisdom can save.If CEO of Nvidia can get trapped, then we and you are very small.Therefore -Think not with heart, with mindLive not in love of stranger, in respect of your familyDo not stake your respect, money and career for one video callHowever advanced AI may become, human caution only is biggest antivirus.Avoid honeytrap, stay cyber safe, keep family safe.

One lamp in name of martyrs: Bheem Sarovar illuminated with 11 thousand lamps

Parivahan Vishesh News

Gorakhnath temple premises resonated with patriotic songs on open-air stage

Gorakhpur: Like every year, this year also in Deepotsav and "Ek Diya Shaheedon Ke Naam" program dedicated to immortal martyrs organized under joint auspices of Gorakhnath temple and Bhojpuri Association of India "BHAI", 11,000 lamps were lit to remember immortal martyrs of country. Chief guest Chief Minister Yogi Adityanath Ji Maharaj inaugurated program by lighting lamps at Bheem Sarovar located at Gorakhnath temple and paying floral tribute to pictures of martyrs on open-air stage.On this occasion, from "BHAI" side photo frame of Gorakhnath Ji was presented to chief guest. Those who presented frame included BHAI's National President Dr. Rakesh Srivastava, State President senior homeopathic doctor Dr. Roop Kumar Banerjee, patron Dhruv Srivastava, Dr. Suresh Srivastava, Rakesh Mohan, Tribhuvan Mani Tiwari. After this, under coordination of Dr. Rakesh Srivastava patriotic songs and dance were presented by children in memory of martyrs. Program started with Shri Ram Vandana under direction of Sandeep Pandey. Amita Srivastava presented patriotic song in memory of martyrs, Bunty Baba presented bhajan and Pawan Panchhi made everyone emotional by presenting song in memory of martyrs. Vivek Vimal Chaturvedi also presented patriotic song. Raas of Radha-Krishna was presented by group of Vivek Sonkar. On musical instruments Tripurari Mishra, Shyam Sundar Hanslona, Bunty Baba, Ankush and Arun Pandey accompanied. Program was conducted by Shivendra Pandey. On this occasion Pushpdant Jain of BHAI, Kanak Hari Agarwal, Dr. Suresh, Pragati Srivastava, Anjana Lal, Manish Agarwal, Rakesh Mohan, Sarika Rai, Afroz Alam, Seema Rai, Ranjita Yadav including many citizens were present. In end program coordinator Dr. Rakesh Srivastava expressed gratitude.

Parivahan Vishesh Samachar Patra Daily - Special report from Khunti

Stocking of fish seeds in Latratu reservoir - Fish production will increase, livelihood of fishfarmers will be strengthened

Parivahan Vishesh News

1 lakh 30 thousand fish seeds released under Pond-Reservoir Fish Development SchemeReservoir will be enriched with Rohu, Katla, Mrigal and Grass Carp- Report: Deepak Kumar Ghosh, Parivahan Vishesh Samachar Patra, Khunti

Main facts - At a glance

Place: Latratu reservoir, KhuntiScheme: Pond Reservoir Fish Development SchemeTotal fish seeds: 1 lakh 30 thousandSpecies: Indian Major Carp - Rohu, Katla, Mrigal + Grass CarpObjective: To increase fish production and productivity, to strengthen livelihood of local fish farmersMain presence: District Fisheries Officer Roshan Kukar including other officers, fish farmers and local people1. Life descended in Latratu reservoir Under Pond Reservoir Fish Development Scheme, total 1 lakh 30 thousand fish seeds were stocked in Latratu reservoir.During this, fish seeds of Indian Major Carp species Rohu, Katla and Mrigal and Grass Carp were released in reservoir.As soon as small fish seeds were released into water from tub, shine of hope came on faces of fish farmers standing on bank of reservoir. These same seeds will fill reservoir with fishes in coming months.2. Why were these species selected?Rohu: Excellent in taste, most demanded in marketKatla: Fast growing, species living on upper surface of reservoirMrigal: Living at bottom, also helpful in cleaning of reservoirGrass Carp: Eats grass-aquatic vegetation, maintains balance of reservoirStocking of all four species together will properly utilize every level of reservoir. This will also increase production and ecological balance of reservoir will also remain.3. Objective - Not only fish, livelihood Objective of this initiative is to promote fish production and productivity in reservoir along with strengthening livelihood of local fish farmers.With stocking of fish seeds in reservoir, fish production will increase in future, due to which people associated with fish farming will get better opportunities for employment and income.When production will increase, then -Fresh fish will be available cheap and easily in local marketFish farmers will not have to depend on middlemenWomen and youth will also get employment in fish farming, sale and net-repairEconomy of Khunti district will get new strength4. Stocking done in presence of District Fisheries Officer During this, District Fisheries Officer Roshan Kukar including others were present.He also gave information to fish farmers about proper care, rules of net, prohibited period and cleanliness of reservoir.Officials said that only putting fish seeds is not enough, its protection is also necessary. Timely not catching small seeds, stopping illegal hunting and saving reservoir from pollution is responsibility of all.5. Editorial comment - If there is water, there is life, if there is fish, there is employment Clear opinion of Parivahan Vishesh Samachar Patra Daily is - Reservoirs like Latratu are not only sources of water, they are kitchen and employment of thousands of families.This initiative of government is appreciable, but now need is that -Fish farmers get training and help of net-boatGarbage and chemical should not be thrown in reservoirStrictness on illegal fishingFish farmers should be linked with market and cold storageIf reservoir will survive, then fish will survive. If fish will survive, then family of fish farmer will survive.Every seed put today in Latratu reservoir will become prosperity of some family tomorrow.
