Major Racket of Fake Fitness Certificates of Delhi's Commercial Vehicles Exposed - Crores of Loss to Revenue, Road Safety at Risk

Parivahan Vishesh News

TRWA Writes Letter to Transport Commissioner - Alleges Issue of Fake Certificates Without Physical Presence by ATS Centres of Other States

Article K K Chhabra, Parivahan Vishesh Daily

1. Factual Background (Ref: TRWA/05/10/TC Date 31/10/26):

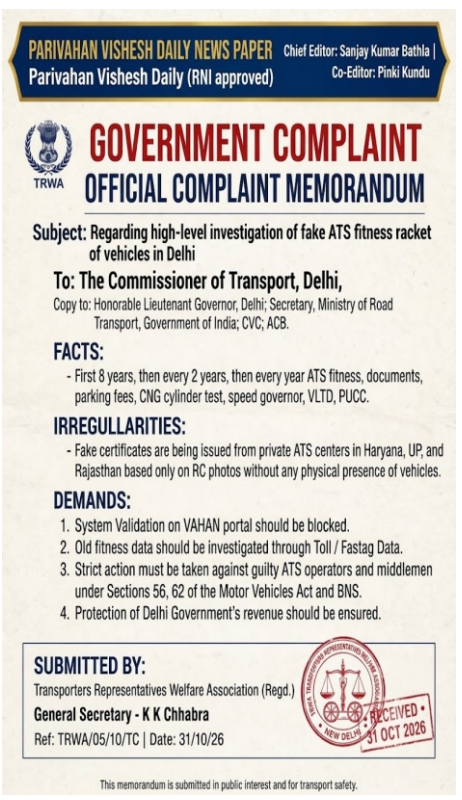

Transporters Representatives Welfare Association (Regd.) has drawn attention of Commissioner Transport, Delhi Government to serious fraud through Speed Post. As per Motor Vehicle Rules, a commercial vehicle registered in Delhi is mandatorily required to get fitness done at ATS (Automated Testing Station) every 2 years for first 8 years and every year thereafter. For this, valid documents are:- Valid parking fee receipt of Delhi Municipal Corporation/Transport Department- Valid CNG Cylinder Hydro Testing Certificate- Valid Speed Governor (SLD) test report and seal- VLTD data for National Permit vehicles of after 2019- Valid PUCC, Insurance Policy, Fitness Fee and actual physical presence of vehicle.

2. Details of Fraud: According to TRWA, in collusion with some private ATS centres operating in Haryana, Uttar Pradesh, Rajasthan etc., fake fitness certificates are being issued by agents by charging nominal fee on basis of only RC and photograph of vehicle. This allows vehicle owners to evade mandatory parking fee applicable in Delhi, CNG testing fee, speed governor and VLTD conditions.

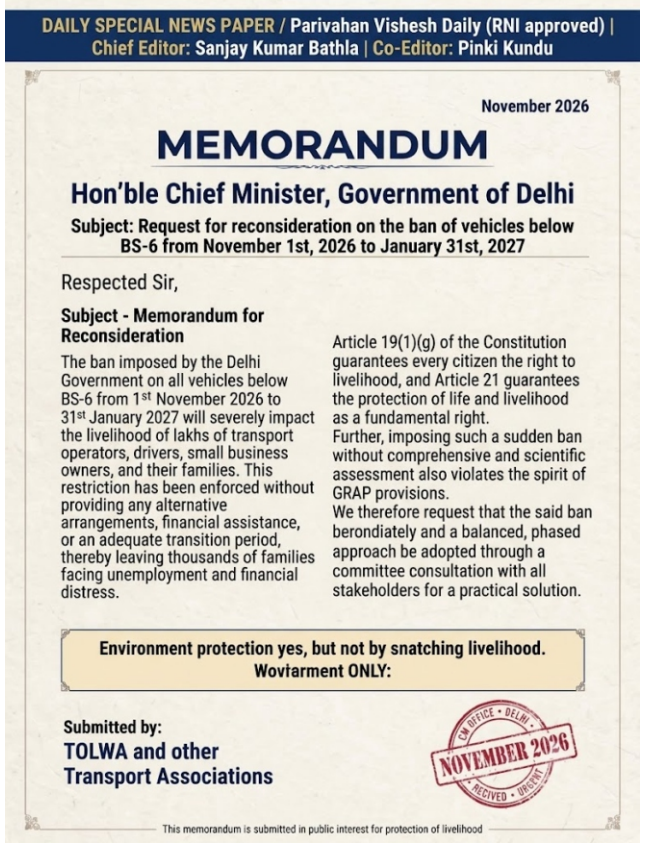

3. Danger and Loss:- Road Safety: Unfit vehicles plying on roads without technical and physical inspection are a major danger to life of general public and cause of serious accidents.- Revenue Loss: Direct loss of crores of rupees to Delhi Government and Municipal Corporation in parking fee and other heads.

4. TRWA's Public Interest Demands:- Technical Block on VAHAN Portal (System Validation): Unless Delhi vehicle completes prescribed parking fee of Delhi and other mandatory local compliances, its fitness process from ATS of other states should be automatically blocked by portal.- High-level Inquiry of Certificates Issued Earlier: Data of fitness certificates issued by ATS of other states should be scrutinized and physical verification should be done by matching with actual movement of vehicles (Toll/Fastag Data).- Punitive Action Against Culprits: Strict action under relevant sections of Motor Vehicles Act and Bharatiya Nyaya Sanhita against concerned ATS centres issuing fitness and middlemen/brokers active in Delhi. Copy of letter has also been sent to Lieutenant Governor Delhi, Secretary MoRTH, Central Vigilance Commission, Anti-Corruption Branch and Directorate of Vigilance Delhi Government.

Ban on Vehicles Below BS-6 Even When Air Quality is Good - Is It Tenable on Constitutional and Judicial Scrutiny?

Parivahan Vishesh News

Report Sanjay Kumar Bathla, Chief Editor Delhi Government on 20th October, under Winter Action Plan by Chief Minister Rekha Gupta, announced entry ban on vehicles below BS-6 registered outside Delhi from 1st November 2026 to 31st January 2027, affecting more than 10 lakh vehicles of NCR.

1. Facts: From 1st November 2026 to 31st January 2027, entry of BS-III, BS-IV vehicles from outside Delhi closed, exemption only to BS-6, CNG, EV and essential services. 'No Valid PUCC, No Fuel' also applicable.

2. Blow to Constitutional Rights:
- Article 19(1)(g) - Fundamental Right to Profession: Running transport business is fundamental right of citizen. Complete ban without reason is violation of this right.
- Article 19(1)(d) - Right to move freely throughout territory.
- Article 21 - Right to Life and Livelihood: Supreme Court in Olga Tellis Vs Bombay Municipal Corporation (1985) made it clear - taking away livelihood is taking away right to life. Livelihood of lakhs of drivers, helpers, operators at stake.
- Article 14 - Right to Equality: Discrimination even when both BS-6 and BS-4 pass PUCC. Is this Reasonable Classification when AQI is good?
- Article 300A - Right to Property: Stopping a vehicle which is legally purchased, tax paid, fitness obtained from plying on road.

3. Violation of Acts and GRAP:
- Motor Vehicles Act 1988 Section 115: Power to impose restriction is with State, but it should be proportionate and on scientific basis.
- Environment Protection Act 1986 and Air Act 1981: Pollution prevention is necessary, but permanent ban without AQI basis is not.
- CAQM Act 2021: Principle of GRAP is - Stage-I at AQI 200, Stage-II at 300 etc. Imposing restrictions like Stage-IV when air quality is good is against scientific basis of GRAP. Last year same restriction was imposed from 18th December when GRAP Stage-IV was imposed, this year from fixed dates - this is arbitrary.

4. Judicial Orders:
- M C Mehta Vs Union of India (continuous since 1985): Supreme Court said - Pollution control is necessary, but along with rehabilitation of transporters and alternative arrangement also.
- NGT Order 2017: Measures for pollution control should be Proportionate, not completely ending livelihood.
- Supreme Court BS-6 Order: BS-6 mandatory from 1st April 2020, but old valid vehicles should be allowed to run till their valid period.

5. Public Interest Demand:1. Ban should be linked to AQI basis of GRAP, not from fixed date.2. Practical solution by meeting with transport welfare organizations - like time-bound entry, green corridor.3. Slogan - Environment protection is necessary, but not by snatching employment!

Against Ban on Vehicles Below BS-6 - Saharanpur Goods Transport Association

Parivahan Vishesh News

Strong Opposition to Three-Month Ban on Vehicles Below BS-6 in Delhi - General Secretary Says - Playing with Livelihood of Lakhs of Families in Name of Environment Protection Will Not Be Tolerated.

Report Special Correspondent, Parivahan Vishesh Daily, Saharanpur

The decision of Delhi Government to impose ban on vehicles below BS-6 emission standard from 1st November 2026 to 31st January 2027 has increased worry of transport businessmen.Against this decision, Saharanpur Goods Transport Association has taken a tough stand and demanded immediate reconsideration from the Government - General Secretary of Association said that vehicles below BS-6 standard may also include BS-4, BS-3 and other old emission standard vehicles.Ban on these vehicles will affect business of truck operators, transporters, drivers and helpers - Along with economic crisis in front of thousands of businessmen, there is apprehension of impact on livelihood of lakhs of families.General Secretary said that environment protection is necessary, but pushing transport industry into crisis for this is not proper.Government should have dialogue with transport organizations before implementing ban and should provide practical alternatives.Saharanpur Goods Transport Association has demanded that immediate reconsideration should be done on decision of ban imposed on vehicles below BS-6.Balancing between environment protection and employment, such a path should be found out, so that transport industry which is considered backbone of country's economy and livelihood of families connected with it can remain safe!!

Big Change Regarding Driving License - New Framework Will Be Implemented From 1st January 2027!

Parivahan Vishesh News

Central Government Approves New Classification, License Will Be Divided Into Four Categories on Sarathi Portal

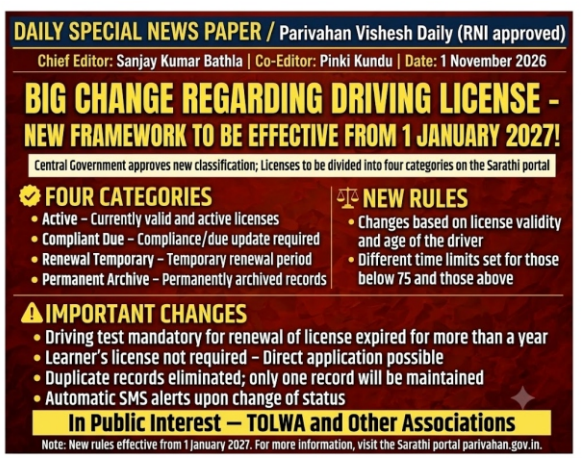

Report: Parivahan Vishesh Daily - Chief Editor: Sanjay Kumar Bathla I Co-Editor: Pinky Kundu

1. Fact - What is New Framework?Central Government (Ministry of Road Transport and Highways - MoRTH) has approved new classification framework to make driving license system more transparent and digital, which will be implemented from 1st January 2027. Now on Sarathi 4.0 portal all licenses will be classified on basis of their validity and status. Ministry had released its draft on 16th October 2026 which was published in Gazette on 21st October.

2. Four Categories - Main Points:- Active (Active): Currently valid and active license
- Compliant Due (Compliant Due): Compliance / Due Update Required - whose renewal is due soon
- Renewal Temporary (Renewal Temporary): Licenses running in temporary renewal period
- Permanent Archive (Permanent Archive): Permanently stored / inactive recordThis change will be on basis of validity of license and age of driver, in which different time-limit has been fixed for those below and above 75 years of age.

3. Important Changes:
- Driving Test Mandatory for License Expired More Than One Year: Now there will be no need of Learner License, direct renewal application will be possible but test will have to be given.
- Duplicate Record Will End: Now only one record will be kept, fake licenses will be checked.
- Automatic SMS Alert: Driver will get immediate message on change of status of license.
- Additional New Proposals (In MoRTH Draft): Separate colour licenses for Indian and foreign citizens (Indian - Orange-Green, Foreign - Blue-Green), Blood Group, Mobile and Emergency Contact mandatory on license, Safe Driving Tutorial pass marks increased from 60% to 75%, Fee waiver on Aadhaar-based online services.

4. Impact on Drivers: This will check fake license racket, crowd in RTO will reduce, and drivers will get clear information about status of their license. For senior drivers above 75 years of age, Medical Certificate (Form 1-A) and Refresher Training is being made mandatory. In Public Interest - Tolwa and Other Organizations I Note: For more information see Sarathi portal http://parivahan.gov.in

BS-VI Vehicle Ban in Delhi: Lawyers Seek Exemption, Say - It Will Be Difficult to Reach Court

Parivahan Vishesh News

Demand to give relief to lawyers from vehicle ban under BS-VI rules in Delhi. Know what is whole matter.

Report: Chief Editor Sanjay Kumar Bathla - Co-Editor Pinky Kundu

Strict rules to be implemented to deal with increasing pollution during winters in Delhi have now created stir in legal corridors. For getting exemption from rules of Delhi BS-VI vehicle ban in Delhi, Bar Associations of Supreme Court and Delhi High Court have appealed to administration. Lawyers say that if these rules are implemented strictly, there will be big hurdle in court work and timely appearance.In fact, Commission for Air Quality Management (CAQM) has issued an order to reduce pollution. Under this, there will be ban on entry of non-BS-VI commercial and other vehicles in Delhi between 1st November 2026 to 31st January 2027. After this order, Honorary Secretary of Supreme Court Bar Association (SCBA) Pragya Baghel has written letter to Supreme Court Administration on 31st October 2026 demanding relief for lawyers.Increased worry of lawyers coming from NCR: President of Delhi High Court Bar Association (DHCBA) and Senior Advocate N. Hariharan has also written letter in this regard to Lieutenant Governor Taranjit Singh Sandhu and Acting Chief Justice of Delhi High Court Nitin Vasudev Sambre. Their demand is that judges, lawyers and court staff should be kept out of these restrictions.Lawyers argue that they are an essential part of justice system and their work is very essential. Biggest problem is of those employees and lawyers who come from NCR cities like Noida, Gurugram and Ghaziabad. Due to very high cost of living in Delhi, many people live in outside cities and use old vehicles. In such case, their movement will be badly affected by these restrictions.However, it has been informed that private vehicles have been kept out of this purview, but this rule will be applicable on buses, trucks and agricultural vehicles. Delhi Traffic Police has already warned that vehicles not following rules can be seized. Police has advised vehicle owners to keep their registration and PUC certificate updated. Helpline numbers 011-25844444 or 1095 have been issued for assistance."

Given the continuous support and cooperation that Parivahan Vishesh Newspaper has received from all of you over the past three years, and considering its growing role in amplifying your voice day by day, the management of Parivahan Vishesh Newspaper and Transport Vishesh News Limited have decided to launch the public's own channel, 'Parivahan Vishesh News Doordarshan,' from the month of October. The objective of this initiative is to deliver public interest news, public welfare information, public awareness, and important updates more rapidly and effectively to the Governmant of India, various State Governments, and all political organizations before anyone else.

Get Ready — We're Coming Soon!

PARIVAHAN VISHESH NEWS DOORDARSHAN

Great News! Now your voice will resonate across the entire world.
After 3 successful years of the Parivahan Vishesh Newspaper—now, a new revolution!

We hope that just as you have supported and contributed to taking "Parivahan Vishesh Newspaper" to great heights in today's era, in the same way, you will continue to support "Parivahan Vishesh News Doordarshan," which is being launched to become the voice of the people, and help us make it the world's largest news.

Sanjay Bathla
Editor In chief

Buying a home is one of the most significant decisions a family makes. It carries years of savings, careful planning and countless expectations. For some, it marks the beginning of married life. For others, it represents security for children, a comfortable retirement or the fulfilment of a long-held dream. Beyond its market value, a home becomes the setting for our everyday experiences—the place where we rest, celebrate, work and grow together.

Naturally, we want to choose well. We compare locations, prices, amenities and construction quality. We imagine furniture arrangements and discuss which room will be long to whom. Alongside these considerations, many families also seek guidance from Vastu Shastra, hoping to understand whether the property suits their needs and preferences.

Yet this is often where confusion begins. One person recommends only a north-facinghome. Another insists that an east-facing entrance is essential. Someone warns against a particular kitchen position, while another suggests that a remedy can address every concern. Faced with conflicting advice, buyers may become anxious about a decision that should bring hope and excitement.

Throughout November, we will explore these questions through a special four-partseries, "Before You Buy: A Vastu Guide to Choosing Your Home." Each article will examine a different stage of property selection, helping readers understand what to observe, what to ask and what deserves closer assessment before making a commitment.

The series will bring together traditional Vastu perspectives and practical considerations of comfort, functionality and family requirements. Its purpose is to encourage thoughtful decisions, with clear explanations that readers can relate to the homes they visit.

Article One: Beyond North and East—What Truly Matters When Choosing a Home

Our opening article will address perhaps the most common question in property-relatedVastu discussions: "Which facing direction is best?"

North and east often receive immediate approval, while south and west may be dismissed without a detailed examination. However, a property has many features, and its facing direction provides only part of the information needed to understand it.

We will begin by clarifying what "facing" actually means. Does the description refer to the apartment's entrance, its balcony, the building's main gate or the road outside? These are different features, yet property advertisements and everyday conversations frequently treat them as interchangeable.

Readers will discover why two homes described as north-facing can have very different layouts and living conditions. One may offer comfortable room proportions, good ventilation and convenient movement. Another may have awkward passages, limited daylight and spaces that do not suit the household.

Through relatable examples, we will explore the importance of examining the complete property. The article will also consider family circumstances, including the needs of children, older adults and people working from home.

The opening message is simple: before accepting or rejecting a property because of its directional label, take time to understand the whole home.

Article Two: Read the Floor Plan Before You Fall in Love with the Property

An impressive sample flat can capture our imagination within minutes. Attractive lighting, elegant furniture and coordinated colours make it easy to picture a happy future. But the permanent arrangement beneath those finishes deserves equal attention.

Our second article will guide readers through the floor plan—the document that reveal show different parts of a home connect and function.

We will discuss why an accurate plan, supported by a reliable direction reference, is essential for a meaningful Vastu assessment. Readers will learn to identify the entrance, room boundaries, balconies, structural columns and service shafts before considering individual directional interpretations.

The article will introduce the traditional significance of the Brahmasthan, or central area, and explain why its assessment should reflect the realities of modern apartments. It will also examine the kitchen, bedrooms, toilets and utility spaces, considering both traditional preferences and daily usability.

For example, a kitchen needs safe movement, ventilation and sensible appliance placement. A bedroom must accommodate its occupant comfortably. A toilet's location requires attention to drainage, waterproofing and maintenance, alongside any Vastu interpretation.

By encouraging readers to imagine ordinary activities within the plan, this article will help them look beyond decorative appeal and assess whether a property can serve their family well.

Article Three: Outside Your Walls—The Surroundings Deserve Attention Too

A home belongs to a larger environment. Its approach road, neigh bouring structures, surrounding activity and ground conditions can influence the experience of living there.

Our third article will take readers beyond the entrance and into the property's surroundings.

For those considering land or an independent house, we will explore plot shape, access, slope and the relationship between built and open spaces. Traditional Vastu interpretations will be discussed alongside practical questions about planning, drainageand the usable area of the site.

For apartment buyers, attention will turn to the distance between buildings, available daylight, privacy, airflow and the effect of floor level. A well-presented interior may leave important questions unanswered if neighbouring construction blocks windows or creates persistent noise.

We will also discuss road junctions and nearby institutions or commercial activity. Rather than drawing conclusions from a label alone, readers will be encouraged to observe the actual conditions: traffic movement, parking pressure, headlights, dust and the timing of nearby activities.

This article will highlight the value of visiting a property more than once. A peaceful afternoon may offer a very different impression from a busy evening or a rainy day. Careful observation can reveal details that photographs and brochures cannot convey.

Article Four: The Final Decision—What Can Be Adjusted and What Needs Careful Assessment?

By the time a buyer reaches the final shortlist, the challenge often becomes choosing between different compromises. One property offers a convenient location, another hasa better layout, and a third fits the budget more comfortably.

Our concluding article will help readers approach that comparison with clear priorities.

We will distinguish between changes involving furniture, storage or room use and alterations affecting plumbing, entrances or structural elements. A bed may have another suitable position; moving a bathroom requires an entirely different level of evaluation.

Readers will be encouraged to establish the feasibility and cost of important changes before purchasing. Advice involving walls, drainage, electrical systems or shared building services should be assessed by the relevant professionals.

The article will also discuss remedies with realistic expectations. Traditional recommendations should come with an explanation of their reasoning and limitations.

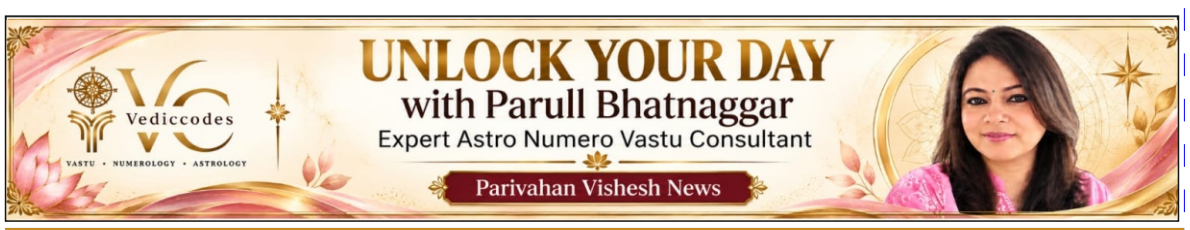

They cannot replace repairs, sound construction, legal verification or essential maintenance.

A practical checklist will bring the series together, covering the layout, surroundings, family requirements, proposed adjustments and professional checks. The aim is to help buyers compare properties consistently and understand the reasons behind their final choice.

Join Us Throughout November

Across these four articles, we will move from a familiar question about direction to a broader understanding of property selection.
For readers who value Vastu, the series offers an opportunity to explore its traditiona lprinciples with greater care. For anyone preparing to buy, it provides questions worth carrying to the next property visit.

Join us throughout November as we look closely at the spaces we hope to call home—and learn to choose them with understanding, patience and confidence.

MONEY & RELATIONSHIP PREDICTION

Know Your Day • Protect Your Money • Strengthen Your Relationships

Parivahan Vishesh News

02 NOVEMBER 2026 | Day vibration: 5 — Change, communication, adaptability, movement and opportunity

Moolank 1
Money & Career: Day 5 adds movement, communication and adaptability to your leadership energy. A new contact, negotiation or change of approach can open an opportunity, but keep your financial objective clear.
Relationship: You may want quick decisions and freedom of action. Keep the other person informed so independence does not feel like disregard.
Precaution: Avoid impatience, impulsive spending and changing a sound plan merely because something new looks exciting.
Make Your Day Better: Take one calculated opportunity and keep your communication direct but flexible.

Moolank 2
Money & Career: Day 5 encourages your sensitive nature to become more adaptable. Calls, networking or a change in routine may bring useful information, but verify details before making a financial commitment.
Relationship: Emotions may fluctuate quickly today. Speak openly instead of over-interpreting a delayed reply or change in tone.
Precaution: Avoid nervous spending, overthinking mixed signals and saying yes simply to preserve harmony.
Make Your Day Better: Stay emotionally centred while remaining open to one useful change.

Moolank 3
Money & Career: Day 5 works strongly with your communication and creative skills. Sales, marketing, teaching, content or networking can gain momentum when your message is focused and follow-up is prompt.
Relationship: Conversation can be lively and enjoyable. Keep humour respectful and do not hide important feelings behind constant social activity.
Precaution: Avoid scattered commitments, gossip and excessive spending on entertainment or appearances.
Make Your Day Better: Use your words to create one valuable connection and turn it into action.

Moolank 4
Money & Career: Day 5 challenges your structured nature to become more flexible. A change in schedule, method or opportunity can help if you assess it logically rather than rejecting it automatically.
Relationship: Routine may be interrupted, requiring patience. Adapt without becoming critical when the other person handles things differently.
Precaution: Avoid rigidity, frustration over last-minute changes and unnecessary expenses caused by poor planning.
Make Your Day Better: Allow one sensible adjustment while keeping your essential priorities intact.

Moolank 5
Money & Career: Your Moolank 5 strongly resonates with Day 5, amplifying communication, movement, business instinct and adaptability. Excellent for networking, sales and negotiation, but speed must be balanced with financial discipline.
Relationship: Your need for variety and freedom is strong. Keep communication transparent so spontaneity refreshes the relationship instead of creating uncertainty.
Precaution: Avoid risky speculation, impulse buying, overcommitment and changing direction too often.
Make Your Day Better: Choose the most promising opportunity, negotiate smartly and follow it through.

Moolank 6
Money & Career: Day 5 brings movement into your responsible and comfort-seeking nature. New client activity, travel or a change in financial planning can help, provided lifestyle expenses stay controlled.
Relationship: A little freshness can improve closeness. Plan something different or communicate more playfully, but do not neglect practical commitments.
Precaution: Avoid comfort spending, overindulgence and agreeing to plans that disturb your financial balance.
Make Your Day Better: Introduce one refreshing change without compromising stability.

Moolank 7
Money & Career: Day 5 encourages your analytical nature to explore new information and contacts. Research can reveal an opportunity, but avoid endlessly comparing options once the facts are sufficient.
Relationship: You may alternate between wanting space and stimulating conversation. Explain your need clearly instead of suddenly withdrawing.
Precaution: Avoid mental restlessness, suspicion and sudden decisions based on incomplete information.
Make Your Day Better: Explore intelligently, then commit to one well-verified choice.

Moolank 8
Money & Career: Day 5 adds speed and negotiation to your ambitious energy. Business discussions, collections or commercial opportunities can move quickly, but review terms carefully before committing resources.
Relationship: Control may clash with the day's freedom-loving energy. Give the other person room and discuss expectations rather than imposing them.
Precaution: Avoid risky deals, power struggles and spending to display status or success.
Make Your Day Better: Use flexibility as a business strength and keep one important decision grounded in facts.

Moolank 9
Money & Career: Day 5 gives movement to your purposeful energy. A change, trip, conversation or new contact can help redirect resources toward a more meaningful goal.
Relationship: You may feel ready to move forward quickly after an emotional issue. Make sure the other person has also understood and processed what happened.
Precaution: Avoid impulsive generosity, abrupt exits and using constant activity to avoid deeper feelings.
Make Your Day Better: Move forward with purpose, carrying the lesson rather than the emotional burden.

Mahulapal Villagers Celebrate Lakshmi Puja Amidst Severe Difficulties; Bypass Road Remains a Distant Dream

Parivahan Vishesh News

Manoranjan Sasmal , State Head Odisha

Bhubaneswar: The residents of Mahulapal village in Kamakhyanagar Block of Dhenkanal district celebrated Lakshmi Puja this year amid considerable hardship due to the heavy traffic passing through the village. Mahulapal hosts the second-largest Lakshmi Puja celebration in Dhenkanal district. The festival began on October 25 and will conclude with the immersion ceremony on November 2. Beautifully decorated arches, attractive lighting and colourful decorations have added to the festive atmosphere. Various cultural programmes, dance performances and musical events are also being organised. Devotees from far-off places are visiting the village to offer prayers and seek the blessings of Goddess Lakshmi.However, the biggest concern for the villagers is the road passing through the heart of Mahulapal. According to local residents, nearly 10,000 vehicles pass through this road every day. Despite facing financial difficulties, villagers contribute from their limited resources to organise the grand celebration. But the continuous movement of vehicles is seriously affecting the festive atmosphere.Vehicles passing through the village are not only creating difficulties for devotees but are also damaging decorative gates and lighting arrangements erected for the festival. The villagers believe that if traffic had been diverted outside the village during the Puja, such problems could have been avoided.Walking around the Puja pandals and enjoying the festive decorations is a unique experience. Unfortunately, due to the continuous flow of vehicles, enjoying the festival on foot has become almost impossible in Mahulapal.The problem is not limited to religious celebrations. Organising weddings, thread ceremonies and post-death rituals has also become extremely difficult because of the heavy traffic on this road.The situation has even started affecting marriage prospects in the village. Some prospective grooms are reportedly reluctant to marry girls from Mahulapal because of the road conditions. Their concern is that if they cannot take out a traditional wedding procession (Roshanai) through the village, there is little reason to choose Mahulapal for marriage. The villagers have one major demand: construction of a bypass road at the earliest. Until the bypass is built, they have urged the authorities to install at least four speed breakers inside the village to control vehicle speeds and ensure public safety.The residents say they have repeatedly approached the Chief Minister and the Minister of Works, demanding a bypass road, but their appeals have so far gone unheard. Just as China's Huang He (Yellow River) is associated with suffering and hardship, the road passing through Mahulapal has become the biggest source of misery for its residents. For the people of Mahulapal, the road itself has become their greatest problem. How long will they have to wait for a bypass road and relief from this daily ordeal?

COMPOUND NUMBER 12 – THE KING, THE QUEEN AND THE RAJGURU

Parivahan Vishesh News

Weekly Numerology

Dr. Pujaprasun N.
Gold Medalist
Shivoham Shastr@
shivohamshastr.com
07303855446

The Influence of the Sun, Moon and Jupiter:Compound Number 12 is a number that deserves careful study. At first glance, it carries the combined influence of three powerful planetary energies: the Sun, the Moon and Jupiter. The Sun represents authority and action, the Moon represents emotions and imagination, while Jupiter represents wisdom, knowledge, guidance and expansion.Yet, in my study of compound numbers, I do not consider 12 a particularly desirable number, especially when it is chosen as a Name Number. The reason is not the absence of positive qualities. In fact, Number 12 has several excellent qualities. The real issue lies in the placement and sequence of its digits, and in the way these three planetary energies interact.To understand Number 12 properly, we must study not only its total but also the individual positions of the numbers.The planetary combination of Number 12:In Chaldean numerology, Number 12 reduces to Number 3.Number 1 represents the Sun.Number 2 represents the Moon.Number 3 represents Jupiter.Therefore, Number 12 carries the combined influence of the Sun, Moon and Jupiter.The Sun is dynamic, commanding, confident and assertive. It represents leadership, individuality, authority, initiative and the desire to achieve.The Moon is emotional, receptive, imaginative and reflective. It represents the mind, feelings, sensitivity, memory, dreams and the ability to understand other people.Jupiter is Devguru Brihaspati. It represents knowledge, wisdom, teaching, counselling, ethics, guidance, honour and expansion.When these three energies come together, they can produce an intelligent, imaginative, knowledgeable and influential personality. However, the order in which the numbers appear becomes extremely important.The most important point: the position of 1 and 2:There is a very important difference between 12 and 21. Both numbers contain the same digits, and both reduce to 3, but their sequence is different. In numerology, I give considerable importance to this sequence.In Number 12, the Sun comes first and the Moon follows it. If we understand the numbers symbolically, the king stands before the queen. The Sun represents the king, authority, status and power, while the Moon represents the queen, emotions, sensitivity and the mind.This arrangement gives Number 12 a strong concern for position, recognition and status. Such individuals may be very conscious of where they stand in society, how people perceive them, and whether they receive the respect they believe they deserve.For them, status can become extremely important. They may want to be recognised, respected and treated with authority. Their identity is often connected with their position, achievements and social standing.One important observation is that power can come before emotion. The Sun's commanding nature may take precedence over the Moon's softer and more sensitive qualities. As a result, these individuals may sometimes appear authoritative, dominating, proud or slightly rigid.They may have emotions, but they do not always express them first. They may prefer to maintain their dignity and position rather than reveal their vulnerability. At times, this can create an attitude in their personality.This is one of the central characteristics I want people to understand about Compound Number 12: the presence of the Moon does not automatically make the personality emotionally expressive. The position of the Sun before the Moon can make authority and status more prominent than emotional openness.The influence of Jupiter: the Rajguru:When we add 1 and 2, we get 3, which represents Jupiter, the Devguru Brihaspati.This gives Number 12 an additional dimension. The person is not merely concerned with authority or status; the total also brings the qualities of knowledge, teaching, wisdom and guidance.In my interpretation, the combination can be understood through the image of a king, a queen and a Rajguru. The Sun gives the king's authority, the Moon gives the queen's sensitivity and understanding, and Jupiter gives the wisdom of the royal teacher.This is why people influenced by Number 12 can become good teachers, trainers, counsellors, mentors and advisors. They may have the ability to guide others and explain complicated subjects.However, their teaching style may not always be gentle. Because of the Sun's authority and Jupiter's position as the teacher, they can become strict, disciplined and demanding mentors. They may expect students, employees or people under their guidance to follow instructions properly.They can be generous with knowledge, but they may also expect respect in return. They may not appreciate being challenged unnecessarily, particularly when they believe they have greater experience or knowledge.The positive expression is a wise and respected teacher. The challenging expression is a strict mentor who may become overly authoritative.The relationship between Number 12 and Number 3:Number 12 reduces to 3, and therefore it carries the fundamental qualities of Jupiter. It shares the creative, expressive, communicative and optimistic qualities associated with the Number 3 series.People influenced by Jupiter often have a natural inclination towards learning, teaching, explaining, advising and sharing knowledge. They may enjoy being in positions where their opinions are heard and their experience is valued.However, there is an important point I repeatedly observe in the Number 3 series: people can be excellent starters but may struggle to finish what they begin.They can start a project with great enthusiasm, confidence and excitement. They may have several ideas and make ambitious plans. But somewhere in the middle, their interest may decrease, their attention may move towards something else, or they may become distracted by another opportunity.This gap between starting and completing can affect their results.Number 12 can experience this tendency in a particular way because its Sun wants to act, its Moon keeps imagining and reconsidering, and its Jupiter keeps expanding the possibilities. The individual may have the ability, knowledge and ambition, but may not always maintain the same level of consistency until the final outcome.The Sun's initiative and the Moon's delay:One of the most important challenges of Number 12 comes from the interaction between the Sun and the Moon.The Sun is associated with dynamism, initiative, decision-making and action. It wants to move forward and achieve results.The Moon, on the other hand, is reflective and imaginative. It thinks, feels, visualises, considers possibilities and responds to changing circumstances.In Number 12, the Sun appears first, but the Moon follows it. Here the Moon is the goal setter and the Sun is executer, in my interpretation, the Moon can gradually influence the direction of the Sun's action. The individual may have the desire to achieve something, but the mind may keep creating new goals, doubts, expectations or emotional considerations.This can lead to postponement and procrastination.They may know what needs to be done, but still delay taking the final step. They may wait for the right moment, the right circumstances, the right confidence or the right emotional state.Sometimes they work very hard near a deadline. They may spend the final moments waiting anxiously for the result, almost holding their breath to see what happens.This creates a conflict between action and inaction.They may miss opportunities not because they lack intelligence or capability, but because they do not always act at the right time. A golden opportunity may come, but excessive thinking, delay or uncertainty can prevent them from taking full advantage of it.This is why I consider the placement of the digits in Number 12 particularly important. The combination has strong planetary qualities, but the sequence can create an imbalance between initiative and execution.Imagination, dreams and confusion:The Moon gives Number 12 a fertile imagination. These individuals can be dreamers, thinkers and creative people. They may visualise possibilities that others do not immediately notice.They can be interested in subjects that require imagination, observation and deeper thinking. They may enjoy reading, researching, studying human behaviour and exploring subjects beyond ordinary practical life.However, an active imagination can also create confusion when it is not supported by clear decisions.They may think about several possibilities at the same time. Their mind may move between ambition, fear, hope, expectation and uncertainty.At one moment, they may feel extremely confident. At another moment, they may question their own decisions. Their emotional state can influence their ability to remain focused.This is why Number 12 can sometimes produce moodiness and indecision. The individual may possess excellent knowledge and ability but still find it difficult to maintain a single direction.The hidden side of the personality:Another interesting feature of Number 12 is that people may not reveal their entire personality to everyone.The Moon has a reflective and hidden dimension. It does not always show everything openly. Similarly, individuals influenced by Number 12 may display one side of their personality publicly while keeping another side private.They may appear confident, authoritative, knowledgeable and socially capable. People may see them as strong individuals who know what they are doing.However, internally, they may be sensitive, imaginative, uncertain or emotionally affected by situations that they do not openly discuss.They may not like showing vulnerability, especially when they feel that doing so could affect their status or image.This difference between the public personality and the private mind is an important feature to observe in Number 12.Career, profession and suitable fields:Number 12 can perform well in professions where knowledge, communication, creativity, guidance and public interaction are important.Because of Jupiter's influence, teaching and education can be particularly suitable fields. These individuals may become teachers, professors, lecturers, trainers, academic advisors or professional mentors.The Moon adds understanding, sensitivity and the ability to listen. This can make them good counsellors and advisors. They may understand different perspectives and help people think through their problems.The Sun adds confidence and authority. Therefore, they may also be comfortable in positions where they have responsibility, supervise others or represent an organisation.The creative influence of the Moon, combined with Jupiter's knowledge and the Sun's confidence, can also support artistic and expressive careers. They may do well in writing, music, performing arts, creative direction, media, communication and other fields where imagination and expression are required.Diplomacy is another area worth considering. The Moon is associated with cooperation, harmony and sensitivity, while Jupiter contributes judgement and wisdom. These qualities can help a person understand different people and viewpoints. The Sun can add the confidence required to represent a position or negotiate with authority.However, one point I want to emphasise is that Number 12 may often prefer a job or professional position over independent business. The structured environment of an organisation can provide a defined role, recognition, authority and a platform to use one's knowledge.This does not mean that every person with Number 12 will avoid business. It means that, in my interpretation, a recognised professional position may feel more comfortable and satisfying to many of them than the uncertainty and continuous decision-making involved in running an independent business.Honour, recognition and money:An important characteristic of the Number 3 series is the preference for honour over money.Jupiter is associated with knowledge, dignity, ethics, respect and social standing. For this reason, individuals influenced by Number 3 may place considerable importance on the respect they receive.Number 12 carries this Jupiterian quality, but the Sun in its first position adds an additional desire for status and recognition.They may want to earn well, but money alone may not satisfy them. They also want their work to be acknowledged. They want people to recognise their knowledge, experience and contribution.They may feel more fulfilled when they are respected as an authority, expert, teacher or guide.The challenge arises when the desire for honour becomes stronger than practical judgement. Sometimes they may spend too much time protecting their image, maintaining their position or expecting recognition from others.The healthier expression is to build genuine expertise and allow respect to follow naturally from the quality of one's work.The effect of age and changing motivation:Another observation in my study of Number 12 concerns the period after the age of forty.The Sun initially provides ambition, initiative and the desire to establish oneself. But as the individual moves into a more mature phase of life, the earlier drive for enterprise may not remain equally strong.They may continue to work hard, but the results may sometimes be mixed or less satisfying than expected.This can create a feeling that effort is not translating into the same level of achievement. The person may have experience, knowledge and the ability to work, but may not feel the same enthusiasm for starting new ventures or taking fresh risks.At this stage, the Jupiter and Moon influences may become more prominent in their interests. They may turn towards research, philosophy, spirituality and subjects that help them understand life at a deeper level.Astrology, numerology and other occult sciences may attract their attention. They may become interested in studying hidden patterns, symbolic systems, human behaviour and spiritual knowledge.This interest can become a constructive direction when it is supported by discipline and a genuine desire to learn.Relationships and emotional expression:The Sun-Moon combination also deserves attention in relationships.The Moon represents emotional understanding, affection, sensitivity and the need for harmony. The Sun represents individuality, self-respect, authority and the desire to be acknowledged.In Number 12, the Sun's position before the Moon can make self-respect and personal authority especially important.These individuals may want love and emotional closeness, but they may also expect respect and recognition from their partner. They may find it difficult when they feel ignored, undervalued or challenged in a manner they consider disrespectful.At times, they may express their expectations through authority rather than openly discussing their emotional needs.The positive side is that they can be caring, understanding and supportive. The Moon gives them sensitivity, while Jupiter can provide maturity and a sense of responsibility.The challenging side appears when pride, status or the need to be right becomes more important than listening to the other person. They may need to learn that emotional closeness requires not only respect but also openness, patience and mutual understanding.The connection with Number 6:In my working numerological system, Number 6 represents Venus, while Number 3 represents Jupiter.I consider the numbers of the 6 series unfavourable in relation to the numbers of the 3 series. Therefore, Number 12, which reduces to 3, requires particular care when it is associated with Number 6.This is an important compatibility consideration in my numerological practice. I do not recommend treating the relationship between these numbers as automatically harmonious merely because both have attractive qualities.Number 12 and Number 6 can bring different priorities and approaches. Jupiter is associated with wisdom, principles, teaching and honour, whereas Venus is associated with relationships, comforts, pleasure, beauty and material enjoyment.In my interpretation, this difference can create friction. I therefore consider Number 12 unfavourable for individuals strongly associated with Number 6, and the reverse relationship also deserves attention.The spiritual and traditional significance of Number 12:Number 12 has an important place in several religious, spiritual and cultural traditions. It is associated with cycles, completeness, organisation and the orderly movement of time.There are twelve months in a year and twelve hours displayed on each half of a traditional clock face. These associations connect Number 12 with cycles, seasons, recurring patterns and the natural organisation of time.In Christianity, there are twelve apostles. In Hindu tradition, there are twelve Jyotirlingas, the sacred shrines associated with Lord Shiva.These examples demonstrate the symbolic importance of twelve in different traditions. It is often understood as a number representing completeness, sacred order and spiritual significance.The Jupiter influence of Number 3 also connects Number 12 with the Guru principle: knowledge, wisdom, teaching and the search for higher understanding.However, we must distinguish the spiritual symbolism of the number twelve from its interpretation as a compound number in numerology. A number can be considered sacred or complete in a religious tradition and still have challenging characteristics in a particular numerological system.Why I do not consider Number 12 desirable as a Name Number:This is the central conclusion of my study.Number 12 contains three powerful influences:The Sun gives authority, ambition, initiative and status.The Moon gives imagination, emotions, sensitivity and the ability to understand others.Jupiter gives wisdom, knowledge, teaching and guidance.On paper, this appears to be a very promising combination. Yet, the placement of the numbers creates a particular pattern.The Sun wants to act, the Moon wants to imagine and reflect, and Jupiter wants to expand knowledge and possibilities. The individual may therefore have ambition, intelligence and creativity, but may struggle with consistency, timely execution and the completion of plans.The desire for status may sometimes become stronger than emotional expression. The individual may expect respect but find it difficult to reveal vulnerability. The ability to guide others may develop into strictness or excessive authority.The person may begin with enthusiasm, postpone important decisions, reconsider plans and eventually struggle to achieve the full potential of an opportunity.This is why I do not judge a compound number only by its final single digit. If we look only at 1 + 2 = 3, we see Jupiter and its positive qualities. But when we study the original compound 12, we must also consider the Sun-Moon sequence.Number 12 and Number 21: the importance of sequenceNumber 12 and Number 21 both reduce to 3, but they should not be interpreted as identical.In Number 12, the Sun comes before the Moon. In Number 21, the Moon comes before the Sun.The sequence changes the symbolic arrangement of the planetary influences. In my teaching, I consider this distinction important because the first digit and the following digit do not necessarily express themselves in the same way.Number 12 carries the image of the king standing before the queen, with authority and status taking a prominent position. Its total becomes Jupiter, the Rajguru.This is why I describe Number 12 through the combination of the king, the queen and the Rajguru. It is a number with the potential for knowledge, teaching, influence and recognition, but it also carries challenges related to attitude, emotional expression, delay and execution.The two compounds must therefore be studied separately rather than treated as interchangeable simply because their digital roots are the same.My final interpretation of Compound Number 12:Compound Number 12 is a combination of the Sun, Moon and Jupiter. It can produce intelligent, creative, imaginative and knowledgeable individuals who have the potential to become excellent teachers, counsellors, mentors, advisors, artists and diplomats.They may possess a natural ability to guide people, communicate ideas and gain recognition through their knowledge. They can be strict teachers and authoritative mentors. They may prefer honour and respect over money alone, and a recognised professional position may appeal to them more than independent business.At the same time, the number carries certain challenges. The desire for status can become excessive. Authority may come before emotional expression. Imagination may create confusion, and overthinking may delay action. These individuals may start projects enthusiastically but lose interest before completing them. They may miss valuable opportunities because of postponement or indecision.After forty, their interests may increasingly turn towards research, philosophy, spirituality, astrology, numerology and other occult sciences, while their earlier entrepreneurial drive may not remain equally strong.The most important lesson of Number 12 is that intelligence and knowledge alone do not guarantee achievement. Timely action, consistency, emotional balance and the ability to complete what one starts are equally important.For these reasons, although Number 12 has the powerful support of the Sun, Moon and Jupiter, I do not consider it a particularly desirable compound number, especially for a Name Number.A final point must be remembered: the birth number, destiny number and name number are different considerations. My caution here is specifically about choosing 12 as a Name Number. The compound should not be judged only by its reduction to 3; its original sequence must also be studied.In numerology, the compound number tells us a story that the single-digit total alone cannot explain.

Grand Diamond Jubilee Celebrations held in Jhajjar

Parivahan Vishesh News

DC Varsha Khanwal inaugurated the ceremony by lighting the lamp.

Heard the auspicious message of President Draupadi Murmu, Governor Prof. Asim Kumar Ghosh and Chief Minister Nayab Singh Saini from Kurukshetra

A wonderful presentation of Haryana's cultural glimpse was given in the Government Nehru PG College Auditorium

Rangoli decorated on the theme of progress from Haryana state tradition
Jhajjar, November 1. *

To mark the completion of 60 years of the formation of Haryana state, a grand district level function was organised in the auditorium of Government Nehru PG College on the occasion of Diamond Jubilee on Sunday. Bahadurgarh MLA Rajesh Joon and DC Varsha Khanwal were present in the programme. In the state level function organised in Kurukshetra, President Smt. Draupadi Murmu also released the logo of Diamond Jubilee to mark the completion of 60 years of Haryana in the august presence of Chief Minister Shri Nayab Singh Saini.DC Varsha Khanwal inaugurated the ceremony by lighting the lamp. The program began with Vande Mataram. The ceremony included virtual messages from President Draupadi Murmu, Governor Prof. Asim Kumar Ghosh, and Chief Minister Nayab Singh Saini, delivered from the state-level program held in Kurukshetra. Guests were given a grand welcome with the sound of the flute and the beating of drums.*Haryana is continuously moving forward after completing 60 years of development journey: Rajesh June*Addressing the district-level function, Bahadurgarh MLA Rajesh Joon said that the completion of 60 years since the establishment of Haryana is an occasion of pride, glory, and celebration for every citizen of the state. The Diamond Jubilee is not merely an anniversary celebration, but an important occasion to commemorate the state's six-decade journey of development, historical achievements, rich cultural heritage, and social progress. He stated that since its formation, Haryana has made steady progress in various areas of development. The hard work, determination, and collective efforts of the people of the state have given Haryana a new identity. He said that in Jhajjar district, its soldiers are engaged in protecting the country on the borders. In sports, its athletes are bringing glory to the district and the state at the international level. In terms of GST tax collection, Haryana ranks fourth in the country, and Jhajjar district ranks third in Haryana. Today, the district is playing a leading role in every field, a result of the collective efforts of all of us.*Make the new generation aware of the history and development journey of Haryana: DC*DC Varsha Khanwal, while extending Haryana Day greetings to the district residents present at the ceremony, said that the state's 60-year journey has been marked by numerous struggles, achievements, and milestones of development. We must not only learn about our state's glorious history but also introduce future generations to it. She urged citizens to educate children and youth about Haryana's formation, the circumstances of its rise, and the state's development journey, so that they may develop a sense of pride in their soil, culture, and traditions.The DC said it's crucial to understand the circumstances under which Haryana emerged and how the state has established itself in various areas of development over the past six decades. He added that the Jhajjar district administration periodically organizes such programs with enthusiasm and fanfare, ensuring the participation of students, women, and every segment of society. He called on all district residents to actively contribute to the state's development.*Haryana's development journey depicted through Rangoli*On the occasion of Haryana Day, an attractive rangoli was also made at the venue. The rangoli prepared by Monica and Mukesh on behalf of the Education Department depicted environmental protection, development and various government schemes in an artistic manner. The rangoli attracted the attention of the people present at the function and was appreciated by the guests present. Renowned Haryanvi artist Ganesh Nunwal and the girl students of Government Girls Senior Secondary School Nuna Majra enthralled everyone with their wonderful presentation of Haryanvi dance. The programme was conducted by spokesperson Sanjay Sharma. The state's six decades of development journey, achievements and glorious heritage were seen in the Diamond Jubilee celebrations held in Jhajjar.These officers were presentOn this occasion, ADC Jagnivas, SDM Badli Vishal Kumar, SDM Beri Renuka Nandal, CTM Ritu, DFO Sahiti Reddy, DRO Manveer Singh, DEO Ratindra Singh, DDPO Nisha Tanwar, DPRO Dinesh Kumar, DIO Amit Bansal, DPC Anil Sharma, DPO Neha Dahiya, AIPRO Dr. Ashwani Sharma along with officers and dignitaries of various departments were present.

Don't wait for November 5 for women's awards, apply online immediately: DC

Parivahan Vishesh News

On International Women's Day, women who have done excellent work in various fields will be honored

Jhajjar, 01 November .

Online applications have been invited for the Women's Awards to honor women who have achieved outstanding, commendable, and notable achievements in various fields on the occasion of International Women's Day, March 8, 2027. Eligible and interested women can apply through the department's online portal until November 5, according to DC Varsha Khanwal.The Deputy Commissioner stated that awards will be presented in various categories to encourage women's achievements, recognize their contributions, and promote women's empowerment in society. Under these awards, women will be honored with a certificate along with a cash prize.DC Varsha Khanwal informed that under the awards, a cash prize of Rs 5 lakh has been fixed for Smt. Sushma Swaraj Award, Rs 1.5 lakh for Indira Gandhi Mahila Shakti Award, Rs 1 lakh for Kalpana Chawla Shaurya Award and Rs 1 lakh for Behan Shanno Devi Panchayati Raj Award. Apart from this, cash prize of Rs 21,000 each will be given for Government Employee Award, Social Worker Award and Women Entrepreneur Award and Rs 51,000 for Life Time Achievement Award. A certificate will also be given along with all the awards.*Important instructions regarding online application and eligibility*Meanwhile, Neha Dahiya, DPO of the Women and Child Development Department, stated that eligible women can apply within the stipulated timeframe on the Haryana Women and Child Development Department's online portal, https://onlinemis.wcdhry.gov.in/. The application process is completely online, so no offline applications will be accepted. A woman applying for the award must possess a family identity card. She added that a duly signed affidavit in the prescribed format must be submitted along with the application. This affidavit must declare that there are no adverse cases pending against the organization in any forum, department, or court. It must also be clarified that if the information provided is found to be incorrect or any misappropriation is proven, the award amount and related monetary benefits will have to be returned to the government.District Program Officer Neha Dahiya appealed to eligible women to complete the application process before the deadline and take advantage of this opportunity for women's awards. For more information on the application process and other details, contact the office of the District Program Officer, Women and Child Development Department, located on the ground floor of the Mini Secretariat.

District residents should participate in controlling air pollution: DC

Parivahan Vishesh News

DC Varsha Khanwal directed the officials to fully implement the NGT's GRAP system.

Jhajjar, 01 November.

DC Varsha Khanwal said that the administration is vigilant about controlling air pollution in the district. All concerned departments should ensure timely implementation of related works along with creating awareness for environmental protection. She said that the NGT has implemented the GRAP system to control air pollution. It must be followed effectively. The SAMEER app has been launched to actively promote the environmental protection campaign. Any citizen can complain on the SAMEER app about violation of the GRAP system or other activities that are polluting the environment.The DC said that effective steps should be taken to strictly enforce the GRAP regulations imposed from time to time to control air pollution. He also urged farmers to take advantage of government schemes for crop residue management and directed officials to strictly monitor those burning crop residue. He said that anti-smoke guns should be used by the concerned departments to control dust on the roads, and strict compliance with the rules issued by the Pollution Control Board regarding air pollution should be ensured.While giving directions to the officials, the DC said that the officials should make every possible effort to make the city pollution free by making an action plan and should issue challans against those who act arbitrarily and if required, also register FIR against those who burn garbage.*Water sprinkling is necessary to prevent dust from spreading in the air during construction work on government sites.*DC Varsha Khanwal said that people have become increasingly aware of air pollution control. She added that water sprinkling is essential to prevent dust from spreading into the air during ongoing construction on government sites. She added that strict action is needed against those encroaching on urban roadways to prevent traffic congestion.It is necessary to follow the Citizen Charter for pollution control.DC Varsha Khanwal said that participation of every citizen is necessary in controlling air pollution so that a clean and healthy environment can be ensured. She said that citizens should keep the engines of their vehicles properly tuned. Maintain proper tyre pressure in their vehicles to reduce fuel consumption. Keep the PUC certificate of vehicles updated. Switch off the engine at traffic signals i.e. red lights. To reduce pollution, give priority to hybrid or electric vehicles. Do not spread or burn garbage in open spaces. Plant as many trees as possible and take care of them. Celebrate festivals in an environment-friendly manner, avoid firecrackers. She requested the citizens to cooperate in improving air quality by following these rules.

Haryana women cyclists win silver medal in National Track Cycling Championship

Parivahan Vishesh News

Meenakshi, Bhumika, Parul and Vaishnavi put up stellar performance in 4000m Team Pursuit event

Haryana, Kurukshetra // Rajesh Saluja

Haryana's women players have brought laurels to the state by winning silver medal with their brilliant performance in the National Track Cycling Championship being organized in Ranchi under the joint auspices of Cycling Federation of India and Jharkhand Cycling Association. 35 cyclists from Haryana are participating in this competition being held from 30th October to 4th November.On the second day of the competition, in the 4000m Team Pursuit event, Haryana's women team performed brilliantly and secured second position. The team that won the silver medal included Meenakshi, Bhumika, Parul and Vaishnavi. All four players made the state proud by displaying excellent coordination, speed and sporting skills.Haryana State Cycling Association General Secretary Neeraj Tanwar, while congratulating the players, said that Haryana's cyclists are showcasing their talent brilliantly in this competition. He hopes that in the upcoming matches of the competition too, the players of the state will perform well and bring many medals to Haryana's kitty.He informed that Meenakshi has already represented India in the Asian Games this year, while other players of the team have also proved their mettle at the national level. The players are accompanied by Gaurav Verma and Ashu as managers and Somvir Singh, Nirmal and Anil Kumar as coaches. He expressed confidence that under the guidance of coaches and managers, the players will perform excellently in the upcoming matches with full enthusiasm and confidence.

District level solution camp in Jhajjar today to solve public problems

Parivahan Vishesh News

Camps will be organised at the sub-division level in Beri, Bahadurgarh and Badli Mini Secretariats from 10 am to 12 noon

Jhajjar, 01 November.

In order to provide quick, transparent, and effective solutions to public problems, the district administration will organize resolution camps in all subdivisions, including the district headquarters, on Monday, November 2. These camps will be held from 10 a.m. to 12 p.m., where citizens' complaints will be heard and resolved on the spot.A district-level resolution camp will be held in the conference hall of the Mini Secretariat, chaired by DC Varsha Khanwal. During this, the DC will hear complaints related to various departments and direct officials to resolve the problems in a timely manner.*Solution camps will also be organised in all three sub-divisions*At the subdivision level, subdivision-level resolution camps will be held under the chairmanship of SDM Abhinav Siwach in Bahadurgarh, SDM Vishal Kumar in Badli, and SDM Renuka Nandal in the Beri Mini Secretariat Complex. Complaints received at these camps will be resolved on a priority basis.

Concluding Ceremony of Yuva Sangam Phase-7 Program

Parivahan Vishesh News

- Grand concluding ceremony of seven-day youth program under Ek Bharat Shreshtha Bharat initiative.

- Youth is the biggest capital of the nation -- Prof.

- Yogesh SinghYouth should feel proud of their culture -- Prof. K.P. Singh

Report Prof. Manoj Kain, Delhi University - Presented by Pinki Kundu

The seven-day Yuva Sangam Phase-7 program organized under the Ek Bharat Shreshtha Bharat initiative at Delhi University from 26th October to 1st November concluded on Sunday at Gandhi Bhavan with great enthusiasm, zeal and the message of national unity.The chief guest at the concluding ceremony was Dr. Naresh Grover, Director AICTE Delhi University, Director of Gandhi Bhavan and Nodal Officer Prof. K.P. Singh, Joint Director, Gandhi Bhavan Prof. Hansraj Suman, Principal of Dyal Singh College Prof. Bhavna Pandey, Prof. Manoj Kumar Kain, Dr. Manish Kumar, Tamil Nadu Coordinator Dr. Nageshwar Rao, anchoring was done by Prof. Charu Kalra.Delhi University Vice Chancellor Prof. Yogesh Singh sent his message for Yuva Sangam Phase-7, in his inspirational message he said that India's greatest strength lies in unity in diversity.India is a country of different languages, religions, cultures, traditions and lifestyles, but despite all these diversities our national identity is one.Initiatives like Ek Bharat Shreshtha Bharat provide youth an opportunity to understand the diverse cultural traditions of the country, develop respect for each other and strengthen the spirit of national unity.DU Registrar Dr. Vikas Gupta also sent his message to students saying that 11 years ago on the occasion of Sardar Vallabhbhai Patel Jayanti, Prime Minister Shri Narendra Modi had conceived the Ek Bharat Shreshtha Bharat initiative in which youth are to be connected with their culture, literature, language, lifestyle etc.He called upon students that along with acquiring education, they should develop the spirit of social service, national service and harmony in society so that the purpose of education reaches every section of society.He also said that such programs develop leadership ability, self-confidence, social responsibility and national consciousness in students.Chief Guest Dr. Naresh Grover in his address told the students of Tamil Nadu that in Delhi every language, culture and tradition is seen, you must have also shared your thoughts.He told that this is the government's initiative that the young generation should know India properly and that is possible only when we go and see important places.You must have learnt a lot from Delhi, you will keep remembering memories here.Nodal Officer Prof. K.P. Singh said Yuva Sangam is not just a tour, it is a laboratory to live India.In the last seven days you have felt everything from Haryanvi Ragini to Punjabi Bhangra and Delhi's language. This is our real strength.He further said that Prime Minister's mantra of Ek Bharat Shreshtha Bharat will be realized when our youth will feel proud of their culture.I call upon all you youth that you go from here to your respective states and become ambassadors of this culture.Delhi University is your own home, please come again.Director of Gandhi Bhavan, Delhi University and Nodal Officer of Yuva Sangam Phase-7 Prof. K.P. Singh while addressing the youth said that the real strength of India lies in its unity in diversity, cultural heritage and rich traditions.He called upon the youth to play their active role in maintaining the unity, integrity and social harmony of the country and to strengthen the spirit of mutual brotherhood and national unity while respecting the language, culture, customs and traditions of different states.He said that youth are the biggest power of nation building and it is necessary to develop positive thinking, leadership ability, discipline and spirit of national service within them.The program concluded with emotional moments. Youth from Central University of Tamil Nadu bid farewell to each other by presenting their turbans, caps and local souvenirs and resolved that they will become true soldiers of Ek Bharat Shreshtha Bharat.At the end of the program, guests were thanked and all teachers, organizers and participants who contributed to making the event successful were appreciated.Participants were honored by giving certificates. Thus the seven-day youth program concluded with the resolve that youth will play their active role in building a strong, harmonious, inclusive and developed nation while respecting the diversity of India.

Dispute over ownership rights on land worth crores

Parivahan Vishesh News

Tension increased due to clash between two sides

Allegations of encroachment on 30 decimal land sold of Bombay Hotel and Madhukar Studio

Both sides clashed for second consecutive day, apprehension of major untoward incident

Report Dr. Rajkumar Yadav, Parivahan Vishesh Daily, Rourkela

Dispute over ownership rights of crores of rupees land sold of Bombay Hotel and Madhukar Studio in city is continuously deepening. Amid efforts to fill pit for construction work on land, there was strong clash between both sides on Friday and Saturday night. Due to continuously increasing tension, apprehension of untoward incident is being expressed in area.According to sources, disputed land is about 30 decimal, whose market value is being told more than Rs 25 crore. Out of this, a part has been purchased by Istiyak Alam alias Pappu, while information about lease of eight decimal land has also come to light.It is told that for last one week Pappu and his family members are trying to fill pit of land for construction work. Whereas, teacher Hushn Ara living in neighbourhood has claimed that disputed land is of her ancestors. It is alleged that despite purchase of a part of land, dispute started due to attempt to encroach on entire land, which is now continuously becoming serious.After strong clash between both sides on Friday night, filling work had to be stopped. On Saturday night Pappu and his family members were not present on spot, but attempt was made to get filling work done by parking police van. During this, Hushn Ara and her family members again clashed with outsiders, after which work had to be stopped.Despite intervention of police in case, Hushn Ara's family alleging bias has appealed to higher officials of police administration for impartial action.Demand for demarcation of land - Enlightened people of area say that administration should take positive initiative and get proper demarcation of disputed land done with help of Tehsil, so that actual ownership right and status of land can become clear. With both sides adamant on their respective claims, there is apprehension of dispute taking more serious form. In such situation, it has become necessary to control situation in time through administrative intervention and impartial investigation.

Why action on small shopkeepers, leniency on big establishments?

Parivahan Vishesh News

Banned plastic seized, fine also collected in joint raid of RMC and Pollution Control Board

Questions raised on accountability of big commercial institutions amid action in Koel Nagar Food Court and NAC Market

Report Dr. Rajkumar Yadav, Parivahan Vishesh Daily, Rourkela

The joint action of Rourkela Municipal Corporation (RMC) and State Pollution Control Board in the direction of making the city free from plastic pollution is certainly welcome. During a special drive conducted in Koel Nagar Food Court and NAC Market on Friday, banned single-use plastic was seized from various shops and shopkeepers violating rules were fined. This initiative is important from the point of view of environmental protection and curbing use of banned plastic.But along with this action a basic question also arises — are environmental protection laws applicable only to small shopkeepers? Why does the government machinery, which conducts immediate raids and fines on shops of small traders who earn daily to run their family, not show the same promptness in case of big establishments, industrial units and influential commercial institutions?Questions have been raised about such institutions in the city and surrounding industrial areas, whose pollution control related approvals, NOCs and environmental compliance status needs to be examined. The concerned departments should also make public the status regarding complaints being raised about big industrial establishments including liquor manufacturing centre located at Birmitrapur. Do all units have valid permission? Are their production activities and pollution standards regularly checked? If there is violation of rules somewhere, why does details of action not come before public?The meaning of environmental protection is not only seizing plastic bags in markets, but also keeping strict surveillance on big pollution sources with equal strictness.RMC and Pollution Control Board should continue the campaign, but scope of action should not remain limited to small shopkeepers. On the touchstone of law, small shopkeeper and big industrialist both should be equal.Public wants not showy action, but fair system and equal justice.

29 Acres of Land Lying Vacant for Years in the Name of Industrial Development! Odisha Govt Cancels Vedanta's Land Allotment

Parivahan Vishesh News

Encroachment on government land, concession in name of industry and years of waiting for development; administrative action raises serious questions on accountability of industrial investment

Report Dr. Rajkumar Yadav, Parivahan Vishesh Daily, Rourkela / Jharsuguda

The case of getting government land allotted in the name of industrial development in Odisha and then not utilizing it for years has once again emerged as a big question on accountability of government system. The state government has cancelled with immediate effect the lease of about 28.8 acres of government land allotted to Vedanta Limited in Panchapalli village of Jharsuguda district. As per order issued on 27th October 2026, the company has been directed to hand over peaceful and vacant possession of the land to concerned authority.The matter is serious because this land was allotted in year 2013 for industrial development of state through Industrial Infrastructure Development Corporation (IDCO). Objective was to promote industrial activities, create employment and strengthen economy of region. But on inspection, instead of industrial structure, only boundary wall was found on the land. No notable construction, no production activity and no proposed industrial infrastructure.

Most worrying aspect is that company had also mortgaged this land and obtained loan facility from bank. However, as per spokesperson of Vedanta, concerned loan has been repaid. The company, while presenting its side, said that use of land was proposed for future expansion, ancillary industrial facilities and construction of community health centre. Talks continuing with IDCO in this regard has also been mentioned.

But this matter is not limited to only 28.8 acres land. Report of Comptroller and Auditor General of India (CAG) has exposed horrifying picture of management of government land in Odisha. According to report, 12,393.651 acres of land allotted for industries between year 1981 to 2021 was not used for prescribed purposes. Till March 2024, IDCO had allotted total 50,231.849 acres of industrial land. In addition, unauthorized encroachment on 668.893 acres of government land was also revealed, whose value was estimated around Rs 597.87 crore.

In this background, state government has cancelled land allotment of 267 inactive industrial units and issued show-cause notices to 398 other units. Government has also emphasized on policy of taking back industrial land lying unused for three years.

Question is, after all government land is for industries or for lying inactive with private companies for years? Keeping that land unused for years, from which local youth should get employment, displaced families should get opportunity and region should get economic prosperity, is injustice with public interest.

Now need is not only to cancel allotment, but to conduct public audit of industrial land allotment, actual investment, employment generation and utilization in entire state. Government land is property of public, not permanent fiefdom of any company.

Under whose pressure is the action file on Birmitrapur liquor manufacturing centre stuck?

Parivahan Vishesh News

Role of local attached administration, Tehsildar, Excise and Pollution Control department officials in dock; Why delay in seizure despite getting numbers of suspicious vehicles?

Questions raised on pending inquiry of vehicle numbers provided by senior excise officer; Demand for impartial inquiry into administrative contacts and decisions in entire episode

Report Dr. Rajkumar Yadav, Parivahan Vishesh Daily, Rourkela

Allegations of irregularities being raised regarding liquor manufacturing centre located at Birmitrapur are now no longer limited to production, transportation and revenue only. Despite instructions of Collector, complaints reaching various offices and information of concerned departments, concrete action not coming to fore has raised serious questions on accountability of local administration. Biggest question is under whose protection process of action has become so slow?In this entire episode, impartial review of role of local Tehsildar, regional Pollution Control department, Excise department and other concerned offices' higher officials is also necessary. When complaints have reached concerned officers, why status of joint inspection, verification of documents and action as per rules has not been made public till now?An important aspect of case is also that earlier some suspicious vehicles' egistration numbers were allegedly made available to department by a senior officer of Excise department and matter of taking action of seizure as required after investigating them had come to light. In such case question is in whose name those vehicles are registered? What is their relation with liquor manufacturing centre? Despite availability of numbers to department, why there is so much delay in their identification, investigation and possible seizure? Concerned officers should answer these questions.Along with this, if necessary and legal basis comes to light in investigation, then official and relevant contacts between alleged operators, managers of establishment and concerned administrative officers should also be investigated by competent agency. If needed, with lawful permission, scrutiny of Call Detail Records (CDR) and other communication records can make it clear at what level contact and interference happened during action on complaints.Allegations like alleged business of crores per month, inter-state supply, possible revenue loss and violation of environmental rules cannot be kept suppressed in files now.Administration will have to clarify whether delay in action is administrative laxity or result of some influential intervention.Collector sir should fix time-limit for joint investigation and get inquiry done of vehicle numbers, license, production records, transport documents and pollution related permissions. If allegations are correct then action should be taken against those responsible and if baseless then facts should be made public. After all, accountability of law should be equally applicable on both establishment and administration.

The Pen That Inspires: The Literary Journey of Writer Dr. Vijay Garg

Dr Vijay Garg

Retired Principal Educational columnist Eminent Educationist street kour Chand MHR Malout Punjab

Parivahan Vishesh News

Dr. Vijay Garg

A writer is not merely a person who puts words on paper; a writer is someone who observes society, understands human emotions, questions existing practices and inspires people to think differently. Through his writings, a writer can educate generations, raise social awareness and become a voice for meaningful change. Dr. Vijay Garg is one such educationist and writer who has dedicated a significant part of his life to education, knowledge dissemination and social awareness. Born on 15 August 1962 in Fatuhi Khera, Punjab, Dr. Vijay Garg has built his identity through teaching, writing, educational guidance and public service. With academic qualifications including M.Sc., B.Sc., B.Ed. and a Postgraduate Diploma in Statistics, he developed a strong foundation in mathematics and scientific thinking. He served for nearly two decades as a Mathematics Lecturer in the Punjab Education Department and later worked as a Principal. After retiring from government service, he continued his association with education and intellectual activities. ### Writing as a Mission, Not a Profession For Dr. Garg, writing is not simply a hobby or a profession; it is a mission to educate and enlighten society. Over the years, he has written thousands of articles in English, Hindi and Punjabi for national and international newspapers, magazines and educational publications. His writings cover a wide range of subjects, including education, science, technology, environment, social problems, health awareness, career guidance, human values and contemporary challenges. His articles regularly encourage readers to look beyond conventional thinking and understand the practical implications of knowledge in everyday life. As a regular contributor to Junior Science Refresher, he has helped communicate scientific ideas in an accessible manner. His writing reflects the belief that science should not remain confined to laboratories and textbooks; it should become part of everyday thinking and decision-making. ### A Voice for Education and Social Transformation One of the remarkable features of Dr. Garg's writing is its diversity. He believes that a writer should not limit himself to one subject or audience. His articles address students, teachers, parents, policymakers and ordinary citizens. He writes about the changing education system, competitive examinations, career opportunities, scientific discoveries, environmental protection, women's empowerment, rural development, public health and social responsibilities. He also highlights emerging technologies such as artificial intelligence and their influence on education, employment and human life. His approach is simple: complicated subjects should be presented in language that ordinary readers can understand. He believes that knowledge becomes meaningful only when it reaches people and influences their decisions. ### A Writer with a Large Literary Vision Dr. Garg has authored and contributed to more than 150 books covering education, science, mathematics, career guidance, competitive examinations and general knowledge. His publications aim to make learning accessible, practical and interesting. Some of his notable works include Career Handbook, Most Influential Indian Scientists of All Time, The Hybrid Teacher, Visual Dictionary, From Failure to Success and Jawahar Navodaya Vidyalaya Practice Kit. These books reflect his interest in developing educational resources for students at different stages of learning. His work also demonstrates his commitment to helping students from rural areas and economically weaker backgrounds access quality educational material. His book From Failure to Success carries an important message: failure should not be considered the end of a journey but an opportunity to learn, improve and move forward. DPS Publishing House +3 ### Beyond Books and Newspaper Columns Dr. Garg's contribution extends beyond conventional writing. He established the New National Digital Library to provide students with digital study materials, competitive-examination resources, books and academic guidance. Through educational WhatsApp groups, he has supported aspirants preparing for NEET, JEE, UPSC, IAS and Olympiads. He also serves as Academic Editor of the online magazine FnBWorld.com, contributing to its academic quality and intellectual direction. His literary contribution received recognition through the Surjeet Patra Award in 2026, honouring his sustained contribution to writing and literature. Imphal Times +1 ### The Philosophy Behind His Writing For Dr. Garg, the responsibility of a writer goes beyond presenting information. A writer should encourage critical thinking, promote scientific temper, challenge harmful social practices and inspire positive action. He believes that education without values is incomplete, science without social responsibility is limited, and knowledge without practical application loses much of its importance. His writings frequently remind readers that social transformation begins with awareness. Whether discussing environmental degradation, educational inequality, changing family relationships, technological development or human values, he attempts to connect individual responsibility with collective progress. ### The Journey Continues Retirement from government service has not meant retirement from learning, teaching or writing for Dr. Vijay Garg. Rather, it has provided him with greater opportunities to devote himself to literary activities, educational initiatives and social awareness. In an age when information is available everywhere but meaningful understanding is increasingly difficult to develop, writers like Dr. Garg underline the importance of responsible communication. His journey demonstrates that a teacher can continue educating society even after leaving the classroom. A newspaper article can become a lesson, a book can become a guide, and a thoughtful sentence can inspire someone to change the direction of life. Ultimately, the greatness of a writer is not measured merely by the number of articles published or books written, but by the thoughts awakened, minds enlightened and lives positively influenced. Dr. Vijay Garg's literary journey represents a continuing commitment to knowledge, education and social responsibility. His pen remains an instrument of learning, his ideas a source of inspiration, and his writing an effort to build a more informed, thoughtful and enlightened society.

A New Mathematical Era: Unlocking the Doors to Progress

Parivahan Vishesh News

Dr. Vijay Garg

Mathematics has always been one of the most powerful tools for understanding the world. From the movement of planets to the functioning of smartphones, from building bridges to predicting weather patterns, mathematics plays an essential role in almost every aspect of modern life. Today, rapid technological developments, artificial intelligence and scientific discoveries are opening the doors to a new era of mathematical progress. Mathematics is no longer limited to textbooks, classrooms and complicated calculations. It has become the foundation of innovation, research and problem-solving. Modern technologies such as artificial intelligence, machine learning, robotics, quantum computing and data science depend heavily on mathematical principles. Concepts such as algebra, calculus, statistics, probability and geometry are helping scientists and engineers develop solutions to complex global challenges. One of the most exciting developments is the growing relationship between mathematics and artificial intelligence. Mathematical algorithms enable computers to recognise patterns, analyse information, make predictions and improve their performance through experience. From medical diagnosis to financial forecasting, mathematical models are making decision-making faster and more accurate. Another important area is data science. Every day, enormous amounts of information are generated through digital communication, online services, scientific research and business activities. Mathematics helps convert this information into meaningful knowledge. Statistical techniques and mathematical models help governments, researchers and organisations understand trends and make informed decisions. Mathematics is also playing a significant role in healthcare. Mathematical modelling helps researchers understand the spread of diseases, evaluate treatment strategies and develop new medicines. In climate science, mathematical calculations are used to study global warming, predict extreme weather events and understand environmental changes. Similarly, in agriculture, mathematical tools help improve irrigation, estimate crop production and use natural resources efficiently. However, the new mathematical era is not only about advanced technology. It is equally important to strengthen mathematical education. Many students consider mathematics a difficult and frightening subject because they are introduced to it mainly through formulas, memorisation and examinations. Teachers must make mathematics more interesting by connecting it with everyday experiences, practical activities, puzzles, experiments and real-life problems. The use of digital platforms, interactive software and AI-based learning tools can make mathematical education more accessible and personalised. Students can learn at their own pace, identify their weaknesses and practise difficult concepts through innovative methods. Nevertheless, technology should support teachers rather than replace their guidance, encouragement and human understanding. Another important requirement is developing mathematical thinking rather than merely memorising procedures. Students should be encouraged to ask questions, explore different methods, identify patterns and develop logical reasoning. Such skills are valuable not only for scientists and engineers but also for citizens making decisions in everyday life. The future will demand professionals who can combine mathematical knowledge with creativity, communication and critical thinking. Careers in artificial intelligence, robotics, cybersecurity, financial technology, space research, biotechnology and data analytics will increasingly require strong mathematical foundations. A new mathematical era offers tremendous opportunities, but it also demands equal access to quality education. Rural students, economically weaker sections and learners from disadvantaged backgrounds must receive opportunities to develop mathematical abilities through good teaching, digital resources and practical learning experiences. Mathematics is much more than a subject; it is a universal language of progress. It teaches patience, accuracy, discipline and logical thinking. By strengthening mathematical education and connecting it with emerging technologies, we can prepare young minds to face future challenges. The doors to progress are already opening. Mathematics will provide the keys to unlock them.Dr Vijay Garg Retired Principal Educational columnist Eminent Mathematician street kour

Villages Were Once Known for Pure Air; Today, They Too Are in the Grip of Pollution

Parivahan Vishesh News

Dr. Vijay Garg

There was a time when the mention of villages brought to mind green fields, shady trees, open skies, clean water and fresh, unpolluted air. Mornings in villages began with the melodious chirping of birds and refreshing breezes. People often preferred villages to escape the crowds, smoke and pollution of cities. However, the situation is changing rapidly. Today, the villages of Punjab are also facing the serious problem of air pollution. The places once known for their clean environment are increasingly filled with smoke, dust and harmful particles. There are several reasons behind the growing air pollution in Punjab. Crop residue burning, particularly after the paddy harvest during October and November, is one of the major contributors. The smoke released from burning agricultural waste spreads across neighbouring villages and towns. It increases the concentration of fine particulate matter in the air, which can enter the human body through breathing and adversely affect health. However, stubble burning is not the only cause of pollution. Increasing numbers of vehicles, diesel-powered agricultural machinery, brick kilns, construction activities, road dust, waste burning and smoke from household fuels also contribute to deteriorating air quality in villages. The excessive and improper use of pesticides and chemicals in agricultural fields raises additional environmental concerns. Today, children, elderly people and women living in villages are also experiencing respiratory problems. Exposure to polluted air can increase the risk of coughing, eye irritation, allergies, asthma and cardiovascular diseases. Prolonged exposure may seriously affect lung and heart health. Young children, whose lungs are still developing, and elderly people with vulnerable health are particularly at risk. Another worrying aspect of this problem is the relatively limited awareness and monitoring of air pollution in rural areas. Many villages lack adequate air-quality monitoring facilities. As a result, residents often remain unaware of the actual quality of the air they breathe every day. To address this crisis, farmers should not simply be blamed; instead, they must be provided with practical and affordable alternatives. Machines such as Happy Seeders, Super Seeders and balers should be made easily accessible for effective stubble management. Agricultural residue can also be converted into organic manure, biogas and other useful products. Farmers need adequate financial assistance, technical guidance and institutional support to adopt environmentally friendly practices. Increasing tree cover, developing community forests, planting trees along roadsides and protecting ponds and natural water bodies are equally important. Burning garbage and plastic waste must be discouraged through effective awareness and enforcement. Clean cooking fuels should be promoted, while emissions from brick kilns and industrial units must be properly controlled. Schools and village panchayats can play an important role in this campaign. Students should be encouraged to participate in environmental awareness rallies, plantation drives and programmes promoting clean air. Regular monitoring of air quality and the formation of local environmental committees in villages can also prove beneficial. Governments, panchayats, farmers, scientists and ordinary citizens must work together to address this growing challenge. Clean air is not merely an urban concern; it is a basic necessity and a right of every citizen, irrespective of where they live. We must remember that villages are not merely centres of agricultural production. They are also the foundation of our culture, natural heritage and way of life. If the air in our villages becomes polluted, the dream of a healthy society and a secure future will remain incomplete. The time has come to restore villages as symbols of fresh air, greenery and natural beauty. Clean air is not a luxury; it is one of the most fundamental necessities of life.

Big Question on Gutkha-Tobacco-Cigarette

Parivahan Vishesh News

Awareness farce or revenue game - Serious questions raised on government's double standards and ruining of youth

Hariom Bajpai 'Nadan'Pilibhit.

Today in the country, lakhs of people are losing their lives every year due to consumption of tobacco, gutkha and cigarettes, falling prey to serious diseases like cancer, tuberculosis and heart disease. This is such a bitter truth, which the government itself confirms from time to time through big advertisements, publicity campaigns and public awareness programs. The government drains crores of rupees of public's hard-earned money like water on these advertisements, to remind people that "Tobacco is injurious to health."But amidst all this, a burning and legitimate question has arisen in the mind of common public that when government has full knowledge of its deadly consequences, then why does government not completely ban sale of these products today.The most frightening and worrying aspect of this problem is that today the youth section of the country and school students, women are coming under its grip most rapidly. These intoxicating substances being openly sold around schools and educational institutions are proving very dangerous for children today. In the beginning, youth who start its consumption merely as 'hobby' or by seeing friends, when they become slaves of its serious addiction, they themselves do not know. This situation has become a big threat to future of coming generation.Experts and common citizens believe that huge central and state taxes received from tobacco and cigarette companies is a big financial source for government. Where on one hand government spends thousands of crores rupees on health services budget and cancer treatment, on other hand it indirectly gives open exemption to sale of products that invite same disease.Public's question is whether in government's priority 'human life' comes first or 'revenue i.e. tax earnings'.In India, stringent laws like Cigarettes and Other Tobacco Products Act exist, under which smoking is prohibited at public places and sale of tobacco near educational institutions is banned. Despite this, ground reality is quite opposite. Today gutkha, cigarette and intoxicating substances are being sold rampantly around schools, and local administration is sitting with eyes closed on this. Is this weakness of administrative system or political collusion.Just printing symbolic pictures on cigarette packets or completing formality through advertisements once or twice a year is not enough now. Demand of aware citizens of entire country including Pilibhit is that government should leave this dual policy and take strong steps - Complete ban should be imposed on production and sale of tobacco, gutkha and these intoxicating products sold near schools.If complete ban is not possible immediately, then a clear roadmap for stopping its manufacturing in a phased manner should be placed before public.Government should clarify its position on this issue and answer people of country why it is hesitating to crack down on this deadly business.

Apna Auto Taxi Union Celebrates Diwali Milan - Gives Happy Diwali Wishes to Drivers

Parivahan Vishesh News

Welcomed by distributing sweets under leadership of Santosh Pandey, resentment expressed over Delhi Government policies

Message: Your Companion Santosh Pandey - Happy Diwali to all drivers.

1. Fact - Diwali Milan Function:
Today, as every year, by Apna Auto Taxi Union, in happiness of Diwali, all auto-taxi driver companions were welcomed with Diwali sweets. On this occasion, Happy Diwali wishes were given to all drivers. Program was led by Union colleague Santosh Pandey. Enthusiasm was seen among all drivers with slogan of Jai Shri Ram.

2. Main Points - Resentment of Drivers:
In meeting, main problems of auto-taxi drivers of Delhi were discussed:
- Allegation of injustice on Delhi Government - Allegation of getting drivers looted through companies
- Attempt to finish work of traditional auto-taxi by promoting private vehicles (Bike Taxi, Car Pooling)
- Crisis on employment due to increase in commercial permit, fitness, and aggregator commission

3. Warning of Agitation:
In discussion it was decided that soon commercial drivers of Delhi, along with all commercial drivers of country, will do big agitation against Modi Government at Centre and Rekha Gupta Government of Delhi."

Sharp Attack on SP-Congress: Beware of Those Who Patronize Criminals

Parivahan Vishesh News

Gorakhpur. Chief Minister Yogi Adityanath on Sunday wrote new chapter of development in Chauri Chaura assembly constituency of Gorakhpur, the sacred penance place of Mahayogi Guru Shri Gorakhnath Ji. Chief Minister inaugurated and laid foundation stone of 84 development projects costing more than Rs 287 crore. Most prominent among them is railway overbridge built on Level Crossing No. 147-B on Chauri Chaura - Bhopa Bazar - Mundera Bazar road, which Chief Minister termed as 'Revolutionary Overbridge'. Chief Minister said that I also wanted this bridge to be made Y Model but without causing damage to any trader's shop or house. He said, "We will do development and will also save heritage and employment. There will be no compromise with interests of traders."Chief Minister started his address with vigorous lines of National Poet Ramdhari Singh Dinkar. Remembering historic sacrifice of Chauri Chaura and bravery of Babu Bandhu Singh of Tarkulha Devi Temple, he paid homage to freedom fighters. He said that this land is of revolutionaries and development here is true tribute to those martyrs. Targeting opposition, Yogi Adityanath said that Uttar Pradesh has now changed. Making sharp attack on Samajwadi Party, he said, "SP means giving protection to criminals, who are opponents of farmers and development." Cautioning public, he said that there is need to beware of 'chameleons'. Modi Government has uplifted poor, while corrupt and anti-security elements only are opposing Modi Ji today. On demand of Nagar Panchayat President, Chief Minister assured establishment of a state-of-the-art Digital Nagar Panchayat office in Mundera Bazar. He said that his government without any discrimination, considering 25 crore people of state as its family, is becoming partner in their happiness and sorrow. Chief Minister described these projects as a special gift to public for upcoming Diwali and Chhath festivals. In end he reiterated that his government is firm on its resolve to crush mafia, corrupt and criminals into dust and now in Uttar Pradesh there will be only atmosphere of development and celebration.On this occasion, Bansgaon MP and Union Minister Kamlesh Paswan, Nishad Party President and Cabinet Minister Sanjay Nishad, former MLA and Rajya Sabha MP Sangeeta Yadav, Chauri-Chaura MLA Sarwan Nishad, BJP State Vice President and Legislative Council Member Dr. Dharmendra Singh, Gorakhpur Rural MLA Vipin Singh, Khajani MLA Shriram Chauhan, Sahjanwa MLA Pradeep Shukla, former MP Jaiprakash Nishad, former MLA Bechan Ram, BJP Regional President Vinod Rai, District President Janardan Tiwari, District In-charge Ajay Gautam along with local BJP office bearers and workers were present.

Kaushal Deepotsav 2026' Rocks at DAV Public School, Students Win Hearts with Innovation and Creativity

Parivahan Vishesh News

Panchkula. A grand organization of Kaushal Bodh Exhibition and Diwali Carnival under 'Kaushal Deepotsav 2026' was done on Saturday at DAV Public School, Sector-8, Panchkula. In the program, students did splendid display of their creativity, scientific thinking, technical efficiency and practical skills.In the program, Keshni Anand Arora was present as Chief Guest. School Manager Jaskiran Harika and Regional Assistant Jaya Bhardwaj also specially participated. On this occasion, Principals of various prestigious schools of Tricity, parents, former students and retired teachers were also present.In exhibition inspired by CBSE's Kaushal Bodh initiative, students presented models and creative projects based on various subjects. On behalf of Art Department, display of handmade diyas, scented candles, rangoli, toran and decorative items made of clay was done. Activities like face painting and on-the-spot painting also attracted attention of people.On behalf of Information Technology Department, scratch-based games, animation, QR codes and other digital activities were presented. While, working models like robotic arm, catapult and propeller boat of Physics Department displayed scientific understanding and innovation capability of students.'Green Kitchen Garden' exhibition prepared by joint efforts of Biology Department and gardener staff of school remained centre of attraction. Through this initiative based on theme 'Grow What You Eat', message of environment protection, organic farming and nutritious food was given. Through activity of cooking without fire, students displayed culinary art, cleanliness and life-useful skills.In Diwali Carnival, colourful decoration, tasty dishes, entertaining games and various stalls created festive atmosphere. Stalls of many dishes including sweets, chaat, golgappa, pav bhaji and bhel puri were put up, which visitors enjoyed.Chief Guest Keshni Anand Arora, School Manager Jaskiran Harika and Regional Assistant Jaya Bhardwaj observed various stalls of exhibition. The organization effectively presented coordination of practical experience, creativity, scientific approach and Indian culture along with education.Aim of program was to develop confidence, innovation, technical efficiency and life-useful skills in students. 'Kaushal Deepotsav 2026' provided opportunity to students to show their talent along with connecting Diwali festival with knowledge, creativity and environmental awareness also.

Kalpi Bar Association President Murdered in Kanpur After Abduction; Police Search for Suspects Underway

Parivahan Vishesh News

Sunil Bajpai

Kanpur. The president of the Kalpi Bar Association (Jalaun) was abducted and subsequently murdered after being lured to Kanpur under the pretext of discussing a case file. His body was discovered today, Sunday, in the Sachendi area, prompting the police to launch an investigation.According to information provided by the police:Gayadeen Ahirwar, a 70-year-old senior advocate and president of the Kalpi Bar Association, was abducted on Saturday night by miscreants in a car near the Durga Mandir intersection on the Kanpur-Jhansi highway. His body was found this Sunday morning in the Sachendi area.Police sources indicate that Advocate Gayadeen was called under the guise of discussing a case file. The abductors then took him toward Orai. Shortly thereafter, his mobile phone became unreachable, and the number from which he had received the call was also switched off.Regarding the motive, preliminary police investigations point toward a land dispute. Two suspects have been taken into custody for questioning.Gayadeen Ahirwar, who was serving his fourth term as president of the Kalpi Bar Association, resided in the Kagjipura area of Kalpi—located 35 km from the district headquarters. According to his family, he had been practicing civil and criminal law in Kalpi since 1981 and had won the association's election on May 8, 2026.He is survived by his wife, Rajeshwari (68), three sons, and two daughters. His eldest son, Saurabh (40), works in Lucknow, while his younger son, Harshmitra (30), lives at home in Kalpi. Another son, Gaurav Mitra, passed away on October 31, 2025. The police have registered a case and are actively searching for the suspects involved in the murder; in this process, two individuals deemed suspicious have been taken into custody and are currently being questioned.

Today's Cybersecurity Thought

Pinki Kundu

The "Lost USB" Trap: A Small Device, A Major Cyber Threat"The easiest way to breach a network may not be by hacking its firewall, but through a USB drive left on the floor."

Parivahan Vishesh News

In today's digital age, cybercriminals exploit not only technical vulnerabilities but also human curiosity and behavior. One such common yet highly effective cyberattack technique is the "Lost USB Trap."Cybercriminals deliberately leave USB drives, pen drives, external storage devices, or other removable media in locations such as parking lots, office premises, cafeterias, conference venues, reception areas, and sometimes even near employees' computer desks. Out of curiosity or a desire to identify the owner, individuals often connect these devices to their computers, unknowingly triggering malware infections and compromising the entire network.This attack technique exploits human behavior rather than technical weaknesses, making it a form of social engineering attack. How Does the Attack Work?1. The attacker loads a USB device with malware, spyware, ransomware, or other malicious scripts.2. The device is intentionally left at a location where employees or other individuals are likely to find it.3. An unsuspecting user plugs the USB device into a computer.4. The malware may automatically execute through:o AutoRun featureso Malicious executable fileso BadUSB firmware manipulationo Fake documents containing malware5. Once activated, the malware may:o Steal login credentialso Install backdoorso Encrypt files and launch ransomware attackso Spread to other systems across the networko Exfiltrate sensitive information Why Is It So Dangerous?1. Bypasses Traditional Security ControlsFirewalls, email filters, and other online security measures can stop internet-based threats. However, an infected USB device connected directly to a system can bypass many external security controls.2. Exploits Human CuriosityAttackers know that users are likely to open USB devices labeled as "Confidential," "Salary Data," "Payroll," "Interview Results," or "Passwords."3. Can Compromise an Entire NetworkA single infected USB connected to one workstation can become the entry point for compromising an organization's entire network.4. Difficult to DetectAdvanced USB malware can remain dormant for long periods, evade antivirus detection, and activate only under specific conditions.Real-World ExamplesStuxnetOne of the most infamous cyberattacks, Stuxnet, reportedly spread through infected USB drives to systems that were completely isolated from the internet (air-gapped environments). This demonstrated how removable media can compromise even highly secure networks.Red Team Security TestsMultiple cybersecurity awareness studies and red team exercises have shown that employees frequently plug unknown USB drives found within office premises into their computers, proving the effectiveness of this attack technique. Potential ConsequencesIf an infected USB device is connected to a system, it can result in:• Theft of confidential and sensitive information• Banking and financial fraud• Theft of user IDs and passwords• Ransomware attacks• Data breaches• Disruption of government and critical infrastructure services• Unauthorized remote access to systems How to Identify a Suspicious USB DeviceThe following indicators may suggest that a USB device is suspicious:• The owner is unknown.• It is found in parking lots, elevators, cafeterias, or public places.• It carries unusual labels such as: o "Salary Details"o "Confidential"o "Personal Photos"o "Passwords"o "Annual Appraisal"• It comes from an unknown or untrusted source.• It displays unusual pop-ups or unexpected activity when connected to a computer.Best Practices for Individuals Never connect an unidentified USB device to a computer.Submit any found USB device to the IT department or security team. Disable AutoRun and AutoPlay features.Use updated endpoint security solutions.Scan removable media before accessing its contents. Follow organizational policies regarding USB devices and external storage. Immediately report suspicious USB devices or cybersecurity incidents. Best Practices for Organizations• Restrict USB usage through endpoint management tools.• Implement Device Control Policies.• Deploy advanced Endpoint Detection and Response (EDR) solutions.• Conduct regular cybersecurity awareness training.• Monitor USB activity through security logs.• Enforce the Principle of Least Privilege.• Establish clear Standard Operating Procedures (SOPs) for handling found storage devices."Think Before You Plug."A USB drive may appear harmless, but it can serve as a gateway for malware, ransomware, credential theft, and network compromise.If the source of a USB device is unknown, never connect it to any system, laptop, or mobile device."Your curiosity can become a cybercriminal's most powerful weapon."

Vigilance Awareness Week Concludes at Safdarjung Hospital, Emphasis on Transparency and Accountability

Parivahan Vishesh News

CVC Director P.K. Mohanty stresses the need to make preventive vigilance an integral part of institutional functioning

New Delhi: The valedictory ceremony of Vigilance Awareness Week 2026 was held at Vardhman Mahavir Medical College (VMMC) and Safdarjung Hospital. P.K. Mohanty, Director, Central Vigilance Commission (CVC), attended the event as the Chief Guest, while Shanky Rastogi, Deputy Secretary, CVC, was the Guest of Honour. The week-long observance was held from October 26 to November 1, with the theme "Integrity: The Way of Life."Various activities were organised during the week to promote awareness about honesty, transparency, accountability and the prevention of corruption. The programme began with the administration of an integrity pledge to officers and staff members. Students of the College of Nursing, along with hospital staff, presented a street play in the OPD building to sensitise patients and visitors about preventing corruption and upholding ethical conduct. Slogan-writing and quiz competitions were also organised.On October 27, a Public Grievance Redressal Camp was organised by the Public Grievance Redressal Committee, where grievances of visitors were heard and necessary steps were initiated towards their resolution.Addressing the valedictory ceremony, P.K. Mohanty emphasised the importance of preventive vigilance in strengthening institutional accountability, transparency and good governance. Shanky Rastogi highlighted the need for transparency in government procurement processes, adherence to rules and effective internal control mechanisms.Hospital Director Dr. Kavita Rani Sharma said that vigilance should not remain limited to an annual observance but must become an integral part of day-to-day institutional functioning. Medical Superintendent Dr. Charu Bamba appreciated the departments and staff members for their cooperation in organising the event.The programme was coordinated by Vigilance Officer Dr. Richa Kapoor.

Why violence in the hands that were supposed to hold toys?

Parivahan Vishesh News

Virendra Hiralal Patharia

We have long considered childhood a symbol of innocence, innocence, and tender emotions. Even children's mischief possesses a unique sweetness. We smile at their small mistakes and find our own childhood in their innocent words. But when we see and read news of a third-grade student brutally assaulting a younger girl in the KG class, and a video of the incident surfaces, it not only disturbs our minds but also besieges us with numerous questions.If the video of that incident hadn't surfaced, many people might not have believed that such a young child could beat another child so brutally. The question isn't how much punishment that child should receive, but rather, where did he develop this violent impulse at such a young age? What are the circumstances that are turning the tenderness of childhood into such a harsh one?Children aren't born violent, insensitive, or arrogant. Their behavior is largely shaped by the environment they grow up in. They observe what happens around them, learn what they are taught, and often repeat what adults ignore as normal behavior.Today, in the name of building self-confidence, children are being taught a new kind of education. They are told not to fear anyone, not to listen to anyone, to respond to anyone who says something, and to confront anyone who troubles them. It's undoubtedly important to raise children fearless, but it's equally crucial to teach them the difference between fearlessness and insolence. Speaking up for one's rights is a good thing, but respecting the rights of others is equally important. One should learn to protect oneself, but testing one's strength on someone weaker is not bravery, it's cruelty.We teach children not to bow down to anyone, but we forget to also teach them not to bow down unnecessarily. We inspire them to win, but fail to teach them the patience to accept defeat. We teach them to move forward, but we forget to tell them that moving forward doesn't require pushing others back.Families are no exception to this change. Once upon a time, children grew up in joint families surrounded by grandparents, uncles, aunts, and other relatives. Each relationship offered something to learn. Grandmother's stories were filled with compassion, grandfather's experiences offered life wisdom, and even uncles' and aunts' scoldings held a sense of belonging. The presence of multiple generations in the home taught children to live with people of diverse temperaments, thoughts, and behaviors.Families are smaller these days, and this may be a demand of the times and circumstances. However, the concern arises when children begin to lose respect for their own relationships. They are sometimes inadvertently taught that grandparents are old-fashioned, that uncles and aunts are not worth paying attention to, and that the advice of relatives is useless. Criticizing, mocking, and using derogatory language toward elders in front of children is gradually becoming commonplace.It's also important to understand that not everything adults say is right. Children must be taught to speak out against wrong behavior and set their own boundaries. However, there's a difference between disagreement and disrespect. Disagreeing with someone isn't wrong, but insulting them is a lack of values. Teaching children respect doesn't mean preparing them to endure injustice, but rather instilling a sense of right and wrong.Another serious issue is handing smartphones to children at a very young age. Despite their busy schedules, parents want their children to be quiet, not disturb them, and spend their time on the phone. Gradually, the phone becomes their child's companion, teacher, source of entertainment, and sometimes their world. Parents think everything is fine because the child is busy. But they fail to see what the child is seeing on that small screen, what kind of language they are hearing, and what kind of behavior they are adopting, mistaking it for entertainment.The internet offers a vast world of knowledge, but it also contains content filled with violence, profanity, aggression, and abusive behavior. Violence scenes, revenge stories, and videos portraying bravery as a way to humiliate others can impact children's minds. Not every child is affected in the same way, but it's also not fair to assume that everything seen at a young age will have no impact.The irony is that we give our children mobile phones and expect peace from them, but we don't take the time to sit and talk with them. We want them to listen to us, but do we listen patiently? We expect good behavior from them, but do they see adults in their homes speaking respectfully to each other? We want them to avoid anger, but don't they see their parents losing their temper over small things?Children don't acquire values solely through sermons. They learn them from the behavior at home. If swearing is commonplace at home, children will consider it part of the language. If every dispute is resolved with a raised voice and physical violence, they will adopt this approach. If the weak are mocked, they may also target someone weaker. Conversely, if the home is filled with love, patience, cooperation, and respect, children naturally imbibe these qualities.Schools also play an important role in this. The purpose of education shouldn't be solely bookish knowledge, good exam scores, and competitive success. Children should also be taught empathy, sensitivity, discipline, respect for others' feelings, and control of their anger. If a child harasses another child, it can't be dismissed as mere indiscipline. It's essential to understand the reasons behind their behavior, protect the victim, and provide timely, appropriate counseling.It's also important to keep in mind that an entire generation cannot be blamed based on a single incident, nor would it be appropriate to assume that young child is a born criminal. He, too, is a child, in need of proper guidance and the opportunity to reform. But it would also be wrong to dismiss his behavior as innocent mischief. Such violent tendencies, manifest at a young age, need to be seriously understood and prevented.Childhood doesn't just require expensive schools, expensive toys, good clothes, and modern amenities. It needs parental time, family affection, guidance from elders, healthy interactions with friends, and the opportunity to play freely. It should also know that being strong doesn't mean intimidating others, but protecting the weak. Being brave doesn't mean fighting, but standing up to wrongdoing. And most importantly, empathizing with another's pain is the first sign of humanity.Today, we need not only express our outrage over that viral video, but also take a closer look at our homes, families, and schools. Are we, while providing children with amenities, robbing them of their childhood? Are we abandoning them in the name of self-reliance? Are we forgetting to love human beings while teaching them to fight the world?Because children are not just the future of our homes, they are the future of society. Before giving them degrees and success, it's important to raise them to be sensitive human beings.Remember, children learn more from our behavior than from our words. Before handing them a mobile phone, it's our responsibility to instill in them values, compassion, and respect for others. Make childhood a school of humanity, not a competitive arena.

Kharge's 'people's impeachment': A concern for democracy or a new strategy for political pressure?

Parivahan Vishesh News

Saurabh Varshney

As important as the impartiality of the Election Commission is in a democracy, maintaining its constitutional independence and institutional dignity is equally crucial. Launching a campaign like the People's Impeachment of the Chief Election Commissioner is not a normal political event, but rather a sign of a serious and extraordinary situation for the democratic system. The question is whether it is appropriate to escalate political disagreement to this level, and whether this will strengthen public confidence in democratic institutions. Congress National President Mallikarjun Kharge has leveled serious allegations against the Central Government and the Election Commission through the People's Impeachment Motion program against Chief Election Commissioner Gyanesh Kumar. He stated that the Congress has no personal animosity against the Election Commissioner, but rather its fight is for fair elections and the protection of democracy. Kharge alleged that the Election Commission is working under the instructions of the Prime Minister and the Home Minister, and that the freedom of voting rights in the country is being affected. Amidst these allegations, he expressed the opposition's resolve to continue the struggle to protect democracy. Certainly, questioning the impartiality of a constitutional institution like the Election Commission is a serious matter, but to understand this issue, it is necessary to examine the facts and constitutional norms beyond political accusations. India is the world's largest democracy. Here, elections are not merely a process for forming a government, but an expression of the people's political will and constitutional rights. The Constitution has entrusted the Election Commission with the responsibility of conducting free and fair elections. Therefore, it is not unusual for its functioning to be questioned. The opposition has the right to raise voices against any irregularities, bias, or violations of voter rights in the electoral process. But the question also arises: can the problem be resolved by constantly making allegations against a person holding a constitutional office from political platforms and by initiating public impeachment? The concept of impeachment itself is extremely serious. It is not a simple tool for political dissent, but a matter of constitutional and legal process. The process for removing the Chief Election Commissioner from office is also in accordance with the procedure prescribed for the removal of a Supreme Court judge under Article 324(5) of the Constitution. This requires a constitutional process involving a special majority in Parliament. Therefore, launching a political campaign for public impeachment against an individual and a genuine constitutional impeachment process are two different things. Public protest is a democratic right, but it cannot be considered a substitute for the constitutional process. It must also be understood that such a campaign against a Chief Election Commissioner is not a simple political incident. It could raise questions about the credibility of democratic institutions, both at home and abroad. If the Election Commission is indeed committing any irregularities, evidence of this should be made public. Concrete questions should be raised about election data, voter lists, voting procedures, and administrative decisions. The opposition should utilize Parliament, the judiciary, and other constitutional forums. The impartiality of an institution cannot be proven or disproved solely through political speeches and allegations. On the other hand, the ruling party also has a responsibility not to dismiss every criticism from the opposition as political frustration. In a democracy, the opposition exists not only to contest elections and change the government; it is also a vital force that ensures accountability of power. If the opposition is questioning the functioning of the Election Commission, the government and the Commission should respond based on facts. The tendency to avoid transparency or to label those who ask questions as political opponents weakens the democratic system. The real concern is that constitutional institutions are increasingly becoming the focus of accusations and counter-accusations in the country's politics. Sometimes, parliamentary proceedings are questioned, sometimes the judiciary's comments are viewed through a political lens, and sometimes, the Election Commission's impartiality is contested. Such circumstances do not bode well for any democracy. The reputation of constitutional institutions is not the property of any government or political party. Their respect and independence are the collective responsibility of the entire nation. It would be unfair to dismiss Kharge's initiative as merely political opposition, nor would it be correct to consider it the final resort to protect democracy. Protest is a right in a democracy, but even that has constitutional limits. Before demanding the removal of an official, serious consideration should be given to the authenticity of the allegations, the legality of the process, and its consequences. Otherwise, a politics of distrust towards institutions could emerge, the consequences of which will ultimately be borne by the common voter. Today, the Election Commission needs to prove its impartiality not just through statements, but through transparent procedures and accountability. The opposition should also fulfill its responsibility and present concrete evidence to support its allegations. The government should resolve all doubts about the electoral system through democratic dialogue. After all, the Election Commission is not the guardian of any political party, but the guardian of the right to vote for every citizen of the country. In a democracy, an extraordinary initiative like public impeachment cannot be considered a happy situation. It signals deep distrust and a lack of dialogue within the political system. But even more unfortunate is the weakening of public trust in a fundamental democratic process like elections. Therefore, it is essential that the ruling party, in its arrogance of power, neither forgets constitutional norms nor does the opposition transform political opposition into institutional conflict. The true victory of democracy lies not in the resignation of an individual or the political success of a party, but in fair elections, independent institutions, and the unwavering faith of the public. A woman was raped by the police at Gamharia police station in Seraikela district.

Parivahan Vishesh News

One arrested, four including the station in-charge suspended

Kartik Kumar Parichha, State Head -Jharkhand

Ranchi, this is the same district of Jharkhand, just twenty-twenty five kilometers away from whose border His Excellency the President was to visit Rayarangapur in Odisha after four days. A very sensational case of rape of a woman who had come to the Gamharia police station premises of Saraikela Kharsawan district seeking justice, by a constable on duty, has come to light. After that, SP Manoj Sargiari took appropriate action and suspended three policemen and one accused was arrested. Along with this, Gamharia police station in-charge Sanjay Prasad, Sub Inspector Manoj Sahu, Anirudh Singh, constable Santosh Rai have been suspended with immediate effect on the charge of serious negligence in duty.According to reports, the victim, a resident of Dudh village in the Gamharia police station area, had come to the police station to lodge a complaint regarding a family dispute. Due to harassment and fear from her husband, police officers advised her to stay overnight at the police station. Late that night, on-duty constable Neeraj Lakra took the woman to a room inside the police station, where he raped her. The incident sparked a stir within the department. A special investigation team was formed under the leadership of Seraikela SDPO Anubhav Bhardwaj. They sealed the room to preserve evidence. A case was registered under appropriate sections and the accused was arrested. The investigation into the technical and scientific aspects of the case is ongoing. Meanwhile, JLMK leaders escalated the issue by staging a sit-in at the police station.
